### Overview

ANSI-HSSP Global Supply Chain Security Standards Workshop and Annual Plenary Meeting took a close look at the current landscape as well as standardization needs and solutions for global supply chain security in the U.S., Europe, internationally and regionally. A Keynote speaker provided an overview of the national strategy for global supply chain security and its development. Public - and private - sector experts then presented specific perspectives on aviation and air cargo security, maritime and port security, rail and trucking security, as well as the entire end-to-end global supply chain. Anti-counterfeiting measures were also addressed, along with standards and conformance solutions. Roundtable sessions enabled significant attendee participation and contribution to the discussions. The HSSP annual plenary meeting also took place in conjunction with the Workshop. The ANSI-HSSP Plenary provided the unique opportunity for the homeland security, emergency preparedness, and business continuity communities (public sector, private sector, and standards developing organizations) to come together to discuss current issues and challenges, strategic approaches, recent successes, and future outlooks. All ANSI and ANSI-HSSP members, constituents, and other interested stakeholders are welcome to attend.
