### American National Standards

#### Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

#### Ordering Instructions for "Call-for-Comment" Listings

1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

* Standard for consumer products
Comment Deadline: March 7, 2004

IIAR (International Institute of Ammonia Refrigeration)

Supplements

BSR/IIAR 2a-200x, Equipment, Design, and Installation of Ammonia Mechanical Refrigerating Systems (supplement to ANS/IIAR 2-1999)
Revisions and additions to First Public Review Draft of proposed Addendum a to ANS/IIAR 2-1999, pertaining to the following sections:
Proposed change #2 (affecting Section 7.3.4);
Proposed change #3 (affecting new Informative Appendix F); and
Addition of proposed change #9 (affecting Informative Appendix A).

ANS/IIAR 2-1999 is an American National Standard for the design, fabrication, manufacture, installation and use of ammonia mechanical refrigerating systems.

Click here to see these changes in full, or look at the end of “Standards Action.”
Send comments (with copy to BSR) to: Chris Combs, IIAR

Comment Deadline: March 22, 2004

ANS (American Nuclear Society)

Revisions

This standard provides nuclear critically safety criteria for the handling, storage, and transportation of LWR fuel rods and units outside reactor cores.
Single copy price: $10.00 (electronic); $20.00 (paper)
Order from: Cara Ford, ANS; cford@ans.org
Send comments (with copy to BSR) to: Same

Reaffirmations

BSR/ANS 15.11-1993 (R200x), Radiation Protection at Research Reactor Facilities (reaffirmation of ANSI/ANS 15.11-1993)
This standard establishes the elements of a radiation protection program and the criteria necessary to provide an acceptable level of radiation protection for personnel at research reactor facilities and the public consistent with keeping exposures and releases as low as is reasonably achievable (ALARA).
Single copy price: $70.00
Order from: Cara Ford, ANS; cford@ans.org
Send comments (with copy to BSR) to: Same

BSR/ANS 57.8-1995 (R200x), Nuclear Fuel Assembly Identification (reaffirmation of ANSI/ANS 57.8-1995)
This standard describes requirements for the unique identification of fuel assemblies utilized in nuclear power plants. It defines the characters and proposed sequence to be used in assigning identification to fuel assemblies.
Single copy price: $10.00 (electronic); $24.00 (paper)
Order from: Cara Ford, ANS; cford@ans.org
Send comments (with copy to BSR) to: Same

ASA (ASC S1) (Acoustical Society of America)

Reaffirmations

BSR S1.1-1994 (R200x), Acoustical Terminology (reaffirmation of ANSI S1.1-1994 (R1999))
This standard provides definitions for a wide variety of terms, abbreviations, and letter symbols used in acoustics and electroacoustics. Terms of general use in all branches of acoustics are defined, as well as many terms of special use for architectural acoustics, acoustical instruments, mechanical vibration and shock, physiological and psychological acoustics, underwater sound, sonics and ultrasonics, and music.
Single copy price: $150.00
Order from: Susan Blaeser, ASA (ASC S1); sblaeser@aip.org
Send comments (with copy to BSR) to: Same

BSR S1.13-1995 (R200x), Measurement of Sound Pressure Levels in Air (reaffirmation of ANSI S1.13-1995 (R1999))
This standard provides a means to calculate atmospheric absorption losses of sound generally encountered, and the preferred descriptor for each is identified.
Single copy price: $130.00
Order from: Susan Blaeser, ASA (ASC S1); sblaeser@aip.org
Send comments (with copy to BSR) to: Same

BSR S1.18-1999 (R200x), Template Method for Ground Impedance (reaffirmation of ANSI S1.18-1999)
This standard provides a means to calculate atmospheric absorption losses of sound from any source for a wide range of meteorological conditions. The atmosphere is assumed to be still, homogeneous moist air of normal composition. Non-homogeneous atmospheres may be divided into horizontal layers within which homogeneous conditions may be assumed. Attenuation coefficients for pure-tone sounds are calculated by over ranges of frequency, and the humidity, pressure, and temperature of the atmosphere. For sounds analyzed by fractional-octave-band filters, alternative methods are provided.
Single copy price: $130.00
Order from: Susan Blaeser, ASA (ASC S1); sblaeser@aip.org
Send comments (with copy to BSR) to: Same

BSR S1.26-1995 (R200x), Method for the Calculation of the Absorption of Sound by the Atmosphere (reaffirmation of ANSI S1.26-1995 (R1999))
Provides the means to calculate atmospheric absorption losses of sound from any source for a wide range of meteorological conditions. The atmosphere is assumed to be still, homogeneous moist air of normal composition. Non-homogeneous atmospheres may be divided into horizontal layers within which homogeneous conditions may be assumed. Attenuation coefficients for pure-tone sounds are calculated by over ranges of frequency, and the humidity, pressure, and temperature of the atmosphere. For sounds analyzed by fractional-octave-band filters, alternative methods are provided.
Single copy price: $130.00
Order from: Susan Blaeser, ASA (ASC S1); sblaeser@aip.org
Send comments (with copy to BSR) to: Same

ASAE (American Society of Agricultural Engineers)

Withdrawals

ANSI/ASAE S330.1-AUG88 (RJUNE00), Procedure for Sprinkler Distribution Testing for Research Purposes (withdrawal of ANSI/ASAE S330.1-AUG88 (RJUNE00))
Provides the means to calculate atmospheric absorption losses of sound from any source for a wide range of meteorological conditions. The atmosphere is assumed to be still, homogeneous moist air of normal composition. Non-homogeneous atmospheres may be divided into horizontal layers within which homogeneous conditions may be assumed. Attenuation coefficients for pure-tone sounds are calculated by over ranges of frequency, and the humidity, pressure, and temperature of the atmosphere. For sounds analyzed by fractional-octave-band filters, alternative methods are provided.
Single copy price: $130.00
Order from: Carla Miller, ASAE; cmiller@asae.org
Send comments (with copy to BSR) to: Same
ASTM (ASTM International)
The URL to search for scopes of ASTM standards is: http://www.astm.org/dsearch.htm
For reaffirmations and withdrawals, order from: Customer Service, ANSI
For new standards and revisions, order from: Faith Lanzetta, ASTM
For all ASTM standards, send comments (with copy to BSR) to:
Faith Lanzetta, ASTM

Revisions
BSR/ASTM D1000-200x, Test Method for Pressure-Sensitive Adhesive-Coated Tapes Used for Electrical and Electronic Applications (revision of ANSI/ASTM D1000-1999)
Single copy price: $38.00

