American National Standards

Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

Ordering Instructions for “Call-for-Comment” Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

* Standard for consumer products
Comment Deadline: December 9, 2007

UL (Underwriters Laboratories, Inc.)

New National Adoptions

BSR/UL 60065-200x, Audio, Video and Similar Electronic Apparatus - Safety Requirements (Proposal dated 11/9/07) (national adoption with modifications and revision of ANSI/UL 60065-2006a)

Proposes to reinstate the option in 5.1(g) of IEC 60065 for rated current and power consumption markings to be provided in the instruction manual.

Click here to see these changes in full, or look at the end of "Standards Action."

Send comments (with copy to BSR) to: Barbara Davis, UL-CA; Barbara.J.Davis@us.ul.com

Comment Deadline: December 24, 2007

ASABE (American Society of Agricultural and Biological Engineers)

Reaffirmations

Provides general guidelines for guarding for agricultural equipment so as to provide a reasonable degree of personal safety for operators and other persons during the normal operation and servicing of such equipment. This Standard applies to agricultural equipment as identified in ASAE Standard S390.

Single copy price: $45.00

Send comments (with copy to BSR) to: Carla VanGilder, ASABE; vangilder@asabe.org

Order from: Carla VanGilder, ASABE; vangilder@asabe.org

BSR/ASAE S525.2-MAY98 (R200x), Agricultural Cabs - Environmental Air Quality - Part 2: Pesticide Vapor Filters - Test Procedure and Performance Criteria (reaffirmation of ANSI/ASAE S525.2-MAY98 (R2003))

Provides a procedure for testing and demonstrating the capacity and efficiency of the gas and vapor air-purifying device under laboratory conditions.

Single copy price: $45.00

Send comments (with copy to BSR) to: Same

Provides a quantitative method of establishing an engineering control including definitions, performance criteria, and test procedures for cabs (enclosures) used on agricultural tractors and self-propelled machines.

Single copy price: $45.00

Send comments (with copy to BSR) to: Same

ASTM (ASTM International)

The URL to search for scopes of ASTM standards is: http://www.astm.org/dsearch.htm

For reaffirmations and withdrawals, order from: Customer Service, ANSI

For new standards and revisions, order from: Corice Leonard, ASTM ; cleonard@astm.org

For all ASTM standards, send comments (with copy to BSR) to: Corice Leonard, ASTM ; cleonard@astm.org

New Standards

BSR/ASTM D2163-200x, Test Method for Analysis of Liquefied Petroleum (LP) Gases and Propane Concentrates by Gas Chromatography (new standard)

Single copy price: $42.00

BSR/ASTM D7321-200x, Standard Test Method for Particulate Contamination of Biodiesel B100 Blend Stock Biodiesel Esters and Biodiesel Blends by Laboratory Filtration (new standard)

Single copy price: $47.00

Single copy price: $41.00

BSR/ASTM WK6536 (Z1924Z) (D7413), Test Method for Condition Monitoring of Nitrification in In-Service Petroleum and Hydrocarbon Based Lubricants by Trend Analysis Using Fourier Transform Infrared (FT-IR) Spectrometry (new standard)

Single copy price: $35.00

BSR/ASTM WK6537 (Z1925Z) (D7414), Test Method for Condition Monitoring of Oxidation in In-Service Petroleum and Hydrocarbon Based Lubricants by Trend Analysis Using Fourier Transform Infrared (FT-IR) Spectrometry (new standard)

Single copy price: $35.00

BSR/ASTM WK6538 (Z1926Z) (D7415), Test Method for Condition Monitoring of Sulfate By-Products in In-Service Petroleum and Hydrocarbon Based Lubricants by Trend Analysis Using Fourier Transform Infrared (FT-IR) Spectrometry (new standard)

Single copy price: $35.00

BSR/ASTM WK11531 (Z3165Z) (D7416), Test Method for Analysis of In-Service Lubricants Using the Industrial Minilab Integrated Tester (new standard)

Single copy price: $41.00

BSR/ASTM WK11532 (Z3166Z) (D7417), Test Method for Analysis of In-Service Lubricants Using a Particular Four-Part Integrated Tester: (Optical Emission Spectroscopy, Infrared Spectroscopy, Viscosity, and Laser Particle Counting) (new standard)

Single copy price: $59.00

BSR/ASTM WK12292 (Z3328Z) (F2693), Practice for Lateral Connection Sealing and Repair in a Relined or Unlined Sewer Main (new standard)

Single copy price: $35.00

BSR/ASTM WK12567 (Z3365Z) (D7418), Practice for the Set-Up and Operation of Fourier Transform Infrared (FT-IR) Spectrometers for In-Service Oil Condition Monitoring (new standard)

