American National Standards

Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

Ordering Instructions for “Call-for-Comment” Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

* Standard for consumer products
Comment Deadline: February 19, 2006

ASME (American Society of Mechanical Engineers)

Revisions

This Standard establishes physical, material, testing, and marking requirements for six-liter water closets that incorporate a water-conserving dual-flushing feature into the fixture. The tests specified in this Standard are for removal of liquid wastes and toilet tissue or other comparable waste loads that are expected when actuating the reduced flush feature of the unit.

Click here to see these changes in full, or look at the end of “Standards Action.”

AAMI (Association for the Advancement of Medical Instrumentation)

New National Adoptions

Specifies general production, labeling and performance requirements for the manufacture of biological indicators and suspensions intended for use in the validation and monitoring of sterilization cycles.

Single copy price: $50.00/$95.00 Mbr/list (print: Order Code 1113801-P); $50.00/$95.00 Mbr/list (electronic: Order Code 1113801-P-PDF)

Send comments (with copy to BSR) to: C.J. Gomez, AAMI, 20S2; gomezc@asme.org

Provides specific requirements for test organisms and biological indicators intended for use in assessing the performance of sterilizers employing pure ethylene oxide gas or admixtures of the gas with diluent gases at sterilizing temperatures within the range of 20 C to 65 C.

Single copy price: $35.00/$70.00 Mbr/list (print: Order Code 1113802-P); $35.00/$70.00 Mbr/list (electronic: Order Code 1113802-P-PDF)

Send comments (with copy to BSR) to: Cliff Bernier, AAMI; CBernier@aami.org

This part of ISO 11138 provides specific requirements for test organisms, inoculated carriers and biological indicators intended for use in assessing the performance of sterilization processes employing moist heat as the sterilizing agent.

Single copy price: $35.00/$70.00 Mbr/list (print: Order Code 1113903-P); $35.00/$70.00 Mbr/list (electronic: Order Code 1113803-P-PDF)

Send comments (with copy to BSR) to: Cliff Bernier, AAMI; CBernier@aami.org

* BSR/AAMI/ISO 11138-4-200x, Sterilization of health care products - Biological indicators - Part 4: Biological indicators for dry heat sterilization processes (identical national adoption)

Provides specific requirements for test organisms, inoculated carriers and biological indicators intended for use in assessing the performance of sterilization processes employing dry heat as the sterilizing agent.

Single copy price: $35.00/$70.00 Mbr/list (print: Order Code 1113804-P); $35.00/$70.00 Mbr/list (electronic: Order Code 1113804-P-PDF)

Send comments (with copy to BSR) to: Cliff Bernier, AAMI; CBernier@aami.org

* BSR/AAMI/ISO 11138-5-200x, Sterilization of health care products - Biological indicators - Part 5: Biological indicators for low-temperature steam and formaldehyde sterilization processes (identical national adoption)

Provides specific requirements for test organisms, inoculated carriers and biological indicators intended for use in assessing the performance of sterilization processes employing low-temperature steam-formaldehyde as the sterilizing agent.

Single copy price: $35.00/$70.00 Mbr/list (print: Order Code 1113805-P); $35.00/$70.00 Mbr/list (electronic: Order Code 1113805-P-PDF)

BSR S1.4-1983 (R200x), Specification for Sound Level Meters (reaffirmation of ANSI S1.4-1983 (R2001))
This standard specifies minimum requirements for three basic types of sound level meters, types 0, 1, and 2, with performance requirements that become progressively less stringent, proceeding from type 0 to type 2. For each type, the standard requires three frequency weightings, A, B, and C, and two exponential-time-averaging characteristics, slow and fast.

