American National Standards

Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

Ordering Instructions for “Call-for-Comment” Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

* Standard for consumer products
Comment Deadline: June 4, 2007

ASTM (ASTM International)
The URL to search for scopes of ASTM standards is: http://www.astm.org/dsearch.htm
For reaffirmations and withdrawals, order from: Customer Service, ANSI
For new standards and revisions, order from: Corice Leonard, ASTM; cleonard@astm.org
For all ASTM standards, send comments (with copy to BSR) to: Corice Leonard, ASTM; cleonard@astm.org

New Standards
BSR/ASTM F2657-200x, Test Method for Outdoor Weathering Exposure of Crosslinked Polyethylene (PEX) Tubing (new standard)
Single copy price: $35.00

Reaffirmations
Single copy price: $29.00

GEI (Greenguard Environmental Institute)

New Standards
BSR/GEI Moisture Management in Buildings-200x, GREENGUARD Moisture Management Standard for New Construction (new standard)
Provides:
- Smart mold prevention practices in building design;
- A protocol for mold prevention construction practices and the verification of their implementation; and
- A protocol for developing an on-going mold operations and a maintenance plan following occupancy.
Single copy price: Free
Obtain an electronic copy from: www.greenguard.org or ehowell@greenguard.org
Order from: Ethleen Howell, GEI; ehowell@greenguard.org
Send comments (with copy to BSR) to: Same

HL7 (Health Level Seven)

New Standards
BSR/HL7 V3 RPS, R1-200x, HL7 Version 3 Standard: Regulated Product Submission, Release 1 (new standard)
The goal of the Regulated Product Submission message is to facilitate the processing and the review of the submissions received by regulatory agencies. Regulatory authorities receive submissions to address a variety of regulatory issues.
Single copy price: Free (HL7 members); $600.00 (non-members)
Obtain an electronic copy from: karenvan@HL7.org
Order from: Karen Van Hentenryck, HL7; karenvan@HL7.org
Send comments (with copy to BSR) to: Same

NSF (NSF International)
Revisions
BSR/NSF 170 200x (i4), Glossary of food equipment terminology (revision of ANSI/NSF 170-2005)
Issue 4: The purpose of this ballot is to define the term frost top unit.
Single copy price: $35.00
Obtain an electronic copy from: www.techstreet.com/cgi-bin/browsePublisher?publisher_id=133&subgroup_id=10020
Order from: Lorna Badman, NSF; badman@nsf.org;durbin@nsf.org
Send comments (with copy to BSR) to: Same

GEI (Greenguard Environmental Institute)

New Standards
BSR/GEI Moisture Management in Buildings-200x, GREENGUARD Moisture Management Standard for New Construction (new standard)
Provides:
- Smart mold prevention practices in building design;
- A protocol for mold prevention construction practices and the verification of their implementation; and
- A protocol for developing an on-going mold operations and a maintenance plan following occupancy.
Single copy price: Free
Obtain an electronic copy from: www.greenguard.org or ehowell@greenguard.org
Order from: Ethleen Howell, GEI; ehowell@greenguard.org
Send comments (with copy to BSR) to: Same

Projects Withdrawn from Consideration
An accredited standards developer may abandon the processing of a proposed new or revised American National Standard or portion thereof if it has followed its accredited procedures. The following projects have been withdrawn accordingly:

ASTM (ASTM International)
### Call for Comment Contact Information

The addresses listed in this section are to be used in conjunction with standards listed in Call for Comment. This section is a list of developers who have submitted standards for public review in this issue of *Standards Action* – it is not intended to be a list of all ANSI developers. Please send all address corrections to: Standards Action Editor, American National Standards Institute, 25 West 43rd Street, New York, NY 10036 or standact@ansi.org.

## Final actions on American National Standards

The standards actions listed below have been approved by the ANSI Board of Standards Review (BSR) or by an ANSI-Audited Designator, as applicable.

### AAMI (Association for the Advancement of Medical Instrumentation)

#### New National Adoptions

#### Revisions

### ASME (American Society of Mechanical Engineers)

#### New Standards

#### Revisions

### ASSE (ASC A10) (American Society of Safety Engineers)

#### Reaffirmations

### ASTM (ASTM International)

#### New Standards

#### Reaffirmations

### Revisions

### Withdrawals

### AWS (American Welding Society)

#### Revisions
ISA (ISA)

Revisions

ITI (INCITS) (InterNational Committee for Information Technology Standards)

New National Adoptions

TIA (Telecommunications Industry Association)

New Standards

Revisions

UL (Underwriters Laboratories, Inc.)