Single copy price: $41.00

BSR/ASTM WK13482 (Z3552Z) (D7419), Test Method for Determination of Total Aromatics and Total Saturates in Lube Basestocks by High Performance Liquid Chromatography (HPLC) with Refractive Index Detection (new standard)

Single copy price: $41.00
BSR/ASTM WK15940 (Z3964Z) (D7420), Test Method for Determining Tribomechanical Properties of Grease Lubricated Plastic Socket Suspension Joints Using a High-Frequency, Linear-Oscillation (SRV) Test Machine (new standard)

Single copy price: $35.00

BSR/ASTM WK16038 (Z3986Z) (D7421), Test Method for Determining Extreme Pressure Properties of Lubricating Oils Using a High-Frequency, Linear-Oscillation (SRV) Test Machine (new standard)

Single copy price: $30.00

Single copy price: $59.00

BIFMA (Business and Institutional Furniture Manufacturers Association)

Revisions

BSR/BIFMA X5.5-200x, Standard for Office Furnishings - Desk/Table Products (revision of ANSI/BIFMA X5.5-1998)

Provides a common basis for evaluating the safety, durability and structural performance, including reasonably foreseeable misuse, of desk/table products. It provides test methods and performance requirements for desk/table products, and specifies acceptance levels to help ensure reasonable safety and performance independent of construction materials, manufacturing processes, mechanical designs, or aesthetic designs. The intention is to describe the means of evaluating function and safety of desk/table products without restricting construction materials, manufacturing processes, or designs.

This part of ISO/IEC 18014:
(1) identifies the objective of a time-stamping authority;
(2) describes a general model on which time-stamping services are based;
(3) defines time-stamping services;
(4) defines the basic protocols of time-stamping; and
(5) specifies the protocols between the involved entities.

Defines time-stamping mechanisms that produce independent tokens, which can be verified one by one. A time-stamping service provides evidence that a data item existed before a certain point in time. Time-stamp services produce time-stamp tokens, which are data structures containing a verifiable cryptographic binding between a data item’s representation and a time-value.

BSR/ASME PTC 19.11-200x, Steam and Water Sampling, Conditioning, and Analysis in the Power Cycle (revision of ANSI/ASME PTC 19.11-1997 (R2004))
Specifies and discusses the methods and instrumentation for testing boiler make-up and feedwater, steam, and condensate in relation to performance testing as may be required in Performance Test Codes in one-time acceptance testing, and in continuous performance monitoring. This Standard also provides guidance to powerplant management, engineers, chemists, and operators in the design and operation of sampling systems for monitoring of cycle chemistry. The methods and equipment recommended herein may be useful for monitoring other influent and effluent streams of the power plant.

UL (Underwriters Laboratories, Inc.)

New Standards

BSR/UL 1081-200x, Swimming Pool Pumps, Filters, and Chlorinators (Proposal dated 11/9/07) (new standard)
Applies to motor-operated water pumps of the nonsubmersible type, pump-filter combinations, and chlorinators for use with swimming pools, hot tubs, and spas, in accordance with the National Electrical Code, NFPA 70. Units may be permanently connected or cord- and plug-connected to the electrical supply. Permanently connected units may be for indoor use or for indoor and outdoor use. Cord- and plug-connected units are evaluated for outdoor use, but may also be used indoors.

30 Day Notice of Withdrawal: ANS 5 to 10 years past approval date

In accordance with clause 4.7.1 Periodic Maintenance of American National Standards of the ANSI Essential Requirements, the following American National Standards have not been reaffirmed or revised within the five-year period following approval as an ANS. Thus, they shall be withdrawn at the close of this 30-day public review notice in Standards Action.

The addresses listed in this section are to be used in conjunction with standards listed in Call for Comment. This section is a list of developers who have submitted standards for public review in this issue of Standards Action – it is not intended to be a list of all ANSI developers. Please send all address corrections to: Standards Action Editor, American National Standards Institute, 25 West 43rd Street, New York, NY 10036 or standact@ansi.org.

Incorrect Designation Number

In the Final Actions section of the October 19, 2007 edition of Standards Action, ANSI/TIA 664-520-B-2007 was listed as the revision for ANSI/TIA 664-000-A-2000. This information is incorrect. The correct listing is as follows:

10/12/2007
Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

ABYC (American Boat and Yacht Council)

Office: 613 Third Street
Annapolis, MD 21403
Contact: John Adey
Fax: (410) 956-2737
E-mail: jadey@abyinc.org; hkoepper@abyinc.org

BSR/ABYC A-33-200x, Emergency Engine Cut-Off Devices (new standard)
Stakeholders: Boat manufacturers, insurance personnel, surveyors, trade organizations, and consumers.
Project Need: To identify safety issues with propulsion engines under emergency conditions.
This standard applies to devices that stop the propulsion engine under emergency conditions.

