This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained.

Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

Ordering Instructions for “Call-for-Comment” Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

* Standard for consumer products
Comment Deadline: December 10, 2006

NSF (NSF International)

Revisions

BSR/NSF 2-200x (i14), Food Equipment (revision of ANSI/NSF 2-2005a)
Issue 14: The purpose of the ballot is to clarify what is considered easily cleanable for wire whips.

Click here to see these changes in full, or look at the end of "Standards Action."

Comment Deadline: December 25, 2006

AISI (American Iron and Steel Institute)

New Standards

BSR/AISI COFS/PRODUCT-200x, North American Standard for Cold-Formed Steel Framing - Product Data (new standard)
This standard provides criteria, including material and product requirements for structural and nonstructural cold-formed steel framing members where the specified minimum base steel thickness is between 18 mils (0.0179 inches) (0.455 mm) and 118 mils (0.1180 inches) (2.997 mm). The components covered include C-shape studs, joists, track, U-channels, furring channels and angles.
Single copy price: Free

Order from: Jay Larson, AISI; jlarson@steel.org
Send comments (with copy to BSR) to: Same

Revisions

BSR/AISI COFS/TRUSS-200x, North American Standard for Cold-Formed Steel Framing - Truss Design (revision of ANSI/AISI COFS/TRUSS-2004)
Covers design of cold-formed steel trusses for load-carrying purposes in buildings, including manufacturing, quality criteria, installation and testing, as they relate the design of cold-formed steel trusses.
Single copy price: Free
Obtain an electronic copy from: Jay Larson (jlarson@steel.org)
Order from: Jay Larson, AISI; jlarson@steel.org
Send comments (with copy to BSR) to: Same

BSR/AISI COFS/HEADER-200x, North American Standard for Cold-Formed Steel Framing - Header Design (revision of ANSI/AISI COFS/HEADER-2004)
Covers design and installation of cold-formed steel box and back-to-back headers, and double and single L-headers for load-carrying purposes in buildings.
Single copy price: Free
Obtain an electronic copy from: Jay Larson (jlarson@steel.org)
Order from: Jay Larson, AISI; jlarson@steel.org
Send comments (with copy to BSR) to: Same

BSR/AISI COFS/GP-200x, North American Standard for Cold-Formed Steel Framing - General Provisions (revision of ANSI/AISI COFS/GP-2004)
Covers design, construction and installation of structural and nonstructural cold-formed steel framing members where the specified minimum base steel thickness is between 18 mils (0.0179 inches) (0.457 mm) and 118 mils (0.1180 inches) (3.00 mm).
Single copy price: Free
Obtain an electronic copy from: Jay Larson (jlarson@steel.org)
Order from: Jay Larson, AISI; jlarson@steel.org
Send comments (with copy to BSR) to: Same

ASTM (ASTM International)

The URL to search for scopes of ASTM standards is: http://www.astm.org/dsearch.htm
For reaffirmations and withdrawals, order from: Customer Service, ANSI
For new standards and revisions, order from: Corice Leonard, ASTM; cleonard@astm.org
For all ASTM standards, send comments (with copy to BSR) to: Corice Leonard, ASTM; cleonard@astm.org

CEA (Consumer Electronics Association)

New Standards

- BSR/CEA 2003-C-200x, Digital Audiobook File Format and Player Requirements (new standard)
  Defines requirements and provides recommendations to publishers, software developers, content providers, and hardware manufacturers for the data structure, usability requirements, playback systems and delivery systems for audiobooks in digital file format. It should be noted that throughout CEA-2003-C, the term “audiobook” is defined as any audio file or collection of audio files of primarily spoken word content that is played in a linear order.
  Single copy price: 97.50 (CEA Member); $130.00 (Nonmember)
  Obtain an electronic copy from: www.ihis.com

ESTA (ASC E1) (Entertainment Services and Technology Association)

New Standards

BSR E1.6-1-200x, Entertainment Technology - Powered Winch Hoist Systems (new standard)
This draft standard is part of the BSR E1.6 powered theatrical rigging system project. This part, BSR E1.6-1, deals with powered winches that are not serially manufactured electric chain hoists, and is intended to establish requirements for the design, manufacture, inspection, and maintenance of powered winch hoist systems for lifting and suspending loads in theatres and other places of public assembly where the failure of such systems could endanger life or limb of performers, audience members, workers, or the general public.