BSR S1.4a-1985 (R200x), Amendment to ANSI S1.4-1983 (reaffirmation of ANSI S1.4a-1985 (R2001))
The intent of this amendment is:
(a) to specify the electrical design goal for the relative response characteristics of the A-weighted frequency response up to 100kHz; and
(b) to specify type 0 and type 1 tolerance limits on relative electrical response for frequencies between 16 kHz and 100 kHz.
Single copy price: $100.00

BSR S1.5-1984 (R200x), Preferred Frequencies, Frequency Levels, and Band Numbers for Acoustical Measurements (reaffirmation of ANSI S1.6-1984 (R2001))
This standard defines the preferred frequencies, or nominal band-center frequencies to be used for acoustical measurements. Frequency levels or band numbers are associated with these sets of frequencies, and the preferred frequencies are rounded values obtained from those for which the corresponding frequency levels or band numbers are integers.
Single copy price: $90.00
Obtain an electronic copy from: sblaeser@aip.org
Order from: Susan Blaeser, ASA (ASC S1); sblaeser@aip.org
Send comments (with copy to BSR) to: Same

BSR S1.8-1989 (R200x), Reference Quantities for Acoustical Levels (reaffirmation of ANSI S1.8-1989 (R2001))
This standard includes reference quantities for commonly used levels in acoustics, electro-acoustics, and mechanical vibration. Acoustical levels of various kinds are commonly used to describe acoustical measurements in gases, liquids, and solids. A reference quantity, preferably independent of the medium, is needed for each kind of level. The preferred unit for an acoustical level is the decibel.

BSR S1.9-1996 (R200x), Instruments for the Measurement of Sound Intensity (reaffirmation of ANSI S1.9-1996 (R2001))
Specifies the requirements for instruments to measure sound intensity employing the two-microphone technique and methods for performance verification to meet the requirements. Its primary application is to instruments used for the determination of sound power of sources, in accordance with the requirements of ANSI S12.12-1992. The requirements and methods of performance verification are specified for the complete instrument system and separately for the probes and processors forming the complete system.

BSR S1.42-2001 (R200x), Design Response of Weighting Networks for Acoustical Measurements (reaffirmation of ANSI S1.42-2001)
This Standard provides the design criteria for both the frequency-domain response (amplitude and phase) and time-domain of the A- and C-weighting networks used in acoustically related measurements. The poles and zeros for each weighting network are given, along with equations for computing the amplitude and phase responses as functions of frequency and impulse and step responses as functions of time. Other known weighting networks that had been standardized, such as the B-, D- and E-weightings, or weightings that were published in the past, are listed in the Annexes for reference.

ANSI S2.41-1985 (R2001), Mechanical Vibration of Large Rotating Machines with Speed Range from 10 to 200 rev/s - Measurement and Evaluation of Vibration Severity in situ (withdrawal of ANSI S2.41-1985 (R2001))

Focuses on the measurement and evaluation of vibration severity of large rotating machinery in situ. It is not applicable to reciprocating machinery. The values recommended as limits in this standard are intended to serve as standard values for machines of similar type, when measured in accordance with the procedures describes herein. The recommended vibration limits may be used for acceptance standards or for monitoring the performance of the machine during service operations.

Revisions

BSR/ASAE S338.5-200x, Field Equipment for Agriculture - Safety Chain for Towed Equipment (revision of ANSI/ASAE S338.4-NOV97 (RAPR2003))

This Standard covers the specifications for an auxiliary attaching system to retain a connection between towing and towed machines in the event of separation of the primary attaching system long enough to bring the machines to a stop. It should not be construed that this auxiliary system can ensure that control or connection will be maintained in the event of incidents such as loss of control, rollover, jackknife or collision. This Standard applies to all combinations of agricultural towing and towed equipment when traveling on highways.

Correction

Call for Comment Deadline Extended for UL Standards

In the Standards Action dated December 23, 2005 the following UL standards were listed incorrectly for a 45 day public review. The length of the public review should be extended to 60 days so that the comment deadline ends on February 21, 2006.

1) BSR/UL 1316, Standard for Safety for Glass-Fiber-Reinforced Plastic Underground Storage Tanks for Petroleum Products, Alcohols, and Alcohol-Gasoline Mixtures
2) BSR/UL 1746, Standard for Safety for External Corrosion Protection Systems for Steel Underground Storage Tanks
The addresses listed in this section are to be used in conjunction with standards listed in Call for Comment. This section is a list of developers who have submitted standards for public review in this issue of Standards Action – it is not intended to be a list of all ANSI developers. Please send all address corrections to: Standards Action Editor, American National Standards Institute, 25 West 43rd Street, New York, NY 10036 or standact@ansi.org.

