American National Standards

Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

Ordering Instructions for "Call-for-Comment" Listings

- 1. Order from the organization indicated for the specific proposal.
- Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
- 3. Include remittance with all orders.
- 4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

⋆ Standard for consumer products

Comment Deadline: July 18, 2004

ADA (American Dental Association)

New Standards

BSR/ADA 85-Part 1-200x, Disposable Prophy Angles: Part 1 (new standard)

This specification covers disposable prophy angles suitable for a dental hygienist or a dentist to use in conjunction with a doriot style handpiece during the final stages of a dental cleaning, also known as a polish.

Click here to see these changes in full, or look at the end of "Standards Action."

Send comments (with copy to BSR) to: Sharon Stanford, ADA; stanfords@ada.org

Comment Deadline: August 2, 2004

AGA (ASC Z380) (American Gas Association)

Supplements

BSR/GPTC Z380.1-1998-2000, Addendum No. 1, Guide for Gas Transmission and Distribution Piping Systems (supplement to ANSI/GPTC Z380.1-2003)

The guide material contains information and some "how to" methods to assist the operator in complying with the Code of Federal Regualtions, Title 49, Part 191 and Part 192.

Single copy price: Free

Order from: Paul Cabot, AGA; pcabot@aga.org Send comments (with copy to BSR) to: Same

AISI (American Iron and Steel Institute)

Supplements

BSR/COS/NASPEC SUPPLEMENT 200x, Supplement 2004 to the North American Specification for the Design of Cold-Formed Steel Structural Members, 2001 Edition (supplement to ANSI/COS/NASPEC-2001)

The Supplement provides updates to the 2001 North American Specification for the Design of Cold-Formed Steel Structural Members. This Supplement includes the updates to the Specification and the Commentary; and a new addition of Appendix 1, Design of Cold-Formed Steel Structural Members Using the Direct Strength Method.

Single copy price: Free

Order from: Helen Chen, AISI; Hchen@steel.org Send comments (with copy to BSR) to: Same

API (American Petroleum Institute)

New Standards

BSR/API RP 651-200x, Cathodic Protection of Aboveground Petroleum Storage Tanks (new standard)

Describes the corrosion problems typical in aboveground steel storage tanks and associated piping systems. RP 651 provides a general description of the two methods currently used to provide cathodic protection against corrosion.

Single copy price: Free

Order from: Roland Goodman, API; goodmanr@api.org Send comments (with copy to BSR) to: Same BSR/API RP 652-200x, Lining of Aboveground Petroleum Storage Tank Bottoms (new standard)

Provides guidance and presents procedures and practices for achieving effective corrosion control in aboveground storage tanks by application of tank bottom linings. It contains information pertinent in the selection of lining materials, surface preparation, lining application, cure, and inspection provisions for the application of tank bottom linings for both existing and new storage tanks.

Single copy price: Free

Order from: Roland Goodman, API; goodmanr@api.org Send comments (with copy to BSR) to: Same

NEMA (ASC C12) (National Electrical Manufacturers Association)

Revisions

BSR C12.7-200x, Requirements for Watthour Meter Sockets (revision of ANSI C12.7-1993 (R1999))

Covers the general requirements and pertinent dimensions applicable to watthour meter sockets rated up to and including 600 V and up to and including 320 A continuous duty per socket opening.

Single copy price: \$41.00

Order from: Carin Bernstiel, NEMA; car_bernstiel@nema.org Send comments (with copy to BSR) to: Same

BSR C12.9-200x, Test Switches for Transformer-Rates Meters (revision of ANSI C12.9-1993 (R1999))

Intended to encompass the dimensions and functions of meter test switches used with transformer-rated watthour meters in conjunction with instrument transformers.

Single copy price: \$30.00

Order from: Carin Bernstiel, NEMA; car_bernstiel@nema.org Send comments (with copy to BSR) to: Same

NEMA (ASC C78) (National Electrical Manufacturers Association)

Revisions

BSR C78.389-200x, High-Intensity Discharge Lamps - Methods of Measuring Characteristics (revision, redesignation and consolidation of ANSI C78.386-1989 (R2003), C78.387-1995 (R2003), C78.387a-1998 (R2003), C78.387b-1998, C78.387bd-2001, C78.387c-2002, C78.387e-2003, C78.388-1990 (R2003))

This document is a consolidation/revision of the standard that describes the procedures to be followed and the precautions to be observed in measuring the electrical characteristics of high-intensity discharge lamps. The standard outlines methods of measurement that will make it possible to obtain reproducible and accurate measurements of high-intensity discharge lamp characteristics.

Single copy price: \$86.00

Order from: Randolph N. Roy, NEMA (ASC C78); ran_roy@nema.org Send comments (with copy to BSR) to: Same

NSF (NSF International)

Revisions

BSR/NSF 46-200x (i5), Evaluation of Components and Devices Used in Wastewater Treatment Systems (revision of ANSI/NSF 46-2002)

Issue 5: The purpose of this standard is to add a section in ANSI/NSF 46 dealing with ultraviolet technology.