BSR/TIA 472F000-200x, Optical Fiber Drop Cable (new standard)
This document covers optical fiber communications cables intended for use in outdoor and indoor/outdoor optical fiber drop applications.
Single copy price: $95.00
Order from: Global Engineering Documents; www.global.ihs.com, (800) 854-7179
Send comments (with copy to BSR) to: Billie Zidek-Conner, TIA; bzidekco@tia.eia.org

BSR/TIA 472E000-200x, Standard for Indoor-Outdoor Optical Fiber Cable (new standard)
This document covers optical fiber communications cables intended for use in Indoor-Outdoor optical fiber applications.
Single copy price: $87.00
Order from: Global Engineering Documents; www.global.ihs.com, (800) 854-7179
Send comments (with copy to BSR) to: Billie Zidek-Conner, TIA; bzidekco@tia.eia.org

UL (Underwriters Laboratories, Inc.)

New Standards
• BSR/UL 497C-200x, Protectors for Coaxial Communications Circuits (new standard)
The requirements cover protectors for use on coaxial cable circuits consisting of single or multiple air gap arresters, gas tube arresters, or solid-state arresters, with or without fuses or other current-limiting devices.
Single copy price: Contact comm2000 for pricing and delivery options
Order from: comm2000
Send comments (with copy to BSR) to: Michael Hieb, UL-CA; michael.j.hieb@us.ul.com

BSR/UL 1322-200x, Fabricated Scaffold Planks and Stages (Bulletin dated 2/6/04) (new standard)
These requirements cover wood, metal, or a combination of wood and metal fabricated planks, stage platforms, and modular stage platforms for use with suspended, fixed, or rolling scaffolds. These requirements also cover modular suspended platforms.
Single copy price: Contact comm2000 for pricing and delivery options
Order from: comm2000
Send comments (with copy to BSR) to: Marcia Kawate, UL-CA; Marcia.M.Kawate@us.ul.com

ITI (INCITS)

New Standards
BSR/INCITS 379-200x, Information Technology - Iris Image Interchange Format (new standard)
This Standard specifies two alternative image interchange formats for biometric authentication systems that utilize iris recognition.
Single copy price: $18.00
Order from: Global Engineering Documents; www.global.ihs.com, (800) 854-7179
Send comments (with copy to BSR) to: Barbara Bennett, ITI (INCITS); bbennett@itic.org

New National Adoptions
INCITS/ISO/IEC 15938-7:2003, Information technology - Multimedia content description interface - Part 7: Conformance testing (identical national adoption)
 Specifies how tests can be designed to verify whether descriptions and description consuming terminals meet the specifications of parts 1, 2, 3, 4 and 5 of ISO/IEC 15938.
Single copy price: $102.00
Order from: Global Engineering Documents, http://www.global.ihs.com/ Send comments (with copy to BSR) to: Barbara Bennett, ITI (INCITS); bbennett@itic.org

NSF (NSF International)

Revisions
BSR/NSF 18-200x (i3), Manual food and beverage dispensing equipment (revision of ANSI/NSF 18-1996)
Issue 3: Complete Revision. Reballot.
Single copy price: $35.00
Order from: www.nsf.org
Send comments (with copy to BSR) to: Steve Tackitt, c/o: Lorna Badman, NSF; badman@nsf.org

Issue 25: Revision to Annex H, Disinfection Efficacy.
Single copy price: $35.00
Order from: www.nsf.org
Send comments (with copy to BSR) to: Steve Tackitt, c/o: Lorna Badman, NSF; badman@nsf.org

TIA (Telecommunications Industry Association)

New Standards
Describes data services available on wideband spread spectrum systems. It is organized into a series of related recommendations, some of which address functions common to all code division multiple access devices, and others which describe a specific data service.
Single copy price: $156.00
Order from: Global Engineering Documents; www.global.ihs.com, (800) 854-7179
Send comments (with copy to BSR) to: Billie Zidek-Conner, TIA; bzidekco@tia.eia.org

BSR/TIA 733-A-200x, High Rate Speech Service Option 17 for Wideband Spread Spectrum Communications Systems (new standard)
This document describes the requirements for Service Option 17.
Single copy price: $156.00
Order from: Global Engineering Documents; www.global.ihs.com, (800) 854-7179
Send comments (with copy to BSR) to: Billie Zidek-Conner, TIA; bzidekco@tia.eia.org
Reaffirmations

BSR/UL 845-1994 (R200x), Motor Control Centers (reaffirmation of ANSI/UL 845-1994)
Covers motor control centers intended to be employed in accordance with the National Electrical Code, NFPA 70, for use on circuits having available short-circuit currents not more than 200,000 amperes rms symmetrical, at 600 volts maximum.
Single copy price: Contact comm2000 for pricing and delivery options
Order from: comm2000
Send comments (with copy to BSR) to: Mitchell Gold, UL-IL; Mitchell.Gold@us.ul.com; cbanks@ansi.org

BSR/ASME AG-1a-200x, Code on Nuclear Air and Gas Treatment

Revisions

BSR/ASME B36.19M-200x, Stainless Steel Pipe (revision of ANSI/ASME B36.19M-1985 (R2002))
Covers the standardization of dimensions of welded and seamless wrought stainless steel pipe for high or low temperatures and pressures.
Single copy price: $10.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Jack Karian, ASME; karianj@asme.org

Supplements

• BSR/ASME AG-1a-200x, Code on Nuclear Air and Gas Treatment (supplement to ANSI/ASME AG-1-2003)
Provides requirements for design, fabrication, inspection, and testing of air cleaning and conditioning components and appurtenances, as well as air cleaning components used in engineering safety systems in nuclear facilities.
Single copy price: $20.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org; ANSlBox@asme.org; JonesG@asme.org
Send comments (with copy to BSR) to: Christian Sanna, ASME; sanniac@asme.org

Reaffirmations

ANSI/ASME B47.1-1988 (R200x), Gage Blanks (reaffirmation of ANSI/ASME B47.1-1988 (R1999))
Covers standard designs for the following:
(a) plain and thread plug gage blanks to 12.010 in. maximum gaging diameter
(b) plain and thread ring gage blanks to 12.260 in. maximum gaging diameter
(c) involute and serrated spline plug and ring gage blanks to 8.000 in. major diameter
(d) straight-sided spline plug and ring gage blanks to major diameters of 8.000 in. for plugs and 6.000 in. for rings
(e) machine taper plug and ring gage blanks to 5.000 in. gaging diameter
(f) adjustable snap gages to 12 in.
(g) adjustable length gages to any desired length
(h) master disks up to 8.010 in. in diameter
Recommended general designs covering taper plug and ring gages for special applications, flush-pin gages, and flat plug gages are also included.
Single copy price: $70.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org; ANSlBox@asme.org; JonesG@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezcg@asme.org