Initiation of Canvasses

The following ANSI-accredited standards developers have announced their intent to conduct a canvass on the proposed American National Standard(s) listed herein in order to develop evidence of consensus for submittal to ANSI for approval as an American National Standard. Directly and materially affected interests wishing to participate as a member of a canvass list, i.e., consensus body, should contact the sponsor of the standard within 30 days of the publication date of this issue of Standards Action. Please also review the section entitled “American National Standards Maintained Under Continuous Maintenance” contained in Standards Action for information with regard to canvass standards maintained under the continuous maintenance option.

Correction

Missing Standards

Four standards were scheduled to appear in the Final Actions section of the December 23, 2005 issue of Standards Action. Due to an oversight, they were not listed and are being included in this issue. The four standards are: ANSI/CEA 426-B-1998 (R2005), ANSI/(NFPA) T3.5.26 R2-2000 (R2005), ANSI/SCTE 38-2-2005, and ANSI/UL 2108-2005.
Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

3-A (3-A Sanitary Standards, Inc.)
Office: 1451 Dolley Madison Boulevard Suite 210
McLean, VA 22101
Contact: Timothy Rugh
Fax: (703) 761-4334
E-mail: trugh@3-A.org

BSR/3-A P3-A 001-200x, Terminology Relating to Equipment Used in the Manufacture of Active Pharmaceutical Ingredients (new standard)
Stakeholders: Active pharmaceutical ingredient manufacturers (users), pump and component manufacturers, regulatory bodies.
Project Need: To create standards for the design of equipment that will be more efficiently cleanable, enhance acceptance by QA and inspection agencies, and advance the state-of-the-art for production equipment. This standard is one in a series of equipment and materials of construction standards.
This standard will establish standard terminology for use in the series of equipment and materials of construction standards.

AGA (ASC Z380) (American Gas Association)
Office: 400 North Capitol Street, NW
Washington, DC 20001
Contact: Paul Cabot
Fax: (202) 824-9122
E-mail: pcabot@aga.org

Stakeholders: Natural gas transmission and distribution companies, pipeline and equipment manufacturers.
Project Need: To update the standard.
Standard contains a model set of design recommendations, material reference, and recommended practices relating to compliance with the Federal Natural Gas Pipeline Safety Regulations, Title 49 CFR Parts 191, and 192.

ALI (ASC A14) (American Ladder Institute)
Office: 401 N. Michigan Avenue
Chicago, IL 60611
Contact: Ron Pietrzak
Fax: (312) 527-6705
E-mail: rpietrzak@smithbucklin.com

BSR/ASC A14.3-200x, Ladders - Fixed - Safety Requirement (revision of ANSI A14.3-2002)
Stakeholders: End users of fixed ladders (consumers).
Project Need: To update an existing standard for its 5-year cycle.
This standard prescribes the minimum requirements for the design, construction, and use of fixed ladders and sets forth requirements for cages, wells, and ladder safety systems used with fixed ladders, in order to minimize personal injuries. All parts and appurtenances necessary for a safe and efficient ladder shall be considered integral parts of the design.

AWWA (American Water Works Association)
Office: 6666 West Quincy Avenue
Denver, CO 80235
Contact: Jim Wailes
Fax: (303) 795-7603
E-mail: jwailes@awwa.org

BSR/AWWA B506-200x, Zinc Orthophosphate (new standard)
Stakeholders: Drinking water treatment and supply industry. Water utilities, consulting engineers.
Project Need: To provide the minimum requirements for zinc orthophosphate (including physical, chemical, packaging, shipping, and testing requirements).
This standard describes zinc orthophosphate (ZOP) corrosion inhibitor in dry and liquid forms for use in water supply service.