Single copy price: \$35.00

Order from: www.nsf.org

Send comments (with copy to BSR) to: Mike Hoover, c/o/ Jaclyn Bowen

UL (Underwriters Laboratories, Inc.)

New Standards

★ BSR/UL 2255-200x, Receptacle Closures (new standard)

These requirements cover products which are molded of insulating material and are intended to cover the outlet slots of receptacles having 1-15R and 5-15R configurations in accordance with Wiring Devices-Dimensional Requirements, ANSI/NEMA WD6.

Single copy price: Contact comm2000 for pricing and delivery options

Order from: comm2000

Send comments (with copy to BSR) to: Camille Alma, UL;

Camille.A.Alma@us.ul.com

Comment Deadline: August 17, 2004

ASSE (American Society of Sanitary Engineering)

Revisions

★ BSR/ASSE Series 5000-200x, Professional Qualifications Standard for Backflow Prevention Assembly Testers, Repairers and Surveyors (revision of ANSI/ASSE Series 5000-1998)

Education, training and performance requirements for personnel involved in the testing, repairing and surveying of backflow prevention assemblies. It includes test procedures, trouble-shooting guides, report forms, flow charts and schematics.

Single copy price: \$45.00

Order from: Kim Frantz, ASSE; kim@asse-plumbing.org Send comments (with copy to BSR) to: Shannon Corcoran, ASSE

(Organization); shannon@asse-plumbing.org

EIA (Electronic Industries Alliance)

Revisions

BSR/EIA 649-200x, National Consensus Standard for Configuration Management (revision of ANSI/EIA 649-1998)

Intended to be used when establishing, performing, or evaluating Configuration Management processes in any industry, business enterprise or governmental organization. This standard describes Configuration Management functions and principles and defines a neutral Configuration Management terminology for use with any product line.

Single copy price: \$74.00 US

Order from: EIA: Order by Phone: 800-699-9277
Send comments (with copy to BSR) to: Chris Denham, EIA; cdenham@geia.org

Notice of Withdrawal: ANS at least 10 years past approval date

The following American National Standards have not been revised or reaffirmed within ten years from the date of their approval as American National Standards and accordingly are withdrawn:

ANSI A250.5-1994, Accelerated Physical Endurance Test Procedure for Steel Doors, Frames, and Frame Anchors

ANSI B11 TR1-1993, Ergonomic Guidelines for the Design, Installation and Use of Machine Tools (NOT AN AMERICAN NATIONAL STANDARD)

ANSI C57.12.23-1992, Transformers - Underground-Type Self-Cooled, Single-Phase Distribution Transformers with Seperable, Insulated High-Voltage Connectors: High Voltage (24 940 GrdY/14 400V and Below) and Low Voltage (240/120V, 167 kVA and Smaller

- ANSI C57.12.26-1993, Pad-Mounted Compartmental-Type, Self-Cooled, Three-Phase Distribution Transformers for Use with Separable Insulated High-Voltage Connectors, High-Voltage, 34 500 Grd Y/19 920 Volts and Below; 2500 kVA and Smaller, Requirements for

ANSI INCITS 385-2004, Information Technology - Face Recognition Format for Data Interchange (new standard): 5/13/2004

NCCLS (National Committee for Clinical Laboratory Standards)

Revisions

ANSI/NCCLS M2-A8-2003, Performance Standards for Antimicrobial Disk Susceptibility Tests; Approved Standard - Eighth Edition (revision and redesignation of ANSI/NCCLS M2-A7-2000): 6/4/2004

ANSI/NCCLS M7-A6-2003, Methods for Dilution Antimicrobial Susceptibility Tests for Bacteria that Grow Aerobically; Approved Standard - Sixth Edition (revision and redesignation of ANSI/NCCLS M7-A5-2000): 6/4/2004

ANSI/NCCLS M11-A6-2004, M11-A6, Methods for Antimicrobial Susceptibility Testing of Anaerobic Bacteria; Approved Standard - Sixth Edition (revision and redesignation of ANSI/NCCLS M11-A5-2001): 6/7/2004

TIA (Telecommunications Industry Association)

New National Adoptions

ANSI/TIA 455-20-B-2004, FOTP29 - IEC 60793-1-46: Optical Fibres - Part 1-46: Measurement Methods and Test Procedures - Monitoring of Changes in Optical Transmittance (identical national adoption and revision of ANSI/TIA 455-20A-1994 (R2001)): 5/13/2004

Revisions

ANSI/TIA 102.BAEA-A-2004, Project 25 - Data Overview - New Technology Standards Project - Digital Radio Technical Standards (revision and redesignation of ANSI/TIA 102.BAEA-1-2002): 6/4/2004

ANSI/TIA 102.BAEB-A-2004, Project 25 - Packet Data Specification, New Technology Standards Project (revision and redesignation of ANSI/TIA 102.BAEB-2000): 6/4/2004

UL (Underwriters Laboratories, Inc.)