Revisions

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANSI, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

ASC X9 ( Accredited Standards Committee X9, Incorporated)
Office: 1212 West Street, Suite 200
Annapolis, MD 21401
Contact: Janet Busch
Fax: (410) 267-0961
E-mail: janet.busch@x9.org

BSR X9.100-181-200x, Specifications for TIFF Image Format for Image Exchange (new standard)
Stakeholders: Financial institutions and their processors.
Project Need: To implement a check-specific usage of Aldus’ TIFF 6.0 specification.
The scope of this standard is to define specific TIFF fields that can be used and the allowable values for those fields that will support interoperability for check image exchange processing between financial institutions. This standard will only address the use of G4 bilevel image (black/white) compressions within the TIFF 6.0 structure.

ASTM (ASTM International)
Office: 100 Barr Harbor Drive
West Conshohocken, PA 19428-2959
Contact: Helene Skloff
E-mail: hsdkloff@astm.org; cleonard@astm.org

BSR/ASTM Z3633Z/WK13915-200x, Standard Test Method for Determination of Vibrated Bulk density of the 1,17 mm by 4,7 mm Calcined Petroleum Coke Fraction crushed to 0,42 mm by 0,83 mm, using a semi-automated apparatus (new standard)
Project Need: To provide a more specific Vibrated Bulk Density Standard to be used for commercial exchange.
This test method covers the determination of bulk density of a representative 2-kg sample of calcined petroleum coke, after vibration to increase compaction, using a semi-automatic apparatus.

BSR/ASTM Z3697Z/WK14401-200x, Evaluating the Fire Test Response of Deck Structures to Burning Brands (new standard)
Stakeholders: Fire Standards industry.
Project Need: To address many of the external fire exposure issues related to wildland and urban interface.
This standard determines the fire test response of decks or other horizontal ancillary structures attached to or in close proximity to primary structures.

BSR/ASTM Z3704Z/WK14412-200x, 12 to 60 in. (300 to 1500 mm) Annular Corrugated Profile-Wall Polyethylene (PE) Pipe and Fittings for Sanitary Sewer Applications (new standard)
Project Need: To provide pipe and fittings suitable for underground use for sanitary sewer systems.
This specification covers requirements and test methods for annular, corrugated profile wall polyethylene pipe and fittings with an interior liner.

BSR/ASTM Z3743Z/WK14824-200x, Body Protectors Used in Equine Competition and Racing (new standard)
Project Need: To cover the minimum performance criteria and describe test methods for body protectors for use in equine competition and racing.
This standard addresses the unique needs of the participants of equine competition and equine racing events.

BSR/ASTM Z3740Z/WK14899-200x, Determination of Firmness and Stability for the Accessibility of Surface Systems Under and Around Playground Equipment Using a Rotational Penetrometer (new standard)
Project Need: The measurement of these performance criteria for firmness and stability is accomplished by using test equipment entitled a rotational penetrometer.
This specification establishes minimum performance criteria for firmness and stability on surfaces used under and around playground equipment, in order to assess accessibility.
BSR/AWWA B102-200x, Manganese Greensand for Filters (revision of BSR/ATIS 0600010-200x)
- Stakeholders: Drinking water treatment and supply industry, water utilities, and consultants.
- Project Need: To provide specifications for manganese greensand used in water treatment and supply industry, including physical, chemical, and testing requirements.
- Describes the materials and application requirements for manganese greensand used in water treatment and supply industry.

BSR/AWWA C300-200x, Reinforced Concrete Pressure Pipe, Steel-Cylinder Type (revision of ANSI/AWWA C300-2004)
- Stakeholders: Drinking water treatment and supply industry, water utilities, and consultants.
- Project Need: To provide specifications for reinforced concrete pressure pipe, including physical, chemical, and testing requirements.
- This standard describes the manufacture of reinforced concrete pressure pipe that is not prestressed or pretensioned, in sizes 30 in. to 144 in. (760 mm to 3,660 mm), inclusive. Larger sizes have been manufactured based on the concepts of this standard.
BSR/AWWA C302-200x, Reinforced Concrete Pressure Pipe, Noncylinder Type (revision of ANSI/AWWA C302-2004)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide purchasers, manufacturers, and constructors with the minimum requirements for reinforced concrete pressure pipe, noncylinder type, including fabrication and testing requirements.

This standard describes the manufacture of circumferentially reinforced concrete pressure pipe, without a steel cylinder and not prestressed, in sizes from 12 to 144 in. (300 to 3,660 mm) inclusive and for working pressures not exceeding 55 psi (380 kPa) and working plus surge pressures not exceeding a total pressure of 65 psi (450 kPa). The type of pipe is designed for the internal pressure, external loads, and bedding conditions designated by the purchaser. Pipe of diameters larger than 144 in. (3,660 mm) have been manufactured based on the concepts of this standard.

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide the minimum requirements for air-release valves, air/vacuum valves, and combination air valves for water supply service.

This standard describes 1/2-in. (13-mm) through 6-in. (150-mm) air-release valves and 1/2-in. (13-mm) through 20-in. (500-mm) air/vacuum and combination air valves having gray cast-iron or ductile-iron bodies and covers. The valves are designed for use in water systems with maximum working pressures of 300 psig (2,070 kPa) and water temperatures ranging from above freezing to a maximum of 125 F (52 C).