CSA (3) (CSA America, Inc.)
Office: 8501 East Pleasant Valley Road
Cleveland, OH 44131-5575
Contact: Allen Callahan
Fax: (216) 642-3463
E-mail: al.callahan@csa-america.org

BSR Z83.8a-200x, Gas Unit Heaters and Gas-Fired Duct Furnaces (same as CSA 2.6a) (revision of ANSI Z83.8a-2003)
Stakeholders: Consumers, manufacturers, gas suppliers and certifying agencies.
Project Need: To revise the standard.
Details test and examination criteria for gas unit heaters and gas-fired duct furnaces for use with natural, manufactured, and mixed gases; LP gases; and LP gas-air mixtures. A unit heater may either be suspended or floor-mounted and may be of the low- or high-static pressure type.
DASMA (Door and Access Systems Manufacturers Association)
Office: 1300 Sumner Avenue
Cleveland, Ohio 44115-2851
Contact: Jennifer Boyle
E-mail: jboyle@taol.com

BSR/DASMA 103-2001 (R200x), Standard for Counterbalance Systems on Residential Sectional Garage Doors (reaffirmation of ANSI/DASMA 103-2001)

Stakeholders: Manufacturers of garage doors and garage door components, users of garage doors, test labs.

Project Need: The standard is being reaffirmed for its full scheduled review.

This standard defines performance-based and prescriptive-based methods of compliance for sectional door counterbalance system components under tension. This specification for sectional garage doors is intended to cover residential sectional garage doors generally used for vehicular traffic. Without limitation, DASMA does not represent or imply that this standard relates to any component or system other than counterbalance systems expressly identified and described herein.

ITSDF (Industrial Truck Standards Development Foundation, Inc.)
Office: 1750 K St NW, Suite 460
Washington, DC 20006
Contact: William Montwieler
Fax: (202) 478-7599
E-mail: wmontwieler@earthlink.net

BSR/ITSDF B56.10-200x, Safety Standard for Manually Propelled High Lift Industrial Trucks (revision of ANSI/ITSDF B56.10-2005)

Stakeholders: Manufacturers and users of manually propelled high-lift industrial trucks

Project Need: Wording needs to be revised to harmonize with other B56 standards.

This Standard defines the safety requirements relating to the elements of design, operation, and maintenance of manually propelled, high-lift industrial trucks controlled by a walking operator, and intended for use on level, improved surfaces.

SDI (ASC A250) (Steel Door Institute)
Office: 30200 Detroit Road
Cleveland, Ohio 44135
Contact: Linda Hamill
Fax: (440) 892-1404
E-mail: leh@wherryassoc.com

BSR A250.4-200x, Physical Endurance for Steel Doors, Frames, Frame Anchors and Hardware Reinforcings (revision of ANSI A250.4-2001)

Stakeholders: Architects, specifiers, contractors.

Project Need: Existing ANS that needs to be revised/affirmed as part of the 5-year cycle.

To establish a standard method of testing the performance of a steel door mounted in a pressed steel or channel iron frame, installed with appropriate anchors, under conditions that might reasonably be considered an accelerated field-operating condition.

BSR A250.11-200x, Recommended Erection Instructions (revision of ANSI A250.11-2001)

Stakeholders: Architects, specifiers, contractors.

Project Need: Existing ANS that needs to be revised/affirmed as part of the 5-year cycle.

Provides recommended methods for the installation of steel frames for swinging doors in a variety of wall conditions, commonly used in commercial buildings.

UL (Underwriters Laboratories, Inc.)
Office: 333 Pfingsten Road
Northbrook, IL 60062-2096
Contact: Susan Malohn
Fax: (847) 407-1725
E-mail: Susan.P.Malohn@us.ul.com

BSR/UL 1286-200x, Office Furnishings (new standard)

Stakeholders: AHJs, manufacturers, and users of office furnishings.