New National Adoptions

★ ANSI/UL 60335-2-3-2004, Standard for Safety of Household and Similar Electrical Appliances, Part 2: Particular Requirements for Electric Irons (identical national adoption): 5/28/2004

ANSI/UL 61965-2004, Standard for Mechanical Safety for Cathode Ray Tubes (identical national adoption and revision of ANSI/UL 61965-2002): 6/1/2004

Revisions

ANSI/UL 651-2004, Schedule 40 and 80 Rigid PVC Conduit (Bulletin dated 3-19-04) (revision of ANSI/UL 651-2002): 5/28/2004

- ANSI/UL 859-2004, Household Electric Personal Grooming Appliances (bulletin dated April 5, 2004) (revision of ANSI/UL 859-2002): 6/1/2004
- ANSI/UL 1008-2004, Transfer Switch Equipment (revision of ANSI/UL 1008-2003): 5/13/2004
- ANSI/UL 1655-2004, Standard for Safety for Community-Antenna Television Cables (revision of ANSI/UL 1655-1999): 6/3/2004
- ANSI/UL 1694-2004, Tests for Flammability of Small Polymeric Component Materials (revision of ANSI/UL 1694-2002): 5/13/2004

Correction

Standards Missing from May 28th Issue of Standards Action

Due to a computer error, the Final Actions listings for the following standards did not appear in the May 28th issue of Standards Action: ANSI INCITS 375-2004, ANSI INCITS 379-2004, ANSI INCITS 381-2004, ANSI INCITS 385-2004, ANSI INCITS 385-2004, ANSI/ISA 12.04.01 (IEC 60079-2 Mod)-2004, ANSI/ISA 12.04.01 (IEC 60079-2 Mod)-2004, ANSI/TIA 455-20-B-2004, ANSI/UL 1008-2004, and ANSI/UL 1694-2004. These listings have been added to this week's Final Action section and appear above. We apologize for any inconvenience this error may have caused.

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers of the initiation and scope of activities expected to result in new or revised American National Standards. This information is a key element in planning and coordinating American National Standards. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed new American National Standards or revisions to existing American National Standards that have been received from ANSI-accredited standards developers that utilize the periodic maintenance option in connection with their standards. Please also review the section entitled "American National Standards Maintained Under Continuous Maintenance" contained in Standards Action for comparable information with regard to standards maintained under the continuous maintenance option. Directly and materially affected interests wishing to receive more information should contact the standards developer directly.

ADA (American Dental Association)

Office: 211 East Chicago Avenue

Chicago, IL 60611-2678

Contact: Sharon Stanford

Fax: (312) 440-2529

E-mail: stanfords@ada.org

BSR/ADA 27-200x, Polymer-Based Filling, Restorative, and Luting

Materials (identical national adoption)

Stakeholders: Dentists, dental manufacturers, government

Project Need: Provides evaluation criteria for direct filling restorative

naterial.

This Standard specifies requirements for dental polymer-based filling and restorative materials and polymer-based luting materials supplied in a form suitable for mechanical mixing, hand-mixing, or intra-oral and extra-oral external energy activation, and intended for use primarily for the direct or indirect restoration of cavities in the teeth. The luting materials covered by this Standard are intended for use in the cementing or fixation of restorations and appliances such as inlays, onlays, veneers, crowns and bridges.

AISI (American Iron and Steel Institute)

Office: 1140 Connecticut Avenue, NW

Suite 705

Washington, DC 20036

Contact: Helen Chen

Fax: (202) 463-6573

E-mail: Hchen@steel.org

BSR/AISI/COS TS-1-02-200x, Rotational-Lateral Stiffness Test Method

for Beam-to-Panel Assemblies (new standard)

Stakeholders: Cold-Formed Steel

Project Need: This is a test procedure used by manufacturers in

cold-formed steel industry.

This is a test procedure to determine the rotational-lateral stiffness of beam-to-panel assemblies. The test method is used primarily in determining the strength of beams connected to panels as part of a structural assembly.

BSR/AISI/COS TS-6-04-200x, Standard Procedures for Panel and

Anchor Structural Tests (new standard) Stakeholders: Cold-Formed Steel

Project Need: This is a test procedure used by manufacturers in

cold-formed steel industry.

This test procedure extends and provides methodology for interpretation of results of tests performed according to ASTM E1592-01.

BSR/AISI/COS TS-8-04-200x, Base Test Method for Purlins Supporting

a Standing Seam Roof System (new standard)

Stakeholders: Cold-Formed Steel

Project Need: This is a test procedure used by manufacturers in

cold-formed steel industry.

This test is to obtain the reduction factor to be used in determining the nominal flexural strength of a purlin supporting a standing seam roof system.

