Dear Colleagues,

With the aim of fostering collaboration on standardization work taking place in ISO, IEC and ITU, we are pleased to provide the following links to the recently proposed new work items of each organization.

New work items at ISO
New work items at IEC
New work items at ITU

Should you have questions or require further information on work being carried out in ISO, IEC and ITU, please contact projects@iso.org.

Yours sincerely,

ISO Central Secretariat
Standardization and Technical Policy | iso central secretariat
Agricultural tractors and self-propelled sprayers — Protection of the Operator (driver) against hazardous substances — Part 5: Classification, requirements and test procedures

Agricultural tractors and self-propelled sprayers — Protection of the Operator (driver) against hazardous substances — Part 4: Filters — Requirements and test procedures

Agricultural tractors and self-propelled sprayers — Protection of the Operator (driver) against hazardous substances — Part 3: System verification

Security and resilience — Security management systems — Guidelines for the application and implementation of ISO 22303 in the supply chain

Seedling breeding — Method for calculating the rating life with additional consideration of surface distress

Intelligent transport systems — Flexible infrastructure supported location-based services for connected autonomous mobility via nomadic and mobile devices — Part 2: Part 2: Merging on and off-road at junctions with traffic signals

Transferrable applications of ductile iron pipe systems — Product design and installation

Industrial automation systems and integration — Product data representation and exchange — Part 1584: Annotated 3D model equivalence translated shape module

Industrial automation systems and integration — Product data representation and exchange — Part 1587: Annotated 3D model equivalence display attribute module

Ductile iron products for sewerage applications

Size designation of clothes — Body measurement tables — Group segmentation based on morphology

Fire protection — Automatic sprinkler systems — Part 10: Requirements and test methods for access protection devices for playing Reference architecture for data-driven ag/food systems

</table>

**Work item**: Short name identifying a (draft or approved) Recommendation or other text. It may be a provisional name or the final publication designation (e.g. H.264)

**Question**: Number of the Question responsible for the development of a work item

**Equiv. Num.**: If any, designation of the equivalent document as published by another standards development organization (e.g., for Common texts with ISO/IEC JTC1)

**Status**: Current Approval state of a work item

**Timing**: Best current estimate of the expected year and month of Determination (TAP), Consent (AAP), or Agreement (non-normative materials) of a work item

**Approval process**: One of: Traditional Approval Process (TAP); Alternative Approval Process (AAP); or Agreement

**Version**: Indication of whether a work item is new or revised

**Liaison relationship**: List of groups/organizations coordinating work on a topic

**Subject / Title**: Best current expectation of the full name of a work item

**Priority**: One of: Low; Medium; or High