BSR E1.27-2-200x, Entertainment Technology - Standard for Permanently Installed Control Cables for Use with ANSI E1.11 (DMX512-A) and USITT DMX512/1990 Products (new standard)
Describes the types of permanently installed cable used to interconnect products that comply with ANSI E1.11-2004 (DMX512-A) or with USITT DMX512/1990. The description includes definitions of acceptable cable and connector types and the ways in which they may be used. This draft standard is intended for entertainment lighting applications that are permanently installed, regardless of the nature of the facility. Connection of portable and temporary equipment are not covered by this standard.

ICC (International Code Council)

New Standards

BSR/ICC 500-200x, Standard on Design, Construction and Performance of Storm Shelters (new standard)
Provides technical design and performance criteria that will facilitate and promote the design, construction, and installation of safe, reliable, and economical storm shelters to protect the public. It is intended that this Standard be used by design professionals, storm shelter designers, manufacturers, and constructors, building officials, emergency management personnel, and government officials to ensure that storm shelters provide a consistently high level of protection to the sheltered public.

ISA (ISA)

Revisions

BSR/ISA 75.19.01-200x, Hydrostatic Testing of Control Valves (revision of ANSI/ISA 75.19.01-2001)
Establishes requirements and definitions for standard hydrostatic shell testing of control valves by the valve manufacturer to prove the structural integrity and leak tightness of the valves' pressure-retaining parts, including any closure parts such as the valve body to bonnet joint, but excluding packings, bellows or other moving seals, and packing leakoff/purge/vent port connections. Bellows or similar moving stem seals may be pressure tested after assembly at a pressure to be agreed upon by the valve manufacturer and the purchaser.

**UL (Underwriters Laboratories, Inc.)**

**New National Adoptions**

BSR/UL 60730-2-8-200x, Standard for Safety for Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Electrically Operated Water Valves, Including Mechanical Requirements (national adoption with modifications of IEC 60730-2-8)

A new edition is being proposed that includes the following revisions:

(a) national differences have been added to exclude the EMC requirements for general-use water valve applications in Clauses 23, 26 and Annex H;
(b) a national difference has been added to define the term safety valve;
(c) a blocked output test (temperature) and a dry condition test have been added to the IEC text; and
(d) editorial changes were made to the text including renumbering of clauses and national differences.

30 Day Notice of Withdrawal: ANS 5 to 10 years past approval date
In accordance with clause 4.7.1 Periodic Maintenance of American National Standards of the ANSI Essential Requirements, the following American National Standards have not been reaffirmed or revised within the five-year period following approval as an ANS. Thus, they shall be withdrawn at the close of this 30-day public review notice in Standards Action.

ANSI/ISA 77.20-2005, Fossil Fuel Power Plant Simulators - Functional Requirements
ANSI/ISA 77.44.02-2001, Fossil Fuel Power Plant Steam Temperature Control System - Once-Through Type

Notice of Withdrawal: ANS at least 10 years past approval date
The following American National Standards have not been revised or reaffirmed within ten years from the date of their approval as American National Standards and accordingly are withdrawn:

ANSI B11.14-1996, Machine Tools - Coil-Slitting Machines - Safety Requirements for Construction, Care, and Use

Correction
BSR INCITS 307 and BSR INCITS 309 - Incorrect Titles
In the Call-for-Comment section of the October 27, 2006 issue of Standards Action, two INCITS standards had the wrong titles. The correct listings are:

BSR INCITS 307-1997 (R200x), Information technology - Serial Storage Architecture - Physical Layer 2 (SSA-PH2)
BSR INCITS 309-1997 (R200x), Information technology - Serial Storage Architecture - Protocol (SSA-S3P)
Call for Comment Contact Information

The addresses listed in this section are to be used in conjunction with standards listed in Call for Comment. This section is a list of developers who have submitted standards for public review in this issue of Standards Action – it is not intended to be a list of all ANSI developers. Please send all address corrections to: Standards Action Editor, American National Standards Institute, 25 West 43rd Street, New York, NY 10036 or standact@ansi.org.

### Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASDs) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANSI and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANSI, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

---

**AIIS (American Iron and Steel Institute)**

**Office:**
1140 Connecticut Avenue, NW
Suite 705
Washington, DC 20036

**Contact:** Helen Chen

**Fax:** (202) 463-6573

**E-mail:** Hchen@steel.org

**BSR/AISI/COS/DIAFPGRAM-200x, North American Cold-Formed Steel Diraphgram Design Standard (new standard)**

**Stakeholders:** Cold-formed steel diaphragm manufacturers.

**Project Need:** For the design and construction of cold-formed steel diaphragms.

**Address:** the installation, diaphragm design issues, and testing requirements of cold-formed steel diaphragms used in buildings.

**CEA (Consumer Electronics Association)**

**Office:**
2500 Wilson Boulevard
Arlington, VA 22206

**Contact:** Jean Johnson

**Fax:** (703) 907-7693

**E-mail:** jjohnson@ce.org

**BSR/CEA 2022-200x, Digital STB Active Power Consumption Measurement (new standard)**

**Stakeholders:** Terrestrial broadcast, satellite and cable television interests, TV and set-top-box (STB) manufacturers.

**Project Need:** This standard will address a need for a consistent means of measuring power consumption for set-top-boxes (STBs) when active.

**Defines:** a method for measuring power consumption of a digital set top box (STB) whose primary function is video reception and delivery when operating in an active (ON) state.

**CSA (3) (CSA America, Inc.)**

**Office:**
8501 East Pleasant Valley Road
Cleveland, OH 44131-5575

**Contact:** Allen Callahan

**Fax:** (216) 642-3463

**E-mail:** al.callahan@csa-america.org

**BSR Z83.7b-200x, Gas-Fired Construction Heaters (same as CSA 2.14) (addenda to ANSI Z83.7-2000 (R2005) and ANSI Z83.7a-200x)**

**Stakeholders:** Consumers; manufacturers; gas suppliers; and certifying agencies.

**Project Need:** To revise this Standard for Safety.

**Details:** the test and examination criteria for construction heaters for use with natural and liquefied petroleum gases. A construction heater is primarily intended for temporary use in heating buildings or structures under construction, alteration, or repair. All products of combustion are released into the area being heated.

**BSR Z83.18b-200x, Recirculating Direct Gas-Fired Industrial Air Heaters (supplement to ANSI Z83.18-2004, ANSI Z83.18a-2005)**

**Stakeholders:** Consumers; manufacturers; gas suppliers; and certifying agencies.

**Project Need:** To revise this Standard for Safety.

**Details:** the test and examination criteria for direct gas-fired industrial air heaters of the recirculating type, for use with natural, manufactured and mixed gases; liquefied petroleum gases; and LP gas-air mixtures.

**ISA (ISA)**

**Office:**
67 Alexander Drive
Research Triangle Park, NC 27709

**Contact:** Eliana Beattie

**Fax:** (919) 549-8288

**E-mail:** ebeattie@isa.org

**BSR/ISA 60079-28-200x, Electrical apparatus for explosive gas atmospheres - Part 28: Protection of equipment and transmission systems (national adoption with modifications of IEC 60079-28)**

**Stakeholders:** Consumers; manufacturers; regulatory bodies.

**Project Need:** To provide safety measures in relation to equipment using optical radiation intended for use in explosive gas atmospheres.

**Explains:** the potential ignition hazard from equipment using optical radiation intended for use in explosive gas atmospheres. Covers the equipment, which itself is located outside, but its emitted optical radiation enters such atmospheres. Describes precautions and requirements to be taken when using optical radiation transmitting equipment in explosive gas atmospheres. Also outlines a test method, which can be used to verify a beam is not ignition capable under selected test conditions, if the optical limit values cannot be guaranteed by assessment or beam strength measurement.