BSR/ABYC S-31-200x, Environmental Considerations for Distributed Power Systems Installed Onboard Boats (new standard)
Stakeholders: Boat manufacturers, insurance personnel, surveyors, trade organizations, and consumers.
Project Need: To identify safety issues with distributed power systems onboard boats.
This standard is intended for the qualification of distributed power systems for use onboard boats.

ASTM (ASTM International)

Office: 100 Barr Harbor Drive
West Conshohocken, PA 19428-2959
Contact: Helene Skloff
E-mail: hskloff@astm.org; cleonard@astm.org

BSR/ASTM Z3563Z/WK13581-200x, Guide for Measurement for Remaining Antioxidant Content in In-Service Industrial Lubricants by Linear Sweep Voltammetry (new standard)
Stakeholders: Petroleum Products and Lubricants Industry.
Project Need: The standard will be a complementary to the existing standards ASTM D6810 and D6971, in order to include correctly these techniques as part of the oil condition monitoring practices.
Addresses and specifies the correct guidelines for users of voltammetric techniques as part of antioxidant condition monitoring techniques.

Stakeholders: Petroleum Products and Lubricants Industry.
Project Need: Oxygenates are considered catalyst poisons and must be detected and measured to protect commercial process.
Covers the gas chromatographic procedure for the quantitative determination of organic oxygenates in ethylene, propylene, C4, and C5 matrices by multidimensional gas chromatography and flame ionization detection.

BSR/ASTM Z4079Z/WK16905-200x, Standard Practice for Sampling, Storage, and Handling of Hydrocarbon Samples for Mercury Analysis (new standard)
Stakeholders: Petroleum Products and Lubricants Industry.
Project Need: To develop a new Standard Practice to address sampling, storage, and handling issues associated with hydrocarbon samples involving mercury analysis.
Covers the types of and preparation of containers found most suitable for the handling of hydrocarbon samples for the determination of mercury.

BSR/ASTM Z4081Z/WK16931-200x, Standard Practice for Sample Preparation of Petroleum and Lubricant Products for Elemental Analysis (new standard)
Stakeholders: Petroleum Products and Lubricants Industry.
Project Need: To provide only the basic steps for generally encountered sample types. Anything out of the ordinary may require special procedures.
Describes different means by which petroleum product and lubricant samples can be prepared before the measurement of their elemental content using different analytical techniques.

ASABE (American Society of Agricultural and Biological Engineers)

Office: 2950 Niles Road
St Joseph, MI 49085
Contact: Carla VanGilder
E-mail: vangilder@asabe.org

BSR/ASABE S607-200x, Fan Ventilation of Confined-Space Manure Storages for Safe Entry (new standard)
Stakeholders: Farm families, agricultural construction firms, ventilation equipment dealers, engineers.
Project Need: Each year, there are fatalities on farms due to entry into confined-space manure storages. Forced ventilation has been shown to be effective for reducing concentrations of these noxious gases to levels that are safe for human entry into the pits.
The standard is limited to on-farm confined-space, on-farm manure storages with solid, partially slotted or totally slotted covers. The primary focus of the standard will be for rectangular prismatic or cylindrical shaped storages. The standard will be sufficiently broad for use in installing ventilation systems in existing manure storage systems and for designing ventilation systems in new installations. The standard identifies evacuation times to reduce noxious gases from maximum expected concentrations to levels safe for human occupancy.

BSR/ASABE S609-200x, Storage, and Handling of Hydrocarbon Samples for Mercury Analysis (new standard)
Stakeholders: Petroleum Products and Lubricants Industry.
Project Need: To develop a new Standard Practice to address sampling, storage, and handling issues associated with hydrocarbon samples involving mercury analysis.
Covers the types of and preparation of containers found most suitable for the handling of hydrocarbon samples for the determination of mercury.

BSR/ASABE S612-200x, Linear Sweep Voltammetry (new standard)
Remains the same as the previous one.

BSR/ASABE S613-200x, Voltammetric Techniques as Part of Antioxidant Condition Monitoring Practices (new standard)
Remains the same as the previous one.
Heat release and total heat release. This fire-test-response test method is intended to be used for products and materials that are difficult to ignite and have relatively low rates of heat release and total heat release.

