

INTERNATIONAL ELECTROTECHNICAL COMMISSION

CONFORMITY ASSESSMENT BOARD (CAB)

SUBJECT

Updated report on new actions and follow-up status of outstanding CAB matters

BACKGROUND

This document replaces CAB/2003/R and is a notification that an updated list of open action items is available for download and review.

In accordance with CAB Decision 43/08 a downloadable Excel spreadsheet (CAB_FollowUP_Actions_20201013.xlsx) is available on the [CAB Collaboration Platform](#) (CP) with a list of current and past actions.

Please be reminded that an additional column was added indicating the previous status of the action as reported in the previous report. Whenever an action shows “C” (completed) in the current and previous status columns, it will be removed from the next report. This helps with traceability and ensures that actions do not simply disappear as soon as they are completed. They must be seen as completed in two reports before being removed. This should allow time for any comments or corrections to be received by the Secretariat.

The current list indicates 67 actions, with 37 having been completed, and 30 open actions yet to be completed.

ACTION

The members of CAB are requested to download and review the updated Excel document, and take action where appropriate.