BSR/AWWA C561-200x, Fabricated Stainless Steel Slide Gates (revision of ANSI/AWWA C561-04)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide the minimum requirements for the above-defined fabricated stainless steel slide gates.

This standard describes fabricated stainless steel slide gates with full aperture closure, designed for either seating or unseating head, or both, in ordinary water supply service. The stainless steel gates have nonmetallic seats, which may be of self-adjusting design or may cooperate with adjustable wedging devices or pressure pads. The gates may be used for square, rectangular, or round openings. The gates may be conventional-closure or of flush-bottom-closure type.

BSR/AWWA C563-200x, Fabricated Composite Slide Gates (revision of ANSI/AWWA C563-2004)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide the minimum requirements for fabricated composite slide gates, including materials, general design, manufacture, testing, inspection, and shipment.

This standard describes vertically mounted, fabricated composite, resilient-seated slide gates (hereafter simply referred to as gates) designed for either seating head or unseating head, or both, in ordinary water supply service. The gates are primarily used to shut off water flow through a rectangular or round orifice, end of channel, or in-channel openings. They may be of the conventional closure or the flush bottom-closure type and may be opened either upward or downward.

BSR/AWWA C606-200x, Grooved and Shouldered Joints (revision of ANSI/AWWA C606-2006)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide the minimum requirements for grooved and shouldered joints.

This standard describes grooved and shouldered joints for ductile-iron pipe, metallic pressure pipe of iron pipe size, and fittings, and other components for water service. The standard describes 4-in. through 24-in. (102-mm through 610-mm) diameter grooved ductile-iron pipe; 3/4-in. through 24-in. (19-mm through 610-mm) diameter grooved steel, aluminum, brass, and other metallic pipe of iron pipe size (IPS) dimensions; and 4-in. through 64-in. (102-mm through 1,626-mm) nominal diameter shouldered ends for ductile-iron pipe and metallic pipe of IPS dimensions.

BSR/AWWA C703-200x, Cold-Water Meters - Fire-Service Type (revision of ANSI/AWWA C703-1996 (R2004))

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide the minimum requirements for cold-water meters, fire-service type.

This standard describes the various types and classes of cold-water fire-service-type meters in sizes 3 in. (75 mm) through 10 in. (250 mm) and the materials and workmanship used in their fabrication.

BSR/AWWA C907-200x, Injection-Molded Poly(Vinyl Chloride) (PVC) Pressure Fittings, 4 In. Through 12 In. (100 mm Through 300 mm), for Water Distribution (revision of ANSI/AWWA C907-2004)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide purchasers, manufacturers, and suppliers with the minimum requirements for PVC pressure injection molded fittings, 4 in. to 12 in. (100 mm to 300 mm), for underground water distribution systems.

BSR/AWWA D104-200x, Automatically Controlled, Impressed-Current Cathodic Protection for the Interior of Steel Water Tanks (revision of ANSI/AWWA D104-2004)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide purchasers, manufacturers, and suppliers with the minimum requirements for automatically controlled, impressed-current cathodic protection for the interior of steel water tanks.

This standard describes automatically controlled, impressed-current cathodic protection systems intended to minimize corrosion of submerged interior steel surfaces of water storage tanks and 30-in (750-mm) diameter and larger wet risers of elevated tanks. This standard does not describe sacrificial (galvanic) anode-type cathodic protection systems or manually controlled, impressed-current systems.

BSR/AWWA D110-200x, Wire- and Strand-Wound, Circular, Prestressed Concrete Water Tanks (revision of ANSI/AWWA D110-2004)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide purchasers, manufacturers, and suppliers with the minimum requirements for wire- and strand-wound, circular, prestressed concrete water tanks.

BSR/AWWA D110-200x, Wire- and Strand-Wound, Circular, Prestressed Concrete Water Tanks (revision of ANSI/AWWA D110-2004)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To provide purchasers, manufacturers, and suppliers with the minimum requirements for wire- and strand-wound, circular, prestressed concrete water tanks.

Describes current recommended practice for the design, construction, inspection, and maintenance of wire- and strand-wound, circular, prestressed concrete water-containing structures with the following four types of core walls:

Type I: Cast-in-place concrete with vertical prestressed reinforcement;

Type II: Shotcrete with a steel diaphragm;

Type III: Precast concrete with a steel diaphragm;

Type IV: Cast-in-place concrete with a steel diaphragm.
BSR/AWWA G200-200x, Distribution Systems Operation and Management (revision of ANSI/AWWA G200-2004)

Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers.

Project Need: To define the critical requirements for the operation and management of water distribution systems, including maintaining water quality, system management programs, and operation and maintenance of facilities.

