

NGA

National Graphene Association

ANSI Nanotechnology Standards Panel (ANSI-NSP)

March 20, 2018

Washington DC

The National Graphene Association is the main organization and body in the U.S. advocating and promoting the commercialization of graphene.

NGA is focused on convening current and future stakeholders and addressing critical issues such as policy and standards development that will result in effective integration of graphene and graphene based materials globally.

National Graphene Association

Connect • Innovate • Commercialize

Connecting stake holders: In depth look at pain points, expectations and challenges of the field.

- **Unification of Terminology**

ISO/TS 80004-13:2017 Nanotechnologies — Vocabulary — Part 13: Graphene and related two-dimensional (2D) materials

Consistent adoption:

- Education
- Persistence
- Encouragement

National Graphene Association

Connect • Innovate • Commercialize

- Technical Specification/parameter testing & reporting Challenges for end user regarding comparison of materials from different suppliers.
- Clear Distinction between Film and Flake segments

National Graphene Association

Connect • Innovate • Commercialize

**Global
Graphene
Expo™
& Conference**

OCTOBER 15-17, 2018
AUSTIN, TX | AT&T CENTER

The only US conference dedicated solely to the commercialization of graphene.

Dedicated Standardization Track

- Presentations
- Panels
- Round table Discussions

I invite you to join and participate.

National Graphene Association

Connect • Innovate • Commercialize

celtig

GROLLTEX

Graphene for a Smart Life

Panelists

- Dr. Lu Liu
- Mr. Jeffrey Draa
- Dr. Kuan-Tsae Huang

National Graphene Association

Connect • Innovate • Commercialize
