 - [Part One:](#) Opening Remarks and Panel 1: Federal Agency Perspectives on the Energy Efficiency Imperative
 - [Part Two:](#) Panel 2: The Energy Efficiency Landscape
 - [Part Three:](#) Afternoon Discussions: Planning a Path Forward

Note: Due to unforeseen technical difficulties, the beginning portion of the afternoon's discussions is currently unavailable

Overview

The American National Standards Institute (ANSI) hosted an exploratory meeting to examine the need for a potential ANSI Energy Efficiency Standards Panel, and to hear directly from stakeholders what shape such an activity should take. The purpose of the meeting was to gather input from stakeholders as to areas where an ANSI standards panel would be most beneficial in coordinating a U.S. approach to energy efficiency standardization activities.

Participants

Participants included stakeholders from the private and public, including representatives of industry, government, standards developing organizations, trade associations, conformity assessment bodies, and the scientific and technical communities and other affected groups that are engaged in energy efficiency activities. Over 120 individuals attended the in-person session, and another 100 joined by webinar.
