

U.S.-Indonesia Healthcare Standards and Innovation Workshop / August 3, 2022

A 10-point action plan to make digital technology work for Universal Health Coverage

Sejal Mistry
Regional Director Southeast Asia
ACCESS Health International

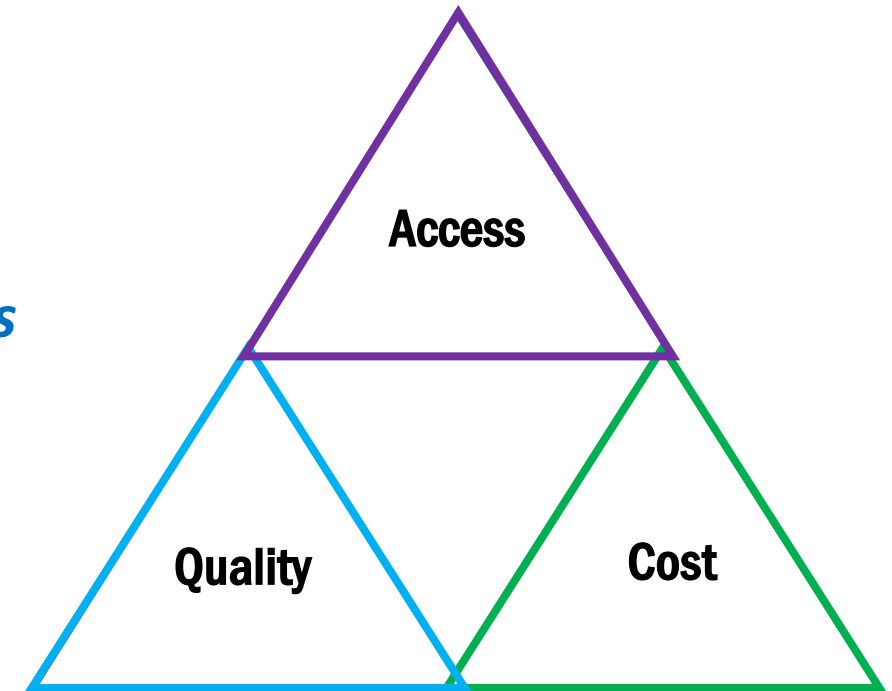

Is Universal Health Coverage Achievable or Impossible?

“Universal health coverage means that all people have access to the health services they need, when and where they need them, without financial hardship”