**BSR Z21.17a-200x, Domestic Gas Conversion Burners (same as CSA 2.7a) (addenda to ANSI Z21.17-1998 (R2004))**

**Stakeholders:** Consumers; manufacturers; gas suppliers; and certifying agencies.

**Project Need:** To revise this Standard for Safety.

**Details:** test and examination criteria for domestic conversion burners for use with natural, manufactured and mixed gases; liquefied petroleum gases; and LP gas-air mixtures.
Standards Action - November 10, 2006 - Page 15 of 22 Pages

LIA (ASC Z136) (Laser Institute of America)
Office: 13501 Ingenuity Drive, Suite 128
Orlando, FL 32826
Contact: Barbara Sams
Fax: (407) 380-5588
E-mail: bsams@laserinstitute.org

BSR Z136.8-200x, Safe Use of Lasers in Research, Development and Testing (new standard)
Stakeholders: Universities; national laboratories; and commercial, military and medical research facilities.
Project Need: To provide reasonable and adequate guidance for the safe use of lasers and laser systems employed in all research, development, and testing applications.
This standard provides recommendations for the safe use of lasers and robotic equipment and therefore may be subject to various serious hazards posed by the equipment or motion of the equipment.
Covers robots and robotic equipment rated 600 V or less for installation in accordance with ANSI/NFPA 70.

BSR Z136.9-200x, Safe Use of Lasers in Manufacturing Environments (new standard)
Stakeholders: Laser and laser system manufacturers; automation and assembly line integrators (third-party integrators).
Project Need: To provide reasonable and adequate guidance for the safe use of lasers and laser systems employed in all manufacturing environments.
This standard provides recommendations for the safe use of lasers and laser systems in manufacturing that operate at wavelengths between 0.18 mm and 1 mm.

BSR Z136.10-200x, Safe Use of Lasers in Entertainment, Displays and Exhibitions (new standard)
Stakeholders: Providers of conventional laser light shows, displays and equipment; manufacturers and users of such equipment.
Project Need: To provide reasonable and adequate guidance for the safe use of lasers and laser systems employed in all entertainment, display and exhibition environments.
This standard provides recommendations for the safe use of lasers and laser systems in entertainment, display and testing that operate at wavelengths between 0.18 mm and 1 mm.

BSR/UL 1740-200x, Standard for Safety for Robots and Robotic Equipment (new standard)
Stakeholders: Robot and robotic equipment manufacturers; users of such robots and equipment; accessory manufacturers.
Project Need: To protect persons who may be in close proximity to robots and robotic equipment and therefore may be subject to various serious hazards posed by the equipment or motion of the equipment.
Covers robots and robotic equipment rated 600 V or less for installation in accordance with ANSI/NFPA 70.

UL (Underwriters Laboratories, Inc.)
Office: 1285 Walt Whitman Road
Melville, NY 11747-3081
Contact: Raymond Suga
Fax: (631) 439-6021
E-mail: Raymond.M.Suga@us.ul.com

BSR/UL 1740-200x, Standard for Safety for Robots and Robotic Equipment (new standard)
Stakeholders: Robot and robotic equipment manufacturers; users of such robots and equipment; accessory manufacturers.
Project Need: To protect persons who may be in close proximity to robots and robotic equipment and therefore may be subject to various serious hazards posed by the equipment or motion of the equipment.
Covers robots and robotic equipment rated 600 V or less for installation in accordance with ANSI/NFPA 70.

American National Standards
Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMVA
- AGRSS, Inc
- ASC B109 (AGA)
- ASHRAE
- ASME
- ASTM
- MHI (ASC MH10)
- NCPDP
- NBBPVI
- NSF International
- TIA
- Underwriters Laboratories, Inc.

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on “Standards Information,” and see “American National Standards Maintained Under Continuous Maintenance”. This information is also available directly at http://public.ansi.org/ansionline/Documents/Standards%20Activities/American%20National%20Standards/Procedures,%20Guides,%20and%20Forms/.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
# ISO Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

**Comments**

Comments regarding ISO documents should be sent to Henrietta Scully, at ANSI's New York offices. The final date for offering comments is listed after each draft.