ATIS (Alliance for Telecommunications Industry Solutions)
Office: 1200 G Street NW, Ste 500
Washington, DC 20005
Contact: Kerianne Conn
Fax: 202-347-7125
E-mail: kconn@atis.org

BSR ATIS 100026-200x, Sessions/Border Control Functions and Requirements (new standard)
Stakeholders: Telecommunications Industry.
Project Need: To define the Session Border Control functions and requirements that are performed within a service provider's network.
Defines the Session Border Control functions and requirements that are performed within a service provider’s network. The functions performed depend on the interface supported.

BHMA (Builders Hardware Manufacturers Association)
Office: 355 Lexington Ave., 17th Floor
New York, NY 10017-6803
Contact: Michael Tierney
Fax: (212) 370-9047
E-mail: mtierney@kellencompany.com

BSR/BHMA A156.24-200x, Delayed Egress Locks (revision of ANSI/BHMA A156.24-2003)
Stakeholders: Building and construction.
Project Need: To update and revise the standard.
Covers products used in connection with conventional exit devices or locks causing the doors to remain locked after releasing actuation for a predetermined length of time. Performance criteria are included for functional, cycle, operational, fail-safe and overload requirements.

IESO (Indoor Environmental Standards Organization)
Office: 12339 Carroll Avenue
Rockville, MD 20852
Contact: Kristy Lee
Fax: (301) 230-9648
E-mail: klee@iestandards.org

BSR/IESO 2120-200x, Initial Residential Mold Assessment Standard (new standard)
Stakeholders: Residential remediators, residential assessors, residential property managers, home owners, home inspectors.
Project Need: To standardize mold assessment of residential properties.
Provides residential structure investigation procedures to identify observable mold and conditions associated with potential mold amplification including moisture intrusion. The initial investigative process includes, but is not limited to, information gathering, collection of relevant historical events and walk-through observations. There are four potential outcomes:
(1) Neither mold nor associated conditions were readily observable;
(2) Mold was not readily observable but associated conditions were;
(3) Mold was readily observed but no associated conditions were; or
(4) Readily observed mold and conditions.
Outcomes (2), (3), or (4) may warrant additional investigation by a qualified professional.

BSR/IESO 3210-200x, Standard Guide for the Inspection of an Educational Facility for Moisture Intrusion and Mold Growth (new standard)
Stakeholders: Residential remediators, residential assessors, residential property managers, home owners, home inspectors.
Project Need: To standardize assessment for mold in educational properties.
Provides standardized procedures to be used for the investigation of educational structures for readily observable mold or conditions associated with mold amplification. The initial investigative process includes, but is not limited to, initial information gathering, documentation of relevant historical events and observations from an on-site walk-through. There are four potential outcomes:
(1) Neither mold nor associated conditions were readily observable;
(2) Mold was not readily observable but associated conditions were;
(3) Mold was readily observed but no associated conditions were; or
(4) Readily observed mold and conditions.
Outcomes (2), (3), or (4) may warrant additional investigation by a qualified professional.

BSR/IESO 4210-200x, Standard Guide for the Evaluation and Sampling of Arsenic on Surfaces of Pressure Treated Structures (new standard)
Stakeholders: Mold remediators, mold assessors, educational facilities managers.
Project Need: To standardize the assessment for arsenic containing compounds in pressure treated lumber.
Provides standardized procedures for investigation, sampling and evaluation of arsenic and/or arsenic compounds on surfaces constructed of pressure-treated lumber.

LEO (Leonardo Academy, Inc.)
Office: 1526 Chandler Street
Madison, WI 53711
Contact: Johna Roth
Fax: (608) 255-7202
E-mail: johna@leonardoacademy.org

BSR/SCS-002-200x, Type III Life-Cycle Impact Profile Declarations for Products and Services (new standard)
Stakeholders: Service industries and their clients, building industry professionals, building owners and operators.
Project Need: To have verifiable environmental performance data and information in a consistent format, based on a full life-cycle impact assessment.
Specifies the life-cycle impact assessment (LCIA) methods, scope, metrics and format for declarations. This standard will comply with the requirements of ISO 14044 and ASTM draft standard E06.71.10. This standard is not intended to establish minimum environmental performance requirements or define a preference for one technology relative to another. This standard is intended to develop a uniform and standardized format for properly reporting the environmental life-cycle impacts of any system studied. The standard explicitly excludes weighting factors and interpretation of LCIA results.