World Health Organization

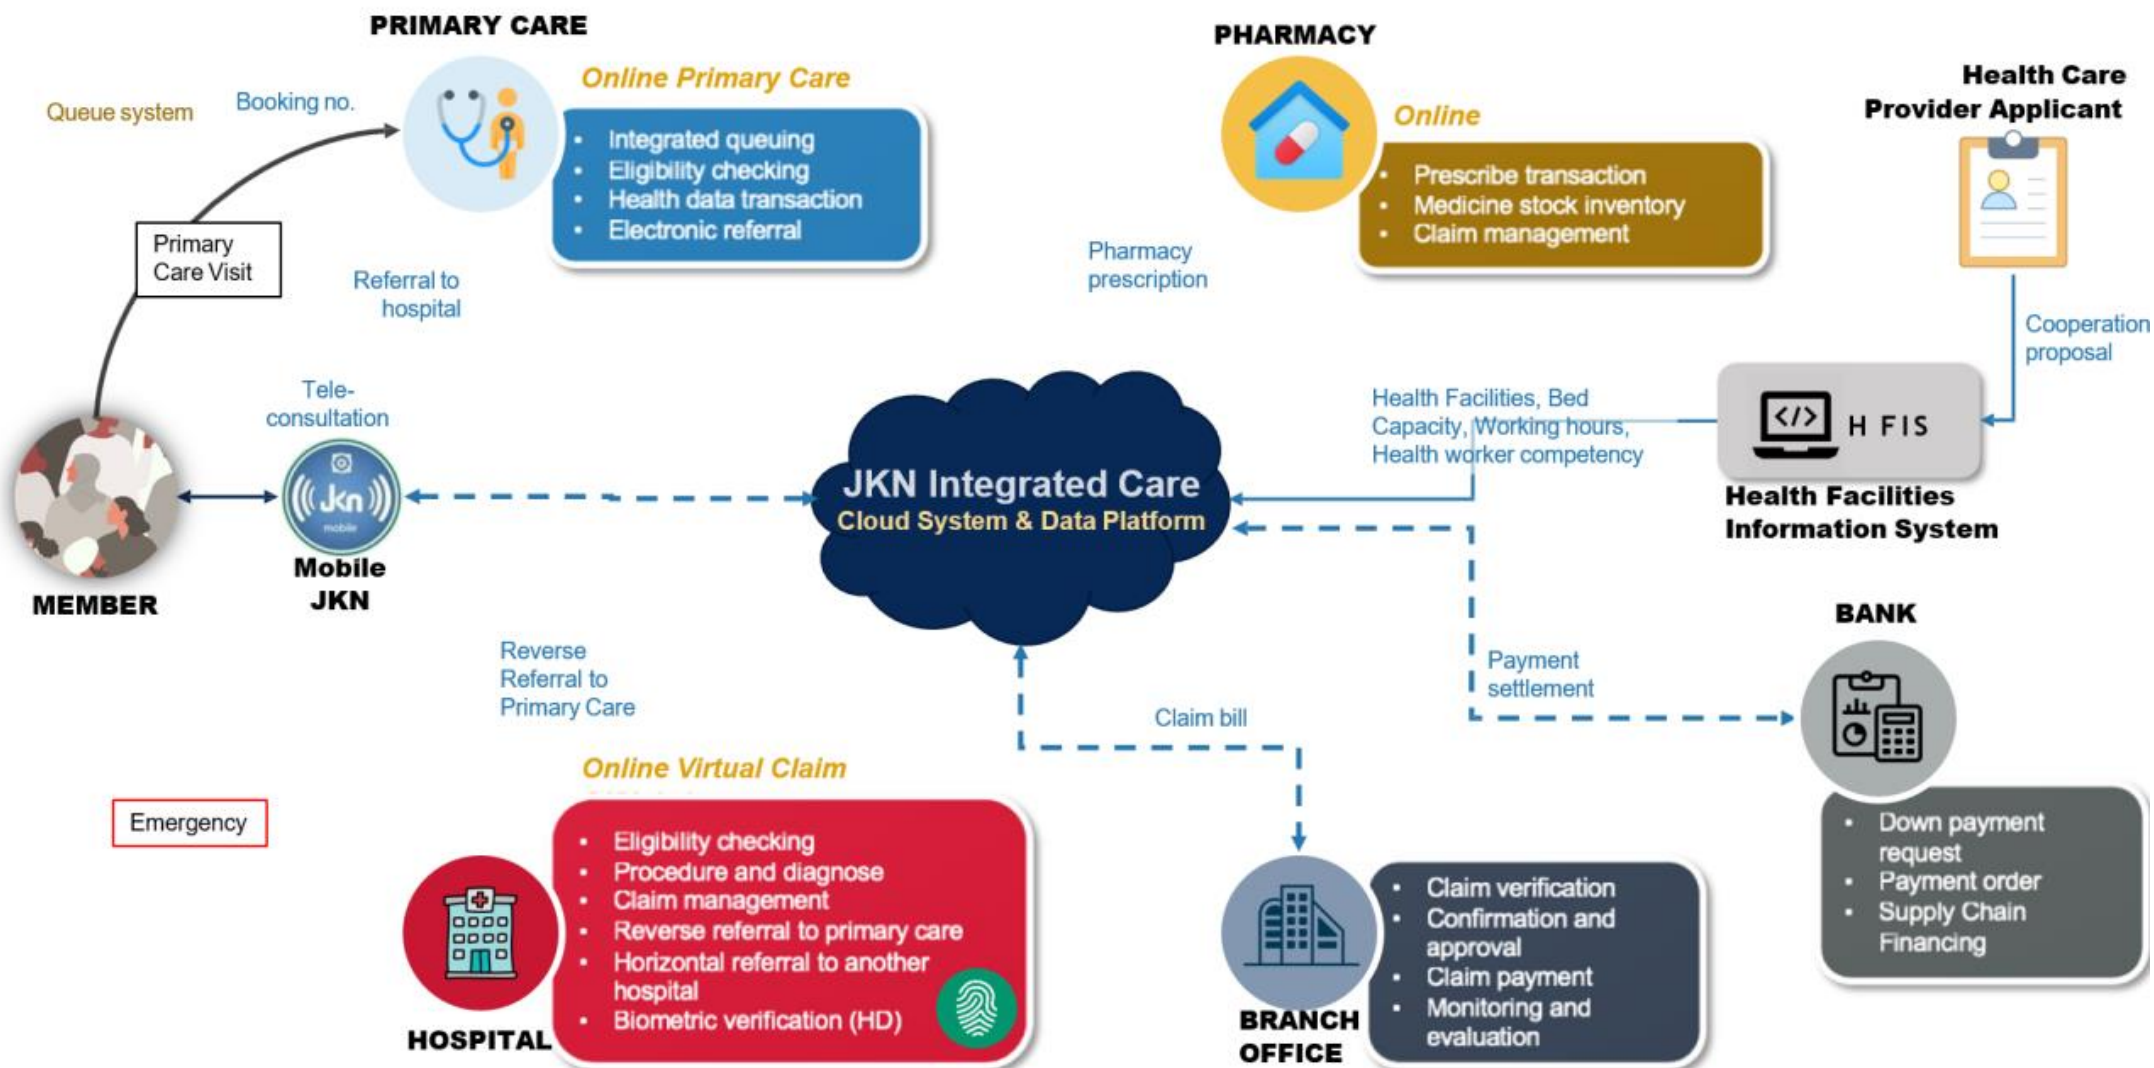

Versus

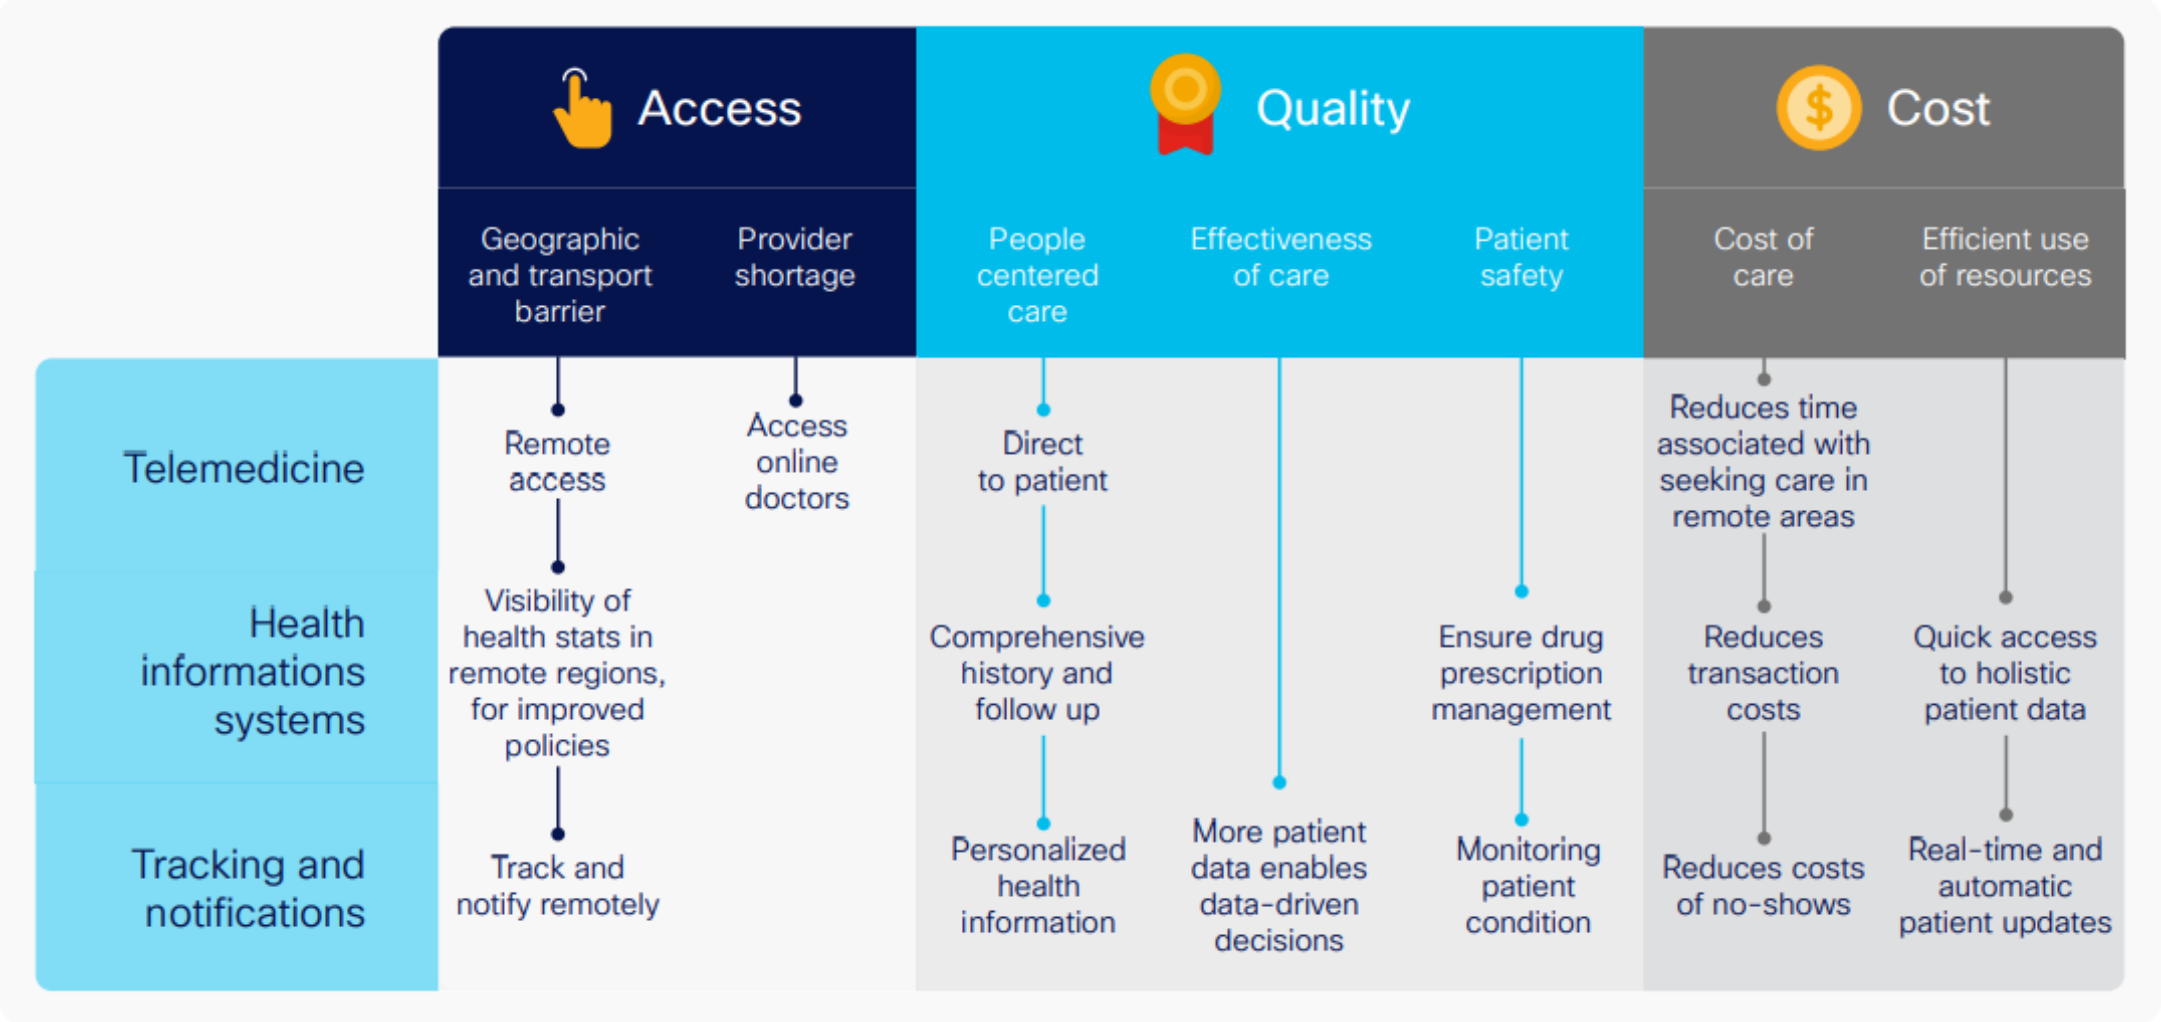

“The golden rule of healthcare in our society is that everyone deserves the finest health care attainable, provided someone else pays. But in what I call the iron triangle of health care, access, quality, and cost containment have equal angles, representing identical priorities, and an expansion of any one angle compromises one or both of the other two.”

William Kissick

A digital JKN to promote quality, access, and reduce costs

Core digital technologies that drive access, quality, and cost savings

10 actions to ensure that digital technologies can fulfill UHC goals

1. Establish
head of
state mandate

2. Build the
national digital
infrastructure

3. Invest in
human capital

4. Develop a
regulatory and
legal framework

5. Appoint an
eHealth
government
agency

6. Define an impact
measurement
framework

7. Lead a
multi-sectoral
strategy

8. Enable
private sector
innovation

9. Adopt a
lens of equity

10. Design for
user experience