## Ordering Instructions

ISO Drafts can be made available via ANSI’s ESS “on-demand” service. Please e-mail your request for an ISO Draft to Customer Service at sales@ansi.org. The document will be posted to the ESS within 3 working days of the request. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

### ANAESTHETIC AND RESPIRATORY EQUIPMENT (TC 121)

ISO/DIS 26825, Anaesthetic and respiratory equipment - User-applied labels for syringes containing drugs used during anaesthesia - Colours, design and performance - 2/1/2007, $40.00

IEC/DIS 60601-1-10, Medical electrical equipment -- Part 1-10: General requirements for basic safety and essential performance -- Collateral standard: Requirements for the development of physiologic closed-loop controllers, $107.00

### APPLICATIONS OF STATISTICAL METHODS (TC 69)

ISO/DIS 24153, Random sampling and randomization procedures - 2/1/2007, $98.00

### BIOLOGICAL EVALUATION OF MEDICAL AND DENTAL MATERIALS AND DEVICES (TC 194)

ISO/DIS 10993-1, Biological evaluation of medical devices - Part 1: Evaluation and testing within a risk management system - 2/1/2007, $82.00

### CRANES (TC 96)

ISO/DIS 11660-1, Cranes - Access, guards and restraints - Part 1: General - 1/26/2007, $88.00

### DENTISTRY (TC 106)

ISO/DIS 6360-5, Dentistry - Number coding system for rotary instruments - Part 5: Specific characteristics of root-canal instruments - 2/8/2007, $33.00

### INTERNAL COMBUSTION ENGINES (TC 70)

ISO/DIS 8178-2, Reciprocating internal combustion engines - Exhaust emission measurement - Part 2: Measurement of gaseous and particulate exhaust emissions under field conditions - 2/8/2007, $82.00

### NUCLEAR ENERGY (TC 85)

### PETROLEUM PRODUCTS AND LUBRICANTS (TC 28)

### PLASTICS (TC 61)

ISO/DIS 23560, Woven polypropylene sacks for bulk packaging of foodstuffs - 2/1/2007, $53.00

### POWDER METALLURGY (TC 119)

ISO/DIS 3907, Hardmetals - Determination of total carbon content - Gravimetric method - 2/1/2007, $40.00
ISO/DIS 3908, Hardmetals - Determination of insoluble (free) carbon content - Gravimetric method - 2/1/2007, $33.00

### REFRACTORIES (TC 33)

### SOLID MINERAL FUELS (TC 27)

ISO/DIS 1952, Solid mineral fuels - Determination of extractable metals in dilute hydrochloric acid - 2/1/2007, $46.00

### STEEL (TC 17)

ISO/DIS 5954, Cold-reduced carbon steel sheet according to hardness requirements - 2/8/2007, $53.00

### TEXTILES (TC 38)

### TIMBER STRUCTURES (TC 165)

ISO/DIS 19993, Timber structures - Glued laminated timber - Face and edge joint cleavage test - 2/9/2007, $40.00

### TRACTORS AND MACHINERY FOR AGRICULTURE AND FORESTRY (TC 23)

ISO 4254-1/DAmd1, Agricultural machinery - Safety - Part 1: General requirements - 2/1/2007, $33.00

### WELDING AND ALLIED PROCESSES (TC 44)

ISO/DIS 24373, Welding consumables - Solid wires and rods for fusion welding of copper and copper alloys - Classification - 2/1/2007, $53.00
Newly Published ISO Standards

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Global Engineering Documents.

ACOUSTICS (TC 43)

ISO 389-5:2006, Acoustics - Reference zero for the calibration of audiometric equipment - Part 5: Reference equivalent threshold sound pressure levels for pure tones in the frequency range 8 kHz to 16 kHz, $41.00

AGRICULTURAL FOOD PRODUCTS (TC 34)

ISO 12082:2006, Processed cheese and processed cheese products - Calculation of the content of added citrate emulsifying agents and acidifiers/pH-controlling agents, expressed as citric acid, $30.00

AIRCRAFT AND SPACE VEHICLES (TC 20)

ISO 8913:2006, Aerospace - Lightweight polytetrafluoroethylene (PTFE) hose assemblies, classification 400 degrees F/3 000 psi (204 degrees C/20 684 kPa) and 204 degrees C/21 000 kPa (400 degrees F/3 046 psi) - Procurement specification, $97.00

