## American National Standards

### Call for Comment on Standards Proposals

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically, in accordance with the developer’s procedures.

### Ordering Instructions for "Call-for-Comment" Listings

1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org
Comment Deadline: October 18, 2009

UL (Underwriters Laboratories, Inc.)

Revisions
BSR/UL 21-200x, Standard for LP-Gas Hose (revision of ANSI/UL 21-2007)
Covers the addition of the moist ammonia-air stress cracking test.
  Click here to see these changes in full, or look at the end of “Standards Action.”
Send comments (with copy to BSR) to: Mitchell Gold, (847) 664-2850, Mitchell.Gold@us.ul.com

Covers the addition of specifications for physical media for instructions and installation documents.
  Click here to see these changes in full, or look at the end of “Standards Action.”
Send comments (with copy to BSR) to: Megan Cahill, (847) 664-3411, Megan.M.Cahill@us.ul.com

BSR/UL 609-200x, Standard for Safety for Local Burglar Alarm Units and Systems (revision of ANSI/UL 609-2004)
Covers the addition of specifications for physical media for instructions and installation documents.
  Click here to see these changes in full, or look at the end of “Standards Action.”
Send comments (with copy to BSR) to: Megan Cahill, (847) 664-3411, Megan.M.Cahill@us.ul.com

Covers the addition of specifications for physical media for instructions and installation documents.
  Click here to see these changes in full, or look at the end of “Standards Action.”
Send comments (with copy to BSR) to: Megan Cahill, (847) 664-3411, Megan.M.Cahill@us.ul.com

BSR/UL 1610-200x, Standard for Safety for Central-Station Burglar-Alarm Units (revision of ANSI/UL 1610-2004)
Covers the addition of specifications for physical media for instructions and installation documents.
  Click here to see these changes in full, or look at the end of “Standards Action.”
Send comments (with copy to BSR) to: Megan Cahill, (847) 664-3411, Megan.M.Cahill@us.ul.com

AIHA (ASC Z88) (American Industrial Hygiene Association)

Revisions
BSR/AIHA Z88.10-200x, Respirator Fit Testing Methods (revision and redesignation of ANSI Z88.10-2001)
Provides guidance on how to conduct fit testing of tight-fitting respirators and appropriate methods to be used. Fit testing is only one element of a complete respiratory protection program.
Single copy price: Free

Order from: Mili Washington, (703) 846-0794, mmavely@aiha.org
Send comments (with copy to BSR) to: Same

ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)

New Standards
Provides minimum criteria that apply to new buildings and major renovation projects (new portions of buildings and their systems): a building or group of buildings, including on-site energy conversion or electric-generating facilities, which utilize a single submittal for a construction permit or which are within the boundary of a contiguous area under single ownership and address sustainable sites, water use efficiency, energy efficiency, the building’s impact on the atmosphere, materials and resources, and indoor environmental quality (IEQ). This fourth public review shows changes made to the third public review draft in response to comments received.
Single copy price: $35.00
Obtain an electronic copy from: http://www.ashrae.org/technology/page/331
Order from: standards.section@ashrae.org

ATIS (Alliance for Telecommunications Industry Solutions)

Reaffirmations
BSR ATIS 1000006-2005 (R200x), Signalling Systems No. 7 (SS7) - Emergency Telecommunications Service (ETS) (reaffirmation of ANSI ATIS 1000006-2005)
Single copy price: $160.00
Obtain an electronic copy from: kconn@atis.org
Order from: Kerrianne Conn, (202) 434-8841, kconn@atis.org
Send comments (with copy to BSR) to: Same

BSR ATIS 1000110-1999 (R2005), Signalling System No. 7 (SS7) - General Information (reaffirmation and redesignation of ANSI T1.110-1999 (R2005))
This standard is based on the 1988 Blue Book specification of Signaling System No. 7 (SS7#7) for international use issued by the CCITT Study Group XI (Vol. VI Fascicles V1.7 and V1.8) and is intended to be generally compatible with that standard. It has been appropriately modified for use within and between U.S. networks to meet the anticipated needs and applications of those entities.
Single copy price: $250.00

BSR ATIS 1000111-2005 (R200x), Signalling System Number 7 (SS7) - Message Transfer Part (MTP) (reaffirmation of ANSI ATIS 1000111-2005)

Provides an internationally standardized general-purpose common-channel signalling system that provides a reliable means of transfer of information in correct sequence and without loss or duplication.

Single copy price: $595.00
Obtain an electronic copy from: kconn@atis.org
Order from: Kerrianne Conn, (202) 434-8841, kconn@atis.org
Send comments (with copy to BSR) to: Same

BSR ATIS 1000112-2005 (R200x), Signaling System Number 7 (SS7) - Signaling Connection Control Part (SCCP) (reaffirmation of ANSI ATIS 1000112-2005)

Contains a general description of the services provided from the Message Transfer Part (MTP) of Signaling System Number 7 (SS7), the functions within the Signaling Connection Control Part (SCCP), and the resultant services provided for the users of the SCCP.

Single copy price: $595.00
Obtain an electronic copy from: kconn@atis.org

BSR ATIS 1000113-2005 (R200x), Signaling System No. 7 (SS7) - Integrated Services Digital Network (ISDN) User Part (reaffirmation of ANSI ATIS 1000113-2005)

Defines the protocol that supports the signaling functions required to provide voice and non-voice services in an Integrated Services Digital Network. This standard is based on the Specification of Signaling System No. 7 for international use issued by ITU-T Study Group 11 in the year 2000 and subsequent amendments.