ASAE (American Society of Agricultural Engineers)

Office: 2950 Niles Road

St. Joseph, MI 49085-9659

Contact: Carla Miller

Fax: (269) 429-3852

E-mail: cmiller@asae.org

BSR/ASAE S589-200x, Odor Detection - Threshold Measurement (new

standard)

Stakeholders: USDA, NPPC, EMS, Extension Agents, Livestock Producers, Research Agencies, Universities and Colleges

Project Need: Need for a uniform procedure for measuring livestock odor because US government and state agencies are focusing on odor and air quality from confined animal feedlot operations.

Defines the method for the detection of odor concentration, the determination of gas samples at room temperature using human assessors, the determination of dilution factors, assessor training, sample presentation methods, and research result comparision.

BSR/ASAE S590-200x, Odor Intensity Measurement (new standard)

Stakeholders: USDA, NPPC, EMS, Extension Agents, Livestock Producers, Research Agencies, Universities and Colleges, state regulated entities

Project Need: Develop uniform procedure for measuring odor intensity from livestock facilities.

Defines the method for super-threshold intensity determination, odor comparision, reference scale, assessor training, sample presentation methods, and research result comparision.

HPS (ASC N43) (Health Physics Society)

Office: 1313 Dolley Madison Blvd Suite 402

McLean, VA 22101
Contact: Michael Johnson
Fax: 703 790 2672

E-mail: mjohnson@burkinc.com

BSR N43.5-200x, Radiation Safety for the Design of Radiographic and

Fluoroscopic Industrial X-Ray Equipment (revision of ANSI

N43.5-1976 (R1989))

Stakeholders: Radiation safety officers in X-ray facilities

Project Need: Revision of standard is due.

This standard provides guidelines specific to the radiation safety aspects of the design of industrial x-ray equipment operating at energies below 1MeV for radiographic and fluoroscopic applications, wherein x-rays are generated by electronic means. The objective is to acheive safe design of industrial x-ray equipment by establishing requirements for some of the components taht are critical for radiation safety. These include controls, panel displays, warning indicators, tube assembly, and shielding.

ISEA (International Safety Equipment Association)

Office: 1901 North Moore Street, Suite 808

Arlington, VA 22209

Contact: Cristine Fargo Fax: (703) 525-2148

E-mail: cfargo@safetyequipment.org

BSR/ISEA 105-200x, Hand Protection Selection Criteria (revision of ANSI/ISEA 105-2000)

Stakeholders: Manufacturers of hand protection products, various industries where hand protection is used

Project Need: The purpose of this standard is to provide manufacturers with a mechanism to classify their products for specified areas of glove performances. The information from this testing and classification can be used to help users to select appropriate hand protection.

This standard addresses the classification and testing of hand protection for specific performance properties related to chemical and industrial applications. Hand protection includes gloves, mittens, partial gloves, or other items covering the hand or a portion of the hand that are intended to provide protection against or resistance to a specific hazard.

ITI (INCITS) (InterNational Committee for Information Technology Standards)

Office: 1250 Eye Street, NW

Suite 200

Washington, DC 20005-3922

Contact: Barbara Bennett

Fax: (202) 638-4922

E-mail: bbennett@itic.org

BSR INCITS PN-1704-D-200x, Information technology - Conformance Testing for ANSI INCITS 378-2004, Finger Minutia Format for Data Interchange (new standard)

Stakeholders: Existing markets for fingerprint technology should experience added impetus from the benefits of interoperability. New markets will open as a result of this.

Project Need: Users of biometric systems will adopt systems to the extent that those systems add value and reduce risk. Standards are a significant part of risk reduction.

The INCITS M1 Minutia Interchange Format provides an industry standard to allow for fingerprint minutia extracted with one vendor's algorithm to be useful to another vendor's matching algorithm. There is a natural need to assure that the output of a vendor's extract process conforms to this interchange standard. This conformance standard will meet that need.

BSR INCITS PN-1705-D-200x, Information technology - Conformance Testing Methodology for ANSI INCITS 381-2004, Finger Image Based Data Interchange Format (new standard)

Stakeholders: The proposed standard will increase the interoperability of finger image data interchange format implementations based on INCITS 381.

Project Need: To encourage wider adoption by users of biometric solutions conforming to INCITS 381 and to promote the development of conformant implementations of INCITS 381 among the industry.

The proposed standard would establish the specifications of the framework, concepts, methodology for testing, and criteria to be achieved to claim conformance to ANSI INCITS 381-2004, Information Technology - Finger Image-Based Data Interchange Format.

BSR INCITS PN-1706-D-200x, Information technology - Application Profile for Commercial Biometric Physical Access Control (new standard)

Stakeholders: Physical access control market.

Project Need: Biometric Access Control Devices are typically proprietary. Enrollment and verification are driven as a complete solution, and customers must accept the risk associated with that.

The proposed standard is intended to support the deployment of standards based interoperable biometric physical access control systems for commercial purposes. The standard's goals include capturing the needs of vendors, integrators, customers, and users for these systems.