COSMETICS (TC 217)

ISO 21148/Cor1:2006, Cosmetics - Microbiology - General instructions for microbiological examination - Corrigendum, FREE

CRYOGENIC VESSELS (TC 220)

ISO 21012:2006, Cryogenic vessels - Hoses, $66.00

EARTH-MOVING MACHINERY (TC 127)

ISO 5006:2006, Earth-moving machinery - Operators field of view - Test method and performance criteria, $87.00

FIRE SAFETY (TC 92)

ISO 3008:2006, Fire resistance tests - Door and shutter assemblies, $124.00

HEALTH INFORMATICS (TC 215)

ISO 20301:2006, Health informatics - Health cards - General characteristics, $61.00

INDUSTRIAL FANS (TC 117)

ISO 13347-4/Cor1:2006, Industrial fans - Determination of fan sound power levels under standardized laboratory conditions - Part 4: Sound intensity method - Corrigendum, FREE

METALLIC AND OTHER INORGANIC COATINGS (TC 107)

ISO 22778:2006, Metallic coatings - Physical vapour-deposited coatings of cadmium on iron and steel - Specification and test methods, $71.00

ISO 22779:2006, Metallic coatings - Physical vapour-deposited coatings of aluminium - Specification and test methods, $71.00

NATURAL GAS (TC 193)

ISO 23874:2006, Natural gas - Gas chromatographic requirements for hydrocarbon dewpoint calculation, $92.00

NON-DESTRUCTIVE TESTING (TC 135)

ISO 9712/Cor1:2006, Non-destructive testing - Qualification and certification of personnel - Corrigendum, FREE

OTHER

ISO IWA 5:2006, Emergency preparedness, $66.00

PAINTS AND VARNISHES (TC 35)

ISO 11890-2:2006, Paints and varnishes - Determination of volatile organic compound (VOC) content - Part 2: Gas-chromatographic method, $71.00

POWDER METALLURGY (TC 119)

ISO 3369:2006, Impermeable sintered metal materials and hardmetals - Determination of density, $35.00

ROAD VEHICLES (TC 22)

ISO 14572:2006, Road vehicles - Round, screened and unscreened 60 V and 600 V multi-core sheathed cables - Test methods and requirements for basic and high-performance cables, $77.00

ISO 19812:2006, Road vehicles - M10 x 1 compact spark-plugs with flat seating and 16 mm hexagon and their cylinder head housings, $48.00

SAFETY OF MACHINERY (TC 199)

ISO 13849-1:2006, Safety of machinery - Safety-related parts of control systems - Part 1: General principles for design, $160.00

SHIPS AND MARINE TECHNOLOGY (TC 8)

ISO 22472:2006, Ships and marine technology - Guidelines for the operation and installation of voyage data recorders (VDR), $131.00

STEEL (TC 17)

ISO 16172:2006, Continuous hot-dip metallic-coated steel sheet for corrugated steel pipe, $54.00

TECHNICAL SYSTEMS AND AIDS FOR DISABLED OR HANDICAPPED PERSONS (TC 173)

ISO 24214:2006, Skin barrier for ostomy aids - Vocabulary, $35.00

TEXTILE MACHINERY AND ALLIED MACHINERY AND ACCESSORIES (TC 72)

ISO 21485:2006, Textile machinery - Draw frame for cotton spinning - Vocabulary and principles of construction, $54.00
WELDING AND ALLIED PROCESSES (TC 44)

ISO 18274/Cor2:2006, Welding consumables - Wire and strip electrodes, wires and rods for fusion welding of nickel and nickel alloys - Classification - Corrigendum, FREE

ISO Guides

OTHER

ISO Guide 98:1995, Guide to the expression of uncertainty in measurement (GUM), $170.00

ISO Guide 99:1996, International vocabulary of basic and general terms in metrology (VIM), $124.00

ISO Technical Specifications

DIMENSIONAL AND GEOMETRICAL PRODUCT SPECIFICATIONS AND VERIFICATION (TC 213)

