

VIRTUAL VIA ZOOM

August 30-31, 2021, 8:30PM-11:00PM (U.S. EDT)
August 31- Sep 1, 2021, 7:30AM-10:00AM (Vietnam)

Promoting Standards and Technology Cooperation

Through its U.S.-Indo-Pacific Standards and Technology Cooperation Program (STCP), the U.S. Trade and Development Agency is supporting Vietnam's efforts in leading adoption and implementation of 5G standards. This workshop will offer participants the opportunity to engage with key Vietnamese and U.S. 5G public officials and industry experts to share solutions to meet growing 5G demand while addressing security needs and promoting market openness, an enabling regulatory environment, and industry best practices.

BACKGROUND

Vietnam has one of the fastest growing digital economies in the Southeast Asia region, acting as a frontrunner and early adapter of 5G networks. Global standards and recognition of international best practices will be vital to coordinate 5G efforts across the region, as well as to facilitate an open regulatory environment for utilizing 5G wireless capabilities in vertical industries. This workshop, organized in partnership with the Ministry of Information and Communications (MIC), will allow Vietnamese and U.S. stakeholders to discuss the importance of 5G standards to facilitate trade and investment cooperation.

The objectives of the 5G Standards Workshop are to:

- Highlight innovations from industry-driven standards development
- Share experiences in 5G implementation and development
- Promote best practices for regulation and compliance
- Feature 5G technologies and services

Key participants will include government officials from the MIC, as well as leading U.S. government officials and industry experts. Speakers from the Vietnamese government and private sector will also provide important context and updates on the current state-of-play and engage in substantive discussion throughout the program.

ABOUT USTDA

The U.S. Trade and Development Agency helps companies create U.S. jobs through the export of U.S. goods and services for priority infrastructure projects in emerging economies. USTDA links U.S. businesses to export opportunities by funding project preparation and partnership building activities that develop sustainable infrastructure and foster economic growth in partner countries.

Attendance at this event is limited to U.S. and Vietnam individuals, firms, or consultants as defined by USTDA's Nationality Source and Origin Requirements available on USTDA's website at www.USTDA.gov.

WHY YOU SHOULD ATTEND

- Identify Vietnam's 5G priorities
- Learn about U.S. 5G standards development activities from U.S. regulators and industry
- Engage with key decision makers
- Inform development of new regulations
- Discover new commercial opportunities
- Partner with U.S. and Vietnam industry leaders

BUSINESS OPPORTUNITIES

- User and Terminal Equipment
- Non-Stand Alone (NSA) and/or Stand Alone (SA) 5G network infrastructure
- Cybersecurity and Threat Mitigation
- 5G Applications and Use Cases

U.S.-INDO-PACIFIC STCP

USTDA's U.S.-Indo-Pacific Standards and Technology Cooperation Program provides a forum for cooperation and exchange on issues related to standards development, technical regulations, and conformity assessment policies and procedures.