Project Need: Development of a new ANSI standard

Describes office furnishing panels, study carrels, work stations, and pedestal-style that are mechanically interconnected to form an office furnishing system, in accordance with the NEC. These are able to be provided with an electrical distribution system, including switches, receptacles, and channels for routing communication cables within system components separate from electrical raceways. Also describes lighting units intended to be mechanically attached to particular components within an individual office or office furnishing system.
American National Standards
Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMVA
- AGRSS
- ASC B109 (AGA)
- ASHRAE
- ASME
- ASTM
- NBBPVI
- NSF International
- TIA
- Underwriters Laboratories Inc.

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on "Standards Information," and see "American National Standards Maintained Under Continuous Maintenance". This information is also available directly at http://public.ansi.org/ansionline/Documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address. If you request that information be provided via fax, please include your fax number. Thank you.
ISO Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments
Comments regarding ISO documents should be sent to Henrietta Scully, at ANSI's New York offices. The final date for offering comments is listed after each draft.

Ordering Instructions
ISO Drafts can be made available via ANSI's ESS "on-demand" service. Please e-mail your request for an ISO Draft to Customer Service at sales@ansi.org. The document will be posted to the ESS within 3 working days of the request. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

NUCLEAR ENERGY (TC 85)
ISO/DIS 9278, Uranium dioxide pellets - Determination of density and amount of open and closed porosity - Boiling water method and penetration immersion method - 4/15/2006, $46.00

OPTICS AND OPTICAL INSTRUMENTS (TC 172)
ISO/DIS 10934-2, Optics and optical instruments - Vocabulary for microscopy - Part 2: Advanced techniques in light microscopy - 4/15/2006, $46.00

TOBACCO AND TOBACCO PRODUCTS (TC 126)
ISO/DIS 2965, Materials used as cigarette papers, filter plug wrap and filter joining paper, including materials having an oriented permeable zone - Determination of air permeability - 4/15/2006, $93.00

WELDING AND ALLIED PROCESSES (TC 44)
ISO/DIS 13918, Welding - Studs and ceramic ferrules for arc stud welding - 4/11/2006, $112.00
Newly Published ISO Standards

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Global Engineering Documents.

Agricultural Food Products (TC 34)

- ISO 10272-1:2006, Microbiology of food and animal feeding stuffs - Horizontal method for detection and enumeration of Campylobacter spp. - Part 1: Detection method, $67.00
- ISO 21871:2006, Microbiology of food and animal feeding stuffs - Horizontal method for the determination of low numbers of presumptive Bacillus cereus - Most probable number technique and detection method, $62.00

Corrosion of Metals and Alloys (TC 156)

- ISO 10062:2006, Corrosion tests in artificial atmosphere at very low concentrations of polluting gas(es), $58.00

Cryogenic Vessels (TC 220)

- ISO 21013-3:2006, Cryogenic vessels - Pressure-relief accessories for cryogenic service - Part 3: Sizing and capacity determination, $46.00

Document Imaging Applications (TC 171)

- ISO 3334:2006, Micrographics - ISO resolution test chart No. 2 - Description and use, $46.00

Essential Oils (TC 54)

- ISO 4731:2006, Oil of geranium (Pelargonium X ssp.), $53.00

Fine Ceramics (TC 206)

- ISO 20504:2006, Fine ceramics (advanced ceramics, advanced technical ceramics) - Test method for compressive behaviour of continuous fibre-reinforced composites at room temperature, $82.00
- ISO 22215:2006, Fine ceramics (advanced ceramics, advanced technical ceramics) - Test method for tensile creep of monolithic ceramics, $46.00

Fluid Power Systems (TC 131)

- ISO 16028/Amd1:2006, Hydraulic fluid power - Flush-face type, quick-action couplings for use at pressures of 20 MPa (200 bar) to 31.5 MPa (315 bar) - Specifications - Amendment 1, $13.00

Gas Cylinders (TC 58)

- ISO 10297:2006, Transportable gas cylinders - Cylinder valves - Specification and type testing, $93.00

Graphic Technology (TC 130)

- ISO 12648:2006, Graphic technology - Safety requirements for printing press systems, $165.00

Metallic and Other Inorganic Coatings (TC 107)

