Call for comment on proposals listed

This section solicits your comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments should be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate.

Ordering Instructions for “Call-for-Comment” Listings

1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

* Standard for consumer products
Comment Deadline: May 4, 2003

UL (Underwriters Laboratories, Inc.)

Revisions

These requirements cover Schedule 40 and Schedule 80 extruded rigid PVC (poly (vinyl chloride)) electrical conduit, and fittings consisting of elbows and other bends made from and for use with this conduit. The designations “Schedule 40” and “Schedule 80” refer to USA trade sizes of conduit having iron-pipe-size outside diameters and specific wall thicknesses.

Click here to see these changes in full, or look at the end of “Standards Action.”

Send comments (with copy to BSR) to: Paul Lloret, UL-CA; Paul.E.Lloret@us.ul.com

Comment Deadline: May 19, 2003

ASA (ASC S1) (Acoustical Society of America)

Revisions

BSR S1.17/Part 1-200x, Microphone Windscreens - Part 1: Measurements and Specification of Insertion Loss in Still or Slightly Moving Air (revision of ANSI S1.17/Part 1-2000)

This Standard, Part 1 of ANSI S1.17, specifies a test method that characterizes the aoustical performance of windscreens for measuring microphones in still or slightly moving air. The insertion loss is determined by measuring the sound pressure levels at a microphone with and without a windsreen in either a reverberant- (diffuse-) or free-field condition, or both.

Single copy price: $90.00

Order from: Susan Blaeser, ASA; sblaeser@aip.org

Send comments (with copy to BSR) to: Same

BHMA (Builders Hardware Manufacturers Association)

New Standards

BSR/BHMA A156.27-200x, Revolving Doors (new standard)

Requirements in this standard apply to power operated revolving type doors which rotate automatically when approached by pedestrians, some small vehicular use, and manual revolving type doors for pedestrians. Included are provisions to reduce the chance of user injury and entrapment. Revolving doors for industrial or trained traffic are not covered in this Standard.

Single copy price: $18.00 (members $9.00)

Order from: Michael Tierney, BHMA; mpierney@snet.net. Send comments (with copy to BSR) to: Same

ITI (INCITS)

Reaffirmations

BSR INCITS 210-1998 (R200x), Information Technology - High-Performance Parallel Interface - Framing Protocol (HIPPI-FP) (reaffirmation of ANSI INCITS 210-1998)

Recommends revisions to the existing HIPPI-FP standard (Project 702) with the following goals: (a) No changes required for existing applications, (b) additional upper-layer protocol identifiers to support new applications, (c) inclusion of the material in the separate addendum, (d) It is possible that this proposed standard might define desirable additional capabilities identified during the development process. Single copy price: $18.00

Order from: ANSI

Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

Defines the mechanical, electrical, timing, and protocol requirements of the SCSI parallel interface to allow conforming devices to inter-operate. The SCSI parallel interface is a local I/O bus that may be operated over a wide range of transfer rates. Single copy price: $18.00

Order from: ANSI

Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

BSR INCITS 305-1998 (R200x), Information Technology - SCSI-3 Enclosure Services (SES) Command Set (reaffirmation of ANSI INCITS 305-1998)

Details the SCSI Enclosure Services (SES) command set documents, the commands and parameters necessary to manage and sense the state of the power supplies, cooling devices, displays, indicators, individual drives, and other non-SCSI elements installed in an enclosure. Single copy price: $18.00

Order from: ANSI

Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

BSR INCITS 306-1998 (R200x), Information Technology - SCSI-3 Block Commands (SBC) (reaffirmation of ANSI INCITS 306-1998)

Defines the command set extensions to facilitate operation of SCSI block devices. The clause(s) of this standard pertaining to the SCSI block device class, implemented in conjunction with the applicable clauses of the SCSI-3 Primary Commands, fully specify the standard command set for SCSI block devices. Single copy price: $18.00

Order from: ANSI

Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

Defines the command set extensions for operation of SCSI medium changer devices, and command set extensions that allow medium changer functions in other types of SCSI devices. Single copy price: $18.00

Order from: ANSI

Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

Defines the command set extensions to facilitate operation of SCSI storage array devices. Clauses of this standard pertaining to the SCSI storage array device class, implemented in conjunction with the applicable clauses within any of the SCSI command standards, shall specify the standard command set available for SCSI storage arrays.

Single copy price: $18.00
Order from: ANSI
Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

Specifies a physical-level, point-to-point, full-duplex, link interface for reliable, flow-controlled transmission of user data at 6400 Mbit/s, per direction, across distances of up to 1 km. A parallel copper cable interface for distances of up to 40 m is specified. Connections to a separate longer-distance optical interface are provided. Small fixed-size micropackets provide an efficient, low-latency, structure for small transfers, and a component for large transfers.

Single copy price: $18.00
Order from: ANSI
Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

BSR INCITS 305/AM1-2000 (R200x), Information Technology - SCSI-3 Enclosure Services (SES) (reaffirmation of ANSI INCITS 305/AM1-2000)

Consists of corrections to INCITS 305: 1998.

Single copy price: $18.00
Order from: ANSI
Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

Standard specifies an 8-bit code derived from, and compatible with, the 7-bit coded character set specified in ISO/IEC 646. The characteristics of this code are also in conformance with the code extension techniques specified in ISO 2022. Also specifies an 8-bit code with a number of options.

Single copy price: $18.00
Order from: ANSI
Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

ISO/IEC 9592 specifies a language independent nucleus of a graphics system. For integration into a programming language, PHIGS is embedded in a language dependent layer obeying the particular conventions of that language. This part of ISO/IEC 9593 specifies such a language dependent layer for the Ada computer programming language.

Single copy price: $18.00
Order from: ANSI
Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

Withdrawals

BSR INCITS 321-200x, Information Technology - Fibre Channel - Switch Fabric (FC-SW) (withdrawal of ANSI INCITS 321-1998)

Specifies tools and algorithms for interconnection and initialization of Fibre Channel switches to create a multi-switch Fibre Channel Fabric. This standard defines an E_Port ("Expansion Port") that operates in a manner similar to an N_Port and F_Port, as defined in ANSI X3.230, with additional functionality provided for interconnecting switches.