Establishes performance requirements for electric chain hoists for vertical lifting service involving material handling of freely suspended (unguided) loads using load chain of the roller or welded link types with one of the following types of suspension: (1) lug; (2) hook or clevis; (3) trolley.
Single copy price: $32.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org; ANSlBox@asme.org; JonesG@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezcg@asme.org

Establishes performance requirements for and chain manually operated chain hoists for vertical lifting service involving material handling of freely suspended (unguided) loads using welded link type load chain as a lifting medium with one of the following types of suspension: (1) hook or clevis; (2) trolley.
Single copy price: $32.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org; ANSlBox@asme.org; JonesG@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezcg@asme.org

Establishes performance requirements for manually lever operated chain hoists used for lifting, pulling, and tensioning-type applications. The specifications and information contained in this Standard apply to manually lever-operated chain hoists of the following types: (1) ratchet and pawl operation with: (a) roller-type load chain; (b) welded link-type load chain.
Single copy price: $32.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org; ANSlBox@asme.org; JonesG@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezcg@asme.org

Establishes performance requirements for electric wire rope hoists for vertical lifting service involving material handling of freely suspended (unguided) loads using wire rope with one of the following types of suspension: (1) lug; (2) hook; (3) trolley; (4) base or deck mounted (does not include base mounted drum hoists of the type covered by ASME B30.7); (5) wall or ceiling mounted (does not include base mounted drum hoists of the type covered by ASME B30.7).
Single copy price: $32.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org; ANSlBox@asme.org; JonesG@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezcg@asme.org

BSR/ASME HST-5M-1999 (R200x), Performance Standard for Air Chain Hoists (reaffirmation of ANSI/ASME HST-5M-1999)
Establishes performance requirements for air powered chain hoists for vertical lifting service involving material handling of freely suspended (unguided) loads using load chain of the roller or welded link types with one of the following types of suspension: (1) lug; (2) hook or clevis; (3) trolley.
Single copy price: $32.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org; ANSlBox@asme.org; JonesG@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezcg@asme.org

Comment Deadline: April 6, 2004

Reaffirmations and withdrawals available electronically may be accessed at: webpage.asme.org

ASME (American Society of Mechanical Engineers)

Revisions

BSR/ASME B36.19M-200x, Stainless Steel Pipe (revision of ANSI/ASME B36.19M-1985 (R2002))
Covers the standardization of dimensions of welded and seamless wrought stainless steel pipe for high or low temperatures and pressures.
Single copy price: $10.00
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Mitchell Karian, ASME; karianj@asme.org

Supplements

- BSR/ASME AG-1a-200x, Code on Nuclear Air and Gas Treatment (supplement to ANSI/ASME AG-1-2003)
Provides requirements for design, fabrication, inspection, and testing of air cleaning and conditioning components and appurtenances, as well as air cleaning components used in engineering safety systems in nuclear facilities.
Single copy price: $20.00

Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Withdrawals

Establishes general rules for the design of graphical symbols. Provides a list of graphical symbols that shall be used for building up complete symbols representing products and engineering drawings and related documentation. Where necessary, it provides application rules to guide the user of this Standard. Provides application examples covering a broad range of technical fields, and this Standard conforms to ISO 81714-1, Design of graphical symbols for use in the technical documentation of products - Part 1: Basic rules, and the ISO 14617 series of standards, Graphical symbols for diagrams.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Serves as an introduction to all the other parts. In particular, it gives information on the creation and use of registration numbers for identifying graphical symbols used in diagrams, rules for the presentation and application of these symbols, and examples of their use and application.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for fluid power conversion units such as pumps and motors in diagrams (for pumps) used mainly for transportation.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for heat transfer and heat engines in Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for the representation of devices for separating, purification and mixing in diagrams.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for use on installation diagrams (e.g., for buildings) and network maps, supplementing the symbols specified in the ASME Y14.40 series. Symbols on such diagrams are used mainly to indicate the location and type of a component or device.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols of a general character, mainly for use in building-up complete symbols representing specific products and functions in diagrams.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for basic elements in actuators, complete actuators and actuating devices in diagrams.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for components and devices used in measurement and control systems, represented in diagrams.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for measurement and control functions in diagrams, with the same symbols in simple applications possibly representing instead components or devices implementing such functions. For graphical symbols for measurement and control components and devices, see ASME Y14.40.5.

Single copy price: Free
Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols in diagrams for (a) mechanical elements such as weights, springs, clutches and brakes, (b) pipe and duct elements such as restrictors, nozzles and air vents, and (c) devices for storage such as tanks, pressure vessels and gas bottles.

Single copy price: Free

Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for valves and dampers in diagrams, including symbols for general-purpose valves, those used in fluid power systems and hygienic valves used in the food and pharmaceutical industries.

Single copy price: Free

Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org

Specifies graphical symbols for pumps, compressors and fans, used mainly for transportation, in diagrams (for pumps and compressors used mainly for energy conversion, such as those in fluid power systems).

Single copy price: Free

Order from: Silvana Rodriguez, ASME; rodriguezs@asme.org
Send comments (with copy to BSR) to: Calvin Gomez, ASME; gomezc@asme.org
Call for Comment Contact Information

The addresses listed in this section are to be used in conjunction with standards listed in Call for Comment. This section is a list of developers who have submitted standards for public review in this issue of *Standards Action* – it is not intended to be a list of all ANSI developers. Please send all address corrections to: Standards Action Editor, American National Standards Institute, 25 West 43rd Street, New York, NY 10036 or standact@ansi.org.

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers of the initiation and scope of activities expected to result in new or revised American National Standards. This information is a key element in planning and coordinating American National Standards. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards (January 2003 edition).

Following is a list of proposed new American National Standards or revisions to existing American National Standards that have been received from ANSI-accredited standards developers that utilize the periodic maintenance option in connection with their standards. Please also review the section entitled "American National Standards Maintained Under Continuous Maintenance" contained in Standards Action for comparable information with regard to standards maintained under the continuous maintenance option. Directly and materially affected interests wishing to receive more information should contact the standards developer directly.