This standard describes the critical requirements for the effective operation and management of drinking water distribution systems.

BHMA (Builders Hardware Manufacturers Association)

Office: 355 Lexington Ave., 17th Floor
New York, NY  10017-6603

Contact: Michael Tierney
Fax: (212) 370-9047
E-mail: mtierney@kellencompany.com

BSR/BHMA A156.27-200x, Power and Manual Operated Revolving Doors (revision of ANSI/BHMA A156.27-2003)

Stakeholders: Door and hardware manufacturers, installers, building and construction.

Project Need: Due for normal five-year revision cycle.

 Applies to power-operated revolving-type doors that rotate automatically when approached by pedestrians, some small vehicular use, and manual revolving-type doors for pedestrians. Included are provisions to reduce the chance of user injury and entrapment. Revolving doors for industrial or trained traffic are not covered in this Standard.

BHMA (Builders Hardware Manufacturers Association)

Office: 355 Lexington Ave., 17th Floor
New York, NY  10017-6603

Contact: Michael Tierney
Fax: (212) 370-9047
E-mail: mtierney@kellencompany.com

BSR/BHMA A156.2-200x, Bored and Preassembled Locks and Latches (revision of ANSI/BHMA A156.2-2003)

Stakeholders: Door and hardware manufacturers, installers, building and construction.

Project Need: Due for normal five-year revision cycle.

Establishes performance requirements for bored and preassembled locks and latches, and includes cycle tests, strength tests, operational tests, security tests, material evaluation tests, finish tests, and dimensional criteria.

BSR/BHMA A156.16-200x, Auxiliary Hardware (revision of ANSI/BHMA A156.16-2002)

Stakeholders: Door and hardware manufacturers, installers, building and construction.

Project Need: Due for normal five-year revision cycle.

This Standard establishes requirements for auxiliary hardware and includes performance tests covering operational, cyclical, strength or finish criteria.

HL7 (Health Level Seven)

Office: 3300 Washtenaw Avenue, Suite 227
 Ann Arbor, MI  48104-4250

Contact: Karen Van Hentenryck
Fax: (734) 677-6622
E-mail: karenvan@HL7.org

BSR/HL7 V3 DACM, R1-200x, HL7 Version 3 Standard: Medical Records; Data Access Consent, Release 1 (new standard)

Stakeholders: Healthcare.

Project Need: There is currently no standard that covers this area.

The Data Consent topic CMET and messages will allow a patient to consent to their health information being collected, accessed, used or disclosed, or to rescind such consent. There is support for a health care provider to gain emergency access and support for a patient to utilize a “shared secret” in managing their consent. Used in conjunction with the masking messages from the Shared Message Domain, the Data Consent messages will provide a patient the appropriate tools to manage their health information. This version of the document includes improved documentation, vocabulary, business name changes for the shared secret as agreed in reconciliation.

NISO (National Information Standards Organization)

Office: 4733 Bethesda Avenue, Suite 300
Bethesda, MD  20814

Contact: Karen Wetzel
Fax: 301-654-1721
E-mail: nisohq@niso.org

Stakeholders: Libraries and library consortia, library system vendors.

Project Need: To revise the standard to address several implementation issues.

This standard defines a protocol that is limited to the exchange of messages between and among computer-based application to enable them to perform functions necessary to lend and borrow items, to provide controlled access to electronic resources, and to facilitate co-operative management of these functions.

TIA (Telecommunications Industry Association)

Office: 2500 Wilson Blvd., Suite 300
Arlington, VA  22201

Contact: Carolyn Bowens
E-mail: cbowens@tiaonline.org

BSR/TIA 41.691-E-2-200x, Mobile Application Part (MAP) - Annexes for the 6XX Series (addenda to BSR/TIA 41.691-E-200x)

Stakeholders: Telecommunications Industry Association.

Project Need: To provide annexes for the 6XX Series.

These annexes are informative.
BSR/UL 2201-200x, Portable Engine-Generator Assemblies (new standard)

Stakeholders: Portable generator industry.

Project Need: To develop a new ANSI/UL standard.

These requirements address the electric shock, carbon monoxide (CO), fire, and casualty aspects associated with the mechanical performance and the electrical features of portable engine-driven generator assemblies. These requirements cover internal combustion engine-driven generators rated 15 kilowatts or less, 250 volts or less, which are provided only with receptacle outlets for the AC output circuits. The generators may incorporate alternating or direct current generator sections for supplying energy to battery charging circuits.

American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option:

- AAMVA
- AGRSS, Inc
- ASC B109 (AGA)
- ASHRAE
- ASME
- ASTM
- MHI (ASC MH10)
- NCPDP
- NBBPVI
- NSF International
- TIA
- Underwriters Laboratories, Inc.

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on "Standards Information," and see "American National Standards Maintained Under Continuous Maintenance". This information is also available directly at www.ansi.org/publicreview.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
ISO Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments

Comments regarding ISO documents should be sent to Henrietta Scully, at ANSI's New York offices. The final date for offering comments is listed after each draft.

