

The **AMERICAN NATIONAL  
STANDARDS INSTITUTE** presents

# STANDARDS AND 21<sup>ST</sup> CENTURY INFRASTRUCTURE

An expert discussion focusing on the growing list of infrastructure issues confronting our country and how voluntary standards play a significant role in supporting strong, practicable, and resilient 21<sup>st</sup> century solutions.

## SPEAKERS

- Joe Bhatia, **American National Standards Institute**
- Chris Dubay, **National Fire Protection Association**
- Patrick Hughes, **NEMA**
- Neil Lakomiak, **UL**
- Christopher Lindsay, **IAPMO**
- Kathie Morgan, **ASTM International**
- Chris Ochoa, **International Code Council**
- Dave Purkiss, **NSF International**
- Steven Unikewicz, **American Society of Mechanical Engineers**
- A representative of the **American Petroleum Institute**

Three panel discussions will focus on the role of standards and conformity assessment in:

- Resilience: repairing, rebuilding, and replacing aging infrastructure
- Modernizing and extending the life of infrastructure; transferring research to practices that support innovative new materials, technologies, and processes
- Continuous monitoring of the built environment, including failure analysis and risk management

**MONDAY  
JULY 17  
2017**

**11:30 AM – 1:30 PM  
2167 RAYBURN HOB**

*This is a widely attended event at which a simple brown bag lunch will be served.*
