### *Improving Safety and Security Through Standards*

Standards and conformity assessment programs for products, services, or processes that have safety and security as their foundation can foster a better society by defending against threats, protecting critical infrastructure, and even saving lives.

The U.S. Celebration of World Standards Day 2005 theme, *Improving Safety and Security Through Standards*, highlights efforts underway within the U.S. and the global standardization community to respond to these critical priorities. It also recognizes the efforts of private and public sector representatives who are devoting their time and attention to the development of standards that, in some form, are helping to make life easier, more comfortable, safer, more secure and convenient.