API (American Petroleum Institute)
Office: 1220 L Street NW
Washington, DC 20005-4070
Contact: Jon Noxon
Fax: (202) 962-4797
E-mail: noxonj@api.org

BSR/API MPMS 5.8-200x, Measurement of Liquid Hydrocarbons by Ultrasonic Flowmeters Using Transit Time Technology (new standard)
Stakeholders: Oil companies, pipeline companies, regulators and manufacturers of ultrasonic flowmeters.
Project Need: Provision of industry standard for ultrasonic flowmeter usage in custody transfer applications.
This standard includes application criteria for ultrasonic flowmeters (UFM) and considerations regarding the liquids being measured. It also address the installation, operation, proving and maintenance of UFMs in liquid hydrocarbon service.

ASME (American Society of Mechanical Engineers)
Office: Three Park Avenue, M/S 20N1
New York, NY 10016
Contact: Silvana Rodriguez
Fax: (212) 591-8501
E-mail: rodriguezs@asme.org; ANSIBox@asme.org; JonesG@asme.org

BSR/ASME PTC 19.11-200x, Steam and Water Sampling, Conditioning and Analysis in the Power Cycle (revision of ANSI/ASME PTC 19.11-1997)
Stakeholders: The document provides guidance to power plant management, engineers, chemists and operators in the design and operation of sampling systems for monitoring of cycle chemistry.
Project Need: This is a needed standard on an important aspect of the function of a power plant, namely determining the quality of steam, boiler make-up and feed water and condensate in relation to performance testing and performance monitoring.
The document specifies methods and instrumentation for determining steam sample selection, sample collection and conditioning, sample analysis and data analysis in one-time acceptance testing and continuous performance monitoring in power plants.

EIA (Electronic Industries Alliance)
Office: 2500 Wilson Blvd., Suite 300
Arlington, VA 22201-3834
Contact: Cecelia Yates
Fax: (703) 907-7549
E-mail: cyates@ecaus.org

BSR/EIA 575-A-200x, Resistors, Rectangular, Surface Mount, General Purpose (new standard)
Stakeholders: Telecom, consumer, medical, aerospace, automotive
Project Need: Update required to reflect current manufacturing
Standard contains electrical and mechanical dimensions of general-purpose surface mount rectangular resistors. This standard also contains the standard testing that should be performed by the manufacturer.

BSR/EIA 576-A-200x, Resistors, Rectangular, Surface Mount, Precision (new standard)
Stakeholders: Telecom, consumer, medical, aerospace, automotive
Project Need: Update required to reflect current manufacturing
Contains electrical and mechanical dimensions of precision surface mount rectangular resistors. This standard also contains the standard testing that should be performed by the manufacturer.

ITI (INCITS) (InterNational Committee for Information Technology Standards)
Office: 1250 Eye Street, NW, Suite 200
Washington, DC 20005-3922
Contact: Deborah Spittle
Fax: (202) 638-4922
E-mail: dsittle@itic.org

BSR INCITS PN-1674-D-200x, Information Technology - Switch Fabric - Generation 4 (FC-SW-4) (new standard)
Stakeholders: The proposed Standard will result in expanded applications for existing and conceived products in both the channel and network markets.
Project Need: There are additional operational and management functions that need to be defined to allow more flexible and interoperable Fibre Channel Switch Fabric deployment.
FC-SW-4 describes the requirements for an interconnecting Fabric consisting of multiple Fabric Switch elements to support the ANSI/INCITS Fibre Channel - Framing and Signaling (FC-FS) and ANSI/INCITS Fibre Channel - Physical Interface (FC-PI) standards.
BSR INCITS PN-1675-D-200x, Information technology - MultiMedia Command Set-5 (MMC-5) (new standard)

Stakeholders: The nature of the proposed project is to provide for growth in the optical storage industry.

Project Need: The proposed project involves a compatible evolution of the present command set to provide for newly developed optical storage products.

The MultiMedia Command set version 5 is based on MultiMedia Command set version 4 that provides for commands to implement CD readers and recorders, DVD readers and recorders and other similar devices.

OLA (ASC Z80) (Optical Laboratories Association)
Office: 11096-B Lee Hwy., Suite 102
Fairfax, VA 22030
Contact: Kris Dinkle
Fax: (703) 359-2834
E-mail: kdinkle@ola-labs.org

BSR Z80.28-200x, Methods for reporting optical aberrations of eyes (new standard)

Stakeholders: Vision care professionals (optometrists, ophthalmologists) vision research, ophthalmic instrument manufacturers, refractive surgical system manufacturers, educators in the field of vision.

Project Need: Specifies standardized methods for reporting the optical aberrations of eyes.

Defines standardized terms and symbols for reporting the aberrations of the eye, defines the standardized coordinate system to be used in reporting those aberrations, defines a standardized graphic representation of the results, offers guidance on converting measurement data to Zernike coefficient representation and in dealing with data in this form under a variety of conditions.

SCTE (Society of Cable Telecommunications Engineers)
Office: 140 Phillips Road
Exton, PA 19341
Contact: Robin Fenton
E-mail: rfenton@scte.org

BSR/SCTE IPS SP 216-200x, Indoor ‘F’ Female to ‘F’ Female Inline Splice (new standard)

Stakeholders: Cable Telecommunications Industry

Project Need: Recommend mechanical and electrical standards for 75 Ohm broadband radio frequency (RF)

The purpose of this document is to recommend mechanical and electrical standards for 75-Ohm broadband radio frequency (RF) devices whose purpose is to provide a transition between two type ‘F’ female connectors. The mechanical configuration is designed for indoor applications.

BSR/SCTE IPS TP 701-200x, Test Method for Compression Tool Verification (new standard)

Stakeholders: Cable Telecommunications Industry

Project Need: Determine the actual compression closure dimension of compression tools

The purpose of this document is to determine and verify the actual compression closure dimension of compression tools, measurement technique for determining the final closed dimension that may affect pull-off performance of the cable to connector interface and calibration technique for adjusting compression tools.

TIA (Telecommunications Industry Association)
Office: 2500 Wilson Boulevard
Suite 300
Arlington, VA 22201-3834
Contact: Billie Zidek-Conner
Fax: (703) 907-7727
E-mail: bzidekco@tia.eia.org

BSR/TIA 1033-200x, Optical Fiber Polarity for Array Connectors (new standard)

Stakeholders: telecomm

Project Need: standard for array connectors

This document provides guidelines for maintaining polarity when using array connectors.