ISO/TS 16610-1:2006, Geometrical product specifications (GPS) - Filtration - Part 1: Overview and basic concepts, $87.00

ISO/TS 16610-20:2006, Geometrical product specifications (GPS) - Filtration - Part 20: Linear profile filters: Basic concepts, $66.00

ISO/TS 16610-29:2006, Geometrical product specifications (GPS) - Filtration - Part 29: Linear profile filters: Spline wavelets, $77.00

ISO/TS 16610-40:2006, Geometrical product specifications (GPS) - Filtration - Part 40: Morphological profile filters: Basic concepts, $71.00

ISO/TS 16610-41:2006, Geometrical product specifications (GPS) - Filtration - Part 41: Morphological profile filters: Disk and horizontal line-segment filters, $66.00

ISO/IEC JTC 1, Information Technology

ISO/IEC 26925:2006, Information technology - Digital storage media for information interchange - Data Interchange on 120 mm and 80 mm Optical Disk using +RW HS Format - Capacity: 4,7 and 1,46 Gbytes per Side (Recording speed 8X), $180.00

ISO/IEC JTC 1 Technical Reports

Registration of Organization Names in the United States

The Procedures for Registration of Organization Names in the United States of America (document ISSB 989) require that alphanumeric organization names be subject to a 90-day Public Review period prior to registration. For further information, please contact the Registration Coordinator at (212) 642-4946.

The following is a list of alphanumeric organization names that have been submitted to ANSI for registration. Alphanumeric names appearing for the first time are printed in bold type. Names with confidential contact information, as requested by the organization, list only public review dates.

PUBLIC REVIEW

icn
Public Review: September 22 to December 21, 2006
intercomputer
Public Review: September 22 to December 21, 2006

NOTE: Challenged alphanumeric names are underlined. The Procedures for Registration provide for a challenge process, which follows in brief. For complete details, see Section 6.4 of the Procedures.

A challenge is initiated when a letter from an interested entity is received by the Registration Coordinator. The letter shall identify the alphanumeric organization name being challenged and state the rationale supporting the challenge. A challenge fee shall accompany the letter. After receipt of the challenge, the alphanumeric organization name shall be marked as challenged in the Public Review list. The Registration Coordinator shall take no further action to register the challenged name until the challenge is resolved among the disputing parties.

Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on "Subscribe".

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. Information Concerning ANSI Accreditation Program for Third Party Product Certification Agencies

Application for Accreditation
Bureau Veritas Certification; KPMG Performance Registrar, Inc.; NSF International; Quality Management Institute

Comment Deadline: December 11, 2006

(Note: This Information Concerning notice originally appeared in the October 13, 2006 issue of Standards Action. Because of errors that were found in its original scope, it is being rerun with the corrected scope in this issue. The comment deadline has been extended to December 11, 2006.)

Bureau Veritas Certification
515 West Fifth Street
Jamestown, NY 14701

KPMG Performance Registrar, Inc
777 Dunsmuir Street
Vancouver, BC V7Y 1K3
Canada

NSF International
789 Dixboro Road
Ann Arbor, MI 48105

Quality Management Institute
20 Carlson Court, Suite 100
Toronto, ON M9W 7K6
Canada

The four certification bodies listed above have submitted formal application for accreditation by ANSI of the following scope:

The Sustainable Forestry Initiative® Program:
- Requirements for Fiber Sourcing, Chain of Custody and Product Labels (October 2006)
  - SFI Annex 1 – SFI Label Use and Fiber Sourcing Requirements
  - SFI Annex 2 – SFI Chain of Custody (CoC) Standard
  - PEFC Annex 4 – Chain of Custody of Forest Based Products – Requirements
  - PEFC Annex 6 – Certification & Accreditation Procedures

Please send your comments by December 11, 2006 to Reinaldo Balbino Figueiredo, Program Director, Product Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036, FAX: (202) 293 9287 or e-mail: rfigueir@ansi.org.

