

American National Standards Institute

Throughout its history, the American National Standards Institute (ANSI) has maintained as its primary goal the enhancement of global competitiveness of U.S. business and the American quality of life by facilitating voluntary consensus standards and conformity assessment systems and promoting their integrity. The Institute provides a forum for hundreds of ANSI-accredited standards developers that work cooperatively to develop American National Standards (ANS).

ANSI is the official U.S. representative to the International Organization for Standardization (ISO) and, via the U.S. National Committee, the International Electrotechnical Commission (IEC); the Institute is also a member of the International Accreditation Forum (IAF).

Comprised of businesses, professional societies and trade associations, standards developers, government agencies, and consumer and labor organizations, ANSI represents the diverse interests of more than 125,000 entities and 3.5 million professionals worldwide.

**OUR BUSINESS IS PROVIDING
THE STANDARDS YOU NEED
FOR YOUR BUSINESS**

The American National Standards Institute (ANSI) manages the development and use of voluntary consensus standards in the United States and represents the needs and views of U.S. stakeholders in standardization forums around the globe. The Institute oversees the creation, promulgation and use of thousands of norms and guidelines that directly impact businesses in nearly every sector: from acoustical devices to construction equipment, from dairy and livestock production to energy distribution, and many more. ANSI is also actively engaged in globally-recognized cross-sector programs such as the ISO 9000 (quality) and ISO 14000 (environmental) management systems. No other organization has the Institute's reach and influence.

As a focal point for standards and the tools to assess conformance to standards, ANSI established itself early on as a top-tier information provider. Its online resources provide competitive business intelligence that can help organizations foster their scientific, technological and economic growth.

ANSI's solid brand recognition and its unique roles and responsibilities enable the Institute to deliver knowledge management resources and e-commerce services to its members and customers. The Institute maintains a cross-referenced network of websites to meet the needs of the global standardization and conformity assessment community.

ANSI is ready to serve as your organization's resource for standards.

For more information, visit one or more of the ANSI websites described below.

ANSI Online (www.ansi.org)

This website is a premier Internet portal for ANSI programs and services. Daily news articles highlight key information and events, weekly updates announce and invite comment on new standards, and public and members-only document libraries archive key materials.

eStandards Store (webstore.ansi.org)

This website provides users with instantaneous access to nearly 160,000 standards and technical documents from around the world. If the standard is available in ANSI's inventory, it can be purchased and the download completed within moments. All transactions are conducted via a secure server equipped with the latest encryption technology to safeguard online purchases.

Site Licenses

This data warehousing service combines electronic access to collections of standards, the flexibility of electronic search and retrieval and the convenience of automatic updates to documents within the collection(s).

NSSN: A National Resource for Global Standards

(www.nssn.org)

This website combines cutting-edge technology with user-friendly search criteria to facilitate the identification and selection of standards needed by your business. The NSSN's more than 300,000 metadata records are updated frequently by developers from around the globe.
