

Topic: AIF Support Series #13: ISO Documents Platform

Date: March 16, 2021

Presenters: Rachel Hawthorne (ANSI Staff) and Edward Terhune (ANSI Staff)

1. Opening of the meeting

- A presentation (see AIF N428-2021) was given on the new ISO Documents Platform. The presentation provides an overview of the website, focusing on how to navigate the new structure, accessing documents and the integration with the other ISO platforms.
- We want to hear from you to learn how we can best support you throughout your U.S. TAG and committee work. Submit any inquiries or comments to ANSI's ISO Team (isot@ansi.org).

2. Key points from the presentation

- The ISO Documents platform can be reached through the ISO Portal (<https://log.iso.org/portal>) by logging in and clicking on "Documents" or through notification email from the Committee/Working Group.
- Your Dashboard will show all groups that you are able to access, and you can mark particular groups as "Favorites" for easier access.
- You can find links to general information about ISO Committees, the membership list for a group and the overall structure of related groups on the group's Documents page.
- There are improved sorting, filtering and search functions – the search function will find text within posted PDFs.
- The "Meeting Documents" section shows upcoming meetings, documents filtered for specific meetings and contains links to the ISO Meetings Platform.
 - A brief presentation entitled "How To Register for an ISO WG Meeting" can be found on ISOT's SharePoint site (share.ansi.org/isot) in the "ISOT Meeting Resources" folder.
- The "Ballot Documents" section show upcoming ballots, documents filtered for specific ballots and contains links to the ISO Ballots Platform.
 - A brief presentation entitled " How To Vote on an ISO WG Ballot" can be found on ISOT's SharePoint site (share.ansi.org/isot) in the "ISOT Voting Resources" folder.
- Posted documents can now be linked to other areas of the ISO site, such as particular projects, meetings or ballots, through their improved metadata.
- ANSI shares feedback with ISO on the site regularly, so please share any comments or feedback you have with us (isot@ansi.org).

Session Questions and Answers

1. Can WG documents be linked to ballots or meetings of the parent committee?

Answer: No, not at present. WG documents can only be linked to WG meetings, WG ballots or projects assigned to the WG. It would be up to WG Convenors to post any relevant information to the WG, and for U.S. TAG Administrators to share TC/SC level documentation to the TAG's membership.

2. Is there a way to "select all" documents in a folder for download?

Answer: No, not at present. When following a "zip and download" link from a notification email, or when visiting a folder of documents, one must manually select any documents to be added to a zip file. We can suggest improvements to this function to ISO.

3. Can you move documents from one folder to another after they've been notified?

Answer: No, it is not possible, so it is important to ensure that documents are posted in the proper folder before sending the document notification to the group's members.

4. Can the Help beacon or Survey pop-up be disabled when visiting the ISO site?

Answer: Not that we are aware of, but we can ask ISO if it will be possible in the future.

5. What is the difference between the "Member List" and the "Full Member List"?

Answer: The "Member List" has all individuals with a direct role in the committee and is visible to all members of the group. The "Full Member List" has all individuals who have access to the committee documents whether they have a direct role in the committee or not. For example, the committee managers of the parent technical committee or related working groups are listed in the full member list, which is only visible to committee officers.

6. When should we go to the ISO Helpdesk or ISOT for assistance?

Answer: Purely technical issues with the ISO site can be directed to the ISO Helpdesk (helpdesk@iso.org). Procedural and other issues can be directed to ANSI's ISO Team (isot@ansi.org). ISOT is happy to be your first contact in either case, and can refer you to ISO as appropriate.

ISO Documents Platform – Adding Documents

- Committee Leaders can now drag and drop documents and upload documents in bulk.
- Documents can be linked to particular projects, ballots and meetings.

The screenshot displays the ISO Documents Platform interface. A modal form titled 'CREATE' is open, allowing users to add new documents. The form includes the following fields:

- Description
- Type (Dropdown menu, currently set to 'Project')
- Project (Dropdown menu, currently set to 'Stage')
- Meeting
- Ballot
- Replaces
- Expected action
- Expected date

At the bottom of the modal, there are three buttons: 'CANCEL', 'BACK', and 'CREATE'. The background shows a list of documents with the following columns: Title, Expected action, Exp. date, Status, and Modified. The list contains several entries, including 'RoV - Ballot on the 2021 Plenary meeting' and 'Ballot on the 2021 Plenary meeting.pdf'.