Single copy price: $18.00
Order from: ANSI
Send comments (with copy to BSR) to: Deborah Spittle, ITI (INCITS); dspittle@itic.org

NFPA (ASC B93) (National Fluid Power Association)

New Standards

BSR B93.77M-1987, Hydraulic fluid power - Cleanliness of parts and components - Method of measuring average steady-state pressure (to be used in conjunction with ANSI/(NFPA)T2.12.10) (revision of ANSI/(NFPA) T2.12.10-1993)

This standard provides recommended universal symbols for filter artwork which are capable of communicating specific filter performance parameters of interest to users. These symbols may be used with either the standards noted in the references or with any standard which has been harmonized with the reference shown.

Single copy price: $40.00
Order from: (NFPA) (ASC B93); jvanpinsker@nfpa.com
Send comments (with copy to BSR) to: June VanPinsker, (NFPA) (ASC B93); jvanpinsker@nfpa.com

FSR/(NFPA) T3.10.18-1990, Hydraulic fluid power - Filter artwork - Design drawings, inspection documents and data reporting (new standard)

This standard provides recommended universal symbols for filter artwork which are capable of communicating specific filter performance parameters of interest to users. These symbols may be used with either the standards noted in the references or with any standard which has been harmonized with the reference shown.

Single copy price: $40.00
Order from: (NFPA) (ASC B93)

This standard specifies sizes, dimensions and identification code for positive displacement hydraulic fluid power pump and motor mounting flanges:
- two-bolt flanges;
- four-bolt flanges.

It also specifies sizes, dimensions and identification for positive displacement hydraulic fluid power pump and motor shafts:
- straight shafts without thread;
- straight shafts with thread;
- tapered shafts with thread;
- 30o involute spline.

Single copy price: $66.00

Correction

Correction of Intent
In the Call for Comments section of the March 28th issue of Standards
Action, BSR/UL 817-200x was listed as a revision of ANSI/UL 817-1995.
It is actually a revision of ANSI/UL 817-2003.
Call for Comment Contact Information

The addresses listed in this section are to be used in conjunction with standards listed in Call for Comment. This section is a list of developers who have submitted standards for public review in this issue of Standards Action – it is not intended to be a list of all ANSI developers. Please send all address corrections to: Standards Action Editor, American National Standards Institute, 25 West 43rd Street, New York, NY 10036 or standact@ansi.org.

Initiation of Canvasses

The following ANSI-accredited standards developers have announced their intent to conduct a canvass on the proposed American National Standard(s) listed herein in order to develop evidence of consensus for submittal to ANSI for approval as an American National Standard. Directly and materially affected interests wishing to participate as a member of a canvass list, i.e., consensus body, should contact the sponsor of the standard within 30 days of the publication date of this issue of Standards Action. Please also review the section entitled “American National Standards Maintained Under Continuous Maintenance” contained in Standards Action for information with regard to canvass standards maintained under the continuous maintenance option.

ALI (Automotive Lift Institute)

Office: P.O. Box 33116
Indialantic, FL  32903

Contact: E.K. Fox

BSR/NALFA LF 01-200x, Laminate Flooring, Specifications and Test Methods (revision of ANSI/NALFA LF 01-2001)
Final actions on American National Standards

The standards actions listed below have been approved by the ANSI Board of Standards Review (BSR) or by an ANSI-Audited Designator, as applicable.

AAMI (Association for the Advancement of Medical Instrumentation)

New National Adoptions

Reaffirmations

ASME (American Society of Mechanical Engineers)

Revisions

Revisions

ASTM (ASTM International)

New Standards

Reaffirmations

ANSI T1.610-1998 (R2003), Generic Procedures for the Control of ISDN Supplementary Services (reaffirmation of ANSI T1.610-1998); 4/1/2003

ANSI T1.610a-1998 (R2003), Generic Procedures for the Control of ISDN Supplementary Services, Modification to the Redirecting Number Information Element (reaffirmation of ANSI T1.610a-1998); 4/1/2003

ANSI T1.622a-1998 (R2003), Message Waiting Indicator Control and Notification Supplementary Services and Associated Switching and Signaling Specifications (reaffirmation of ANSI T1.622a-1998); 4/1/2003

ANSI T1.622-1999 (R2003), Message Waiting Indicator Control and Notification Supplementary Services and Associated Switching and Signaling Specifications (reaffirmation of ANSI T1.622-1999); 4/1/2003

ANSI T1.625-1993 (R2003), Integrated Services Digital Network (ISDN) - Calling Line Identification Presentation and Restriction Supplementary Services (reaffirmation of ANSI T1.625-1993 (R1999)); 4/1/2003

ANSI T1.625a-1998 (R2003), Integrated Services Digital Network (ISDN) - Call Park Supplementary Service - Generic Procedures for the Control of ISDN Supplementary Services, Clarification for Number Identification (reaffirmation of ANSI T1.625a-1998); 4/1/2003

ANSI T1.654-1996 (R2003), Broadband Integrated Services Digital Network (B-ISDN) - Operations and Maintenance (OAM) Principles and Functions (reaffirmation of ANSI T1.654-1996); 4/1/2003

CSS (ASC Z21/83) (CSA America, Inc.)

Supplements

ANSI Z21.11.2a-2003, Gas-Fired Room Heaters, Volume II, Unvented Room Heaters, First Addenda (supplement to ANSI Z21.11.2-2002); 4/1/2003

IEEE (Institute of Electrical and Electronics Engineers)

New Standards

ANSI/IEEE 1278.4-2002, Recommended Practice for Distributed Interactive Simulation - Verification, Validation, and Accreditation (new standard); 3/31/2003

SCTE (Society of Cable Telecommunications Engineers)

**New Standards**

TIA (Telecommunications Industry Association)

**Reaffirmations**

**Revisions**

UL (Underwriters Laboratories, Inc.)

**Revisions**

**Corrections**

**Approval Rescinded**

At the request of ASTM, the approval of ANSI/ASTM D6890-2003 is rescinded. The standard was listed in the March 28th issue of Standards Action.

**Correction of Intent**

In the Final Actions section of the March 21st issue of Standards Action, ANSI/UL 817-2003 was listed as a revision of ANSI/UL 817-1995. It is actually a revision of ANSI/UL 817-2002.

