American National Standards
Call for comment on proposals listed

This section solicits your comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments should be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate.

Ordering Instructions for “Call-for-Comment” Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

ASA (ASC S12) (Acoustical Society of America)

New Standards

Contains the recommended methods for testing, determining, and reporting the vibration levels induced by small air moving devices (AMDs) that are found in cooling equipment used for information technology and telecommunications. The use of this Standard is encouraged to promote uniformity in the measurement and reporting of the vibration levels induced by AMDs for use in information technology and telecommunications equipment.

New National Adoptions

This Nationally Adopted International Standard specifies in detail a laboratory method for determining and reporting the airborne noise emissions of small air-moving devices used primarily for cooling electronic equipment, such as computer and business equipment. To provide compatibility with measurements of noise emitted by such equipment, this Nationally Adopted International Standard used the noise emission descriptors and sound power measurement methods of ISO 7779.

BSR T1.803-1998 (R200x), Telecommunications - Overview and Reference for GSTN Multimedia Terminals (reaffirmation of ANSI T1.803-1998)

This document is to be a general overview of the implementation of multimedia terminals targeting audio-visual conferencing applications on the GSTN. This document also provides elaboration of implementation details in areas which the ITU-T documents have been found to be vague or unclear. Detailed standards for implementation of compatible terminals are provided by normative reference to approved ITU-T Recommendations.

This standard encompasses specifications for 7.5- and 15-kHz services, and a new 20-kHz service. The 7.5- and 15-kHz services parameters have been expanded and each parameter tolerance tightened to agree with forward-looking expected transmission equipment capabilities. The new 20-kHz service specifications has been calculated for those values expected of a transmission media for the higher quality studio-to-studio and studio-to-home digital and compact disc broadcasts. This standard is being recommended for withdrawal as it is no longer needed.

IPC (IPC - Association Connecting Electronics Industries)

New Standards

BSR/IPC 2501-200x, Definition for Web-Based Exchange of XML Data (new standard)

IPC-2501 establishes the governing semantics and an XML-based syntax for shop floor communication between electronic assembly equipment and associated software applications. This standard outlines the communication architecture and supporting XML messages. The required programmatic actions that define the choreography between sender and receiver have also been defined.

BSR/IPC 2581-200x, Generic Requirements for Printed Board Assembly Products Manufacturing Description Data and Transfer Methodology (OffSpring) (new standard)

This standard specifies the XML schema that represents the data file format used to describe printed board and printed board assembly products with details sufficient for tooling, manufacturing, assembly, and inspection requirements. This format may be used for transmitting information between a printed board designer and a manufacturing or assembly facility. The data is most useful when the manufacturing cycle includes computer-aided processes and numerical control machines.

Initiation of Canvasses

The following ANSI-accredited standards developers have announced their intent to conduct a canvass on the proposed American National Standard(s) listed herein in order to develop evidence of consensus for submittal to ANSI for approval as an American National Standard. Directly and materially affected interests wishing to participate as a member of a canvass list, i.e., consensus body, should contact the sponsor of the standard within 30 days of the publication date of this issue of Standards Action. Please also review the section entitled "American National Standards Maintained Under Continuous Maintenance" contained in Standards Action for information with regard to canvass standards maintained under the continuous maintenance option.

## Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers of the initiation and scope of activities expected to result in new or revised American National Standards. This information is a key element in planning and coordinating American National Standards. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards (January 2003 edition). Following is a list of proposed new American National Standards or revisions to existing American National Standards that have been received from ANSI-accredited standards developers that utilize the periodic maintenance option in connection with their standards. Please also review the section entitled "American National Standards Maintained Under Continuous Maintenance" contained in Standards Action for comparable information with regard to standards maintained under the continuous maintenance option. Directly and materially affected interests wishing to receive more information should contact the standards developer directly.

American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMVA
- AGRSS
- ASC B109 (AGA)
- ASHRAE
- ASME
- ASTM
- NBBPVI
- NSF International
- TIA
- Underwriters Laboratories Inc.

