

User Guide for the American National Standards (ANS) Patent Letter of Assurance Database:

Disclaimer:

ANSI's IPR database contains patent holder statements that have been provided to ANSI and claim IPR or pending patent applications as being essential, or potentially essential, to the implementation of an American National Standard.

This database relates only to those patent holder statements actually received by ANSI. ANSI makes no representations or warranties, and disclaims any and all responsibility, with respect to the accuracy, correctness, completeness or scope of (a) such statements, or any claims of IPR contained or identified therein and (b) this database.

Users of this database should contact the ANSI-Accredited Standards Developer (ASD) that sponsors the American National Standard at issue to determine whether additional or any patent statements exist. A list of ASDs is available at www.ansi.org/asd.

Questions: psa@ansi.org

General Information, access to the Database

The Patent Database is located in ANSI's Public Document Library: www.ansi.org/patentletters

To navigate from the ANSI Website: <http://www.ansi.org>:

- From the ANSI Homepage, go to Library → ANSI Public Documents → Patent Letters
 - This initial page will show all patent letters that are currently in the Database. As patent letters are submitted to ANSI, they are posted to this location.

Searches

You may search the database by entering terms in the search box labeled “find a file.” Meta data, where available and populated, is stored on:

Date of Letter (date Patent Letter was signed and submitted)
Patent Number
Referenced Standards
Submitter
ANSI Accredited Standards Developer acronym

Once a list from the Search is compiled, to view the information for each entry:

Click on the title of the standard/project, it is possible to view a copy of the patent letter in PDF format.

You may also sort the database by date of the patent letter.

Additional Comments regarding the ANSI Patent Database

Some of the ANSI-Accredited Standards Developers (ASDs) have supplied ANSI with URLs¹ to their own online Patent Databases. When this is the case, a separate record within the Patent Database in PDF format is posted that will link externally to the respective developer’s database.

Any additional questions or concerns should be directed to the ANSI Procedures and Standards Administration Department (psa@ansi.org)

Updated 6/9/2016.

¹ If user clicks on the URL from the PDF, they may be navigated away from the Patent Database onto the ASD’s website. It is recommended that the user copy the entire URL and paste it into a new browser window.