NBBPVI (National Board of Boiler and Pressure Vessel Inspectors)

Office: 1055 Crupper Avenue

Columbus, OH 43229-1183

Contact: Charles Withers Fax: (614) 847-1828

E-mail: cwithers@nationalboard.org

BSR/NB 387-200x, Construction of Graphite Pressure Vessels (new standard)

Stakeholders: Authorized Insurance Agencies, General Interest, Manufacturers, Certificate Holders, Jurisdictional Authorities, Users, Organized Labor all dealing with the pressure vessel industry.

Project Need: NB-23 Provides rules for inspection and repair of graphite pressure vessels. There are no current Codes regulating the construction of graphite vessels.

Will address design, materials, fabrication, examination and testing, certification/documentation and stamping requirements for graphite pressure vessels.

NEMA (ASC C50) (National Electrical Manufacturers Association)

Office: 1300 North 17th Street

Suite 1847

Rosslyn, VA 22209
Contact: Daniel Threlkel

Fax: (703) 841-3388

E-mail: dan threlkel@nema.org

BSR/NEMA MG 1-200x, Motors and Generators (revision of

ANSI/NEMA MG 1-2003)

Stakeholders: All types of industries

Project Need: This standard is used by all North American motor manufacturers in the construction and performance of electric motors and generators. It is also used by consulting and design engineers in specifying motors for applications.

ANSI/NEMA Standards Publication MG 1-2003 "Motors and Generators" provides more than 500 pages of manufacturing and performance data related to electric motors and generators. Revision 1 provides updates.

NEMA (ASC C82) (National Electrical Manufacturers Association)

Office: 1300 North 17th Street, Suite 1847

Rosslyn, VA 22209

Contact: Randolph Roy Fax: (703) 841-3377

E-mail: ran_roy@nema.org; mat_clark@nema.org

BSR C82.1-200x, Lamp Ballast - Line Frequency Fluorescent Lamp

Ballast (revision of ANSI C82.1-1997 (R2003))

Stakeholders: Manufacturer.

Project Need: To revise ANSI C82.1-1997.

This standard is intended to cover ballasts which have rated open-circuit voltages of 2000 volts or less and are intended to operate lamps at a frequency of 50 Hz or 60 Hz...

NSF (NSF International)

Office: P.O. Box 130140

Ann Arbor, MI 48113-0140

Contact: Donna Backus

Fax: (734) 827-6831

E-mail: backus@nsf.org

BSR/NSF 6-200x (i3), Dispensing Freezers (revision of ANSI/NSF

6-2002)

Issue 3: Incoproration of boilerplate language from ANSI/NSF 2.

American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMVA
- AGRSS
- ASC B109 (AGA)
- ASHRAE
- ASME
- ASTM
- NBBPVI
- NSF International
- TI/
- Underwriters Laboratories Inc.

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on "Standards Information," and see "American National Standards Maintained Under Continuous Maintenance". This information is also available directly at

http://public.ansi.org/ansionline/Documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.

ISO Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments

Comments regarding ISO documents should be sent to Henrietta Scully, at ANSI's New York offices. The final date for offering comments is listed after each draft.

Global Engineering Documents 15 Inverness Way East Englewood, CO 80112-5704 phone: (800) 854-7179 fax: (303) 379-7956 e-mail: global@ihs.com web: http://global.ihs.com

DENTISTRY (TC 106)

ISO/DIS 9173-1, Dentistry - Extraction forceps - Part 1: General requirements - 9/11/2004, \$32.00

ISO/DIS 20126, Dentistry - Physical properties of manual toothbrushes - 9/11/2004, \$38.00

GAS CYLINDERS (TC 58)

ISO/DIS 14245, Gas cylinders - Specifications and testing of LPG cylinder valves - Self-closing - 9/12/2004, \$72.00

GRAPHIC TECHNOLOGY (TC 130)

ISO/DIS 12647-4, Graphic technology - Process control for the manufacture of half-tone colour separations, proofs and production prints - Part 4: Publication gravure process - 9/9/2004, \$63.00

ISO/DIS 16612, Graphic technology - Variable printing data exchange using PPMLand PDF (PPML/VDX) - 9/9/2004, \$92.00

INDUSTRIAL AUTOMATION SYSTEMS AND INTEGRATION (TC 184)

ISO/DIS 19440, Enterprise integration - Constructs for enterprise modelling - 9/11/2004, \$72.00

ISO/DIS 20242-1, Industrial automation systems and integration -Service interface for testing applications - Part 1: Overview -9/12/2004, \$49.00

OPTICS AND OPTICAL INSTRUMENTS (TC 172)

ISO/DIS 14880-2, Microlens arrays - Part 2: Test methods for wavefront aberrations - 9/16/2004, \$83.00

PLASTICS (TC 61)

ISO/DIS 1265, Plastics - Poly(vinyl chloride) resins - Determination of number of impurities and foreign particles - 9/11/2004, \$38.00

ROAD VEHICLES (TC 22)

ISO/DIS 17356-3, Road vehicles - Open interface for embedded automotive applications - Part 3: OSEK/VDX operating system (OS) -9/12/2004, \$125.00