UL (Underwriters Laboratories, Inc.)
Office: 1655 Scott Blvd
Santa Clara, CA 95050
Contact: Michael Hieb
Fax: (408) 566-6045
E-mail: michael.j.hieb@us.ul.com

BSR/UL 1261-200x, Electric Water Heaters for Pools and Tubs (new standard)

Stakeholders: Electric water heaters for pools and tubs

Project Need: New ANSI approval

The requirements cover permanently installed electric water heaters rated 600 volts or less for heating the water supplied through plumbing to separately heated public or private pools or tubs in which swimming, wading, bathing, or partial or total immersion of persons may be involved.
American National Standards
Maintained Under Continuous
Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMVA
- AGRSS
- ASC B109 (AGA)
- ASHRAE
- ASME
- ASTM
- NBBPVI
- NSF International
- TIA
- Underwriters Laboratories Inc.

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on "Standards Information," and see "American National Standards Maintained Under Continuous Maintenance." This information is also available directly at http://public.ansi.org/ansionline/Documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address. If you request that information be provided via fax, please include your fax number. Thank you.
ISO and IEC Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments

Comments regarding ISO documents should be sent to Henrietta Scully at ANSI’s New York offices, those regarding IEC documents to Charles T. Zegers, also at ANSI New York offices. The final date for offering comments is listed after each draft.

ISO Standards

ACOUSTICS (TC 43)

APPLICATIONS OF STATISTICAL METHODS (TC 69)

CRANES (TC 96)
ISO/DIS 8686-4, Cranes - Design principles for loads and load combinations - Part 4: Jib cranes - 4/30/2004, $43.00

FINE CERAMICS (TC 206)
ISO/DIS 24370, Fine ceramics (advanced ceramics, advanced technical ceramics) - Test method for fracture toughness of monolithic ceramics at room temperature by chevron notched beam (CNB) method - 4/29/2004, $58.00

INDUSTRIAL AUTOMATION SYSTEMS AND INTEGRATION (TC 184)

MEASUREMENT OF FLUID FLOW IN CLOSED CONDUITS (TC 30)

NUCLEAR ENERGY (TC 85)
ISO/ASTM DIS 51607, Practice for use of the alanine-EPR dosimetry system - 5/1/2004, $38.00

OPTICS AND OPTICAL INSTRUMENTS (TC 172)
ISO/DIS 12123/DAmd1, Raw optical glass in bulk and preshaped forms - Bubbles and other inclusions - Test method and classification - Amendment 1 - 4/30/2004, $28.00

PETROLEUM PRODUCTS AND LUBRICANTS (TC 28)
ISO/DIS 8216-1, Petroleum products - Fuels (class F) - Classification - Part 1: Categories of marine fuels - 5/1/2004, $28.00
ISO/DIS 8217, Petroleum products - Fuels (class F) - Specifications of marine fuels - 4/29/2004, $78.00

PLASTICS (TC 61)

SHIPS AND MARINE TECHNOLOGY (TC 8)
ISO/DIS 5489, Ships and marine technology - Embarkation ladders - 4/29/2004, $58.00

THERMAL INSULATION (TC 163)

OTHER

ISO/ASTM DIS 51702, Practice for dosimetry in a gamma irradiation facility for radiation processing - 5/1/2004, $49.00
ISO/ASTM DIS 51204, Practice for dosimetry in gamma irradiation facilities for food processing - 5/1/2004, $49.00
ISO/ASTM DIS 51939, Practice for blood irradiation dosimetry - 5/1/2004, $58.00
IEC Standards

3D/128/FDIS, IEC 61360-5: Standard data element types with associated classification scheme for electric components - Part 5: Extensions to the EXPRESS dictionary schema, 03/26/2004

20/683/FDIS, IEC 60502-1 Ed.2: Power cables with extruded insulation and their accessories for rated voltages from 1 kv (um = 1,2 kv) up to 30 kv (um = 36 kv) - Part 1: Cables for rated voltages of 1 kv (um = 1,2 kv) and 3 kv (um = 3,6 kv), 03/26/2004

20/684/FDIS, IEC 60840 Ed.3: Power cables with extruded insulation and their accessories for rated voltages above 30 kv (um = 36 kv) up to 150 kv (um = 170 kv) - Test methods and requirements, 03/26/2004

35/1202/FDIS, IEC 62281 Ed 1: Safety of primary and secondary lithium cells and batteries during transport, 03/26/2004

15E/229/FDIS, IEC 60450, Ed. 2: Measurement of the average viscometric degree of polymerization of new and aged cellulosic electrically insulating materials, 04/02/2004

23B/737/FDIS, IEC 60669-2-4 Ed.1: Switches for household and similar fixed electrical installations - Part 2-4: Particular requirements - Isolating switches, 04/02/2004

36A/117/FDIS, IEC 62199, Ed.1: Bushings for DC application, 04/02/2004

78/574/FDIS, IEC 61481 Ed. 1 Amendment 2: Live working - Portable phase comparators for use on voltages from 1 kv to 36 kV a.c., 04/02/2004
Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization – and IEC – the International Electrotechnical Commission. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Global Engineering Documents.

IEC Standards

DOCUMENTATION AND GRAPHICAL SYMBOLS (TC 3)
IEC 61360-1 Ed. 2.1 en:2004, Standard data element types with associated classification scheme for electric components - Part 1: Definitions - Principles and methods, $135.00

ELECTRIC CABLES (TC 20)
IEC 60245-8 Ed. 1.1 b:2004, Rubber insulated cables - Rated voltages up to and including 450/750 V - Part 8: Cords for applications requiring high flexibility, $64.00
IEC 60811-5-1 Ed. 1.1 b:2004, Insulating and sheathing materials of electric and optical cables - Common test methods - Part 5-1: Methods specific to filling compounds - Drop-point - Separation of oil - Lower temperature brittleness - Total acid number - Absence of corrosive components - Permittivity at 23 C - DC resistivity at 23 C and 100 C, $58.00

ELECTRICAL EQUIPMENT IN MEDICAL PRACTICE (TC 62)
IEC 60601-2-17 Ed. 2.0 en:2004, Medical electrical equipment - Part 2-17: Particular requirements for the safety of automatically-controlled brachytherapy afterloading equipment, $95.00