**Designation Correction**

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers of the initiation and scope of activities expected to result in new or revised American National Standards. This information is a key element in planning and coordinating American National Standards. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards (January 2003 edition).

Following is a list of proposed new American National Standards or revisions to existing American National Standards that have been received from ANSI-accredited standards developers that utilize the periodic maintenance option in connection with their standards. Please also review the section entitled "American National Standards Maintained Under Continuous Maintenance" contained in Standards Action for comparable information with regard to standards maintained under the continuous maintenance option. Directly and materially affected interests wishing to receive more information should contact the standards developer directly.

ALI (Automotive Lift Institute)
Office: P.O. Box 33116
Indialantic, FL 32903
Contact: E.K. Fox
Fax: (321) 722-9931
E-mail: Fox@autolift.org

Covers lifts used to raise self-propelled ground vehicles typically used in facilities for the repair and service of automobiles, trucks, buses, rail and similar vehicles.

ASC X9 (Accredited Standards Committee X9, Incorporated)
Office: P.O. Box 4035
Annapolis, MD 21403
Contact: Isabel Bailey
Fax: (410) 663-7554
E-mail: Isabel.Bailey@X9.org

BSR X9.103-200x, Consumer Credit: Electronic contracting, chattel paper and promissory note (new standard)
The purpose of this American National Standard is to define the technical business specification that will permit the uncomplicated, safe and secure creation, transfer and clearing of electronic contracts consisting of electronic chattel paper and promissory notes (e.g., leases, retail installment sales contracts and loans secured by personal property).

ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)
Office: 1791 Tullie Circle, N.E.
Atlanta, GA 30329
Contact: Claire Ramspeck
Fax: (404) 321-5478
E-mail: cramspeck@ashrae.org

BSR/ASHRAE 158.2P-200x, Methods of Testing for Rating Refrigerant Pressure Regulating Valves (new standard)
This standard establishes methods of testing for rating refrigerant pressure regulating valves and applies to regulating valves used to control the flow of volatile refrigerants and responsive to inlet, to outlet, or to differential pressure, sensed locally or remotely.

BSR/ASHRAE 158.2-200x, Methods of Testing for Rating Refrigerant Pressure Regulating Valves (new standard)
This standard establishes methods of testing for rating refrigerant pressure regulating valves and applies to regulating valves used to control the flow of volatile refrigerants and responsive to inlet, to outlet, or to differential pressure, sensed locally or remotely.

BSR/ASHRAE 158.2-200x, Methods of Testing for Rating Refrigerant Pressure Regulating Valves (new standard)
This standard establishes methods of testing for rating refrigerant pressure regulating valves and applies to regulating valves used to control the flow of volatile refrigerants and responsive to inlet, to outlet, or to differential pressure, sensed locally or remotely.
This standard details construction and performance requirements for temperature compensation devices (TCD) to allow dispensing systems to adjust for full fill of vehicle fuel storage containers under all surrounding outdoor ambient temperature conditions. TCD’s also prevent overpressurization of vehicle fuel containers when the vehicle is fueled while in a cold environment and then parked in a warm environment.

This standard details construction and performance of newly produced hydrogen dispenser and fueling hose breakaway emergency shutoff devices.

This standard details construction and performance requirements of priority and sequencing equipment which is part of a hydrogen dispensing system.

This standard details construction and performance requirements for manually operated valves for use with high pressure hydrogen.

This standard details construction and performance requirements for automatic, pressure operated valves for high pressure hydrogen service, including those for use on compressed hydrogen vehicles and dispensing systems.

This standard details construction and performance requirements for automatic, pressure operated valves for high pressure hydrogen service.

This standard details construction and performance requirements for hydrogen compressors for use in compressed hydrogen fueling stations service.

BSR/DASMA 203-200x, Non-Fire Rated Rolling Doors (new standard)

This standard defines minimum design and performance specifications for non-fire rated rolling doors in commercial and industrial applications, consisting of assembled, interlocking slats of steel, stainless steel, or aluminum and is intended to cover commercial and industrial type doors normally used on garages, warehouses, factories and other places requiring doors generally used for vehicular traffic.

BSR/DASMA 204-200x, Standard for Fire Rated Rolling Door Assemblies (new standard)

This standard defines minimum design and performance specifications for fire rated rolling door assemblies in commercial and industrial applications, consisting of assembled, interlocking slats of steel or stainless steel. It is intended to cover commercial and industrial type warehouses, factories, and other facilities where a fire door is required to close an opening in a firewall during an emergency. Rolling fire doors intended for frequent use should be designed for high cycle operation.

BSR/DASMA 206-200x, Standard Method for Testing Rolling Steel Doors: Determination of Structural Performance Under Uniform Static Air Pressure Difference (new standard)

This test method describes the determination of the structural performance of door systems under uniform static air pressure difference, using a test chamber and is intended only for evaluating the structural performance associated with the specified test specimen and not the structural performance of adjacent construction. The proper use of this test method requires a knowledge of the principles of pressure and deflection measurement.

ESTA (ASC E1) (Entertainment Services and Technology Association)
Office: 875 Sixth Avenue, Suite 1005
New York, NY 10001
Contact: Karl Ruling
Fax: (212) 244-1502
E-mail: kruling@esta.org

BSR E1.25-200x, Recommended basic conditions for measuring the photometric output of stage and studio luminaries by measuring illumination levels produced on a planar surface (new standard)

This document describes the basic conditions for measuring the photometric output of stage and studio luminaries by testing methods that measure the illumination levels produced by the luminaires on a planar surface.

NALFA (North American Laminate Flooring Association)
Office: 1747 Pennsylvania Avenue N.W. Suite 1000
Washington, DC 20006
Contact: David Goch
Fax: (202) 835-0243
E-mail: dgoch@wc-b.com

BSR/NALFA LF 01-200x, Laminate Flooring, Specifications and Test Methods (revision of ANSI/NALFA LF 01-2001)
The product standard shall apply to the performance or residential and commercial use laminate flooring. The standard will be useful in guiding manufacturers and educating suppliers and consumers about the minimum requirements of laminate flooring is residential, light commercial, and commercial use settings.

NFPA (National Fire Protection Association)
Office: One Batterymarch Park
Quincy, MA 02269-9101
Contact: Arthur Cote
Fax: (617) 770-3500
E-mail: acote@nfpa.org

Covers minimum requirements for the installation, design, operation, testing, and maintenance of medium and high expansion foam systems.