Single copy price: $595.00
Obtain an electronic copy from: kconn@atis.org
Order from: Kerrianne Conn, (202) 434-8841, kconn@atis.org

BSR ATIS 1000116-2000 (R200x), Signalling System Number 7 (SS7) - Operations, Maintenance, and Administration Part (OAMP) (reaffirmation and redesignation of ANSI T1.116-2000 (R2005))

This American National Standard is based on ITU-T recommendations Q.750 through Q.756 of Signalling System No. 7 (SS7) for international use and is intended to be compatible with that standard. It has been modified for use within and between U.S. Networks to meet the anticipated needs and applications of those entities.

Single copy price: $425.00

BSR ATIS 1000118-1992 (R200x), Signalling System Number 7 (SS7) - Intermediate Signalling Network Identification (ISNI) (reaffirmation and redesignation of ANSI T1.118-1992 (R2005))

Allows an application process in the origination network to specify intermediate signalling network(s) for non-circuit-associated signalling messages, or to notify an application process in the destination network about such intermediate signalling network(s), or to do both. ISNI may be invoked by a variety of services.

Single copy price: $160.00

BSR ATIS 1000619-1992 (R200x), Integrated Services Digital Network (ISDN) - Multi-Level Precedence and Preemption (MLPF) Service Capability (reaffirmation and redesignation of ANSI T1.619-1992 (R2005))

Allows the maximum compatibility among network and user-owned telecommunications equipments in order to increase the attractiveness and usefulness of ISDN-based capabilities. This standard is one of a series that defines and describes service capabilities within the context of an integrated services digital network (ISDN). This service capability may be made available on demand or by subscription arrangement. The interaction of this service capability with other service capabilities defined in other American National Standards is also included.

BSR ATIS 1000628.a-2001 (R200x), ECS - Connection and Ring Back Addendum (reaffirmation and redesignation of ANSI T1.628a-2001 (R2005))

Specifies the use of the Connection Hold network capability by the Emergency Calling Service (ECS) to support ECS call hold and ring back. This addendum also specifies the TCAP messages exchanged between a switching node routing ECS calls and a Selective Routing Database (SRDB) that contains information determining the PSAP that should receive the emergency calls originating from a given caller or calling location.

Connection Oriented Protocol (SSCOP), provides assured data delivery intended to serve as a guide to all other standards required by a user functions necessary to support signaling (SAAL). This standard is References the complete text of ITU-T Recommendation I.363.5, B-ISDN ATM Adaptation Layer specification: Type 5 AAL. This standard describes a protocol of the Common Part of the ATM Adaptation Layer Type 5 to support Variable Bit Rate (VBR) services.

Improves and clarifies the standard based on related advances in other standards bodies.

Large Volume Call Park Supplementary Service (reaffirmation and redesignation of ANSI T1.650-1995 (R2005))

BSR ATIS 1000635-1999 (R200x), Integrated Services Digital Network (ISDN) - Call Park Supplementary Service-Generic Procedures for the Control of ISDN Supplementary Services, Clarification for Number Identification (reaffirmation and redesignation of ANSI T1.653a-1998 (R2005))

Allows maximum compatibility among network- and user-owned telecommunication equipment in order to increase the attractiveness and usefulness of ISDN-based capabilities. This standard describes the operation of the basic Conference Calling service only. This standard is one of a series, which defines and describes supplementary services within the context of an Integrated Services Digital Network (ISDN). The interaction of this service with other ISDN services is also included.

BSR ATIS 1000647-1999 (R200x), B-ISDN ATM Adaptation Layer - Service Specific Coordination Function for Support of Signaling at the User-to-Network Interface (SSCF at the UNI) (reaffirmation and redesignation of ANSI T1.638-1999 (R2005))

Provides a function that is part of the ATM Adaptation Layer for the support of signaling (SAAL) at the UNI of the B-ISDN. This function is used to map the service of the Service Specific Connection Oriented Protocol (SSCOP) of the AAL to the needs of layer 3 protocols for access signaling across the UNI. This function is called the Service Specific Coordination Function (SSCF) for signaling at the UNI.

Standards Action - September 18, 2009 - Page 5 of 41 Pages

BSR ATIS 1000653-1996 (R200x), Integrated Services Digital Network (ISDN) - Call Park Supplementary Service (reaffirmation and redesignation of ANSI T1.653-1996 (R2005))

 Specifies the service capabilities of the Call Park service within the context of an Integrated Services Digital Network (ISDN). Call Park is a Circuit-Switched service that allows a user to interrupt a voice or voice-band data communication on an existing call, and then re-establish communications from the same or different terminal equipment within the same Call Park subscriber group. The associated switching, signaling specifications, subscription options, and interactions with services defined in other American National Standards are also provided.

BSR ATIS 1000661-2000 (R200x), Signalling System Number 7 (SS7) - Release to Pivot (RTP) (reaffirmation and redesignation of ANSI T1.661-2000 (R2005))

Permits an SS7 Signalling Point that has received a call from another Node, and has determined that the call should be connected to a Destination node other than itself, to have the connection established from a Node earlier in the call path. RTP functionality is shared between the Release Node and the Pivot Node. The RTP capability may be invoked by an end user service or other network capability on a per-call basis. The specific end-user service or other network capability that may invoke RTP is not within the scope of this network capability need.

BSR ATIS 1000669-1999 (R200x), Signalling System Number 7 (SS7) - Intermediate Network Selection (INS) (reaffirmation and redesignation of ANSI T1.669-1999 (R2005))

Allows an application process in the origination network to specify a single intermediate signalling network for non-circuit-associated signalling messages. This network capability also includes functionality that may be used to route non-circuit-associated messages in a number portability environment. Specifically, in a number portability environment, this capability allows the selected Intermediate network to use the number portability routing information derived at a special translation node to route messages towards the destination network.