Ordering Instructions

ISO Drafts can be made available via ANSI’s ESS “on-demand” service. Please e-mail your request for an ISO Draft to Customer Service at sales@ansi.org. The document will be posted to the ESS within 3 working days of the request. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

AGRICULTURAL FOOD PRODUCTS (TC 34)

ISO/DIS 8534, Animal and vegetable fats and oils - Determination of water content - Karl Fischer method (pyridine free) - 7/21/2007, $53.00

BANKING AND RELATED FINANCIAL SERVICES (TC 68)

ISO/DIS 22307, Financial services industry - Privacy impact assessment - 7/22/2007, $93.00

DENTISTRY (TC 106)

ISO 3823-2/DAm1, Dentistry - Rotary bur instruments - Part 2: Finishing burs - Amendment 1 - 7/21/2007, $40.00

EQUIPMENT FOR FIRE PROTECTION AND FIRE FIGHTING (TC 21)

ISO/DIS 11601, Fire fighting - Wheeled fire extinguishers - Performance and construction - 7/18/2007, $88.00

FIRE SAFETY (TC 92)

ISO/DIS 14696, Reaction-to-fire tests - Determination of fire and thermal parameters of materials, products and assemblies using an intermediate-scale calorimeter (ICAL) - 7/21/2007, $134.00

FLOOR COVERINGS (TC 219)

ISO/DIS 26985, Resilient floor coverings - Identification of linoleum and determination of cement content and ash residue - 7/18/2007, $40.00

IMPLANTS FOR SURGERY (TC 150)

ISO/DIS 12189, Implants for surgery - Mechanical testing of implantable spinal devices - Fatigue test method for spinal implant assemblies using an anterior support - 7/22/2007, $58.00

PAPER, BOARD AND PULPS (TC 6)

ISO/DIS 7263, Corrugating medium - Determination of the flat crush resistance after laboratory fluting - 7/21/2007, $53.00

PLASTICS (TC 61)

ISO/DIS 25179, Adhesives - Determination of the solubility of water-soluble or alkali-soluble pressure-sensitive adhesives - 7/15/2007, $40.00

ISO/DIS 25217, Adhesives - Determination of the mode 1 adhesive fracture energy of structural adhesives using double cantilever beam and tapered double cantilever beam specimens - 7/15/2007, $82.00

ISO 4892-2/DAm1, Plastics - Methods of exposure to laboratory light sources - Part 2: Xenon-arc lamps - 7/21/2007, $33.00

ROLLING BEARINGS (TC 4)

ISO/DIS 3290-2, Rolling bearings - Rolling elements - Part 2: Ceramic balls - 7/18/2007, $58.00

RUBBER AND RUBBER PRODUCTS (TC 45)

ISO/DIS 5435, Rubber compounding ingredients - Carbon black - Determination of tinting strength - 7/18/2007, $58.00

ISO/DIS 8067, Flexible cellular polymeric materials - Determination of tear strength - 7/21/2007, $46.00

TECHNICAL SYSTEMS AND AIDS FOR DISABLED OR HANDICAPPED PERSONS (TC 173)

ISO/DIS 7176-10, Wheelchairs - Part 10: Determination of obstacle-climbing ability of electric wheelchairs - 7/15/2007, $40.00

THERMAL INSULATION (TC 163)

ISO/DIS 29465, Thermal insulating products for building applications - Determination of length and width - 7/14/2007, $33.00

ISO/DIS 29466, Thermal insulating products for building applications - Determination of thickness - 7/14/2007, $53.00

ISO/DIS 29467, Thermal insulating products for building applications - Determination of squareness - 7/14/2007, $40.00

ISO/DIS 29468, Thermal insulating products for building applications - Determination of flatness - 7/14/2007, $33.00
ISO/DIS 29469, Thermal insulating products for building applications -
Determination of compression behaviour - 7/14/2007, $58.00

ISO/DIS 29470, Thermal insulating products for building applications -
Determination of the apparent density - 7/14/2007, $33.00

ISO/DIS 29471, Thermal insulating products for building applications -
Determination of dimensional stability under constant normal
laboratory conditions (23 degrees C/50 % relative humidity) -
7/14/2007, $46.00

ISO/DIS 29472, Thermal insulating products for building applications -
Determination of dimensional stability under specified temperature
and humidity conditions - 7/14/2007, $40.00

ISO/DIS 29764, Thermal insulating products for building applications -
Determination of deformation under specified compressive load and
temperature conditions - 7/14/2007, $46.00

ISO/DIS 29765, Thermal insulating products for building applications -
Determination of tensile strength perpendicular to faces - 7/14/2007,
$40.00

ISO/DIS 29766, Thermal insulating products for building applications -
Determination of tensile strength parallel to faces - 7/14/2007,
$40.00