SCTE (Society of Cable Telecommunications Engineers)
Office: 140 Philips Road
Exton, PA 19341
Contact: Rebecca Quartapella
Fax: 610-383-5898
E-mail: rquartapella@scte.org

Stakeholders: Cable Telecommunications Industry.
Project Need: To update this standard to conform to current
Provides the branch object identifiers for each of the MIBs within the SCTE HMS HEADENDIDENT Tree.
American National Standards
Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

Continuous maintenance is defined as follows:

- The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer.
- Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option:

- AAMI
- AAMVA
- AGA
- AGRSS, Inc.
- ASHRAE
- ASME
- ASTM
- MHI (ASC MH10)
- NBBPV1
- NCPDP
- NSF International
- TIA
- Underwriters Laboratories, Inc. (UL)

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on "Standards Information," and see "American National Standards Maintained Under Continuous Maintenance". This information is also available directly at www.ansi.org/publicreview. Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
**ISO Standards**

**BANKING AND RELATED FINANCIAL SERVICES (TC 68)**

ISO/DIS 10962, Securities and related financial instruments - Classification of Financial Instruments (CFI code) - 1/31/2008, $102.00

**DENTISTRY (TC 106)**

**FLUID POWER SYSTEMS (TC 131)**

ISO/DIS 4395, Fluid power systems and components - Cylinder piston rod end types and dimensions - 2/8/2008, $53.00

ISO/DIS 6194-4, Rotary-shaft lip-type seals incorporating elastomeric sealing elements - Part 4: Performance test procedures - 2/2/2008, $71.00

**GEOGRAPHIC INFORMATION/GEOMATICS (TC 211)**

ISO/DIS 19115-2, Geographic information - Metadata - Part 2: Extensions for imagery and gridded data - 2/7/2008, $119.00

**INFORMATION AND DOCUMENTATION (TC 46)**

ISO/DIS 8459, Information and documentation - Bibliographic data element directory - 2/2/2008, $165.00

**PALLETs FOR UNIT LOAD METHOD OF MATERIALS HANDLING (TC 51)**

ISO/DIS 8611-1, Pallets for materials handling - Flat pallets - Part 1: Test methods - 2/7/2008, $88.00

ISO/DIS 8611-3, Pallets for materials handling - Flat pallets - Part 3: Maximum working loads - 2/7/2008, $58.00

**ROAD VEHICLES (TC 22)**

ISO/DIS 7578, Road vehicles - Sheath-type glow-plugs - General requirements and test methods - 2/7/2008, $40.00

ISO/DIS 26022, Road vehicles - Ergonomic aspects of transport information and control systems - Simulated lane change test to assess in-vehicle secondary task demand - 2/7/2008, $107.00

---

**IEC Standards**

23B/872/FDIS, Amendment 1 to IEC 61242 Ed.1: Electrical accessories - Cable reels for household and similar purposes, 01/11/2008

72/757/FDIS, IEC 60730-2-15 Ed.2: Automatic electrical controls for household and similar use - Part 2-15: Particular requirements for automatic electrical air flow, water flow and water level sensing controls, 01/11/2008
NEWLY PUBLISHED ISO STANDARDS

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Global Engineering Documents.

AIRCRAFT AND SPACE VEHICLES (TC 20)

ISO 23041:2007, Space systems - Unmanned spacecraft operational procedures - Documentation, $92.00

BIOLOGICAL EVALUATION OF MEDICAL AND DENTAL MATERIALS AND DEVICES (TC 194)

ISO 10993-12:2007, Biological evaluation of medical devices - Part 12: Sample preparation and reference materials, $77.00

EARTH-MOVING MACHINERY (TC 127)

ISO 9249:2007, Earth-moving machinery - Engine test code - Net power, $48.00

GRAPHICAL SYMBOLS (TC 145)

ISO 7001:2007, Graphical symbols - Public information symbols, $131.00
ISO 22727:2007, Graphical symbols - Creation and design of public information symbols - Requirements, $92.00

INDUSTRIAL AUTOMATION SYSTEMS AND INTEGRATION (TC 184)

ISO 13584-26/Amd1:2007, Industrial automation systems and integration - Parts library - Part 26: Logical resource: Information supplier identification - Amendment 1, $14.00

IRON ORES (TC 102)

ISO 4695:2007, Iron ores for blast furnace feedstocks - Determination of the reducibility by the rate of reduction index, $61.00
ISO 4698:2007, Iron ore pellets for blast furnace feedstocks - Determination of the free-swelling index, $77.00
ISO 7215:2007, Iron ores for blast furnace feedstocks - Determination of the reducibility by the final degree of reduction index, $61.00
ISO 7992:2007, Iron ores for blast furnace feedstocks - Determination of reduction under load, $61.00
ISO 11256:2007, Iron ore pellets for shaft direct-reduction feedstocks - Determination of the clustering index, $66.00
ISO 11257:2007, Iron ores for shaft direct-reduction feedstocks - Determination of the low-temperature reduction-disintegration index and degree of metallization, $48.00
ISO 11258:2007, Iron ores for shaft direct-reduction feedstocks - Determination of the reducibility index, final degree of reduction and degree of metallization, $71.00
ISO 13930:2007, Iron ores for blast furnace feedstocks - Determination of low-temperature reduction-disintegration indices by dynamic method, $54.00