- ISO 10308:2006, Metallic coatings - Review of porosity tests, $98.00

Other

- ISO 2419:2006, Leather - Physical and mechanical tests - Sample preparation and conditioning, $33.00
- ISO 4098:2006, Leather - Chemical tests - Determination of water-soluble matter, water-soluble inorganic matter and water-soluble organic matter, $40.00

Pulleys and Belts (Including Veebelts) (TC 41)

- ISO 10247/Amd1:2006, Conveyor belts - Characteristics of covers - Classification - Amendment 1, $13.00

Road Vehicles (TC 22)

- ISO 15031-5:2006, Road vehicles - Communication between vehicle and external equipment for emissions-related diagnostics - Part 5: Emissions-related diagnostic services, $194.00

Rubber and Rubber Products (TC 45)

- ISO 20299-1:2006, Film for wrapping rubber bales - Part 1: Butadiene rubber (BR) and styrene-butadiene rubber (SBR), $29.00

Valves (TC 153)

- ISO 15848-1:2006, Industrial valves - Measurement, test and qualification procedures for fugitive emissions - Part 1: Classification system and qualification procedures for type testing of valves, $119.00

Welding and Allied Processes (TC 44)

- ISO 16834:2006, Welding consumables - Wire electrodes, wires, rods and deposits for gas-shielded arc welding of high strength steels - Classification, $62.00

ISO Technical Reports

Clinical Laboratory Testing and in Vitro Diagnostic Test Systems (TC 212)

- ISO/TR 18112:2006, Clinical laboratory testing and in vitro diagnostic test systems - In vitro diagnostic medical devices for professional use - Summary of regulatory requirements for information supplied by the manufacturer, $165.00

Quality Management and Corresponding General Aspects for Medical Devices (TC 210)

- ISO/TR 16142:2006, Medical devices - Guidance on the selection of standards in support of recognized essential principles of safety and performance of medical devices, $71.00

ISO Technical Specifications

Equipment for Fire Protection and Fire Fighting (TC 21)

- ISO/TS 7240-9:2006, Fire detection and alarm systems - Part 9: Test fires for fire detectors, $112.00
GEOTECHNICS (TC 182)

ISO/TS 17892-1/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 1: Determination of water content - Corrigendum, FREE

ISO/TS 17892-2/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 2: Determination of density of fine-grained soil - Corrigendum, FREE

ISO/TS 17892-3/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 3: Determination of particle density - Pycnometer method - Corrigendum, FREE

ISO/TS 17892-4/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 4: Determination of particle size distribution - Corrigendum, FREE

ISO/TS 17892-5/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 5: Incremental loading oedometer test - Corrigendum, FREE

ISO/TS 17892-6/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 6: Fall cone test - Corrigendum, FREE

ISO/TS 17892-7/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 7: Unconfined compression test on fine-grained soils - Corrigendum, FREE

ISO/TS 17892-8/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 8: Unconsolidated undrained triaxial test - Corrigendum, FREE

ISO/TS 17892-9/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 9: Consolidated triaxial compression tests on water-saturated soils - Corrigendum, FREE

ISO/TS 17892-10/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 10: Direct shear tests - Corrigendum, FREE

ISO/TS 17892-11/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 11: Determination of permeability by constant and falling head - Corrigendum, FREE

ISO/TS 17892-12/Cor1:2006, Geotechnical investigation and testing - Laboratory testing of soil - Part 12: Determination of Atterberg limits - Corrigendum, FREE

STERILIZATION OF HEALTH CARE PRODUCTS (TC 198)

ISO/TS 11139:2006, Sterilization of health care products - Vocabulary, $62.00

ISO/IEC JTC 1, Information Technology

ISO/IEC 13818-7:2006, Information technology - Generic coding of moving pictures and associated audio information - Part 7: Advanced Audio Coding (AAC), $194.00

ISO/IEC 14496-16/Amd1:2006, Amendment 1: Morphing and textures, $119.00

ISO/IEC 15444-1/Amd1:2006, Codestream restrictions - Amendment 1: Profiles for digital cinema applications, $13.00