ELECTROMECHANICAL COMPONENTS AND MECHANICAL STRUCTURES FOR ELECTRONIC EQUIPMENTS (TC 48)
IEC 61076-6 Ed. 1.0 b:2004, Connectors for electronic equipment - Part 6: Loose part contacts - Sectional specification, $58.00

FIBRE OPTICS (TC 86)
IEC 61300-2-1 Ed. 2.0 b:2004, Fibre optic interconnecting devices and passive components - Basic test and measurement procedures - Part 2-1: Tests - Vibration (sinusoidal), $27.00
IEC 61300-3-16 Ed. 2.0 b:2004, Fibre optic interconnecting devices and passive components - Basic test and measurement procedures - Part 3-16: Examinations and measurements - Endface radius of spherically polished ferrules, $47.00
IEC 61300-3-30 Ed. 1.0 b:2004, Fibre optic interconnecting devices and passive components - Basic test and measurement procedures - Part 3-30: Examinations and measurements - Polish angle and fibre position on single ferrule multifibre connectors, $47.00
IEC 62005-7 Ed. 1.0 b:2004, Reliability of fibre optic interconnecting devices and passive optical components - Part 7: Life stress modeling, $27.00
IEC 62149-3 Ed. 1.0 b:2004, Fibre optic active components and devices - Performance standards - Part 3: 2.5 Gbit/s modulator-integrated laser diode transmitters, $47.00

INDUSTRIAL-PROCESS MEASUREMENT AND CONTROL (TC 65)
IEC/PAS 62381 Ed. 1.0 en:2004, Activities during the factory acceptance test (FAT), site acceptance test (SAT), and site integration test (SIT) for automation systems in the process industry, $95.00
IEC/PAS 62382 Ed. 1.0 en:2004, Electrical and instrumentation loop check, $58.00
IEC 61003-1 Ed. 2.0 en:2004, Industrial-process control systems - Instruments with analogue inputs and two- or multi-state outputs - Part 1: Methods of evaluating performance, $87.00
IEC 61514-2 Ed. 1.0 en:2004, Industrial process control systems - Part 2: Methods of evaluating the performance of intelligent valve positioners with pneumatic outputs, $103.00
INSULATING MATERIALS (TC 15)
IEC 60893-1 Ed. 2.0 b:2004, Insulating materials - Industrial rigid laminated sheets based on thermosetting resins for electrical purposes - Part 1: Definitions, designations and general requirements, $33.00
IEC 61086-1 Ed. 2.0 b:2004, Coatings for loaded printed wire boards (conformal coatings) - Part 1: Definitions, classification and general requirements, $27.00

NUCLEAR INSTRUMENTATION (TC 45)
IEC 62138 Ed. 1.0 b:2004, Nuclear power plants - Instrumentation and control important for safety - Software aspects for computer-based systems performing category B or C functions, $118.00

PERFORMANCE OF HOUSEHOLD ELECTRICAL APPLIANCES (TC 59)
IEC 60704-2-3 Ed. 2.0 b:2004, Household and similar electrical appliances - Test code for the determination of airborne acoustical noise - Part 2-3: Particular requirements for dishwashers, $47.00

POWER CAPACITORS (TC 33)
IEC 60143-1 Ed. 4.0 b:2004, Series capacitors for power systems - Part 1: General, $135.00

SAFETY OF ELECTRICALLY-OPERATED FARM APPLIANCES (TC 61H)
IEC 60335-2-7 Ed. 2.0 b:2004, Household and similar electrical appliances - Safety - Part 2-70: Particular requirements for milking machines, $58.00
IEC 60335-2-86 Ed. 2.0 b:2004, Household and similar electrical appliances - Safety - Part 2-86: Particular requirements for electric fishing machines, $64.00

SAFETY OF HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES (TC 61)
IEC 60335-2-4 Amd.1 Ed. 5.0 en:2004, Amendment 1 - Household and similar electrical appliances - Safety - Part 2-4: Particular requirements for spin extractors, $19.00
IEC 60335-2-7 Amd.1 Ed. 6.0 en:2004, Amendment 1 - Household and similar electrical appliances - Safety - Part 2-7: Particular requirements for washing machines, $27.00
IEC 60335-2-9 Amd.1 Ed. 5.0 en:2004, Amendment 1 - Household and similar electrical appliances - Safety - Part 2-9: Particular requirements for grills, toasters and similar portable cooking appliances, $23.00
IEC 60335-2-29 Amd.1 Ed. 4.0 en:2004, Amendment 1 - Household and similar electrical appliances - Safety - Part 2-29: Particular requirements for battery chargers, $23.00
IEC 60335-2-41 Amd.1 Ed. 3.0 en:2004, Amendment 1 - Household and similar electrical appliances - Safety - Part 2-41: Particular requirements for pumps, $19.00
IEC 60335-2-80 Amd.1 Ed. 2.0 en:2004, Amendment 1 - Household and similar electrical appliances - Safety - Part 2-80: Particular requirements for fans, $17.00
IEC 60335-2-104 Ed. 1.0 b:2004, Household and similar electrical appliances - Safety - Part 2-104: Particular requirements for appliances to recover and/or recycle refrigerant from air conditioning and refrigeration equipment, $118.00

SECONDARY CELLS AND BATTERIES (TC 21)
IEC 61959 Ed. 1.0 b:2004, Secondary cells and batteries containing alkaline or other non-acid electrolytes - Mechanical tests for sealed portable secondary cells and batteries, $33.00

SWITCHGEAR AND CONTROLGEAR (TC 17)
IEC 60439-1 Amd.1 Ed. 4.0 b:2004, Amendment 1 - Low-voltage switchgear and controlgear assemblies - Part 1: Type-tested and partially type-tested assemblies, $87.00
IEC 60947-5-2 Ed. 2.2 b:2004, Low-voltage switchgear and controlgear - Part 5-2: Control circuit devices and switching elements - Proximity switches, $190.00

IEC Technical Specifications
SAFETY OF ELECTRONIC EQUIPMENT WITHIN THE FIELD OF AUDIO/VIDEO, INFORMATION TECHNOLOGY AND COMMUNICATION TECHNOLOGY (TC 108)
IEC/TS 62367 Ed. 1.0 en:2004, Safety aspects for xDSL signals on circuits connected to telecommunication networks (DSL: Digital Subscriber Line), $42.00
This section provides information on standards activity within CEN - the European Committee for Standardization - and CENELEC - the European Committee for Electrotechnical Standardization. CEN and CENELEC are composed of European member bodies whose countries cooperate within the European Economic Community (Common Market) and the European Free Trade Association (EFTA). Their primary purpose is to develop standards needed to harmonize European interests and prevent technical barriers. Both CEN and CENELEC are committed to adopting standards developed by ISO and IEC wherever possible.

