The Role of Certified Professionals in Urban Infrastructure Planning and Sustainable Development, March 2, 2016 Webinar, ANSI Network on Smart and Sustainable Cities

Speaker Biographies

Priya Edjlali
Priya Edjlali, project manager, small commercial buildings, at the U.S. Department of Energy’s Building Technologies Office, works on developing a skilled clean energy workforce and on demonstration and national scale-up of business and technology solutions that can effectively help small and medium commercial buildings improve their energy efficiency.

Priya also assisted states in developing policy and program frameworks that supported cost-effective energy efficiency initiatives designed to increase annual statewide energy savings as part of DOE’s State Energy Program. Previously, her work has included energy economics consulting for the DC Office of People’s Council, regulatory and pricing work for Dominion transmission, market research for Dominion Virginia Power, lean six-sigma operations management for Iberdrola Renewables, and health, safety, security, and environment standards development for E.ON Climate and Renewables in Dusseldorf, Germany.

Doug Gatlin
Doug Gatlin, senior vice president, global service delivery, Green Business Certification Inc. (GBCI), is responsible for strategic execution of critical programs including Leadership in Energy & Environmental Design (LEED) and other GBCI certifications, test development and delivery, and enterprise wide support resources.

Throughout his tenure Doug has been committed to the user experience. He led the launch of LEED v4 on the program delivery side and worked to establish new strategic enterprise programs such as LEED Volume and Proven Provider. He also served as Director of LEED For Existing Buildings, supporting the launch of LEED EB: O&M.

Doug has spent most of his career creating market transformation initiatives. He worked for nearly 10 years with the U.S. EPA’s ENERGY STAR Buildings, and before that was a program manager at the Washington, DC based Climate Institute.

Doug holds a Bachelor’s in Political Science from Duke and a Master’s in Public Policy from Georgetown. He lives with his wife and two children in Silver Spring, MD.

Vijay Krishna
Vijay Krishna, Ph.D., director of personnel credentialing accreditation programs, ANSI, is responsible for managing ANSI accreditation of personnel certification bodies under ISO/IEC 17024 and the associated Conference for Food Protection Manager program, as well as the accreditation of training certificates under ASTM 2659.

Dr. Krishna is a recognized expert in the field and works closely with various national and international agencies that are involved in developing competency-based credentialing systems. He has taught courses in organizational change and leadership at The George Washington University and published in the Human Resource Development International, Advances in Human Resources, International Journal.
of Knowledge, Culture, and Change Management. Dr. Krishna’s academic qualifications include a doctorate in human resource development from The George Washington University.

Richard Lawrence
Richard Lawrence is executive director of the North American Board of Certified Energy Practitioners (NABCEP) which administers personnel certifications for renewable energy professionals in North America. He holds an MS in Environmental Education from Lesley University, where he focused on renewable energy education, training, and workforce development. He joined NABCEP in 2011 as the Director of Operations, and took over as Executive Director in 2013. Prior to NABCEP, he worked for ten years as a renewable energy educator and advocate with several non-profit organizations and community colleges throughout the Northeastern U.S.

Eric Woodroof
Eric A. Woodroof, Ph.D., CEM, CRM, PCF, is widely recognized both nationally and internationally for helping energy and environmental projects get approved and implemented, having helped over 400 organizations and governments improve profits with energy-environmental solutions. He has over 20 years of experience in energy management, consulting and training. His clients have included large corporations, universities, airports, utilities, cities, and the U.S. and foreign governments. He has written widely in the field, and is chairman of the Association of Energy Engineers (AEE)’s Carbon & GHG Reduction Manager (CRM) program certification board, and served as a board member for AEE’s Certified Energy Manager (CEM) program from 1999-2013. He is also founder of ProfitableGreenSolutions.com.