Defines a language and underlying model for the representation of "hyperdocuments" that link and synchronize static and dynamic (time-based) information contained in multiple conventional and multimedia documents and information objects. The language is known as the "Hypermedia/Time-based Structuring Language," or "Hytime".

Single copy price: $335.00

Send comments (with copy to BSR) to: Barbara Bennett, (202) 626-5743, bbennett@itic.org; lbarra@itic.org

Addresses the construction and use of test suites for verifying conformance of SGML systems. The provisions of this standard assist those who build test suites, those who build SGML systems to be evaluated by such suites, and those who examine an SGML system's performance on a test suite as part of the process of selecting an SGML tool.

Single copy price: $122.00

Obtain an electronic copy from: http://www.incits.org or http://webstore.ansi.org

Send comments (with copy to BSR) to: Barbara Bennett, (202) 626-5743, bbennett@itic.org; lbarra@itic.org

The scope of this International Standard is a conforming application of ISO 8879, SGML.

Single copy price: $98.00

Complements ISO 8879 by providing additional tutorial information. It is not intended, and should not be regarded as an extention, modification, or interpretation of ISO 8879. The SGML language contains a number of components, some of which are optional features. The tutorial information covers the main components of the language only; notably a discussion of LINK, CONCUR, and DATATAG is outside the scope of this Technical Report.

Send comments (with copy to BSR) to: Barbara Bennett, (202) 626-5743, bbennett@itic.org; lbarra@itic.org

Provides general guidance on the manner on which data can be expressed by codes. Describes the objectives of coding, the characteristics, advantages and disadvantages of different coding methods, the features of codes and gives guidelines for the design of codes. Examples of applications are ISO 9735: 1988, ISO 8601: 1988, and ISO 3166: 1993.

Single copy price: $98.00
Obtain an electronic copy from: http://www.incits.org or http://webstore.ansi.org
Send comments (with copy to BSR) to: Barbara Bennett, (202) 626-5743, bbennett@itic.org; lbarra@itic.org

Specifies a set of functions that an SGML syntax-directed editing system may have in order to help users manipulate documents. Contains two major clauses. The first one describes the functions on an SGML syntax-directed editing system as applied to document processing. The second clause identifies those additional facilities felt to be appropriate for DTD processing. Does not specify a "standard editing system". Is primarily aimed at the creator of "text" documents. Although SGML can be used, for instance, for databases, spreadsheets, mathematics, and even music, these uses are not directly considered.

Single copy price: $73.00

Covers the identification, specification, development, and reuse of enumerated, bounded data value domains for data elements. A data value domain in this context refers to the possible valid values of a data element concept and its associated data elements. An enumerated domain is one for which all values can be explicitly expressed in a structured or unstructured set. A bounded domain implies knowledge of the upper and lower limits of the value set.

NEMA (ASC C50) (National Electrical Manufacturers Association)

Reaffirmations

BSR C50.41-200x, Polyphase Induction Motors for Power Generating Stations (reaffirmation of ANSI C50.41-2000)

Applies to Polyphase induction motors intended for use in power-generating stations, including the following:
(a) Frame size larger than NEMA 440 series;
(b) Squirrel-cage type;
(c) Single speed or multispeed;
(d) Horizontal or vertical construction; and
(e) Form wound.

Single copy price: $54.00

NPES (ASC CGATS) (Association for Suppliers of Printing, Publishing and Converting Technologies)

New National Adoptions

BSR CGATS.5-200x, Graphic technology - Spectral measurement and colorimetric computation for graphic arts images (identical national adoption and revision of ANSI CGATS.5-2003)

Establishes a methodology for reflection and transmission spectral measurement and colorimetric parameter computation for graphic arts images. Graphic arts includes, but is not limited to, the preparation of material for, and volume production by, production printing processes, which include offset lithography, letterpress, flexography, gravure, and screen printing.

TIA (Telecommunications Industry Association)

**Addenda**

BSR/TIA 41.550-E-3-200x, 3GPP2 Industry Notification: SystemMyTypeCode Assignment in X.S0004-550 (addenda to ANSI/TIA 41.550-E-2004)

Because of the lengthy revision cycle associated with the X.S0004 (Mobile Application Part) family of specifications, there can be significant delays in communicating vendor-specific parameter assignments to the industry at large.

Single copy price: $48.00

Obtain an electronic copy from: www.global.ihs.com

Send comments (with copy to BSR) to: Chenoa Ellison, (703) 907-7486, cellison@tiaonline.org

BSR/TIA 136-440-C-1-200x, TDMA Third Generation Wireless Adaptive Multi Rate (AMR) Codec (addenda to ANSI/TIA/EIA 136-440-C-200x)

Provides a description of the AMR speech service, including speech coding, channel coding, and link adaptation.

Single copy price: $179.00

Obtain an electronic copy from: www.global.ihs.com

Send comments (with copy to BSR) to: Chenoa Ellison, (703) 907-7486, cellison@tiaonline.org

BSR/TIA/EIA 136-370-C-1-200x, TDMA Third Generation Wireless Enhanced General Packet-Data Service (EGPRS-136) (addenda to ANSI/TIA/EIA 136-370-C-200x)

Integrates the TIA/EIA 136 air interface with the General Packet Radio Service (GPRS) as specified by the European Telecommunications Standards Institute (ETSI) and the Third Generation Partnership Project (3GPP). Specifically, EGPRS-136 supports a packet data service on a 200-kHz air interface as specified in ETSI TS 145 001.

