A partnership for coherence in the U.S. credentialing marketplace

These are among the many questions that consumers and employers have to ask every day, and a lack of transparency in the current credentialing maze has fueled the confusion and created a buyer-beware environment. When every credential is unique to its issuer and impossible to compare with others, they all lose their value to job seekers and employers.

A coherent and transparent credentialing marketplace – one that all users can understand and use effectively – is essential to advancing the interests of the American workforce and strengthening the economy. This is the vision that drives the Credential Transparency Initiative.
George Washington Institute of Public Policy (GWIPP), Workcred – an affiliate of the American National Standards Institute (ANSI), and Southern Illinois University (SIU) are leading the Credential Transparency Initiative to create greater coherence and transparency in the U.S. credentialing marketplace. The initiative will develop common terms for describing key features of credentials; create a voluntary, web-based registry for sharing the resulting information; and test practical apps (software applications for mobile devices) for employers, students, educators, and other credentials stakeholders.

Credential Registry

The Credential Registry will allow users to easily compare the quality and value of workforce credentials using a web-based system with information provided directly by the institutions issuing the credentials. The registry will encompass all kinds of credentials – from educational degrees and certificates to industry certifications, occupational licenses, and micro-credentials.

Directory and other apps

The Initiative will develop a Credentialing Directory App, which will allow Credential Registry users to access the websites of participating credential issuers, build customized directories of credentials based on their own criteria, and publish the results. Other apps in development are intended to allow employers to communicate their credentialing requirements; support the review of competency-based resumes; and allow colleges and certification organizations to develop more transparent and assessable competency statements based on employer requirements.

THE GOALS ARE TRANSPARENCY AND CLARITY, AND TO HELP ALIGN CREDENTIALS WITH THE NEEDS OF STUDENTS, JOB SEEKERS, WORKERS, AND EMPLOYERS.

THE CREDENTIAL TRANSPARENCY INITIATIVE IS A PARTNERSHIP LED BY
