Telehealth in the Post-COVID World

Thomas M. Leary, MA, CAE, FHIMSS
Senior VP and Head of Government Relations
Vision
To realize the full health potential of every human, everywhere.

Mission
Reform the global health ecosystem through the power of information and technology.
Level-setting: Terms
The US Has Specific Definitions

- Vary based on:
  - Agency/program
  - Synchronicity
  - Use of video
  - Sites involved (i.e., patient home)
  - Who provides the service

• The infamous §1834(m) (of the Social Security Act)

(m) PAYMENT FOR TELEHEALTH SERVICES.—

(1) IN GENERAL.—The Secretary shall pay for telehealth services that are furnished via a telecommunications system by a physician (as defined in section 1861(r)) or a practitioner (described in section 1842(b)(18)(C)) to an eligible telehealth individual enrolled under this part notwithstanding that the individual physician or practitioner providing the telehealth service is not at the same location as the beneficiary. For purposes of the preceding sentence, in the case of any Federal telemedicine demonstration program conducted in Alaska or Hawaii, the term “telecommunications system” includes store-and-forward technologies that provide for the asynchronous transmission of health care information in single or multimedia formats.

(2) PAYMENT AMOUNT.—

(A) DISTANT SITE.—The Secretary shall pay to a physician or practitioner located at a distant site that furnishes a telehealth service to an eligible telehealth individual an amount equal to the amount that such physician or practitioner would have been paid under this title had such service been furnished without the use of a telecommunications system.

(B) FACILITY FEE FOR ORIGINATING SITE.—

(i) IN GENERAL.—Subject to clause (ii) and paragraph (6)(C), with respect to a telehealth service, subject to section 1833(a)(1)(U), there shall be paid to the originating site a facility fee equal to—

(I) for the period beginning on October 1, 2001, and ending on December 31, 2001, and for 2002, $20; and

(II) for a subsequent year, the facility fee specified in subclause (I) or this subclause for the preceding year increased by the percentage increase in the MEI (as defined in section 1842(i)(3)) for such subsequent year.

(ii) NO FACILITY FEE IF ORIGINATING SITE IS THE HOME.—No facility fee shall be paid under this subparagraph to an originating site described in paragraph (4)(C)(ii)(X).
But It’s All Different Now

**KEY TAKEAWAYS:**

- Effective for services starting March 6, 2020 and for the duration of the COVID-19 Public Health Emergency, Medicare will make payment for Medicare telehealth services furnished to patients in broader circumstances.
- These visits are considered the same as in-person visits and are paid at the same rate as regular, in-person visits.
- Starting March 6, 2020 and for the duration of the COVID-19 Public Health Emergency, Medicare will make payment for professional services furnished to beneficiaries in all areas of the country in all settings.
- While they must generally travel to or be located in certain types of originating sites such as a physician’s office, skilled nursing facility or hospital for the visit, effective for services starting March 6, 2020 and for the duration of the COVID-19 Public Health Emergency, Medicare will make payment for Medicare telehealth services furnished to beneficiaries in any healthcare facility and in their home.
- The Medicare coinsurance and deductible would generally apply to these services. However, the HHS Office of Inspector General (OIG) is providing flexibility for healthcare providers to reduce or waive cost-sharing for telehealth visits paid by federal healthcare programs.
- To the extent the 1135 waiver requires an established relationship, HHS will not conduct audits to ensure that such a prior relationship existed for claims submitted during this public health emergency.
And... Hospital @ Home is Also a Thing!

- Multiple reimbursement paths
  - Inpatient track if replicating all facets of care
  - Combined RPM and CCM benefits + home care
Payment Parity?

- Primarily hinges on facility fees
- Varies by state
- Highly polarized issue
- Outcomes/delivery vs. location/overhead

Will Telehealth Payment Parity Be Permanent or a Passing Fancy?

A recent study by Foley & Lardner indicates telehealth reimbursement will be on top of the agenda during the coming year, but will states, private payers and the federal government find an acceptable path to true payment parity?
How Do I Make It Work?

So Where Are We Now?
Uncertainty Reigns

- Will the Medicare waivers continue after the PHE ends?
- Do I build/buy a platform?
- Will I lose patients to DTC companies? Or get unwarranted referrals?
- Will this work for my patients?
- Will I get paid the same?
- Which version of Hospital at Home is appropriate?
Thank You!