ANSI is publishing this information to give U.S. interests an opportunity to obtain information, and to comment on proposed European Standards and/or Harmonization Documents being circulated for enquiry. Anyone interested in obtaining this information, and/or commenting on proposals should order copies from ANSI.

Comments regarding CEN are to be sent to Henrietta Scully at ANSI’s New York offices. Comments regarding CENELEC are to be sent to Charles T. Zegers, also at ANSI’s New York offices.

Ordering Instructions
ENs are currently available via ANSI’s ESS (Electronic Standards Store), accessed at www.ansi.org.

prENs can be made available via ANSI’s ESS “on-demand” via e-mail request. Send your request for a prEN to be made available via the ESS to Customer Service at sales@ansi.org and the document will be posted to the ESS within 3 working days. Please be ready to provide the date of the Standards Action issue in which the prEN document you are requesting appears.

The following European drafts have been sent to CEN members for enquiry and comment. If the draft is a proposed adoption of an International Standard, it is so noted. The final date for offering comments is listed after each proposal.

prEN 14220, Timber and wood-based materials in external windows, external door leaves and external door frames - Requirements and specifications - 4/22/2004, $46.00
prEN 14221, Timber and wood-based materials in internal windows, door leaves and internal door frames - Requirements and specifications - 4/22/2004, $46.00
prEN 14875, Garden equipment - Electric-powered scissor type grass shears - Mechanical safety - 6/22/2004, $64.00
prEN 14876, Transportable gas cylinders - Periodic inspection and testing of welded steel pressure drums - 6/22/2004, $50.00
prEN 14877, Synthetic surfaces for outdoor sports areas - Specification - 6/22/2004, $30.00
prEN 14878, Textiles - Burning behaviour of nightwear - Classification scheme - 6/22/2004, $30.00
prEN 14879-1, Organic coating systems and linings for protection of industrial apparatus and plants against corrosion caused by aggressive media - Part 1: Terminology, design and preparation of substrat - 5/22/2004, $64.00
prEN 14880, Surface active agents - Determination of inorganic sulfate content in anionic surface active agents - Potentiometric lead selective electrode titration method - 5/22/2004, $30.00
prEN 14881, Surface active agents - Determination of N-(3-diethylaminopropyl)-alanylamine content in alkylamidopropylbetaines - Gas-chromatographic method - 5/22/2004, $35.00
prEN 14882, Rubber or plastic coated fabrics - Determination of the static and dynamic coefficient of friction - 6/22/2004, $26.00
prEN 14883, Welding of thermoplastics - Machines and equipment for welding of thermoplastics by heated element - 6/22/2004, $64.00
prEN 14884, Air quality - Stationary source emissions - Determination of total mercury: Automated measuring systems - 6/22/2004, $56.00
European drafts sent for formal vote (for information)

The following European drafts have been sent to CEN members for formal vote. If the draft is a proposed adoption of an International Standard, it is so noted.

- prEN 1994-1-1 REVIEW, Design of composite steel and concrete structures - Part 1-1: General rules and rules for building
- prEN 1997-1 REVIEW, Eurocode 7: Geotechnical design - Part 1: General rules
- prEN 10326 REVIEW, Continuously hot-dip coated structural steels strip and sheet - Technical delivery conditions, $50.00
- prEN 10327 REVIEW, Continuously hot-dip coated strip and sheet of low carbon steels for cold forming - Technical delivery conditions
- prEN 12253 REVIEW, Road transport and traffic telematics - Dedicated short-range communication - Physical layer using microwave at 5.8 GHz
- prEN 13372 REVIEW, Road transport and traffic telematics (RTTT) - Dedicated short-range communication - Profiles for RTTT applications
- prEN 13705, Welding of thermoplastics - Machines and equipment for hot gas welding (including extrusion welding)
- prEN 14254, In vitro diagnostic medical devices - Single-use receptacles for the collection of specimens, other than blood, from humans
- prEN 14308, Thermal insulation products for building equipment and industrial installations - Factory made rigid polyurethane foam (PUR) and polysioyuranate foam (PIR) products - Specification
- prEN 14457, General requirements for components specifically designed for use in trenchless construction of drains and sewers
- prEN 14820, Single-use containers for human venous blood specimen collection
- prEN ISO 8847 REVIEW, Small craft - Steering gear - Cable and pulley systems (ISO/FDIS 8847: 1994)
Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by members of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland, who in turn disseminates the information to all WTO members. The purpose of this requirement is to provide trading partners with an opportunity to review and comment on the regulation before it becomes final.

To distribute information on these proposed foreign technical regulations, the National Center for Standards and Certification Information (NCSCI), National Institute of Standards and Technology (NIST), provides an on-line service - Export Alert! - that allows interested parties to register and obtain notifications, via e-mail, for countries and industry sectors of interest to them. To register, go to http://ts.nist.gov/ncsci and click on "Export Alert!".

NCSCI serves as the U.S. WTO TBT inquiry point and receives copies of all notifications, in English, to disseminate to U.S. industry. To obtain copies of the full text of the regulations or for further information, contact NCSCI, NIST, 100 Bureau Drive, Stop 2160, Gaithersburg, MD 20899-2160; telephone (301) 975-4040; fax (301) 926-1559, e-mail - ncsci@nist.gov.

NCSCI will also request an extension of the comment period and transmit comments to the issuing foreign agency for consideration.
American National Standards
Withdrawal by Accredited Standards Developer
ANSI/TIA 634-B-1999
In accordance with section 4.2.1.3.2 of the ANSI Essential Requirements, the Telecommunications Industry Association wishes to withdraw its approval of ANSI/TIA 634-B-1999, MSC-BS Interface for Public Wireless Communications Systems. Please direct inquiries to Billie Zidek-Conner, TIA; bzidekco@tia.eia.org.

ANSI Accredited Standards Developers
Change in ASC Secretariat
ASC Z244 - Lockout Protection
As no comments were received in response to the December 26, 2003 announcement of the transfer of Secretariat responsibilities for Accredited Standards Committee Z244, Lockout Protection, from the National Safety Council (NSC) to the American Society of Safety Engineers (ASSE), this action is confirmed, effective January 26, 2004. For additional information, please contact: Mr. Timothy R. Fisher, CSP, ARM, CPEA, Director, American Society of Safety Engineers, 1800 East Oakton Street, Des Plaines, IL 60018; PHONE: (847) 768-3411; FAX: (847) 296-9221; E-mail: TFisher@ASSE.org.

