## American National Standards

### Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

## Correction

### J-STD-025-B-200x

In the October 28, 2005 issue of Standards Action, the listing for BSR J-STD-025-B-200x had the wrong designation and status information. The corrected part of the listing appears below:

BSR J-STD-025-B-200x, Lawfully Authorized Electronic Surveillance (new standard)

#### NOTES:

- 1) J-STD-025-B-200x is not a revision of ANSI/TIA J-STD-025-A-2003. J-STD-025-A-2003 is still an active standard.
- 2) The comment deadline for J-STD-025-B-200x remains November 27, 2005. Please see last week's issue of Standards Action for the parts of the standard currently under Public Review.

# Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit [www.NSSN.org](http://www.NSSN.org), which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

Stakeholders: Suppliers and users.

Project Need: To update the existing 30-year-old standard, which covers much outdated technology and machine tools.

This standard applies to grinding machines, designed primarily for metal removal, that present grinding tools against workpieces and produce changes in the shape, size and surface finish of the workpieces by grinding. This standard also applies to these machines when they are used to grind materials other than metals, such as glass, ceramics, plastics, and rubber. This standards does not apply to portable hand-held grinders.

BSR/NECA 202-2001 (R200x), Standard for Installing and Maintaining Electrical Heat Tracing Systems (reaffirmation of ANSI/NECA 202-2001)

Stakeholders: Contractors.

Project Need: To enhance the basic safety requirements of the National Electrical Code by clearly defining what is meant by installing products and systems in a "neat and workmanlike" manner.

This standard applies to self-regulating heating cables, zone-heating cables, series-resistance heating cables, and mineral-insulated heating cables.

BSR/NECA 411-200x, Standard for Installing and Maintaining Low-Voltage Uninterruptible Power Supplies (UPSs) (new standard)

Stakeholders: Electrical contractors and their customers.

Project Need: To enhance the basic safety requirements of the National Electrical Code by clearly defining what is meant by installing products and systems in a "neat and workmanlike" manner.

This standard describes installation and maintenance procedures for static, three-phase Uninterruptible Power Supplies rated 30 kVA or more and 600 Volts or less, and related battery systems, for commercial, institutional, and industrial applications.

# American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2).

Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer.

Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

# ISO and IEC Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

## Comments

Comments regarding ISO documents should be sent to Henrietta Scully at ANSI's New York offices, those regarding IEC documents to Charles T. Zegers, also at ANSI New York offices. The final date for offering comments is listed after each draft.

## Ordering Instructions

**ISO and IEC Drafts can be made available via ANSI's ESS "on-demand" service. Please e-mail your request for an ISO or IEC Draft to Customer Service at sales@ansi.org. The document will be posted to the ESS within 3 working days of the request. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.**

# Proposed Foreign Government Regulations

## Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by members of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland, who in turn disseminates the information to all WTO members. The purpose of this requirement is to provide trading partners with an opportunity to review and comment on the regulation before it becomes final.

To distribute information on these proposed foreign technical regulations, the National Center for Standards and Certification Information

(NCSCI), National Institute of Standards and Technology (NIST), provides an on-line service - Export Alert! - that allows interested parties to register and obtain notifications, via e-mail, for countries and industry sectors of interest to them. To register, go to <http://ts.nist.gov/ncsci> and click on "Export Alert!".

NCSCI serves as the U.S. WTO TBT inquiry point and receives copies of all notifications, in English, to disseminate to U.S. industry.