ANSI Accredited Standards Developers
Application for Accreditation
APA – The Engineered Wood Association

Comment Deadline: December 11, 2006

The APA – The Engineered Wood Association has submitted an Application for Accreditation as a Developer of American National Standards. APA’s proposed scope of standards activity is as follows:

Consensus standards developed by APA shall be related to the promotion of knowledge, stimulation of research, and development of standard manufacturing specifications, design methodologies, and construction practice pertaining to wood-base structural panels, wood-based composites, and glued engineered wood products, such as structural glued laminated timber, structural composite lumber, prefabricated wood I-joists, and structural insulated panels.

To obtain a copy of APA’s proposed operating procedures, or to offer comments, please contact: Mr. Borjen Yeh, Director, Technical Services Division, APA – The Engineered Wood Association, 7011 South 19th Street, Tacoma, WA 98466; PHONE: (253) 565-6600; FAX: (253) 565-7265; E-mail: help@apawood.org. Please submit your comments to APA by December 11, 2006, with a copy to the Recording Secretary, ExSC in ANSI’s New York Office (FAX: (212) 840-2298; E-mail: Jthompos@ ANSI.org). As the proposed procedures are available electronically, the public review period is 30 days. You may view or download a copy of APA’s proposed operating procedures from ANSI Online during the public review period at the following URL:

International Organization for Standardization (ISO)
Establishment of a New Project Committee
ISO/PC 231 – Brand valuation

The ISO Technical Management Board (TMB) has established a new project committee to work on the development of an ISO Standard in the field of Brand valuation.

When submitting the proposal to ISO, Germany (DIN) has noted that with the emergence of the global economy and increasing competition, brands and brand management have become a core element of corporate policy. Against this backdrop, assessment of brand value is gaining in relevance. Company acquisitions and fusions occur with increasing frequency. This, together with keener competition, means that ongoing reporting, control and monitoring of brand value development now have a central function in determining corporate success.
Further DIN cites that it is difficult to handle and rate this capital as there are no generally accepted standards by which to carry out a valuation, the numerous established concepts giving results that sometimes differ widely. Since the accounting regulations of many countries stipulate that the brand value of a company is to be included in its accounts if due for sale or takeover, the brand value as an intangible parameter is one of the most important indexes affecting a company's balance.

As a result of the proposed standardization work, one single document is expected.

DIN (Germany) has been allocated the secretariat and will appoint a Chair for this committee with the following scope:

Specification of basic requirements relating to methods of monetary brand valuation

ANSI procedures require the establishment and accreditation of a Technical Advisory Group (TAG) in order for the United States to participate in the development of an ISO standard.

Anyone wishing to serve as Administrator for a US TAG for ISO/PC 231 – Brand valuation, or become a member of the US TAG, should one be established, please contact Henrietta Scully at ANSI via e-mail at hscully@ansi.org.

New Draft Available

Comment Deadline: December 8, 2006

This supplement to ISO Guide 98: 1995 provides:

- a general numerical approach, consistent with the broad principles of the GUM for carrying out the calculations required as part of an evaluation of measurement uncertainty;
- guidance on the evaluation of measurement uncertainty in situations where the conditions for the GUM uncertainty framework are not fulfilled or it is unclear whether they are fulfilled;
- (a representation of) the PDF for the output quantity from which (a) an estimate of the output quantity, (b) the standard uncertainty associated with this estimate, and (c) a coverage interval for that quantity, corresponding to a specified coverage probability, can be obtained.

A copy of the second draft of supplement 1 of Guide 98 can be obtained for review by contacting Henrietta Scully via email at hscully@ansi.org and comments sent by Friday, December 8, 2006.
5 Design and construction

5.60 Cleanability of wire whips

The space between the wires shall be at least equal to the diameter of the wire and in no case less than 1/16 in, provided that the handle at the attachment point does not have a diameter greater than 1 in.

When the diameter of the handle is greater than 1 in, the space between the wires shall be at least equal to twice the diameter of the wire.

Reason: Language added to clarify what is considered easily cleanable for this type of device.

5.60.1 Custom equipment

Custom fabricated equipment shall comply with the applicable sections of this Standard and other applicable NSF standards.

5.60.1.1 Performance testing

Custom fabricated equipment shall comply with the performance requirements specified in the applicable NSF standard(s).
