

The American National Standards Institute (ANSI) has delivered education and training services to meet the needs of its membership and the broader voluntary consensus standardization community for nearly 90 years. These services are aligned not only with the Institute's mission, but also with the *United States Standards Strategy*.

The Institute's goal is to meet the information and education needs of its members, raise awareness of standards within the academic community and the general public, and provide training services where expertise exists based on the Institute's unique mission. As coordinator of the U.S. national standardization system, and as the U.S. representative to the International Organization for Standardization (ISO), the International Electrotechnical Commission (IEC) — via the U.S. National Committee, and the International Accreditation Forum, ANSI is uniquely suited to deliver standards-related education and training services.

learning in your own space and at your own pace

www.StandardsLearn.org

Whether you are a student who wants to develop more in-depth knowledge about how standards affect your field of study, or a newcomer to the standards arena and need to expand your awareness of the standardization process, www.StandardsLearn.org is your premier online source for standards and conformity assessment education.

COURSES

The e-Learning content provided by the American National Standards Institute (ANSI) illustrates the importance of standards and compliance programs in the U.S. and around the globe. Currently, two long-form courses are offered:

- *Why Standards Matter*
A general introduction to standards and conformity assessment activities

- *U.S. Standards System – Today & Tomorrow*
Spotlight on the U.S. national standards system

In addition, a series of short courses presents opportunities for quick study on a variety of issues affecting the standards and conformity assessment community. An additional course on standardization in the international arena will be available soon. All of the courses and educational resources are free and provided by ANSI as a public service.

To view current course offerings, please visit [**www.StandardsLearn.org**](http://www.StandardsLearn.org)

ABOUT e-LEARNING

ANSI is committed to bringing dynamic e-Learning options to the general public as well as the standardization and academic communities.

The easy-to-use educational tools offered on www.StandardsLearn.org address the full range of standards activities. The asynchronous (self-paced) educational model allows you to learn at your own speed and convenience. All of the courses and resources are available 24/7 – anywhere you have access to a computer and the Internet.

OTHER RESOURCES

In addition to the e-Learning programs, www.StandardsLearn.org connects you with useful information on national and international voluntary standardization activities:

- **Standards Education Database**
Includes links to current national and international standards-setting activities and organizations that provide information on health and safety, construction, testing and accreditation, wireless communication, and much more

- **Acronyms Database**
Contains nearly 1,500 acronyms used in the standards and conformity assessment community