NICKEL AND NICKEL ALLOYS (TC 155)

ISO 22725:2007, Nickel alloys - Determination of tantalum - Inductively coupled plasma atomic emission spectrometric method, $54.00

NUCLEAR ENERGY (TC 85)

ISO 18213-2:2007, Nuclear fuel technology - Tank calibration and volume determination for nuclear materials accountancy - Part 2: Data standardization for tank calibration, $71.00
ISO 21909/Cor1:2007, Passive personal neutron dosemeters - Performance and test requirements - Corrigendum, FREE

OTHER

ISO 30061:2007, Emergency lighting, $48.00

PLASTICS PIPES, FITTINGS AND VALVES FOR THE TRANSPORT OF FLUIDS (TC 138)

ISO 1167-3:2007, Thermoplastics pipes, fittings and assemblies for the conveyance of fluids - Determination of the resistance to internal pressure - Part 3: Preparation of components, $54.00
ISO 1167-4:2007, Thermoplastics pipes, fittings and assemblies for the conveyance of fluids - Determination of the resistance to internal pressure - Part 4: Preparation of assemblies, $41.00
ISO 22621-1:2007, Plastics piping systems for the supply of gaseous fuels for maximum operating pressures up to and including 2 MPa (20 bar) - Polyamide (PA) - Part 1: General, $97.00
ISO 22621-2:2007, Plastics piping systems for the supply of gaseous fuels for maximum operating pressures up to and including 2 MPa (20 bar) - Polyamide (PA) - Part 2: Pipes, $61.00
ISO 22621-3:2007, Plastics piping systems for the supply of gaseous fuels for maximum operating pressures up to and including 2 MPa (20 bar) - Polyamide (PA) - Part 3: Fittings, $87.00

ROAD VEHICLES (TC 22)

ISO 6621-1:2007, Internal combustion engines - Piston rings - Part 1: Vocabulary, $97.00

ROLLING BEARINGS (TC 4)

ISO 10285:2007, Rolling bearings - Sleeve type linear ball bearings - Boundary dimensions and tolerances, $61.00

RUBBER AND RUBBER PRODUCTS (TC 45)

ISO 5999:2007, Flexible cellular polymeric materials - Polyurethane foam for load-bearing applications excluding carpet underlay - Specification, $71.00

TECHNICAL SYSTEMS AND AIDS FOR DISABLED OR HANDICAPPED PERSONS (TC 173)

ISO 23600:2007, Assistive products for persons with vision impairments and persons with vision and hearing impairments - Acoustic and tactile signals for pedestrian traffic lights, $48.00
TEXTILES (TC 38)

ISO 16322-2/Cor1:2007, Textiles - Determination of spirality after laundering - Part 2: Woven and knitted fabrics - Corrigendum, FREE

TIMBER STRUCTURES (TC 165)

ISO 19993:2007, Timber structures - Glued laminated timber - Face and edge joint cleavage test, $41.00

TRACTORS AND MACHINERY FOR AGRICULTURE AND FORESTRY (TC 23)

ISO 4252:2007, Agricultural tractors - Operators workplace, access and exit - Dimensions, $41.00

ISO Technical Reports

APPLICATIONS OF STATISTICAL METHODS (TC 69)

ISO/TR 29901:2007, Selected illustrations of full factorial experiments with four factors, $131.00

ISO/IEC JTC 1, Information Technology

ISO/IEC 7816-15/Amd1:2007, Identification cards - Integrated circuit cards - Part 15: Cryptographic information application - Amendment 1: Examples of the use of the cryptographic information application, $112.00

ISO/IEC 8824-2/Cor2:2007, Information technology - Abstract Syntax Notation One (ASN.1): Information object specification - Corrigendum, FREE

ISO/IEC 14443-2/Amd1/Cor1:2007, Identification cards - Contactless integrated circuit(s) cards - Proximity cards - Part 2: Radio frequency power and signal interface - Amendment 1 - Corrigendum, FREE

ISO/IEC 17343:2007, Information technology - Telecommunications and information exchange between systems - Corporate telecommunication networks - Signalling interworking between QSIG and SIP - Basic services, $124.00
Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on “Subscribe”.