ROUND STEEL LINK CHAINS, CHAIN SLINGS, COMPONENTS AND ACCESSORIES (TC 111)

ISO/DIS 3266, Eyebolts grade 4 for general lifting purposes - 9/11/2004, \$53.00

SHIPS AND MARINE TECHNOLOGY (TC 8)

ISO/DIS 24408, Ships and marine technology - Position-indicating lights for life-saving appliances - Testing, inspection and marking of production units - 9/12/2004, \$53.00

THERMAL INSULATION (TC 163)

ISO/DIS 23995, Thermal insulation for building equipment and industrial installations - Thermal transmittance - Determination of correction terms - 9/11/2004. \$53.00

TRANSPORT INFORMATION AND CONTROL SYSTEMS (TC 204)

ISO/DIS 14819-6, Traffic and Traveller Information (TTI) - TTI Messages via Traffic Message Coding - Part 6: Encryption and conditional access for the Radio Data System - Traffic Message Channel ALERT C coding - 9/11/2004, \$78.00

ISO/IEC JTC 1, Information Technology

ISO/IEC DIS 20886, Information technology - International Security, Trust, and Privacy Alliance - Privacy Framework - 10/12/2004, \$125.00

Newly Published ISO Standards

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Global Engineering Documents.

Weblinks are now provided from Standards Action to ANSI's Electronic Standards Store. To purchase a PDF copy of the desired standard, click on the blue, underlined designation.

AGRICULTURAL FOOD PRODUCTS (TC 34)

ISO 18593:2004, Microbiology of food and animal feeding stuffs -Horizontal methods for sampling techniques from surfaces using contact plates and swabs, \$43.00

AIR QUALITY (TC 146)

ISO 10498:2004, Ambient air - Determination of sulfur dioxide - Ultraviolet fluorescence method, \$49.00

AIRCRAFT AND SPACE VEHICLES (TC 20)

- ISO 15859-1:2004, Space systems Fluid characteristics, sampling and test methods - Part 1: Oxygen, \$49.00
- ISO 15859-2:2004, Space systems Fluid characteristics, sampling and test methods - Part 2: Hydrogen, \$43.00
- ISO 15859-3:2004. Space systems Fluid characteristics, sampling and test methods - Part 3: Nitrogen, \$49.00
- ISO 15859-4:2004. Space systems Fluid characteristics, sampling and test methods - Part 4: Helium, \$43.00
- ISO 15859-5:2004. Space systems Fluid characteristics, sampling and test methods - Part 5: Nitrogen tetroxide propellants, \$38.00
- ISO 15859-6:2004. Space systems Fluid characteristics, sampling and test methods - Part 6: Monomethylhydrazine propellant, \$38.00
- ISO 15859-7:2004. Space systems Fluid characteristics, sampling and test methods - Part 7: Hydrazine propellant, \$43.00
- ISO 15859-8:2004, Space systems Fluid characteristics, sampling and test methods - Part 8: Kerosine propellant, \$43,00
- <u>ISO 15859-9:2004</u>, Space systems Fluid characteristics, sampling and test methods Part 9: Argon, \$43.00
- ISO 15859-10:2004, Space systems Fluid characteristics, sampling and test methods - Part 10: Water, \$49.00
- ISO 15859-11:2004, Space systems Fluid characteristics, sampling and test methods Part 11: Ammonia, \$38.00
- ISO 15859-12:2004. Space systems Fluid characteristics, sampling and test methods - Part 12: Carbon dioxide, \$32.00
- ISO 15859-13:2004, Space systems Fluid characteristics, sampling and test methods Part 13: Breathing air, \$43.00

FLUID POWER SYSTEMS (TC 131)

ISO 17082:2004, Pneumatic fluid power - Valves - Data to be included in supplier literature, \$38.00

INDUSTRIAL AUTOMATION SYSTEMS AND INTEGRATION (TC 184)

ISO 13584-25:2004, Industrial automation systems and integration -Parts library - Part 25: Logical resource: Logical model of supplier library with aggregate values and explicit content, \$156.00

OPTICS AND OPTICAL INSTRUMENTS (TC 172)

ISO 13695:2004, Optics and photonics - Lasers and laser-related equipment - Test methods for the spectral characteristics of lasers, \$83.00

PLASTICS (TC 61)

- ISO 844:2004. Rigid cellular plastics Determination of compression properties, \$43.00
- <u>ISO 17282:2004</u>, Plastics Guide to the acquisition and presentation of design data, \$137.00
- ISO 21048:2004, Plastics Epoxy resins Determination of 1,2-glycol content, \$38.00

SOIL QUALITY (TC 190)

ISO 16772:2004, Soil quality - Determination of mercury in aqua regia soil extracts with cold-vapour atomic spectrometry or cold-vapour atomic fluorescence spectrometry, \$43.00

ISO Technical Reports

GRAPHIC TECHNOLOGY (TC 130)