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on “Standards Information,” and see “American National Standards Maintained Under Continuous Maintenance”. This information is also available directly at http://public.ansi.org/ansionline/Documents/Standards%20Activities/American%20National%20Standards/Procedures%20Guides%20and%20Forms/

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments
Comments regarding ISO documents should be sent to Henrietta Scully at ANSI's New York offices, those regarding IEC documents to Charles T. Zegers, also at ANSI New York offices. The final date for offering comments is listed after each draft.

ISO/DIS 10477, Dentistry - Polymer-based crown and bridge materials - 8/23/2003, $62.00

ESSENTIAL OILS (TC 54)
ISO/DIS 3140, Oil of sweet orange (Citrus sinensis (L.) Obsbeck), obtained by mechanical treatment - 8/27/2003, $33.00

GAS CYLINDERS (TC 58)
ISO/DIS 7225, Gas cylinders - Precautionary labels - 8/30/2003, $33.00
ISO/DIS 11622, Gas cylinders - Conditions for filling gases into cylinders - 8/30/2003, $60.00

GRAPHIC TECHNOLOGY (TC 130)
ISO/DIS 12647-1, Graphic technology - Process control for the manufacture of half-tone colour separations, proof and production prints - Part 1: Parameters and measurement methods - 8/29/2003, $62.00

PAPER, BOARD AND PULPS (TC 6)
ISO/DIS 5263-1, Pulps - Laboratory wet disintegration - Part 1: Disintegration of chemical pulps - 8/23/2003, $29.00
ISO/DIS 5263-2, Pulps - Laboratory wet disintegration - Part 2: Disintegration of mechanical pulps at 20 degrees C - 8/23/2003, $29.00
ISO/DIS 5263-3, Pulps - Laboratory wet disintegration - Part 3: Disintegration of mechanical pulps at > 85 degrees C - 8/23/2003, $39.00

PETROLEUM PRODUCTS AND LUBRICANTS (TC 28)
ISO/DIS 11223, Petroleum and liquid petroleum products - Direct static measurements - Measurement of content of vertical storage tanks by hydrostatic tank gauging - 8/20/2003, $97.00

PLASTICS (TC 61)
ISO/DIS 9163, Textile glass - Rovings - Manufacture of test specimens and determination of tensile strength of impregnated rovings - 8/30/2003, $62.00

ROAD VEHICLES (TC 22)
ISO/DIS 8705, Mopeds - Measurement method for location of centre of gravity - 8/30/2003, $51.00
ISO/DIS 10355, Mopeds - Positioning of lighting and light-signalling devices - 8/30/2003, $33.00

RUBBER AND RUBBER PRODUCTS (TC 45)
ISO/DIS 4081, Rubber tubing and hoses for automotive cooling systems - Specification - 8/27/2003, $42.00
ISO/DIS 22762-1, Elastomeric seismic-protection isolators - Part 1: Test methods - 8/21/2003, $103.00
ISO/DIS 22762-2, Elastomeric seismic-protection isolators - Part 2: Applications for bridges - Specifications - 8/21/2003, $88.00

ISO/IEC JTC 1, Information Technology
This section provides information on standards activity within CEN - the European Committee for Standardization - and CENELEC - the European Committee for Electrotechnical Standardization. CEN and CENELEC are composed of European member bodies whose countries cooperate within the European Economic Community (Common Market) and the European Free Trade Association (EFTA). Their primary purpose is to develop standards needed to harmonize European interests and prevent technical barriers. Both CEN and CENELEC are committed to adopting standards developed by ISO and IEC wherever possible.

ANSI is publishing this information to give U.S. interests an opportunity to obtain information, and to comment on proposed European Standards and/or Harmonization Documents being circulated for enquiry. Anyone interested in obtaining this information, and/or commenting on proposals should order copies from ANSI.

