

SPONSORING ORGANIZATIONS (as of February 1, 2008)

The United States National Committee (USNC) of the International Electrotechnical Commission (IEC) gratefully acknowledges the organizations that have already stepped forward to commit financial resources in support of IEC 2010.

With more than sixty planned technical committee meetings and an expected turnout of more than 1,500 delegates, the generosity of these sponsors will help to ensure the success of the IEC's 74th General Meeting.