Single copy price: $102.00

Obtain an electronic copy from: www.global.ihs.com

Send comments (with copy to BSR) to: Chenoa Ellison, (703) 907-7486, cellison@tiaonline.org

BSR/TIA/EIA 136-377-C-1-200x, TDMA Third Generation Wireless Enhanced General EGPRS-136 Gs Interface Specifications (addenda to ANSI/TIA/EIA 136-377-C-200x)

Lists the layer-3 procedures and messages applicable to the Gs interface in an EGPRS-136 network. This standard also describes the association between a Gateway MSC/VLR and an SGSN. The Gs interface connects the Gateway MSC/VLR and the SGSN in the EGPRS-136 network architecture.

Single copy price: $58.00

Projects Withdrawn from Consideration
An accredited standards developer may abandon the processing of a proposed new or revised American National Standard or portion thereof if it has followed its accredited procedures. The following projects have been withdrawn accordingly:

UL (Underwriters Laboratories, Inc.)

BSR/UL 1777-200x, Standard for Safety for Chimney Liners (revision of ANSI/UL 1777-2009)

BSR/ASME A112.6.2-200x (R200x), Framing-Affixed Supports for the Off-The-Floor Water Closets with Concealed Tanks (reaffirmation of ANSI/ASME A112.6.2-2000 (R2004))

Establishes minimum performance requirements for framing-affixed supports for off-the-floor water closets with concealed tanks.
Single copy price: $69.00
Order from: Mayra Santiago, ASME; ANSIBOX@asme.org
Send comments (with copy to BSR) to: Fredric Constantino, (212) 591-8684, constantinof@asme.org

Comment Deadline: November 17, 2009
Reaffirmations and withdrawals available electronically may be accessed at: webstore.ansi.org

ANS (American Nuclear Society)

New Standards

BSR/ANS 58.14-200x, Safety and Pressure Integrity Classification Criteria for Light Water Reactors (new standard)

Specifies criteria for the safety classification of items (SSCs and parts, including consumables) in a light water reactor (LWR) nuclear power plant as safety-related (Q), non-safety-related (N), or supplemented (S). In addition, pressure integrity classification criteria are provided for the assignment of Classes 1, 2, 3, 4, or 5 to pressure-retaining items.

Single copy price: $40.00

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

AIHA (ASC Z9) (American Industrial Hygiene Association)
Office: 2700 Prosperity Avenue, Suite 250
Fairfax, VA 22031
Contact: Mili Washington
Fax: (703) 207-8558
E-mail: mmavely@aiha.org

Stakeholders: Design engineers, maintenance personnel, manufacturers, installing contractors.
Project Need: To address the hazards of combustible dust due to recent occupational accidents resulting in multiple fatalities, as recommended by the AIHA, OSHA, and the Chemical Safety Board.
 Applies to dust control systems with combustible solids that are a fire, deflagration, explosion, or detonation hazard.

Stakeholders: Manufacturers, specifiers, certifiers and users of laminar-flow fume hoods (LFFH).
Project Need: To provide the necessary guidelines to improve performance of laminar-flow fume hoods (LFFH) and ensure better protection for personnel working with potentially hazardous materials.
 Applies to laminar-flow fume hoods (LFFH) that use filtered supply air and ducted exhaust to protect products inside the hood from external contamination and exhaust hazardous effluents from the building. This standard provides guidelines for design, operation, testing and maintenance of laminar-flow fume hoods.

ASME (American Society of Mechanical Engineers)
Office: 3 Park Avenue, 20th Floor (20N2)
New York, NY 10016
Contact: Mayra Santiago
Fax: (212) 591-8501
E-mail: ansisbox@asme.org

Stakeholders: Constructors, manufacturers, fabricators, users, and installers of electric chain hoists.
Project Need: To provide a revision to HST-1-1999 (R2004).
Establishes performance requirements for electric chain hoists for vertical lifting service involving material handling of freely suspended (unguided) loads using load chain of the roller or welded link types with one of the following types of suspension:
(1) lug;
(2) hook or clevis; or
(3) trolley.

ASSE (American Society of Sanitary Engineering)
Office: 901 Canterbury Road, Suite A
Westlake, OH 44145-1480
Contact: Steve Hazzard
Fax: (440) 835-3488
E-mail: steve@asse-plumbing.org

BSR/ASSE 1030-200x, Performance Requirements for Positive Pressure Reduction Devices for Sanitary Drainage Systems (new standard)
Stakeholders: Plumbing industry.
Project Need: To develop a standard for a product that does not meet the scope and application of an existing standard.
Positive air pressure reduction devices are to be used in building drainage waste and vent systems and are intended to reduce the impact of short duration air pressure transients that arise in DWV networks through use.

ASSE (ASC A10) (American Society of Safety Engineers)
Office: 1800 East Oakton Street
Des Plaines, IL 60018-2187
Contact: Tim Fisher
Fax: (847) 768-3411
E-mail: TFisher@ASSE.org

BSR ASSE A10.1-200x, Safety Requirements for Pre-Planning for Construction Safety and Health (new standard)
Stakeholders: SH&E professionals in the construction and demolition operations industry.
Project Need: To create a standard that is based upon the consensus of ASC A10 for Construction and Demolition Operations.
Establishes the elements and activities for pre-project and pre-task safety and health planning. The standard applies to all projects where work will be performed by one or more contractors.
It is the intention of this standard to use and align with the relevant ITU-T Recommendations.

