

U.S.-AFRICA CLEAN ENERGY STANDARDS PROGRAM

Electrical Safety for Clean Energy Systems Workshop

Electrical Safety is not an accident. Safe generation, transmission, distribution, management, and use of electricity depend on an interlocking web of technical rules such as installation codes and product standards, proper testing and verification, and application of best practices in the home and in the workplace. This workshop will cover all these components of a safe electrical system, and will feature presentations from the National Electrical Manufacturers Association (NEMA) and other leading experts.

**You are cordially invited to attend a workshop showcasing
the state-of-the-art in electrical safety.**

May 16, 2016

8:30 AM - 12:30 PM
Cape Town, South Africa

Space is limited. To inquire about registration, email us-africacesp@ansi.org. Kindly indicate name, title, organization, contact email and telephone number.