Covers the general principles recommended for the installation of bulk oxygen systems on consumer premises where the supply to the consumer premises originates outside the consumer premises and is delivered by mobile equipment.

BSR/NFPA 10-200x, Standard for Portable Fire Extinguishers (revision of ANSI/NFPA 10-2002)
Covers the selection, installation, inspection, maintenance, and testing of portable extinguishing equipment.

Covers minimum requirements for Halon 1301 fire extinguishing systems for the use and guidance of those charged with the purchasing, designing, installing, testing, inspecting, approving, listing, operating and maintaining such systems.

Covers minimum requirements for carbon dioxide fire extinguishing systems for the use and guidance of those charged with the purchasing, designing, installing, testing, inspection, approving, listing, operating or maintaining such systems.
Covers minimum requirements for the design and installation of automatic sprinkler systems and of exposure protection sprinkler systems including the character and adequacy of water supplies to sprinkler systems.

Covers the design and installation of automatic sprinkler systems for one- and two-family dwellings and mobile homes.

Covers procedures for fire department operations in properties protected by automatic sprinklers; having outside sprinkler systems for exposure protection; and in buildings having standpipe systems.

BSR/NFPA 13R-200x, Standard for the Installation of Sprinkler Systems in Residential Occupancies up to and Including Four Stories in Height (revision of ANSI/NFPA 13R-2002)
Covers design and installation of automatic sprinkler systems for the protection against fire hazards in residential occupancies up to four stories in height.

Covers the design, installation, maintenance and testing of water spray fixed systems.

BSR/NFPA 24-200x, Standard for the Installation of Private Fire Service Mains and Their Appurtenances (revision of ANSI/NFPA 24-2002)
Covers requirements for installation of private fire service mains and their appurtenances supplying automatic sprinkler systems, open sprinkler systems, water spray fixed systems, foam systems, private hydrants, monitor nozzles or standpipe systems with references to water supplies private hydrants and hose houses. Also applies to combined service mains used to carry water for both fire service and other use.

Covers the reasonable safeguards for the prevention and control of fire and explosion hazards incident to drycleaning operations and for the protection of the employees and the public.

Applies to facilities and processes used for the manufacture of protective and decorative finishes or coatings for industrial, automotive, marine, transportation, institutional, household and other purposes.

BSR/NFPA 36-200x, Standard for Solvent Extraction Plants (revision of ANSI/NFPA 36-2001)
Covers reasonable requirements for the safety to life and property from explosion and fire in the design, construction and operation of solvent extraction processes involving the use of flammable solvents.

Applies to laboratories in which hazardous chemicals are handled or operated.

Applies to the storage, use and handling of compressed and liquefied gases in portable cylinders in all occupancies.

BSR/NFPA 72-200x, National Fire Alarm Code(r) (revision of ANSI/NFPA 72-2002)
Deals with the application, installation, performance, and maintenance of protective signaling systems and their components.

BSR/NFPA 76-200x, Recommended Practice for the Fire Protection of Telecommunications Facilities (revision of ANSI/NFPA 76-2002)
Standard proves minimum requirements for fire protection of telecommunication facilities, where telephone, data, cellular, internet, and video services are rendered.

Covers electric/electronic equipment, apparatus or systems supplied as part of industrial machinery or mass production industrial equipment that will promote safety to life and property.

Covers requirements for the design, installation and use of exhaust system components.

Covers fire protection considerations for field-erected water cooling towers of combustible construction or those in which the fill is of combustible material.

Applies to buildings in the course of erection, alteration or demolition.

Covers test methods to measures the response of materials exposed to controlled levels of radiant heating, with or without an external igniter.

BSR/NFPA 273-200x, Standard Method of Test for Determining the Degrees of Combustibility of Building Materials (new standard)
Determines the degree of combustibility of building materials by measuring the heat release rate and total heat release from specimens exposed to radiant heat using an oxygen consumption calorimeter.

BSR/NFPA 289-200x, Method of Fire Test for Room Fire Growth Contribution of Individual Fuel Packages (new standard)
This document describes a method of determining the contribution of individual fuel packages to heat and smoke release in a room environment, and is applicable to individual fuel packages that do not exceed 2.4m high by 2.4m wide by 2.4m deep in dimensions. This documentspecified three types of specimen mounting, depending on the fuel package to be investigated, as follows: (1) single decorative object, including combustible vegetation; (2) exhibit booth; and (3) stage settings.

Covers testing procedures, classification, and color coding of hydrants.

BSR/NFPA 326-200x, Standard for the Safeguarding of Tanks and Containers for Entry, Cleaning, or Repair (revision of ANSI/NFPA 326-1999)
Applies to the entry of underground storage tanks, operating at nominal atmospheric pressure, that have contained flammable or combustible liquids, and that might contain flammable or combustible vapors or residues.

BSR/NFPA 329-200x, Recommended Practice for Handling Releases of Flammable and Combustible Liquids and Gases (revision of ANSI/NFPA 329-1999)
Covers the procedures to be followed in the handling of underground leakage and flammable and combustible liquids. Included are procedures when life and property may be in danger; locating the sources of leakage; testing for underground leaks; tracing liquids underground; and, the removal and disposal of such liquids.
BSR/NFPA 405-200x, Recommended Practice for the Recurring Proficiency Training of Aircraft Rescue and Fire-Fighting Services (revision of ANSI/NFPA 405-1999)
Contains the minimum training evolutions and frequency requirements for maintaining a proficient and effective aircraft rescue and fire fighting (ARFF) team.

BSR/NFPA 408-200x, Standard for Aircraft Hand Portable Fire Extinguishers (revision of ANSI/NFPA 408-1999)
Covers fire safety requirements for the type, capacity, rating, number, location, installation, and maintenance of aircraft hand fire extinguishers to be provided for the use of flight crew members or other occupants of an aircraft for the control of incipient fires in the areas of aircraft that are accessible during flight.

BSR/NFPA 410-200x, Standard on Aircraft Maintenance (revision of ANSI/NFPA 410-1999)
Covers the fire safety requirements to be followed during aircraft maintenance.