NEMA (ASC C78) (National Electrical Manufacturers Association)

Office: 1300 North 17th Street, Suite 1847
Rosslyn, VA 22209
Contact: Matt Clark
E-mail: mat_clark@nema.org; ran_roy@nema.org

BSR/ANSLG C78.81-200x, Electric Lamps - Double-Capped Fluorescent Lamps - Dimensional and Electrical Characteristics (revision and redesignation of ANSI C78.81-2005 (R2008))

Stakeholders: Manufacturers.

Project Need: To revise ANSI/IEC C78.81-2005.

Sets forth the physical and electrical characteristics of the principal types of fluorescent lamps intended for application on conventional line frequency circuits, and electronic high-frequency circuits.

NISO (National Information Standards Organization)

Office: One North Charles Street
Suite 1905
Baltimore, MD 21201
Contact: Karen Wetzel
Fax: (410) 685-5278
E-mail: kwetzel@niso.org; nisohq@niso.org;

ANSI/NISO Z39.96-20XX, Standardized Markup for Journal Article Archiving and Interchange (new standard)

Project Need: To take an existing ad hoc standard through the ANSI standardization process.

Applies the ANSI/NISO standardization process to the currently existing National Library of Medicine (NLM) Journal Archiving and Interchange Tag Suite (version 3.0), the three journal article schemas, and the documentation. The intent is for the Tag Suite to be an ANSI/NISO standard and each of the schemas to be a "sub-standard" or appendix to the Tag Suite standard.

SCTE (Society of Cable Telecommunications Engineers)

Office: 140 Philips Road
Exton, PA 19341
Contact: Rebecca Quartapella
Fax: (610) 363-5898
E-mail: rquartapella@scte.org

Stakeholders: Cable Telecommunications Industry.

Project Need: To describe architectural entities and interfaces.

Describes the various architectural entities and the interfaces that connect them for modular head-end components that provide high-speed data service via DOCSIS and provide narrowcast digital video service (SDV and VOD).

Stakeholders: Cable Telecommunications Industry.

Project Need: To describe architectural entities and interfaces.

Describes the various architectural entities and the interfaces that connect them for modular head-end components that provide high-speed data service via DOCSIS and provide narrowcast digital video service (SDV and VOD).

Stakeholders: Cable Telecommunications Industry.

Project Need: To describe architectural entities and interfaces.

Describes the various architectural entities and the interfaces that connect them for modular head-end components that provide high-speed data service via DOCSIS and provide narrowcast digital video service (SDV and VOD).

BSR/SCTE 137-4-2000x, Modular Headend Architecture - Part 4: Edge Resource Manager Interface (revision and redesignation of ANSI/SCTE 139-2007)

Stakeholders: Cable Telecommunications Engineers.

Project Need: To describe architectural entities and interfaces.

Describes the various architectural entities and the interfaces that connect them for modular head-end components that provide high-speed data service via DOCSIS and provide narrowcast digital video service (SDV and VOD).

AWS (American Welding Society)

Office: 550 N.W. LeJeune Road
Miami, FL 33126
Contact: Rosalinda O'Neill
Fax: (305) 443-5951
E-mail: roneill@aws.org

Stakeholders: Manufacturers, welders, CWIs, engineers.

Project Need: To correct an error in the 94R code edition.

This SWPS is to be used only as permitted by AWS B2.1, Specification for Procedure and Performance Qualification, and the applicable fabrication document(s) [such as code, specification, or contract document(s)]. The fabrication document(s) should specify the engineering requirements such as design, need for heat treatment, fabricating tolerances, quality control, and examination and tests applicable to the end product.

BSR/AWS B2.1-1-020-94-AMD1-200x, Standard Welding Procedure Specification (WPS) for 75% Ar/25% CO2 Shielded Flux Cored Arc Welding of Carbon Steel (M-1/P-1/S-1, Group 1 or 2), 1/8 through 1-1/2 inch Thick, E70T-1 and E71T-1, As-Welded or PWHT Condition (addenda to ANSI/AWS B2.1-1-020-2005)

Stakeholders: Manufacturers, welders, CWIs, engineers.

Project Need: To correct an error in the 94R code edition.

This SWPS is to be used only as permitted by AWS B2.1, Specification for Procedure and Performance Qualification, and the applicable fabrication document(s) [such as code, specification, or contract document(s)]. The fabrication document(s) should specify the engineering requirements such as design, need for heat treatment, fabricating tolerances, quality control, and examination and tests applicable to the end product.
BSR/SCTE DSS 09-18-200x, Modular Headend Architecture - Part 5: Edge QAM Provisioning and Management Interface (new standard)

Stakeholders: Cable Telecommunications Industry
Project Need: To describe architectural entities and interfaces.
Describes the various architectural entities and the interfaces that connect them for modular head-end components that provide high-speed data service via DOCSIS and provide narrowcast digital video service (SDV and VOD).

BSR/SCTE DSS 09-19-200x, Modular Headend Architecture - Part 6: Edge QAM Video Stream Interface (new standard)

Stakeholders: Cable Telecommunications Industry.
Project Need: To describe architectural entities and interfaces.
Describes the various architectural entities and the interfaces that connect them for modular head-end components that provide high-speed data service via DOCSIS and provide narrowcast digital video service (SDV and VOD).

BSR/SCTE DSS 09-20-200x, Modular Headend Architecture - Part 7: EQAM Architectural Overview Technical Report (new standard)

Stakeholders: Cable Telecommunications Industry.
Project Need: To describe architectural entities and interfaces.
Describes the various architectural entities and the interfaces that connect them for modular head-end components that provide high-speed data service via DOCSIS and provide narrowcast digital video service (SDV and VOD).

