Activity domain	Entity	Title of deliverable	Scope of deliverable	Current status	Starting date	Target date
Smart City	ITU-T SG13 Q2	<b>Y.IoT-common-reqts,</b> Common requirements of Internet of Things	<p>This Recommendation provides the common requirements of Internet of Things (IoT) based on abstracted use cases and cross-domain use cases of IoT. The abstracted use cases are derived from application use cases, or derived from the definition and characteristics of the IoT regarded as general abstract use cases. The cross-domain use cases refer to use cases that cover multiple application domains (e.g. e-Health, ITS, Smart Home, etc.).</p> <p>This Recommendation builds on the overview of IoT [ITU-T Y.2060], developing the common requirements based on the IoT reference model.</p> <p>The scope of this Recommendation includes:</p> <ul style="list-style-type: none"> <li>- Abstracted use cases</li> <li>- Cross-domain use cases</li> <li>- Key areas of consideration from a requirements perspective</li> <li>- Common requirements of IoT</li> </ul> <p>Appendix I provides typical application use cases.</p>	Draft Recommendation	2012-05	2014-06
