

ANSI/NAM Manufacturers Network on Chemical Regulation

Focused on REACH Implementation

Wednesday, October 17th, 2007
8:00 am – registration and breakfast
8:30 am – 12:00 pm – meeting

The Fairmont Washington Hotel
2401 M Street, NW
Washington, DC 20037

WHAT

The Manufacturers Network on Chemical Regulation is an issue-driven group that was created to enable the industry with one voice when addressing chemical regulations. The purpose of the Network is to disseminate information, identify issues of concern, share best practices, explore training needs, and leverage resources in areas pertaining to chemical-related regulations and regulatory controls.

The purpose of this first meeting of the Network is to bring industry leaders together to discuss how REACH is being implemented in various sectors.

WHY

The American National Standards Institute (ANSI) and the National Association of Manufacturers (NAM) established the Manufacturers Network on Chemical Regulation in response to business concerns about the impact of REACH (“Registration, Evaluation, Authorization and Restriction of Chemicals”) and other foreign chemical controls.

By cooperating across industries, collaborating early, identifying existing and needed standards and compliance programs, working together to inject scientific research into policy debates, and moving from a “list based” to a “risk based” approach to chemical references in regulation, manufacturers will be ahead of the curve in forced de-selection of materials used in manufactured goods.

WHEN

Wednesday, October 17th, 2007
8:30 am – 12:00 pm

WHO

This event is open to ANSI members, NAM members, and other interested parties.

WHERE

The Fairmont Washington Hotel
Executive Forum
Washington, DC, USA

FORMAT

Small group discussions; plenary session reports and action plan development

SPONSORS

Time	Discussion Topic	Moderator/Panelist