<u>ISO/TR 16044:2004</u>, Graphic technology - Database architecture model and control parameter coding for process control and workflow (Database AMPAC), \$63.00

ISO/IEC JTC 1, Information Technology

- ISO/IEC 7816-2/Amd1:2004, Information technology Identification cards - Integrated circuit(s) cards with contacts - Part 2: Dimensions and location of the contacts - Amendment 1: Assignment of contacts C4 and C8. \$12.00
- ISO/IEC 7816-8:2004, Identification cards Integrated circuit cards -Part 8: Commands for security operations, \$72.00
- ISO/IEC 7816-9:2004, Identification cards Integrated circuit cards -Part 9: Commands for card management, \$53.00
- <u>ISO/IEC 13888-1:2004.</u> IT security techniques Non-repudiation Part 1: General, \$63.00

ISO/IEC JTC 1 Technical Reports

ISO/IEC TR 14496-9:2004, Information technology - Coding of audio-visual objects - Part 9: Reference hardware description, \$78.00

CEN/CENELEC Standards Activity

Competitive Excellence Through Standardization Technology

This section provides information on standards activity within CEN - the European Committee for Standardization - and CENELEC - the European Committee for Electrotechnical Standardization. CEN and CENELEC are composed of European member bodies whose countries cooperate within the European Economic Community (Common Market) and the European Free Trade Association (EFTA). Their primary purpose is to develop standards needed to harmonize European interests and prevent technical barriers. Both CEN and CENELEC are committed to adopting standards developed by ISO and IEC wherever possible.

ANSI is publishing this information to give U.S. interests an opportunity to obtain information, and to comment on proposed European Standards and/or Harmonization Documents being circulated for enquiry. Anyone interested in obtaining this information, and/or commenting on proposals should order copies from ANSI.

Comments regarding CEN are to be sent to Henrietta Scully at ANSI's New York offices. Comments regarding CENELEC are to be sent to Charles T. Zegers, also at ANSI's New York offices.

Ordering Instructions

ENs are currently available via ANSI's ESS (Electronic Standards Store), accessed at www.ansi.org.

prENs can be made available via ANSI's ESS "on-demand" via e-mail request. Send your request for a prEN to be made available via the ESS to Customer Service at sales@ansi.org and the document will be posted to the ESS within 3 working days. Please be ready to provide the date of the Standards Action issue in which the prEN document you are requesting appears.

CEN

European drafts sent for CEN enquiry

The following European drafts have been sent to CEN members for enquiry and comment. If the draft is a proposed adoption of an International Standard, it is so noted. The final date for offering comments is listed after each proposal.

EN 71-5: 1993/prA1, Safety of Toys - Part 5: Chemical toys (sets) other than experimental sets - 11/10/2004, \$137.00

prEN 612 REVIEW, Eaves, gutters with bead stiffened fronts and rainwater pipes with seamed joints made of metal sheet - 11/10/2004, \$43.00

prEN 13981-3, Aluminium and aluminium alloys - Products for structural railway applications - Technical conditions for inspection - Part 3: Castings - 11/10/2004, \$43.00

prEN 14175-6, Fume cupboards - Part 6: Variable air volume fume cupboards - 11/10/2004, \$43.00

prEN 14982, Plastics piping systems - Plastics shafts or risers for inspection chambers and manholes - Determination of ring -10/10/2004, \$38.00

prEN 14983, Explosion prevention and protection in underground mines - Equipment and protective systems for firedamp drainage -11/10/2004, \$67.00

prEN 19440, Enterprise integration - Constructs for enterprise modelling (ISO/DIS 19440: 2004) - 10/10/2004, \$119.00

prEN ISO 1265 REVIEW, Plastics - Poly(vinyl chloride) resins - Determination of number of impurities and foreign particles (ISO/DIS 1265: 2004) - 10/10/2004, \$28.00

prEN ISO 3266, Eyebolts grade 4 for general lifting purposes (ISO/DIS 3266: 2004) - 10/10/2004, \$28.00

prEN ISO 9173-1 REVIEW, Dentistry - Extraction forceps - Part 1: General requirements (ISO/DIS 9173-1: 2004) - 10/10/2004, \$28.00

prEN ISO 14819-6, Traffic and Traveller Information (TTI) - TTI Messages via Traffic Message Coding - Part 6: Encryption and conditional access for the Radio Data System - Traffic Message Channel ALERT C coding (ISO/DIS 14819-6: 2004) - 10/10/2004, \$67.00

prEN ISO 20126, Dentistry - Physical properties of manual toothbrushes (ISO/DIS 20126: 2004) - 10/10/2004, \$28.00

prEN ISO 23995, Thermal insulation for building equipment and industrial installations - Thermal transmittance - Determination of correction terms (ISO/DIS 23995: 2004) - 10/10/2004, \$38.00

European drafts sent for formal vote (for information)

The following European drafts have been sent to CEN members for formal vote. If the draft is a proposed adoption of an International Standard, it is so noted.