BSR/SCTE IPS SP 704-200x, Specifications for System Design Data and Symbols (new standard)

Stakeholders: Cable Telecommunications Industry.
Project Need: To develop a standard set of symbols for representing various outside plant devices in construction maps.
The cable industry has developed a standard set of symbols for representing various outside plant devices in construction maps (SCTE 87-1). This standard has been very widely adopted, and has improved the efficiency and accuracy with which MSO staff and contractors can work among multiple cable systems. The standard was defined to address a key issue facing MSOs, and was expressed in a way that both met business needs of the time (principally, it provided a common symbol set for construction personnel) and was expressed in a form that well served the CAD-drafting technology then emerging as the appropriate technology for creating network maps and drawings.

TechAmerica
Office: 1401 Wilson Boulevard Suite 1100
Arlington, VA  22209
Contact: Chris Denham
Fax: (703) 525-2279
E-mail: cdenham@techamerica.org

Stakeholders: Prime contractors; subcontractors; Government users of logistics data.
Project Need: To define the types of data, the media for delivery (i.e., XML Schemas), and the data definitions. This revision adds additional logistics data elements, improves data element definitions and revises the XML Schemas and Style Sheets used to exchange logistics product data.
Defines logistics product data generated during the requirements definition and design of an industry or government system, end item, or product. This standard makes use of the Extensible Markup Language (XML) through the use of entities and attributes that comprise logistics product data and their definitions.

UL (Underwriters Laboratories, Inc.)
Office: 12 Laboratory Drive
Research Triangle Park, NC  27709
Contact: Valara Davis
Fax: (919) 547-6427
E-mail: Valara.Davis@us.ul.com

BSR/UL 2367-200x, Standard for Safety for Solid State Overcurrent Protectors (new standard)

Stakeholders: Manufacturers and users of solid state overcurrent protectors.
Project Need: To attain a national based standard covering the construction and operation of solid state overcurrent protectors.
Covers devices that are solid-state switches that limit the output current to a safe level when the output load exceeds the current-limit threshold or when a load-side short-circuit is present. Solid-state overcurrent protectors are intended to be used on the load-side of an isolating transformer, power supply or battery to provide a means of supplementary protection.
American National Standards
Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMI
- AAMVA
- AGA
- AGRSS, Inc.
- ASC X9
- ASHRAE
- ASME
- ASTM
- GEIA
- HL7
- MHI (ASC MH10)
- NBBPVI
- NCPDP
- NISO
- NSF
- TIA
- Underwriters Laboratories, Inc. (UL)

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on "Standards Information," and see "American National Standards Maintained Under Continuous Maintenance". This information is also available directly at www.ansi.org/publicreview.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments
Comments regarding ISO documents should be sent to Henrietta Scully at ANSI's New York offices, those regarding IEC documents to Charles T. Zegers, also at ANSI New York offices. The final date for offering comments is listed after each draft.

Ordering Instructions
ISO and IEC Drafts can be made available by contacting ANSI's Customer Service department. Please e-mail your request for an ISO or IEC Draft to Customer Service at sales@ansi.org. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

ISO Standards

AGRICULTURAL FOOD PRODUCTS (TC 34)
ISO/DIS 11037, Sensory analysis - General guidance for sensory assessment of the colour of products - 12/5/2009, $77.00
ISO/DIS 11132, Sensory analysis - Methodology - General guidance for monitoring the performance of a quantitative sensory panel - 12/5/2009, $77.00

FLUID POWER SYSTEMS (TC 131)
ISO/DIS 15524, Pneumatic fluid power - Cylinders - Single-rod short-stroke cylinders, 1000 kPa (10 bar) series, bores from 20 mm to 100 mm - 12/5/2009, $40.00

FREIGHT CONTAINERS (TC 104)
ISO 1496-1/DAm7, Series 1 freight containers - Specification and testing - Part 1: General cargo containers for general purposes - Draft Amendment 7 - 12/6/2009, $29.00

GRAPHICAL SYMBOLS (TC 145)
ISO/DIS 3864-4, Graphical symbols - Safety colours and safety signs - Part 4: Colorimetric and photometric properties of safety sign materials - 12/10/2009, $82.00

MATERIALS, EQUIPMENT AND OFFSHORE STRUCTURES FOR PETROLEUM AND NATURAL GAS INDUSTRIES (TC 67)

OPTICS AND OPTICAL INSTRUMENTS (TC 172)
ISO/DIS 8624, Ophthalmic optics - Spectacle frames - Measuring system and terminology - 12/5/2009, $40.00

OTHER
ISO/DIS 14372, Welding consumables - Determination of moisture resistance of manual metal arc welding electrodes by measurement of diffusible hydrogen - 12/5/2009, $40.00
ISO/DIS 26000, Guidance on social responsibility - 12/16/2008, $155.00

PAINTS AND VARNISHES (TC 35)
ISO/DIS 1519, Paints and varnishes - Bend test (cylindrical mandrel) - 12/12/2009, $53.00
ISO/DIS 2811-1, Paints and varnishes - Determination of density - Part 1: Pyknometer method - 12/12/2009, $46.00
ISO/DIS 2811-2, Paints and varnishes - Determination of density - Part 2: Immersed body (plummet) method - 12/12/2009, $46.00
ISO/DIS 2811-3, Paints and varnishes - Determination of density - Part 3: Oscillation method - 12/12/2009, $53.00
ISO/DIS 2811-4, Paints and varnishes - Determination of density - Part 4: Pressure cup method - 12/12/2009, $53.00

