Dear Sirs

In respect of the proposal to add directional sound requirements to Underwriters Laboratories Inc. standard ANSI/UL464, Audible Signal Devices.

US patent number US 6,201,470 B1 entitled Locating Devices covers the use of broadband sound as a locating device. Sound Alert Technology plc (SAT) are the beneficial owners of the above patent.

It is SAT's business strategy to licence this technology to companies in each market in return for a combination of fees and royalties.

As of today, a licence can be made available to those applicants desiring to utilise the licence for the purpose of implementing the standard under reasonable terms and conditions that are demonstrably free of any unfair discrimination.

Yours Sincerely

A handwritten signature in black ink that reads "JB Keane". The signature is written in a cursive style with a large, looped initial "J".

JB Keane  
Director