ISO/DIS 29767, Thermal insulating products for building applications -
Determination of short-term water absorption by partial immersion -
7/14/2007, $40.00

ISO/DIS 29768, Thermal insulating products for building applications -
Determination of linear dimensions of test specimens - 7/14/2007,
$40.00

ISO/DIS 29769, Thermal insulating products for building applications -
Determination of behaviour under point load - 7/14/2007, $53.00

ISO/DIS 29770, Thermal insulating products for building applications -
Determination of thickness for floating-floor insulating products -
7/14/2007, $40.00

ISO/DIS 29771, Thermal insulating materials for building applications -
Determination of organic content - 7/14/2007, $40.00
Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization – and IEC – the International Electrotechnical Commission. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Global Engineering Documents.

Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on "Subscribe".

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.
Information Concerning

ANSI Accredited Standards Developers

Administrative Reaccreditation
ASC X9
Accredited Standards Committee X9 has been administratively reaccredited at the direction of ANSI’s Executive Standards Council, under revised operating procedures for documenting consensus on proposed American National Standards, effective April 17, 2007. For additional information, please contact: Ms. Janet Busch, Association Services Coordinator, ASC X9, Inc., 1212 West Street, Suite 200, Annapolis, MD 21401; PHONE: (410) 267-7707; FAX: (410) 267-0961; E-mail: janet.busch@x9.org.

Application for Accreditation
American Type Culture Collection (ATCC)

Comment Deadline: May 21, 2007
American Type Culture Collection (ATCC), an ANSI Member since December 2006, has submitted an Application for Accreditation as a Developer of American National Standards. ATCC’s proposed scope of standards activity is as follows:
The ATCC SDO will develop consensus standards for biomaterials and related processes including their development, identification, authentication, production, storage, distribution and transfer. Biomaterials include, but are not limited to, bacteria, fungi, yeasts, cell lines, toxins, protozoa, viruses and molecular products such as DNA. These biomaterials may be biosafety level (BSL) 1, 2 or 3. The first topics to be addressed by the ATCC SDO will be material and process standards required for bacteria used in biodefense research and product development.
The cell biology community is becoming increasingly aware of the extensive use of misidentified and cross-contaminated cell lines in biomedical research, causing misleading and/or meaningless research. Although money is wasted and health care research is compromised, the scientific community has not adequately responded to this growing problem. To further address the need for remedial action and restoration of confidence in cell culture-based research, ATCC is helping organize and convene the “Expert Forum on the Misidentification and Cross-Contamination of Cell Lines.” The expected outcome of the Expert Forum is an “open letter” including an action plan with recommendations to resolve the problem.

To obtain a copy of ATCC’s proposed operating procedures, or to offer comments, please contact: Dr. Joseph B. Perrone, ScD, Vice-President for Standards and Certification, ATCC, 10801 University Boulevard, Manassas, VA 20110-2209; PHONE: (703) 365-2849; FAX: (703) 365-2730; E-mail: jperrone@atcc.org. Please submit your comments to ATCC by May 21, 2007, with a copy to the Recording Secretary, ExSc in ANSI’s New York Office (FAX: (212) 840-2298; E-mail: Jthomps@ANSI.org). As the proposed procedures are available electronically, the public review period is 30 days. You may view or download a copy of ATCC’s proposed operating procedures from ANSI Online during the public review period at the following URL:
http://publicaa.ansi.org/sites/apdl/Documents/Forms/AllItems.aspx?RootFolder=%2fsites%2fapdl%2fDocuments%2fStandards%20Activities%2fPublic%20Review%20and%20Comment%20Accreditation%20Actions&View=%7b21C60355%2dAB17%2d4CD7%2dA090%2dBABEEC5D760%2d7d

Proposed Tentative Interim Amendment (TIA)

Comments Sought for NFPA 58
Comment Deadline: May 18, 2007
The following proposed Tentative Interim Amendment is available for public review and comment.
TIA Log No 875
Reference: 9.1
Comment Closing Date: May 18, 2007
Copies may be obtained at http://www.nfpa.org/itemDetail.asp?categoryID=844&itemID=20972, or requested from Codes and Standards Administration, NFPA, One Batterymarch Park, Quincy, MA 02169, or by calling (617) 984-7249.

ANSI Accreditation Program for Third Party Personnel Certification Agencies

Application for Accreditation
International Society for Performance Improvement (ISPI)

Comment Deadline: May 21, 2007
International Society for Performance Improvement (ISPI)
1400 Spring Street, Suite 260
Silver Spring, MD 20910
ISPI has submitted formal application for accreditation by ANSI of the following scopes of this certification body:
Certified Performance Technologist (CPT)

Please send your comments by May 21, 2007 to Roy Swift, Ph.D., Program Director, Personnel Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036, FAX: (202) 293 9287 or E-mail: swift@ansi.org.