PERSONAL SAFETY - PROTECTIVE CLOTHING AND EQUIPMENT (TC 94)
ISO/DIS 27065, Protective clothing - Performance requirements for protective clothing worn by operators applying pesticides - 12/11/2009, $71.00

PLASTICS PIPES, FITTINGS AND VALVES FOR THE TRANSPORT OF FLUIDS (TC 138)
ISO/DIS 9311-2, Adhesives for thermoplastic piping systems - Part 2: Determination of shear strength - 12/5/2009, $46.00

PLASTICS (TC 61)
ISO/DIS 6721-11, Plastics - Determination of dynamic mechanical properties - Part 11: Glass transition temperature - 12/10/2009, $58.00
REFRIGERATION (TC 86)
ISO 23953-1/DAm1, Refrigerated display cabinets - Part 1: Vocabulary - Draft Amendment 1 - 12/5/2009, $29.00
ISO 23953-2/DAm1, Refrigerated display cabinets - Part 2: Classification, requirements and test conditions - Draft Amendment 1 - 12/5/2009, $93.00

ROAD VEHICLES (TC 22)

WATER QUALITY (TC 147)
ISO/DIS 14403-1, Water quality - Determination of total cyanide and free cyanide using flow analysis (FIA and CFA) - Part 1: Method with flow injection analysis (FIA) - 12/12/2009, $67.00
ISO/DIS 14403-2, Water quality - Determination of total cyanide and free cyanide using flow analysis (FIA and CFA) - Part 2: Method with continuous flow analysis (CFA) - 12/12/2009, $77.00

WELDING AND ALLIED PROCESSES (TC 44)
ISO/DIS 544, Welding consumables - Technical delivery conditions for filler materials and fluxes - Type of product, dimensions, tolerances and markings - 12/12/2009, $53.00
ISO/DIS 10863, Welding - Use of time-of-flight diffraction technique (TOFD) for testing of welds - 12/5/2009, $98.00
ISO/DIS 13585, Brazing - Brazer qualification - 12/5/2009, $67.00

ISO/IEC JTC 1, Information Technology
ISO/IEC DIS 18051, Information technology - Telecommunications and information exchange between systems - Services for Computer Supported Telecommunications Applications (CSTA) Phase III - 12/5/2009, $311.00

IEC Standards
89/950/FDIS, IEC 60695-1-10 Ed 1.0: Fire hazard testing - Part 1-10: Guidance for assessing the fire hazard of electrotechnical products - General guidelines, 11/13/2009
28/198A/FDIS, Amendment 1 to IEC 60071-1 Ed. 8.0: Insulation co-ordination - Part 1: Definitions, principles and rules, 10/30/2009
57/1025/FDIS, IEC 61850-6 Ed.2: Communication networks and systems for power utility automation - Part 6: Configuration description language for communication in electrical substations related to IEDs, 11/06/2009
23E/679/FDIS, IEC 62423 Ed.2: Type F and type B residual current operated circuit-breakers with and without integral overcurrent protection for household and similar uses, 10/30/2009
25/414/FDIS, ISO 80000-10 Ed.1: Quantities and units - Part 10: Atomic and nuclear physics, 10/30/2009
28/198/FDIS, IEC 60071-1 A1 Ed.8: Insulation co-ordination Part 1: Definitions, principles and rules, 10/30/2009
34/133/FDIS, IEC 62493 Ed 1: Assessment of lighting equipment related to human exposure to electromagnetic fields, 10/30/2009
86B/2908/FDIS, IEC 61978-1 Ed. 2.0: Fibre optic interconnecting devices and passive components - Fibre optic passive chromatic dispersion compensators - Part 1: Generic specification, 10/30/2009
86B/2909/FDIS, IEC 61300-3-35 Ed. 1.0: Fibre optic interconnecting devices and passive components - Basic test and measurement procedures - Part 3-35: Examinations and measurements - Fibre optic connector endface visual and automated inspection, 10/30/2009
86C/918/FDIS, IEC 62150-4 Ed. 1.0: Fibre optic active components and devices - Test and measurement procedures - Part 4: Relative intensity noise using a time-domain optical detection system, 10/30/2009
86C/920/FDIS, IEC 61280-1-4 Ed. 2.0: Fibre optic communication subsystem test procedures - Part 1-4: General communication subsystems - Light source encircled flux measurement method, 10/30/2009
Newly Published ISO and IEC Standards

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization – and IEC – the International Electrotechnical Commission. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Standards resellers (http://webstore.ansi.org/faq.aspx#resellers).

ISO Standards

FLOOR COVERINGS (TC 219)
ISO 4918:2009, Resilient, textile and laminate floor coverings - Castor chair test, $80.00

MECHANICAL VIBRATION AND SHOCK (TC 108)
ISO 20806:2009, Mechanical vibration - Criteria and safeguards for the in-situ balancing of medium and large rotors, $104.00

PETROLEUM PRODUCTS AND LUBRICANTS (TC 28)
ISO 11158:2009, Lubricants, industrial oils and related products (class L) - Family H (hydraulic systems) - Specifications for categories HH, HL, HM, HV and HG, $86.00

PLAIN BEARINGS (TC 123)
ISO 4378-1:2009, Plain bearings - Terms, definitions, classification and symbols - Part 1: Design, bearing materials and their properties, $141.00
ISO 4378-2:2009, Plain bearings - Terms, definitions, classification and symbols - Part 2: Friction and wear, $92.00
ISO 4378-3:2009, Plain bearings - Terms, definitions, classification and symbols - Part 3: Lubrication, $116.00
ISO 4378-4:2009, Plain bearings - Terms, definitions, classification and symbols - Part 4: Basic symbols, $73.00
ISO 4378-5:2009, Plain bearings - Terms, definitions, classification and symbols - Part 5: Application of symbols, $104.00

