Emergency Planning For Research and Test Reactors and Other Non-Power Production and Utilization Facilities

Published 2/24/2017
Reference ANSI
The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG-2004, “Emergency Planning for Research and Test Reactors and Other Non-Power Production and Utilization Facilities.” This DG is proposed Revision 2 of Regulatory Guide (RG) 2.6, “Emergency Planning for Research and Test Reactors.” The NRC proposes to revise the RG by updating it to approve the use of the most current version of the American National Standards Institute (ANSI)/American Nuclear Society (ANS) standard ANSI/ANS-15.16-2015, “Emergency Planning for Research Reactors.” The proposed revision provides licensees and applicants with a method that the NRC staff considers acceptable for use in complying with the regulations on the content of emergency plans for research and test reactors and other non-power production and utilization facilities. Submit comments by April 25, 2017. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Aerial Lifts Standard

Published 2/24/2017
Reference ANSI
The Department of Labor (DOL) is submitting the Occupational Safety and Health Administration (OSHA) sponsored information collection request (ICR) titled, “Aerial Lifts Standard,” to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited. The OMB will consider all written comments that agency receives on or before March 27, 2017.

Revisions to Safety Standard for Toddler Beds

Published 2/22/2017
Reference ASTM
In accordance with section 104(b) of the Consumer Product Safety Improvement Act of 2008 (CPSIA), also known as the Danny Keysar Child Product Safety Notification Act, in April 2011 the U.S. Consumer Product Safety Commission (Commission, or CPSC) published a consumer product safety standard for toddler beds. The standard incorporated by reference the ASTM voluntary standard for toddler beds, with several modifications. The CPSIA sets forth a process for updating standards that the Commission has issued under the authority of section 104(b) of the CPSIA. In accordance with that process, we are publishing this direct final rule, revising the CPSC’s standard for toddler beds to incorporate by reference a more recent version of the applicable ASTM standard. The rule is effective on June 6, 2017, unless we receive significant adverse comment by March 24, 2017. If we receive timely significant adverse comments, we will publish notification in the Federal Register, withdrawing this direct final rule before its effective date. The incorporation by reference of the publication listed in this rule is approved by the Director of the Federal Register as of June 6, 2017.

Accreditation and Approval of Intertek USA, Inc., as a Commercial Gauger and Laboratory

Published 2/24/2017
Reference ASTM
Notice is hereby given, pursuant to CBP regulations, that Intertek USA, Inc., has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes for the next three years as of April 12, 2016. Effective Dates: The accreditation and approval of Intertek USA, Inc., as commercial gauger and laboratory became effective on April 12, 2016. The next triennial inspection date will be scheduled for April 2019.
Accreditation and Approval of Chem Coast, Inc., as a Commercial Gauger and Laboratory