Comments regarding CEN are to be sent to Henrietta Scully at ANSI’s New York offices. Comments regarding CENELEC are to be sent to Charles T. Zegers, also at ANSI’s New York offices.

Ordering Instructions
ENs are currently available via ANSI’s ESS (Electronic Standards Store), accessed at www.ansi.org.

prENs can be made available via ANSI’s ESS “on-demand” via e-mail request. Send your request for a prEN to be made available via the ESS to Customer Service at sales@ansi.org and the document will be posted to the ESS within 3 working days. Please be ready to provide the date of the Standards Action issue in which the prEN document you are requesting appears.

CEN
European drafts sent for CEN enquiry
The following European drafts have been sent to CEN members for enquiry and comment. If the draft is a proposed adoption of an International Standard, it is so noted. The final date for offering comments is listed after each proposal.

EN 12941: 1998/prA1, Respiratory protective devices - Powered filtering devices incorporating a helmet or a hood - Requirements, testing, marking - 8/22/2003, $20.00
prEN 14712, Surface active agents - Determination of physical stability in alkaline and acid solutions - 10/22/2003, $30.00
prEN 14713, Adhesives for paper and board and packaging and disposable sanitary products - Determination of friction properties of films potentially suitable for bonding - 10/22/2003, $26.00
prEN ISO 4254-6, Agricultural machinery - Technical means for ensuring safety - Part 6: Sprayers and liquid fertilizer distributors (ISO/DIS 4254-6: 2003) - 9/22/2003, $42.00

European drafts sent for formal vote (for information)
The following European drafts have been sent to CEN members for formal vote. If the draft is a proposed adoption of an International Standard, it is so noted.

EN 1836: 1997/prA2, Personal eye protection - Sunglasses, sunglare filters for general use and filters for direct observation of the sun

Registration of Organization Names in the United States

The Procedures for Registration of Organization Names in the United States of America (document ISSB 989) require that alphanumeric organization names be subject to a 90-day Public Review period prior to registration. For further information, please contact the Registration Coordinator at (212) 642-4975.

The following is a list of alphanumeric organization names that have been submitted to ANSI for registration. Alphanumeric names appearing for the first time are printed in bold type. Names with confidential contact information, as requested by the organization, list only public review dates.

**PUBLIC REVIEW**

### Applied Materials Inc.
- **Organization:** Applied Materials Inc.

**NOTE:** Challenged alphanumeric names are underlined. The Procedures for Registration provide for a challenge process, which follows in brief. For complete details, see Section 6.4 of the Procedures.

A challenge is initiated when a letter from an interested entity is received by the Registration Coordinator. The letter shall identify the alphanumeric organization name being challenged and state the rationale supporting the challenge. A challenge fee shall accompany the letter. After receipt of the challenge, the alphanumeric organization name shall be marked as challenged in the Public Review list. The Registration Coordinator shall take no further action to register the challenged name until the challenge is resolved among the disputing parties.

Proposed Foreign Government Regulations

**Call for Comment**

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by members of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland, who in turn disseminates the information to all WTO members. The purpose of this requirement is to provide trading partners with an opportunity to review and comment on the regulation before it becomes final.

To distribute information on these proposed foreign technical regulations, the National Center for Standards and Certification Information (NCSCI), National Institute of Standards and Technology (NIST), provides an on-line service - Export Alert! - that allows interested parties to register and obtain notifications, via e-mail, for countries and industry sectors of interest to them. To register, go to http://ts.nist.gov/ncsci and click on "Export Alert!".

NCSCI serves as the U.S. WTO TBT inquiry point and receives copies of all notifications, in English, to disseminate to U.S. industry. To obtain copies of the full text of the regulations or for further information, contact NCSCI, NIST, 100 Bureau Drive, Stop 2160, Gaithersburg, MD 20899-2160; telephone (301) 975-4040; fax (301) 926-1559; e-mail - ncsci@nist.gov.

NCSCI will also request an extension of the comment period and transmit comments to the issuing foreign agency for consideration.