BSR/NFPA 422-200x, Guide for Aircraft Accident Response (revision of ANSI/NFPA 422-1999)
Provides recommendations to assist investigating teams on all matters relating to fire; to assess effectiveness of airborne fire detecting and extinguishing systems and crew emergency operations, rescue and fire fighting services; and to collect data for study and analysis.

Covers the fire safety practices regarding location, construction, services, utilities, fire protection, operation and maintenance of new aircraft engine test facilities and modifications made to existing test facilities with could effect the fire and explosion hazard potential with such facilities. These facilities include test cells, test stands and engine run-up enclosures designed to operate only on ground level conditions of temperature and pressure.

BSR/NFPA 450-200x, Guide for Emergency Medical Services and Systems (new standard)
This document is designed to assist individuals, agencies, organizations, or systems as well as those interested or involved in EMS System design.

BSR/NFPA 502-200x, Standard for Road Tunnels, Bridges, and Other Limited Access Highways (revision of ANSI/NFPA 502-2001)
Covers guidance for those individuals responsible for the construction, operation, maintenance, and fire protection of limited access highways, tunnels, bridges, elevated roadways, and air right structures.

Applies to methods for evaluating potential for room flashover from fire involving the contents, furnishings, and interior finish of a room. The methods addressed by this Guide include prevention of ignition, installation of automatic fire suppression systems, control of ventilation factors, and limitation of the rate of heat release of individual and grouped room contents, furnishings and interior finish.

BSR/NFPA 600-200x, Standard on Industrial Fire Brigades (revision of ANSI/NFPA 600-2000)
Covers the organizing, operating, training, and equipping of private fire brigades.

Covers the selection and training of guards who will perform fire loss prevention duties.

Contains requirements for the selection, installation, operation, and maintenance of equipment that detects concentrations of carbon monoxide that could pose a risk to the health of most occupants in family living units. This document is limited to carbon monoxide warning equipment for use in family living units.

Provides recommendations for fire prevention and fire protection for electric generating plants.

Provides recommendations (not requirements) for fire prevention and fire protection for hydroelectric generating plants.

BSR/NFPA 900-200x, Building Energy Code (new standard)
These regulations shall control the minimum energy efficient requirements for:

a) the design, construction, reconstruction, alteration, repair, demolition, removal, inspection, issuance and revocation of permits or licenses, installation of equipment related to energy conservation in all buildings and structures and parts thereof;
b) the rehabilitation and maintenance of construction related to energy efficiency in existing buildings;
c) the standards or requirements for materials to be used in connection therewith;
d) the establishment of reasonable fees for permits and inspections.

BSR/NFPA 909-200x, Code for the Protection of Cultural Resources (revision of ANSI/NFPA 909-2001)
Describes principles and practices of fire safety for cultural properties and for those who operate, use, or visit them. It covers ongoing operation and rehabilitation and acknowledges the need to preserve historic integrity.

BSR/NFPA 914-200x, Code for Fire Protection of Historic Structures (revision of ANSI/NFPA 914-2001)
Provides background material on the historic preservation field and its requirements, information regarding the identification of fire hazards, and recommendations for planning and design approaches and solutions appropriate for the historic building.

BSR/NFPA 1003-200x, Standard for Airport Fire Fighter Professional Qualifications (revision of ANSI/NFPA 1003-2000)
Identifies the level of professional competence required of the airport fire fighter for aircraft rescue and fire fighting.

BSR/NFPA 1035-200x, Standard for Professional Qualifications for Public Fire and Life Safety Educator (revision of ANSI/NFPA 1035-2000)
Identifies the professional levels of competence required of public fire educators. It specifically covers the requirements for knowledge and a progression through three levels of competency.

BSR/NFPA 1150-200x, Standard on Fire-Fighting Foam Chemicals for Class A Fuels in Rural, Suburban, and Vegetated Areas (revision of ANSI/NFPA 1150-1999)
Specifies requirements and test procedures for foam chemicals used in wildland fire fighting.

BSR/NFPA 1192-200x, Standard on Recreational Vehicles (revision of ANSI/NFPA 1192-2002)
Covers fire safety guidelines for fuel systems, fire detection equipment, existing facilities, and plumbing systems, including water distribution and drainage systems.

Provides construction requirements and use of land areas designated for recreational vehicle parks.

Covers the installation, maintenance and use of all public fire service communications systems and facilities.

Covers the evaluation of prior training in initial fire flow delivery procedures by fire department personnel engaged in structural fire fighting efforts.

Provides the fire department training officers or other fire service personnel with guidance on the establishment of a dwelling fire safety program.

Covers minimum requirements for an incident management system to be used by fire departments to manage all emergency incidents.

BSR/NFPA 1581-200x, Standard on Fire Department Infection Control Program (revision of ANSI/NFPA 1581-2000)

Contains minimum requirements for a fire department infection control program.

Provides requirements for the construction, care and use of fire department ground ladders.

Covers requirements for the use, maintenance, inspection and service testing of fire department ground ladders.

Specifies the minimum requirements for the design, performance, testing, and certification of newly manufactured hydraulic powered rescue tools used to facilitate the extraction of victims from entrapment.

Applies to the design, manufacturing, and certification of new protective ensembles or new individual elements of the protective ensemble.

Covers minimum design and performance criteria and test methods for protective clothing designed to protect fire fighters against adverse environmental effects during structural fire fighting.

Specifies minimum design and performance criteria and test methods for protective clothing designed to provide limb/torso protection for fire fighters against adverse environmental effects encountered during proximity fire fighting operations.

Covers design criteria, performance criteria, and test methods for Vapor-Protective Suits designed to protect emergency response personnel against exposure to specified chemicals in vapor and liquid splash environments during hazardous chemical emergencies.

Covers design criteria, performance criteria, and test methods for Liquid Splash-Protective Suits designed to protect emergency response personnel against exposure to specified chemicals in liquid-splash environments during hazardous chemical emergencies.

BSR/NFPA 2010-200x, Standard on Aerosol Fire Extinguishing Systems (new standard)

To provide a system that will be designed, manufactured and installed in a manner that is safe and truly beneficial to society.

Provide minimum design regulations to safeguard life and limb, health, property, and public welfare by regulating and controlling the permitting, design, construction, quality of materials, use and occupancy, location, and maintenance of all buildings and structures within the jurisdiction and certain equipment specifically regulated herein.