EN 1990: 2002/prA1, Eurocode - Basis of structural design

prCEN/TS 14631, Postal services - Automatic identification of receptacles and containers - Receptacle asset numbering

prEN 1011-8, Welding - Recommendations for welding of metallic materials - Part 8: Welding of cast irons

prEN 1274 REVIEW, Thermal spraying - Powders - Composition, technical supply conditions

prEN 14437, Determination of the uplift resistance of installed clay or concrete titles for roofing - Roof system test method

Registration of Organization Names in the United States

The Procedures for Registration of Organization Names in the United States of America (document ISSB 989) require that alphanumeric organization names be subject to a 90-day Public Review period prior to registration. For further information, please contact the Registration Coordinator at (212) 642-4946.

The following is a list of alphanumeric organization names that have been submitted to ANSI for registration. Alphanumeric names appearing for the first time are printed in bold type. Names with confidential contact information, as requested by the organization, list only public review dates.

PUBLIC REVIEW

E-mail: Neil.Clasen@oft.state.ny.us

Public review: April 7, 2004 to July 6, 2004

NOTE: Challenged alphanumeric names are underlined. The Procedures for Registration provide for a challenge process, which follows in brief. For complete details, see Section 6.4 of the Procedures.

A challenge is initiated when a letter from an interested entity is received by the Registration Coordinator. The letter shall identify the alphanumeric organization name being challenged and state the rationale supporting the challenge. A challenge fee shall accompany the letter. After receipt of the challenge, the alphanumeric organization name shall be marked as challenged in the Public Review list. The Registration Coordinator shall take no further action to register the challenged name until the challenge is resolved among the disputing parties.

Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by members of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland, who in turn disseminates the information to all WTO members. The purpose of this requirement is to provide trading partners with an opportunity to review and comment on the regulation before it becomes final.

To distribute information on these proposed foreign technical regulations, the National Center for Standards and Certification Information

(NCSCI), National Institute of Standards and Technology (NIST), provides an on-line service - Export Alert! - that allows interested parties to register and obtain notifications, via e-mail, for countries and industry sectors of interest to them. To register, go to http://ts.nist.gov/ncsci and click on "Export Alert!".

NCSCI serves as the U.S. WTO TBT inquiry point and receives copies of all notifications, in English, to disseminate to U.S. industry. To obtain copies of the full text of the regulations or for further information, contact NCSCI, NIST, 100 Bureau Drive, Stop 2160, Gaithersburg, MD 20899-2160; telephone (301) 975-4040; fax (301) 926-1559, e-mail - ncsci@nist.gov.

NCSCI will also request an extension of the comment period and transmit comments to the issuing foreign agency for consideration.

Information Concerning

ANSI Accredited Standards Developers

Approval of Reaccreditation

NSF International

The Executive Standards Council has approved the reaccreditation of NSF International using revised operating procedures for documenting consensus on proposed American National Standards, effective June 9, 2004. For additional information, please contact: Mr. Jim Kendzel, Vice-President, Standards, NSF International, 789 Dixboro Road, Ann Arbor, MI 48105; PHONE: (734) 827-6820; FAX: (734) 827-6831; E-mail: kendzel@nsf.org.

Single Ply Roofing Institute (SPRI)

The Executive Standards Council has approved the reaccreditation of the Single Ply Roofing Institute (SPRI) using revised operating procedures for documenting consensus on proposed American National Standards, effective June 9, 2004. These reaccredited procedures supersede the previous version adopted by SPRI, the Model

procedures for canvass by an accredited sponsor, as contained in Annex B of the 2002 version of the ANSI Procedures for the Development and Coordination of American National Standards. For additional information, please contact: Ms. Linda King, Managing Director, Single Ply Roofing Institute, 77 Rumford Street, Suite 3B, Waltham, MA 02453; PHONE: (781) 647-7026; FAX: (781) 647-7222; E-mail: info@spri.org.

Withdrawal of Accredited Procedures

NACE International - The Corrosion Society

NACE International - The Corrosion Society has requested the withdrawal of its accreditation under what were formerly known as the Model procedures for canvass by an accredited sponsor, as contained in Annex B of the 2002 version of the ANSI Procedures for the Development and Coordination of American National Standards. This action is taken, effective June 9, 2004. NACE International will continue to maintain its ANSI accreditation under its own operating procedures, currently used to document consensus on its existing American National Standards. For additional information, please contact: Ms. Linda Goldberg, Manager, Technical Activities, NACE International, 1440 South Creek Drive, Houston, TX 77084; PHONE: (781) 228-6221; FAX: (781) 228-6321; E-mail: Linda@mail.nace.org.

ADA Specification No. 85: Part 1 Disposable Prophy Angles

The following section was deleted from the specification that underwent ANSI Public Review in August 2003:

4.2 Microbial Limits

Disposable angles shall be free from designated microbial species. Test per the United States

Pharmacopoeia 25 (USP25), Chapter 61, or current USP, for the following: E coli, Salmonella

species, Pseudomonas, Staphylococcus.