International Organization for Standardization (ISO)

Establishment of a New Technical Committee
ISO/TC 234 – Fisheries and Aquaculture

Comment Deadline: April 23, 2007
The ISO Technical Management Board (TMB) has established a new technical committee to work in the field of Fisheries and Aquaculture.

Standards Action - April 20, 2007 - Page 16 of 19 Pages
The proposed scope of this Technical Committee is:
Standardization in the field of fisheries and aquaculture, including, but not limited to, terminology, technical specifications for equipment and for their operation, characterization of aquaculture sites and maintenance of appropriate physical, chemical and biological conditions, environmental monitoring, data reporting, traceability and waste disposal.

Excluded:
- methods of analysis of food products and traceability covered by ISO/TC 34;
- personal protective clothing covered by ISO/TC 94;
- environmental monitoring covered by ISO/TC 207.

Norway has been allocated the Secretariat of this Technical Committee.

Any organization wishing to serve as Administrator of an accredited US Technical Advisory Group for ISO/TC 234, Fisheries and Aquaculture, please contact Henrietta Scully, at ANSI via e-mail at hscully@ansi.org, by close of business, Monday, April 23, 2007.

Proposal for New Fields of ISO Technical Work

Cross Border Trade of Second-Hand Goods

Comment Deadline: April 27, 2007
The ISO Committee on Consumer Policy (COPOLCO) has proposed a new work item for development of a new ISO Standard on Cross Border Trade of Second Hand Goods with the following scope statement:

The purpose of this project is to develop a standard that sets minimum criteria for Second-Hand Products that are being offered for sale, donated, exchanged, traded or purchased both locally and abroad. The intention of this proposal is to protect consumers’ health and safety including the environment in which they interact.

A copy of the proposal can be obtained for review by contacting Henrietta Scully of ANSI via e-mail at hscully@ansi.org.

Responses on the proposal that are sent to Steven Cornish of ANSI via e-mail, scornish@ansi.org, by close-of-business, Friday, April 27, 2007 All comments received will be considered in the development of a proposed ANSI vote and comments that will be presented to the ANSI ISO Council for approval before submittal to ISO.

Consumer Product Recall and Corrective Action: Code of Good Practice

Comment Deadline: May 4, 2007
ISO’s Committee on Consumer Policy (COPOLCO) has proposed a new work item proposal for an ISO standard on Consumer Product Recall and Corrective Action: Code of Good Practice, with the following scope statement:

This guidance standard would provide a model code of good practice for consumer product recalls, with corrective actions, including: repair; placement; repurchase, and public notice. Such corrective actions include a range of remedies affecting the product, including actions applying to product in the manufacturer’s inventory, the distributor’s inventory, on retail shelves and in consumer hands. This guidance standard would cover principles and provide practical guidance in establishing, implementing and managing an effective, flexible and responsive consumer product corrective action/recall program. This standard would also include guidance about what triggers a recall. It is proposed that this standard would apply to consumer products, including electrical and gas household appliances. However, it would not directly address products such as food, drugs, medical devices or automobiles as these categories of products are subject to highly developed regulatory requirements in many jurisdictions. However, the general principles could potentially be used by any consumer product sector. This standard is designed for use by: manufacturers, retailers, importers, testing organizations, providers of third-party recall services, legal firms, government regulators and consumer/safety organizations.

A copy of the proposal can be obtained for review by contacting Henrietta Scully of ANSI via e-mail at hscully@ansi.org.

Responses on the proposal that are sent to Steven Cornish of ANSI via e-mail, scornish@ansi.org, by close-of-business, Friday, May 4, 2007 Comments received will be compiled and presented for the AIC’s endorsement to be submitted to ISO.

Comment Deadline: May 4, 2007
ISO’s Committee on Consumer Policy (COPOLCO) has proposed a new work item proposal for an ISO guidance standard on Consumer Product Safety: A Practical Guide for Suppliers, with the following scope statement:

This proposal is intended to establish a consensus-based International Guidance Standard that will provide all those in the consumer product supply chain (including designers, manufacturers, importers, distributors, retailers, and other producers of consumers goods, as illustrated in Annex 1, with the practical tools to assist them in identifying, assessing and eliminating or reducing the risks associated with exposure to consumer products. The standard will provide guidance on how to carry out a systematic safety analysis of a consumer product or a product likely to be used by a consumer in order to assess the risks by identifying any associated hazards, the potential exposure of consumers to the hazard, and the consequences of that exposure. It will also aid them in determining, documenting and implementing the best approach to reducing the risks and consistently producing a safe product.

A copy of the proposal can be obtained for review by contacting Henrietta Scully of ANSI via E-mail at hscully@ansi.org.