**American National Standards Maintained Under Continuous Maintenance**

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option:

- **AAMVA**
- **AGRSS**
- **ASC B109 (AGA)**
- **ASHRAE**
- **ASME**
- **ASTM**
- **NBBPVI**
- **NSF International**
- **TIA**
- **Underwriters Laboratories Inc.**

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on "Standards Information," and see "American National Standards Maintained Under Continuous Maintenance". This information is also available directly at http://public.ansi.org/ansionline/Documents/Standards%20Activities/American%20National%20Standards/Procedures%20Guides%20Forms/.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.

**SCTE (Society of Cable Telecommunications Engineers)**

**Office:** 140 Phillips Road

**Exton, PA 19341**

**Contact:** Stephen Oksala

**Fax:** (610) 363-5898

**E-mail:** soksala@scte.org

BSR/SCTE DVS 042-200x, DES CBC Packet Encryption (new standard)

Data Encryption Standard (DES) Cipher Block Chaining (CBC) specifies the encryption and decryption of packet data in digital audio, video and data signals. It provides guidelines for implementing and using the modes of operation.
ISO and IEC Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments

Comments regarding ISO documents should be sent to Henrietta Scully at ANSI's New York offices, those regarding IEC documents to Charles T. Zegers, also at ANSI New York offices. The final date for offering comments is listed after each draft.

ISO Standards

**AIRCRAFT AND SPACE VEHICLES (TC 20)**

ISO/DIS 4118, Alr cargo - Non-certified lower-deck containers for large-capacity aircraft - Specification and testing - 05/23/2003, $84.00

**DENTISTRY (TC 106)**

ISO/DIS 10650, Dentistry - Powered polymerization activators - 05/23/2003, $62.00

**MECHANICAL VIBRATION AND SHOCK (TC 108)**

ISO/DIS 18437-2, Mechanical vibration and shock - Characterization of the dynamic mechanical properties of resilient materials - Part 2: Resonance method - 05/28/2003, $46.00

**MICROBEAM ANALYSIS (TC 202)**

ISO/DIS 17470, Microbeam analysis - Electron probe microanalysis - Guidelines for qualitative point analysis by wavelength dispersive X-ray spectrometry - 05/28/2003, $39.00

**PLASTICS (TC 61)**

ISO/DIS 13894-2, High-pressure decorative laminates - Composite elements - Part 2: Specifications for composite elements with wood-based substrates for interior use - 05/28/2003, $42.00

ISO/DIS 21368, Adhesives - Guidelines for the fabrication of adhesively bonded structures and for reporting procedures suitable for the risk evaluation of such structures - 05/21/2003, $51.00

**ROAD VEHICLES (TC 22)**

ISO/DIS 11407, Commercial road vehicles - Mechanical coupling between towing vehicles, with coupling mounted forward and below, and centre-axle trailers - Interchangeability - 05/28/2003, $39.00

IEC Standards

23/332/FDIS, IEC 61534-1 Ed.1: Powertrack systems - Part 1: General requirements, 05/30/2003

56/856/FDIS, IEC 60300-1, Ed.2: Dependability management - Part 1: Dependability management systems, 05/30/2003

66/324/FDIS, IEC 61010-2-010 Ed.2: Safety requirements for electrical equipment for measurement, control, and laboratory use - Part 2-010: Particular requirements for laboratory equipment for the heating of material, 05/30/2003

66/325/FDIS, IEC 61010-2-051 Ed.2: Safety requirements for electrical equipment for measurement, control, and laboratory use - Part 2-051: Particular requirements for laboratory equipment for mixing and stirring, 05/30/2003

66/326/FDIS, IEC 61010-3-061 Ed.2: Safety requirements for electrical equipment for measurement, control, and laboratory use - Part 2-061: Particular requirements for laboratory atomic spectrometers with thermal atomization and ionization, 05/30/2003

66/327/FDIS, IEC 61010-2-081 A1 Ed.1: Safety requirements for electrical equipment for measurement, control and laboratory use - Part 2-081: Particular requirements for automatic and semi-automatic laboratory equipment for analysis and other purposes, 05/30/2003

68/271/FDIS, IEC 60404-6, Ed. 2: Magnetic materials - Part 6: Methods of measurement of the magnetic properties of magnetically soft metallic and powder materials at frequencies in the range 20 Hz to 200 kHz by the use of ring specimens, 05/30/2003

108/65/FDIS, IEC 62018 Ed.1: Power consumption of information technology equipment - Measurement methods, 05/30/2003

15C/1488/FDIS, IEC 60893-2, Ed. 2: Industrial rigid laminated sheets based on thermosetting resins for electrical purposes - Part 2: Methods of test, 05/23/2003

17B/1277/FDIS, IEC 60947-5-7, Ed. 1: Low-voltage switchgear and controlgear - Part 5-7: Control circuit devices and switching elements - Requirements for proximity devices with analogue output, 05/23/2003

18A/243/FDIS, Electrical installations in ships- Part 354: Single- and three-core power cables with extruded solid insulation for rated voltages 6kV (Um = 7.2 kV) up to 30kV (Um = 36kV), 05/23/2003

20/626/FDIS, Amendment 2 to IEC 60227-5, Ed. 2: Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V - Part 5: Flexible cables (cords), 05/23/2003

34A/1032/FDIS, Amendment 1 to IEC 62035, Ed.1: Discharge lamps (excluding fluorescent lamps) - Safety specifications, 05/23/2003

45A/485/FDIS, IEC 61468 A1 Ed. 1: Nuclear power plants - In-core instrumentation - Characteristics and test methods of self-powered neutron detectors, 05/23/2003

SWITCHGEAR AND CONTROLGEAR (TC 17)

IEC 61915 TS Ed. 1.0 b:2003, Low-voltage switchgear and controlgear - Principles for the development of device profiles for networked industrial devices, $127.00
This section provides information on standards activity within CEN - the European Committee for Standardization - and CENELEC - the European Committee for Electrotechnical Standardization. CEN and CENELEC are composed of European member bodies whose countries cooperate within the European Economic Community (Common Market) and the European Free Trade Association (EFTA). Their primary purpose is to develop standards needed to harmonize European interests and prevent technical barriers. Both CEN and CENELEC are committed to adopting standards developed by ISO and IEC wherever possible.

