

Jennifer Kitchen

Jennifer Kitchen has 18 years of global pressure equipment and power plant industry regulatory and standards experience. Jennifer joined GE Energy in 2007 as the Global Technical Regulations Compliance Product Safety Program Manager where she established technical regulatory compliance programs.

In her current role as the GE Power & Water Technical Regulations and Standards Advocacy Leader, she is responsible for developing and implementing a comprehensive technical advocacy program that will focus on business strategy, engagement, and strengthening external collaboration.

Prior to joining GE, she worked for Hartford Steam Boiler as an Authorized Inspector (AI) and Project Manager for large energy product and installation companies for global boiler and pressure vessel compliance. Jennifer began her career as a Quality Manager for Chart-MVE where she managed engineering and manufacturing compliance operations for cryogenic pressure equipment.

Jennifer is a member of ISO TC 199 for Machinery Safety, ISO TC 192 for Gas Turbines, SES, ANSI Company Member Forum and International Policy Committee, and IEC USNC Council Board.
