

**ANSI Energy Efficiency Standardization Coordination Collaborative (EESCC)
Phase Two Participation Response Form**

Return forms to:
Jana Zabinski, EESCC Program Manager
 American National Standards Institute
 25 West 43rd Street, Fourth Floor
 New York, NY 10036
eesc@ansi.org
 fax: 212.398.0023

EESCC Participation Commitment

Yes, my company / organization / agency would like to participate in the EESCC Phase Two.

Company/Organization	
----------------------	--

Please send the EESCC invoice* to:

Name	
Title	
Organization/Company	
Address	
Telephone	
Fax	
E-mail	

**Annual participation fees are listed below. The current billing year is for the 2015 calendar year.
 An interested party may join the ANSI EESCC at any time and pay a pro-rated fee calculated on a quarterly basis.*

Strategic Benefits of Participation

The EESCC provides a unique forum for stakeholders to stay informed, competitive, and connected on emerging issues related to their business.

Members benefit from having vision into where standardization activities will be taking place and influence toward where additional standardization activities are needed. This facilitates informed decision-making regarding standards participation efforts, in turn helping to optimize resources, reduce costs and duplication of efforts. Together, EESCC members:

- Collaborate with cross-industry peers to coordinate and connect energy and water efficiency standardization activities
- Seek action on EESCC recommendations to close standardization gaps, thereby impacting future energy and water efficiency services and technologies
- Take part in crafting input to policymakers and other stakeholders on the use of voluntary consensus standards to address energy and water efficiency needs
- Participate in a trusted forum whose recommendations are viewed by federal, state, and local governments for decisions regarding technical assistance and lab and industry engagement

Return EESCC participation forms by email: eesc@ansi.org; fax: 212.398.0023, or mail: ANSI, 25 West 43rd Street, New York, New York 10036

- Access early information on emerging energy and water efficiency initiatives, technologies, and standards
- Network and engage in active dialogue with cross-industry peers

Membership Categories

Private Industry

A corporation, partnership, or other entity that is created under the laws of the United States or any state thereof that is engaged in energy efficiency-related commercial activity.

Non-Profit Organization

A not-for-profit scientific, technical, professional, labor, consumer, trade, or other association or organization involved in standards, certification, or other relevant activities.

Government

A department or agency of the United States government or of any state, tribal, interstate, or regional authority or agency, or any local or county subdivision of such entities interested in the work of the EESCC.

Educational

A domestic, not-for-profit institution of higher learning not otherwise eligible for membership.