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.
American National Standards

INCITS Executive Board
ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology

Call for Members
The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum for information technology developers, producers and users to create and maintain formal de jure IT standards. INCITS’ mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with its oversight of programs of its 30+ Technical Committees. Additionally, the INCITS Executive Board exercises international leadership in its role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

The INCITS Executive Board seeks to broaden its membership base and is recruiting new participants in all membership categories:
- special interest (user, academic, consortia)
- non-business (government and major/minor SDOs)
- business (large/small businesses and consultants)

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, please contact Jennifer Garner at (202) 626-5737 or jgarner@itic.org.

ANSI Accredited Standards Developers

Administrative Reaccreditation
Association of Commercial Driving Educators (ACDE)
The Association of Commercial Driving Educators (ACDE) has been administratively reaccredited at the direction of ANSI’s Executive Standards Council, under operating procedures revised to bring the document into compliance with the 2007 version of the ANSI Essential Requirements, effective November 6, 2007. For additional information, please contact: Mr. Robert Murray, Divers Academy International, 1500 Liberty Place, Erial, NJ 08081; PHONE: (856) 404-6100; FAX: (856) 404-6104; E-mail: rmurray@diversacademy.com.

Reaccreditations
Electronic Components, Assemblies & Materials Association (ECA)/Electronic Industries Alliance (EIA)

Comment Deadline: December 10, 2007
The Electronic Components, Assemblies & Materials Association (ECA), which administers the standards and technology functions of the Electronic Industries Alliance (EIA), has submitted revised operating procedures for documenting consensus on proposed American National Standards. As these revisions appear to be substantive in nature, the reaccreditation process is initiated.

To obtain a copy of EIA’s revised operating procedures, or to offer comments, please contact: Mr. Ralph Justus, Vice President, EIA Standards & Technology, ECA, 2500 Wilson Boulevard, Arlington, VA 22201-3834; PHONE: (703) 907-8023; FAX: (703) 875-8908; E-mail: rjustus@ecaau.org.

You may view/download a copy of the revisions during the public review period at the following URL:
http://publicaa.ansi.org/sites/apdl/Documents/Forms/AllItems.aspx?RootFolder=%2fsites%2fapdl%2fDocuments%2fStandards%20Activities%2fPublic%20Review%20and%20Comme nt%2fAccreditation%20Actions&View=%7b21C60355%2dA090%2dBABEEC5D7C60%7d

Please submit any comments to ECA/EIA by December 10, 2007, with a copy to the ExSC Recording Secretary in ANSI’s New York Office (FAX: (212) 840-2298; E-mail: Jthompos@ANSI.org).

Institute of Inspection, Cleaning and Restoration Certification (IICRC)

Comment Deadline: December 10, 2007
The Institute of Inspection, Cleaning and Restoration Certification (IICRC) has submitted revised operating procedures for documenting consensus on proposed American National Standards. As these revisions appear to be substantive in nature, the reaccreditation process is initiated.

To obtain a copy of IICRC’s revised operating procedures, or to offer comments, please contact: Mr. Larry Cooper, Standards Consultant, IICRC, 2715 E. Mill Plain Blvd., Vancouver, WA 98661; telephone: 360.693.5675; fax: 360.693.4858; Email: textilecon@aol.com. You may view/download a copy of the revisions during the public review period at the following URL:
http://publicaa.ansi.org/sites/apdl/Documents/Forms/AllItems.aspx?RootFolder=%2fsites%2fapdl%2fDocuments%2fStandards%20Activities%2fPublic%20Review%20and%20Commen t%2fAccreditation%20Actions&View=%7b21C60355%2dA090%2dBABEEC5D7C60%7d

Please submit any comments to IICRC by December 10, 2007, with a copy to the ExSC Recording Secretary in ANSI’s New York Office (facsimile: 212.840.2298; E-mail: Jthompos@ANSI.org).
**International Organization for Standardization (ISO)**

**Call for International (ISO) Secretariat**

ISO/TC 46/SC 9 – Information and Documentation
- Identification and Description

**Comment Deadline: November 19, 2007**

ANSI has been advised the National Information Standards Organization (NISO) wishes to serve as the ANSI Secretariat for the above ISO subcommittee which Canada (SCC) wishes to relinquish.

This SC is covered by the scope of the main Technical Committee (ISO/TC 46), having the following scope:

- Standardization of practices relating to libraries, documentation and information centres, indexing and abstracting services, archives, information science and publishing.

Anyone wishing to comment on the delegation of the International Secretariat to NISO, please contact Henrietta Scully of ANSI via E-mail: hscully@ansi.org, by November 19th.

**Change of Delegated International (ISO) Secretariat**

ISO/TC 28 – Petroleum Products and Lubricants

**Comment Deadline: December 3, 2007**

ANSI has been advised that the Accredited US Technical Advisory Group (TAG) for ISO/TC 28 unanimously approved the transfer of the US Delegated ISO Secretariat for Technical Committee 28 from the American Petroleum Institute (API) to ASTM International.

