### Joint Member Forum Overview

As technology evolves and innovative products and services are introduced, we rely upon standards and conformity assessment to assure quality, interoperability, and market access. And where technology is completely disruptive and transformative – think of smart phones and the Internet of Things – there is even more potential for standards to support a better future for us all.

The 2017 ANSI Joint Member Forum – Future Perfect – explored these emerging areas of technology where standards and conformance will play a significant role. Attendees also discussed the digital transformation of standardization, whether and how standards themselves may need to evolve.

### Participants

Nearly 150 ANSI members and stakeholders attended to share their perspectives, insights, and expertise.