Reaccreditation
American Society of Civil Engineers (ASCE)
Comment Deadline: March 8, 2004
The American Society of Civil Engineers (ASCE) has submitted revisions to the operating procedures under which it was originally accredited. As these revisions appear to be substantive in nature, the reaccreditation process is initiated.
To obtain a copy of the revised procedures or to offer comments, please contact: Mr. James Rossberg, P.E., M.SEI, Director, Structural Engineering Institute of ASCE, 1801 Alexander Bell Drive, Reston, VA 20191; PHONE: (703) 295-6196; FAX: (703) 295-6361; E-mail: JRossberg@asce.org. Please submit your comments to Mr. Rossberg by March 8, 2004, with a copy to the Recording Secretary, ExSC in ANSI's New York Office (FAX: (212) 840-2298; E-mail: Jthompsog@ANSI.org). As the revisions have been provided electronically, the public review period is 30 days. You may view or download a copy of the revised ASCE operating procedures from ANSI Online during the public review period at the following URL: http://public.ansi.org/ansionline/Documents/Standards%20Activities/Public%20Review%20and%20Comment/Accreditation%20Actions/.

National Association of Architectural Metal Manufacturers (NAAMM)
Comment Deadline: March 8, 2004
The National Association of Architectural Metal Manufacturers (NAAMM) has submitted revisions to the operating procedures under which it was originally accredited. As these revisions appear to be substantive in nature, the reaccreditation process is initiated.
To obtain a copy of the revised procedures or to offer comments, please contact: Mr. Ed Estes, Technical Consultant, NAAMM, 8 South Michigan Avenue, Chicago, IL 60603; PHONE: (312) 332-0405; FAX: (312) 332-0706; E-mail: estesassos@cox.net. Please submit your comments to Mr. Estes by March 8, 2004, with a copy to the Recording Secretary, ExSC in ANSI's New York Office (FAX: (212) 840-2298; E-mail: Jthompsog@ANSI.org). As the revisions have been provided electronically, the public review period is 30 days. You may view or download a copy of the revised NAAMM operating procedures from ANSI Online during the public review period at the following URL: http://public.ansi.org/ansionline/Documents/Standards%20Activities/Public%20Review%20and%20Comment/Accreditation%20Actions/.

Meeting Notices
ASC Z136
The annual meeting of ASC Z136 has been scheduled for Wednesday, March 17, 2004. It will be held at the Center for Devices and Radiological Health (CDRH), 9200 Corporate Blvd., Room 20B, Rockville, Maryland, jointly hosted by ASC Z136 Vice-Chair Jerry Dennis and the LIA.
Hotel accommodations have been secured at the Quality Suites Shady Grove, Rockville at the nightly rate of $105 plus tax. When making your reservations, ask for the Laser Institute of America/ANSI special group rate. This rate is only guaranteed until February 22, 2004.
We urge all Committee members to attend this important meeting. If you would like to attend as an observer, please contact Barbara Sams at the LIA, (407) 380.1553 or bsams@laserinstitute.org for more information.
PROPOSED REQUIREMENTS FOR THE PUBLIC REVIEW OF
REVISONS AND ADDITIONS TO FIRST PUBLIC REVIEW DRAFT OF:
BSR/IIAR 2-1999a: proposed Addendum a to ANSI/IIAR 2-1999: Equipment, Design, and
Installation of Ammonia Mechanical Refrigerating Systems.

In response to comments on the First Public Review Draft of BSR/IIAR 2-1999a, IIAR has revised
the First Public Review draft. Proposed additions to the previously proposed requirements are
shown underlined, and proposed deletions are shown struck out. Public review comments shall
be limited to those additions and deletions only. For reference, the First Public Review Draft can
be found at the following location: https://www.iiar.org/f-technical.cfm

Revisions to Proposed Change #2
Modify section as follows:
7.3.4 Piping in the system and other components required to comply with this paragraph that may
contain liquid refrigerant or other incompressible fluids and that can be isolated from the system shall be
protected from hydrostatic pressure due to the thermal expansion of such liquids during periods of normal
operation, maintenance or standby by one of the following provisions:

  a. Installation of a pressure-relief device anywhere between isolation devices with discharge
     piping to relieve hydrostatic pressure to an another part of the system or to another acceptable
     location (see Appendix F), or

  b. Use of trained technicians to isolate liquid-containing parts of the system.

Revisions to Proposed Change #3
Modify sentence in second paragraph as follows:
Non-boiling liquids Liquids such as oil, secondary refrigerants, and subcooled primary refrigerants can
become entrapped when certain components of a refrigerating system are isolated from other parts of the
system by valves or other means.

Insert new third paragraph as follows:
Practitioners have found that very small relief devices satisfy most requirements for hydrostatic relief found
in refrigeration service. The technical literature available that quantifies such requirements, based on
empirical test data, is found almost exclusively in areas of practice that are much more severe than
refrigeration service. However, many authorities having jurisdiction require calculations or other evidence
to justify selection and sizing of hydrostatic relief devices. In those cases, it is acceptable good engineering
practice to demonstrate that a relief device having adequate capacity for an extremely severe application
will certainly be adequate for less severe circumstances typically encountered in refrigeration applications.
To that end, applicable methodology borrowed from more severe applications such as those found in the oil
and gas industries provide a safe and conservative basis for hydrostatic relief protection in refrigeration
applications. The objective is to provide adequate relief, not necessarily to determine exactly how much
liquid expansion will occur. In most, if not all cases, the smallest relief valves manufactured for such
purposes will have greater flow capacities than the requirements found by calculation for extremely severe
circumstances.

Revise language on page 5 describing equation variables as follows:
B = cubical expansion coefficient per degree Fahrenheit for the liquid at the expected temperature
H = total heat of absorption to the wetted bare surface of a vessel, pipe or container in BTU per hour
   (H = 21,000 A0.82 , where A = total wetted surface of a vessel in square feet)
G = specific gravity of the liquid at the flowing temperature
C = specific heat of the trapped fluid in BTU per lb-°F

New Proposed Change #9
Remove Figures A-1 and A-2 as an editorial change to informative Appendix A. These figures are