ANSI is publishing this information to give U.S. interests an opportunity to obtain information, and to comment on proposed European Standards and/or Harmonization Documents being circulated for enquiry. Anyone interested in obtaining this information, and/or commenting on proposals should order copies from ANSI.

Comments regarding CEN are to be sent to Henrietta Scully at ANSI’s New York offices. Comments regarding CENELEC are to be sent to Charles T. Zegers, also at ANSI’s New York offices.

**Ordering Instructions**

ENs are currently available via ANSI’s ESS (Electronic Standards Store), accessed at www.ansi.org.

prENs can be made available via ANSI’s ESS “on-demand” via e-mail request. Send your request for a prEN to be made available via the ESS to Customer Service at sales@ansi.org and the document will be posted to the ESS within 3 working days. Please be ready to provide the date of the Standards Action issue in which the prEN document you are requesting appears.

---

**CEN**

**European drafts sent for CEN enquiry**

The following European drafts have been sent to CEN members for enquiry and comment. If the draft is a proposed adoption of an International Standard, it is so noted. The final date for offering comments is listed after each proposal.

- prEN 1710, Equipment and components intended for use in potentially explosive atmospheres in mines - 6/27/2003, $76.00
- prEN 13481-8, Railway applications - Track - Performance requirements for fastening systems - Part 8: Fastening systems for track with heavy axle loads - 8/27/2003, $26.00
- prEN 14125, Pipework for underground installation at petrol stations - 5/27/2003, $60.00
- prEN 14617-2, Agglomerated stone - Test methods - Part 2: Determination of flexural strength (bending) - 8/27/2003, $30.00
- prEN 14648, Building hardware - Fittings for shutters - Requirements and test methods - 8/27/2003, $50.00
- prEN 14649, Precast concrete products - Test method for strength retention of glass fibres in cement and concrete (SIC TEST) - 8/27/2003, $30.00
- prEN 14650, Precast concrete products - General rules for factory production control of metallic fibre concrete - 8/27/2003, $20.00
- prEN 14651, Precast concrete products - Test method for metallic fibre concrete - Measuring the flexural tensile strength - 8/27/2003, $42.00
- prEN 14653-1, Manually operated hydraulic shoring systems for groundwork support - Part 1: Product specifications - 8/27/2003, $88.00
- prEN 14653-2, Manually operated hydraulic shoring systems for groundwork support - Part 2: Assessment by calculation or test - 8/27/2003, $30.00
- prEN 14654, Management and control of cleaning operations in drains and sewers - 8/27/2003, $50.00

**European drafts sent for formal vote (for information)**

The following European drafts have been sent to CEN members for formal vote. If the draft is a proposed adoption of an International Standard, it is so noted.
prCEN/TR 14823, Durability of wood and wood-based products -
Quantitative determination of pentachlorophenol in wood - Gas
chromatographic method

prEN 246 REVIEW, Sanitary tapware - General specifications for flow
rate regulators

prEN 1463-1: 1997/prA1, Road marking materials - Retroreflecting
road studs - Part 1: Initial performance requirements

prEN 1759-4, Flanges and their joints - Circular flanges for pipes,
valves, fittings and accessories, class designated - Part 4:
Aluminium alloy flanges

prEN 1839, Determination of explosion limits of gases and vapours

prEN 13820, Thermal insulating materials for building applications -
Determination of organic content

prEN 13858, Corrosion protection of metals - Non-electrolytically
applied zinc flake coatings on iron or steel components

prEN 14143, Respiratory protective devices - Self-contained
re-breathing diving apparatus

prEN 14149, Packaging - Complete, filled transport packages and unit
loads - Impact test by rotational drop

prEN ISO 284 REVIEW, Conveyor belts - Electrical conductivity -

prEN ISO 6887-2, Microbiology of food and animal feeding stuffs -
Preparation of test samples, initial suspension and decimal dilutions
for microbiological examination - Part 2: Specific rules for the

prEN ISO 6887-3, Microbiology of food and animal feeding stuffs -
Preparation of test samples, initial suspension and decimal dilutions
for microbiological examination - Part 3: Specific rules for the

prEN ISO 6887-4, Microbiology of food and animal feeding stuffs -
Preparation of test samples, initial suspension and decimal dilutions
for microbiological examination - Part 4: Specific rules for the
preparation of products other than milk and milk products, meat and
meat products, and fish and fishery products (ISO/FDIS 6887-4: 2003)

prEN ISO 8754 REVIEW, Petroleum products - Determination of sulfur
content - Energy-dispersive X-ray fluorescence spectrometry
(ISO/FDIS 8754: 2003)

prEN ISO 9920, Ergonomics of the thermal environment - Estimation of
the thermal insulation and evaporative resistance of a clothing
ensemble (ISO 9920: 1995)

prEN ISO 14915-2, Software ergonomics for multimedia user interfaces
- Part 2: Multimedia control and navigation (ISO/FDIS 14915-2:
2003)

prEN ISO 19901-4, Petroleum and natural gas industries - Specific
requirements for offshore structures - Part 4: Geotechnical and
foundation design considerations (ISO/FDIS 19901-42003)

prEN ISO 20482, Metallic materials - Sheet and strip - Erichsen
cupping test (ISO/FDIS 20482: 2003)
Registration of Organization Names in the United States

The Procedures for Registration of Organization Names in the United States of America (document ISSB 989) require that alphanumeric organization names be subject to a 90-day Public Review period prior to registration. For further information, please contact the Registration Coordinator at (212) 642-4975.

The following is a list of alphanumeric organization names that have been submitted to ANSI for registration. Alphanumeric names appearing for the first time are printed in bold type. Names with confidential contact information, as requested by the organization, list only public review dates.

Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by members of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland, who in turn disseminates the information to all WTO members. The purpose of this requirement is to provide trading partners with an opportunity to review and comment on the regulation before it becomes final.

To distribute information on these proposed foreign technical regulations, the National Center for Standards and Certification Information (NCSCI), National Institute of Standards and Technology (NIST), provides an on-line service - Export Alert! - that allows interested parties to register and obtain notifications, via e-mail, for countries and industry sectors of interest to them. To register, go to http://ts.nist.gov/ncsci and click on "Export Alert!".