ISO/IEC 15476-3:2006, Information technology - CDIF semantic metamodel - Part 3: Data definitions, $155.00

ISO/IEC 21000-10:2006, Information technology - Multimedia framework (MPEG-21) - Part 10: Digital Item Processing, $175.00
Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on “Subscribe”. NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.
Information Concerning ANSI Accredited Standards Developers

Administrative Accreditation
ASC Z49 – Safety Welding and Cutting
At the direction of ANSI's Executive Standards Council, the accreditation of Accredited Standards Committee Z49, Safety Welding and Cutting, has been administratively maintained using revised operating procedures for documenting consensus on proposed American National Standards, under its last date of reaccreditation, August 17, 2005. This action is taken, effective January 17, 2006. For additional information, please contact the Secretary of ASC Z49: Mr. Steve Hedrick; American Welding Society, 550 NW LeJeune Road, Miami, FL 33126; PHONE: (800) 443 9353; E-mail: steveh@aws.org.

Administrative Reaccreditation
American Society of Safety Engineers (ASSE)
The American Society of Safety Engineers (ASSE) has been administratively reaccredited at the direction of ANSI's Executive Standards Council, under revised operating procedures for documenting consensus on proposed Z590 American National Standards, effective January 17, 2006. For additional information, please contact: Mr. Timothy R. Fisher, CSP, ARM, CPEA, Director, Practices and Standards, American Society of Safety Engineers, 1800 E. Oakton Street, Des Plaines, IL 60018; PHONE: (847) 768-3411; FAX: (847) 296-9221; E-mail: TFisher@ASSE.Org.

Approval of Accreditation
International Association for Continuing Education and Training (IACET)
ANSI's Executive Standards Council has approved the International Association for Continuing Education and Training (IACET) as an ANSI Accredited Standards Developer under its own operating procedures for documenting consensus on proposed American National Standards, effective January 12, 2006. For additional information, please contact: Ms. Katherine Brick, IACET, 1620 I Street NW, Suite 615, Washington, DC 20006; PHONE: (202) 463-2905; FAX: (202) 463-8498; E-mail: katherine@moinc.com.

Approval of Reaccreditation
ASC A10 – Safety Requirements for Construction and Demolition Operations
ANSI's Executive Standards Council has approved the reaccreditation of Accredited Standards Committee (ASC) A10, Safety Requirements for Construction and Demolition Operations, under revised operating procedures for documenting consensus on proposed American National Standards, effective January 10, 2006. For additional information, please contact the Secretariat of ASC A10: Mr. Timothy R. Fisher, CSP, ARM, CPEA, American Society of Safety Engineers, 1800 E. Oakton Street, Des Plaines, IL 60018; PHONE: (847) 768-3411; FAX: (847) 296-9221; E-mail: TFisher@ASSE.Org.

ASC X12 – Electronic Data Interchange
ANSI's Executive Standards Council has approved the reaccreditation of Accredited Standards Committee X12, Electronic Data Interchange, using revised operating procedures for documenting consensus on proposed American National Standards, effective January 13, 2006. For additional information, please contact the Secretariat of ASC X12: Ms. Yvonne Meding, Director of X12 Operations, Data Interchange Standards Association, 7600 Leesburg Pike, Suite 430, Falls Church, VA 22043; PHONE: (703) 970-2051; FAX: (703) 970-4488; E-mail: ymeding@disa.org.

U.S. Technical Advisory Groups

Application for Accreditation
ISO/TC 142 – Cleaning Equipment for Air and Other Gases

Comment Deadline: February 20, 2006
The Institute of Environmental Sciences and Technology (IEST) has submitted an Application for Accreditation for the U.S. Technical Advisory Group to ISO/TC 142, Cleaning equipment for air and other gases, and a request for approval as TAG Administrator. The proposed U.S. TAG to ISO/TC 142 intends to operate using the Model Operating Procedures for U.S. Technical Advisory Groups to ANSI for ISO Activities, as contained in Annex A of the ANSI International Procedures.