This TC is covered by the following scope:

- Standardization of terminology, classification, specifications, methods of sampling, measurement, analysis and testing for:
  - Petroleum;
  - Petroleum products;
  - Petroleum based lubricants and hydraulic fluids;
  - Non-petroleum based liquid fuels;
  - Non-petroleum based lubricants and hydraulic fluids.

Anyone wishing to comment on the delegation of the International Secretariat to ASTM, please contact Henrietta Scully at ANSI via E-mail: hscully@ansi.org, by December 3, 2007.

**Request for Delegated International (ISO) Secretariat**

ISO/TC 28/SC 7 – Petroleum Products and Lubricants – Liquid Biofuels

**Comment Deadline: December 3, 2007**

ANSI has been requested by ASTM to serve as the Delegated ISO Secretariat for the recently established Subcommittee (SC) 7 within Technical Committee (TC) 28.

The SC is covered under the scope of the Technical Committee which is as follows:

- Standardization of terminology, classification, specifications, methods of sampling, measurement, analysis and testing for:
  - Petroleum;
  - Petroleum products;
  - Petroleum based lubricants and hydraulic fluids;
  - Non-petroleum based liquid fuels;
  - Non-petroleum based lubricants and hydraulic fluids.

Anyone wishing to comment on the delegation of the International Secretariat to ASTM, please contact Henrietta Scully at ANSI via E-mail: hscully@ansi.org, by December 3, 2007.

---

**Call for International (ISO) Member Body Vote**

**Road Transport Safety Management Systems**

**Comment Deadline: November 16, 2007**

SIS (Sweden) has submitted to ISO a proposal for a new field of ISO technical activity on Road Transport Safety Management Systems, with the following scope statement.

This International Management Systems Standard will provide:

- Principles of Road-Traffic Safety. The principles will include (but are not limited to) Safe Road Transport System, Leadership, Process approach, Factual approach and Continual Improvement (PDCA) and
- Requirements for a road-traffic safety management system where an organization:
  a) wishes to seek understanding of its role in the road transport system and thereby enable effective efforts to be made in the area of road-traffic safety, and;
  b) wishes to create conditions, in its role in the road transport system, for individuals to survive and avoid serious injuries in the road-traffic, and;
  c) aims to enhance satisfaction among relevant stakeholders in the area of road-traffic safety through the effective application of the system and the assurance of conformity to stakeholder and society and applicable regulatory requirements, and;
  d) wishes to demonstrate its ability to consistently perform processes where the output meets traffic safety requirements on road transports from users, other stakeholders, society and applicable regulatory requirements, and;
  e) wishes to reduce costs for transports in the road–traffic system;
- Guidance on techniques that shall be used to enable the organization to be effective and systematic in the achievement of the road-traffic safety objectives. These techniques are (but are not limited to):
  a) defining of the internal and the external context where the role and the influence of the organization and relevant stakeholders are analyzed in the area of road-traffic safety, and
  b) the concept of Traffic Safety Performance Indicators which enables the organization to understand the process that leads to accidents/injuries and thereby facilitates the definition of the road-traffic safety objectives and targets.

A copy of the complete new work item proposal can be obtained for review by contacting Henrietta Scully via email at hscully@ansi.org and comments sent to Steven Cornish (scornish@ansi.org) by Friday, November 16, 2007. All input will be compiled and a recommended ANSI position with possible comments will then be presented to the AIC for approval.
BSR/UL 60065 (1) Proposal to reinstate the option in 5.1 g) of IEC 60065 for rated current and power consumption markings to be provided in the instruction manual

PROPOSAL

[NOTE that only item g) of subclause 5.1 is shown. The remainder of subclause 5.1 will not change and is not shown.]

(CURRENT)

5.1 DR DU Identification and supply ratings

The apparatus shall be marked with the following:

   g) RATED CURRENT CONSUMPTION or RATED POWER CONSUMPTION of apparatus which can be supplied by SUPPLY APPARATUS FOR GENERAL USE. As an alternative the information may be given in the instruction manual.

The measured consumption at RATED SUPPLY VOLTAGE shall not exceed the marked value by more than 10 %;

(PROPOSED)

5.1 DR DU Identification and supply ratings

The apparatus shall be marked with the following:

   g) RATED CURRENT CONSUMPTION or RATED POWER CONSUMPTION of apparatus which can be supplied by SUPPLY APPARATUS FOR GENERAL USE. As an alternative the information may be given in the instruction manual.

The measured consumption at RATED SUPPLY VOLTAGE shall not exceed the marked value by more than 10 %;