NCSCI serves as the U.S. WTO TBT inquiry point and receives copies of all notifications, in English, to disseminate to U.S. industry. To obtain copies of the full text of the regulations or for further information, contact NCSCI, NIST, 100 Bureau Drive, Stop 2160, Gaithersburg, MD 20899-2160; telephone (301) 975-4040; fax (301) 926-1559, e-mail - ncsci@nist.gov.

NCSCI will also request an extension of the comment period and transmit comments to the issuing foreign agency for consideration.
Accredited Organizations

Approval of Accreditation

North American Electric Reliability Council (NERC)
The Executive Standards Council has approved the accreditation of the North American Electric Reliability Council (NERC) as a Developer of American National Standards using its own procedures for documenting consensus, effective March 24, 2003. For additional information, please contact: Mr. Ron Niebo, Assistant to the President, North American Electric Reliability Council, 116-390 Village Boulevard, Princeton, NJ 08540; PHONE: (609) 452-8060; FAX: (609) 452-9650; E-mail: Ron.Niebo@nerc.net.

ANSI Accreditation Program for Third Party Personnel Certification Agencies

Application for Accreditation

Experior Assessments

Comment Deadline: April 28, 2003

Experior Assessments, 1360 Energy Park Drive, St. Paul, MN 55108, PHONE: (651) 647-1723, has submitted an application for ANSI/CFP accreditation of its personnel certification program utilizing the Conference for Food Protection Standards. Please send your comments by April 28, 2003 to Dr. Roy Swift, Program Director, Personnel Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036, FAX: (202) 293-9287 or e-mail: rswift@ansi.org.

ANSI Accreditation Program for Third Party Product Certification Agencies

Application for Scope Expansion

Underwriters Laboratories, Inc.

Comment Deadline: April 28, 2003

Underwriters Laboratories, Inc., 1655 Scott Blvd., Santa Clara, CA 95007-8542, PHONE: (408) 985-2400, has submitted an application for expanding its scope of accreditation at its Santa Clara facility to include the following product area:

- Licensed Radio Service Equipment

Please send your comments by April 28, 2003 to Reinaldo Balbinho Figueiredo, Program Director, Product Certification Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036, FAX: (202) 293-9287 or e-mail: rfigueir@ansi.org.

Change of Fee Structure

Comment Deadline: April 28, 2003

The ANSI Accreditation Program for Third Party Product Certification Agencies has proposed the following addition to its fee structure:

ANSI scope extension fee: $1000.00 per request

Please send your comments by April 28, 2003 to Reinaldo Balbinho Figueiredo, Program Director Conformity Assessment, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036, FAX: (202) 293-9287 or e-mail: rfigueir@ansi.org.

ANSI-RAB National Accreditation Program for Quality Management Systems

Notice of Accreditation

Registrar

Cotecna Quality Resources Inc.

The ANSI-RAB National Accreditation Program for Registrars of Quality Management Systems is pleased to announce that the following registrar has earned accreditation:

Cotecna Quality Resources Inc.
Ricardo Reyes
14505 Commerce Way, Suite 501
Miami Lakes, FL 33061

FAX: (305) 827-0816
E-mail: ricardo.reyes@cotecnausa.com

U.S. National Committee of the IEC

U.S. Proposal for Initiation of International Standard

SC45A - Reactor Instrumentation

The following proposal for the initiation of an international Standard has been submitted to the International Electrotechnical Commission: SC 45A: Reactor Instrumentation

Title:
Nuclear Power Plant - Instrumentation and Control, Methods for Verifying the Performance of Safety-Related Instrument Channels

Scope:
The purpose of this standard is to describe methods to the nuclear power industry in demonstrating acceptable performance of safety system instrument channels through response time testing, calibration verification, and other means. This standard contains the main topics in its body and the details in its Appendices. In addition to safety-related instrument channels, this standard may also be used for non-safety-related and other instrument channels.

For further information, contact Gary Johnson, Computer Safety and Reliability Center, Lawrence Livermore National Laboratory, 7000 East Avenue, Building, 543, Rm 1237, L632, Livermore, CA 94550, PHONE: (925) 423-8834, FAX: (925) 422-9913, E-Mail: johnson27@llnl.gov.
U.S. Technical Advisory Groups

Approval of Reaccreditation
ISO/TC 96 - Cranes

The Executive Standards Council has approved the reaccreditation under revised operating procedures of the U.S. Technical Advisory Group to ISO/TC 96, Cranes, and the appointment of ASME International as the new TAG Administrator, effective March 28, 2003. For additional information, please contact: Mr. Joseph Wendler, Senior Engineering Administrator, ASME International, Three Park Avenue, New York, NY 10016-5990; PHONE: (212) 591-8524; FAX: 212/591-8501; E-mail: wendlerj@asme.org.

Call for Participants
U.S. TAG Organizational Meeting of IEC/TC 8 - System Aspects for Electrical Energy Supply

The U.S. has not been a Participating Member of IEC/TC 8 prior to its recent expansion. The United States National Committee is hosting a fact-finding meeting in April 2003 for all material interests in order to organize this country’s interface with the newly constructed TC. The scope of TC 8 is as follows:
To prepare the necessary standards framework and co-ordinate the development, in co-operation with other TC/SCs, of the international standards needed to facilitate the functioning of electricity supply systems in open markets.

Anyone wishing to participate in this Technical Committee should contact: Kevin Sullivan, American National Standards Institute, USNC/IEC Assistant Secretary, 25 West 43rd Street, New York, NY 10036, PHONE: (212) 642-4963, E-mail: ksullivan@ansi.org.
PROPOSED REQUIREMENTS FOR THE SIXTH EDITION OF THE STANDARD FOR
SCHEDULE 40 AND 80 RIGID PVC CONDUIT, UL 651

For your convenience in review, proposed additions to existing requirements are shown underlined. New requirements are identified as (NEW).

3.3 Both ends of each length of conduit shall be perpendicular to the longitudinal axis of the conduit.

Exception: An exterior chamfer on the end of conduit is not prohibited. A chamfered end is not considered to be a taper.

(NEW)
5.3 When provided, conduit with a chamfer shall be evaluated to represent unchamfered conduit.