For additional information, or to offer comments, please contact: Ms. Julie Kendrick, Executive Director, IEST, 5005 Newport Drive, Suite 506, Rolling Meadows, IL 60008-3841; PHONE: (847) 255-1561, ext. 11; FAX: (847) 255-1699; E-mail: jkendrick@iest.org. Please forward any comments to IEST, with a copy to the Recording Secretary, ExSC, in ANSI's New York Office (FAX: (212)-840-2298; E-mail: jthompso@ansi.org) by February 20, 2006.
Meeting Notices

ASC Z136 – Safe Use of Lasers
The annual meeting of ASC Z136 is scheduled for Thursday, March 16, 2006. It will be held at the Center for Devices and Radiological Health (CDRH), 9200 Corporate Blvd., Room 20B, Rockville, Maryland, jointly hosted by ASC Z136 Vice Chair Jerry Dennis and the LIA.

In conjunction with the annual meeting, standards subcommittees SSC-2 (Telecommunications) and SSC-4 (Measurements) and technical subcommittee TSC-1 (Bioeffects) will be holding meetings earlier in the week. Please contact your subcommittee chair for details.

We urge all Committee members to attend this important meeting. In addition to subcommittee status updates, Dr. David Sliney will present the findings of the Ad-Hoc Committee on Additional Standards.

If you have any questions or are interested in attending as an observer, please contact Barbara Sams at the LIA, (407) 380.1553 or bsams@laserinstitute.org for more information.

ANSI-Accredited U.S. TAG to ISO/TC 229 Nanotechnologies
The 5th meeting of the ANSI-Accredited U.S. TAG to ISO/TC 229 Nanotechnologies will take place on February 22, 2006, in Washington, D.C., location TBD. For additional information or to join the U.S. TAG, please contact Heather Benko (hbenko@ansi.org) at ANSI.
CHANGES TO A112.19.14 (DECEMBER 2005 DRAFT)

1.1 Scope

This Standard establishes physical, material, testing, and marking requirements for six-liter water closets that incorporate a water-conserving dual flushing feature into the design of the fixture. …

1.4 Definitions

low-consumption water closet: a water closet having an average water consumption (total full flush volume) less than or equal to 1.6 gal (6 L) over the range of test pressures as specified in ASME A112.19.2 for each water closet type, and not exceeding 2.0 gal (7.6 L) at any one test pressure (based upon average values from the three run test).

3.2.3 Dye Test

3.2.3.1 Test Method

(c) 0.34 oz (10 mL) of this solution shall be removed from the bowl and shall be added to 5.75 oz (50 mL) of clean water in a suitable container (i.e., dilution ration of 50:1). A sample of this solution shall be set aside in a test tube or comparator vial as the control sample.

(d) The water closet shall then be flushed several times to ensure that all traces of the dye solution have been removed. One oz (30 mL) of the dye solution [see para. 3.2.3.1(a)] shall be added to the bowl. The flushing device flush actuator shall be actuated and released in a normal manner and the test fixture shall be allowed to complete its filling cycle. …

3.2.3.2 Performance Requirement. A dilution ratio of at least 17:1 shall be obtained in each initial flush, for the average of the three tests. The procedure shall be repeated until three sets of data are obtained.

3.2.4.1.2 Wet Tensile Strength

(a) Test Method. A 2 in. Schedule 40 PVC coupling and union nut shall be used as a frame to hold the toilet paper for the wet tensile strength test. Place one sheet of the toilet paper on the coupling and the union nut shall be slid over the coupling. The frame shall be inverted and the paper shall be submerged in water for 5 sec. The frame shall then be removed from the water and shall be returned to an upright position. A 0.312 in. (8 mm) diameter steel ball weighing 6.3 ± 0.1 g shall be placed in the center of the wet sheet.

3.2.5.1 Test Method. The water closet shall be cycled 15,000 cycles in the full volume flush mode with one reduced flush after each four full flushes, then and, after each four full flushes, one reduced flush shall be made followed by 60,000 cycles in the reduced volume flush mode.