Responses on the proposal that are sent to Steven Cornish of ANSI via e-mail, scornish@ansi.org, by close-of-business, Friday, May 4, 2007 Comments received will be compiled and presented for the AIC’s endorsement to be submitted to ISO.
Relinquishment of ISO Technical Committee Secretariat

ISO/TC 192 – Gas turbines

Comment Deadline: April 30, 2007

ANSI has been advised by the American Society of Mechanical Engineers (ASME) that they no longer wish to serve as delegated Secretariat for ISO/TC 192. The technical committee has the following scope:

Standardization in the field of all aspects of gas turbine design, application, installation, operation and maintenance, including simple turbine cycles, combined cycle systems, definitions, procurement, acceptance, performance, environment (on the gas turbine itself and the external environment) and methods of test.

ISO/TC 192 is responsible for preparing horizontal standards for all types of gas turbines. Work on aero gas turbine engines shall be undertaken in liaison with those technique committees having the primary responsibility.

Note: ISO/TC 20 has the primary responsibility of preparing standards relative to the specific application of gas turbines to aerospace.

Anyone interested in assuming the role of US delegated international secretariat for this Technical Committee should contact Henrietta Scully of ANSI via e-mail, hscully@ansi.org, by close-of-business, Monday, April 30, 2007.

Change of US Delegated Secretariat

ISO/TC 21/SC 5 – Sprinkler and Water Spray Extinguishing Systems

Comment Deadline: May 1, 2007

Last year, ANSI announced the resignation of the National Fire Protection Association (NFPA) as the delegated international secretary for ISO/TC 21/SC 5.

The National Fire Sprinkler Association (NFSA) has applied to assume the role of US Delegated Secretariat for this Subcommittee.

The work of this subcommittee is covered by the scope of the ISO Technical Committee 21, as follows:

Standardization in the field of all fire protection and fire fighting apparatus and equipment including extinguishing media as well as the personal equipment of the fire fighter, and related work on terminology, classification and symbols. Approval of advisory documents relating to the general principles and application of equipment and apparatus for fire protection and fire fighting.

Excluded: Protective clothing dealt with by ISO/TC 94.

Should you wish to comment on the delegation of the ISO/TC 21/SC 5 Secretariat, please contact Henrietta Scully of ANSI via e-mail, hscully@ansi.org, by close-of-business, Tuesday, May 1, 2007.

Call for International (ISO) Secretariat

ISO/TC 38 – Textiles

Comment Deadline, May 31, 2007

ANSI has been advised the United Kingdom (BSI) no longer wishes to serve as Secretariat for the above ISO Technical Committee.

The scope of ISO/TC 38 is as follows:

Standardization of:
- fibres, yarns, threads, cords, rope, cloth and other fabricated textile materials; and the methods of test, terminology and definitions relating thereto;
- textile industry raw materials, auxiliaries and chemical products required for processing and testing;
- specifications for textile products.

Anyone wishing the United States to assume the role of International Secretariat for ISO/TC 38 should contact Henrietta Scully of ANSI via e-mail, hscully@ansi.org, by May 31, 2007.

Review of ISO Guide

ISO/IEC DGuide 76 - Development of service standards - Recommendations for addressing consumer issues

Comment Deadline: June 30, 2007

The following is the scope of Draft ISO/IEC Guide 76

This Guide provides general guidance on the issues to be considered in standards for services. From this guidance, detailed standards may be prepared for any service. It offers a checklist (Clause 9) which may be used by consumer representatives and others participating in the process of standards development. Use of the checklist enables full consideration to be given to all matters of consumer interest, including the needs of children, older persons, persons with disabilities and those from different ethnic and cultural heritages.

This Guide is relevant to the full range of services, whether or not a formal contract is entered into or purchase price paid, but also has relevance for public or charitable services in which there is a consumer, user or participant but not necessarily a purchase, for example, education, health and care provision.

A copy of Guide 76 can be obtained for review by contacting Henrietta Scully of ANSI via e-mail, hscully@ansi.org. Comments must be sent to Steven Cornish of ANSI (scornish@ansi.org) by June 30, 2007.
Meeting Notice

ARI Flow and Contaminant Control Engineering Committee

The ARI Flow and Contaminant Control Engineering Committee will hold a web/telephone meeting Friday, May 11, 2007, at 9:30 am EST (8:30 am CST).

The meeting will address issues relating to revision of:
- ARI Standard 750, Performance Rating of Thermostatic Refrigerant Expansion Valves
- ARI Standard 760, Performance Rating of Solenoid Valves for Use with Volatile Refrigerants
- ARI Standard 770, Performance Rating of Refrigerant Pressure Regulating Valves

Agenda
1. Call to Order/Quorum Determination
2. ARI Antitrust Guidelines
3. Minutes of Last Meeting
4. Standards for Action
   - ARI Standard 750
   - ARI Standard 760
   - ARI Standard 770
5. Other Business
6. Adjourn

Interested parties should contact Steve Szymurski at ARI (PHONE: (703) 524-8800 or E-mail: szymurski@ari.org) for login/dial in instructions.
