U.S.-German Standards Panel 2023

Tuesday, April 04, 2023 and
Wednesday, April 05, 2023

Washington D. C., USA
Panels hybrid, discussions F2F only

After a pause of four years due to the global COVID pandemic it is our great pleasure to invite you to the next round of our bilateral **U.S.-German Standards Panel**. In order to enable a broad participation, the Panel will allow for physical participation and virtual participation for some sessions.

At the Standards Panel, beginning on 4 April 2023, we will take a closer look at current standardization strategies in the US and Europe as well as on how digitalization will affect the standardization work in standards committees and the future format and use of standards deliverables.

In the afternoon sessions, we will then deep-dive into discussions on

- Artificial Intelligence
- Climate Change

Those afternoon discussions will be held physically in order to allow for an active exchange among the participants.

The results of these sessions will then be exchanged and summarized in a face-to-face session of the Standards Panel on the following day, 5 April 2023.

We look forward to welcoming you to the US-German Standards Panel 2023 either physically in Washington or virtually for the afternoon panels. Further details to follow soon.

Supported by:

on the basis of a decision
by the German Bundestag