PLASTICS PIPES, FITTINGS AND VALVES FOR THE TRANSPORT OF FLUIDS (TC 138)
ISO 13479:2009, Polyolefin pipes for the conveyance of fluids - Determination of resistance to crack propagation - Test method for slow crack growth on notched pipes, $65.00

PLASTICS (TC 61)
ISO 21627-1:2009, Plastics - Epoxy resins - Determination of chlorine content - Part 1: Inorganic chlorine, $49.00
ISO 21627-2:2009, Plastics - Epoxy resins - Determination of chlorine content - Part 2: Easily saponifiable chlorine, $49.00
ISO 21627-3:2009, Plastics - Epoxy resins - Determination of chlorine content - Part 3: Total chlorine, $49.00

ROAD VEHICLES (TC 22)
ISO 11012:2009, Heavy commercial vehicles and buses - Open-loop test methods for the quantification of on-centre handling - Weave test and transition test, $80.00

RUBBER AND RUBBER PRODUCTS (TC 45)
ISO 2322:2009, Styrene-butadiene rubber (SBR) - Emulsion- and solution-polymerized types - Evaluation procedures, $86.00

ISO 2476:2009, Butadiene rubber (BR) - Solution-polymerized types - Evaluation procedures, $92.00
ISO 6804:2009, Rubber and plastics inlet hoses and hose assemblies for washing-machines and dishwashers - Specification, $80.00
ISO 25518:2009, Single-use rubber gloves for general applications - Specification, $49.00

SMALL TOOLS (TC 29)
ISO 10643:2009, Dimensions of accessories for cutter arbors with parallel key and tenon drive, $57.00

STERILIZATION OF HEALTH CARE PRODUCTS (TC 198)
ISO 14161:2009, Sterilization of health care products - Biological indicators - Guidance for the selection, use and interpretation of results, $167.00

TEXTILES (TC 38)
ISO 105-G02/Cor2:2009, Textiles - Tests for colour fastness - Part G02: Colour fastness to burnt-gas fumes - Corrigendum, FREE

TRACTORS AND MACHINERY FOR AGRICULTURE AND FORESTRY (TC 23)
ISO 4254-6:2009, Agricultural machinery - Safety - Part 6: Sprayers and liquid fertilizer distributors, $86.00
ISO 28139:2009, Agricultural and forestry machinery - Knapsack combustion-engine-driven mistblowers - Safety requirements, $92.00

TRANSPORT INFORMATION AND CONTROL SYSTEMS (TC 204)
ISO 14813-6:2009, Intelligent transport systems - Reference model architecture(s) for the ITS sector - Part 6: Data presentation in ASN.1, $86.00
ISO 22179:2009, Intelligent transport systems - Full speed range adaptive cruise control (FSRA) systems - Performance requirements and test procedures, $116.00
ISO 24097-1:2009, Intelligent transport systems - Using web services (machine-machine delivery) for ITS service delivery - Part 1: Realization of interoperable web services, $141.00

WATER QUALITY (TC 147)
ISO 18857-2:2009, Water quality - Determination of selected alklyphenols - Part 2: Gas chromatographic-mass spectrometric determination of alklyphenols, their ethoxyates and bisphenol A in non-filtered samples following solid-phase extraction and derivatisation, $92.00

ISO Technical Specifications

PLASTICS PIPES, FITTINGS AND VALVES FOR THE TRANSPORT OF FLUIDS (TC 138)
ISO/TS 15877-7:2009, Plastics piping systems for hot and cold water installations - Chlorinated poly(vinyl chloride) (PVC-C) - Part 7: Guidance for the assessment of conformity, $80.00
ISO/IEC 15459-8:2009, Information technology - Unique identifiers - Part 8: Grouping of transport units, $49.00
ISO/IEC 15963-2009, Information technology - Radio frequency identification for item management - Unique identification for RF tags, $92.00

IEC Standards

ELECTRICAL EQUIPMENT IN MEDICAL PRACTICE (TC 62)
IEC 60601-2-13 Ed. 3.1 en:2009, Medical electrical equipment - Part 2-13: Particular requirements for the safety and essential performance of anaesthetic systems, $204.00

ELECTROACOUSTICS (TC 29)
IEC 60318-1 Ed. 2 b:2009, Electroacoustics - Simulators of human head and ear - Part 1: Ear simulator for the measurement of supra-aural and circumaural earphones, $117.00

ELECTROMAGNETIC COMPATIBILITY (TC 77)
IEC 61000-4-8 Ed. 2.0 b:2009, Electromagnetic compatibility (EMC) - Part 4-8: Testing and measurement techniques - Power frequency magnetic field immunity test, $143.00

FIBRE OPTICS (TC 86)

INSULATING MATERIALS (TC 15)
IEC 60626-1 Ed. 3.0 b:2009, Combined flexible materials for electrical insulation - Part 1: Definitions and general requirements, $41.00

I EC Technical Specifications

ELECTROMAGNETIC COMPATIBILITY (TC 77)
IEC/TS 61000-5-8 Ed. 1.0 en:2009, Electromagnetic compatibility (EMC) - Part 5-8: Installation and mitigation guidelines - HEMP protection methods for the distributed infrastructure, $128.00

SAFETY OF HOUSEHOLD AND SIMILAR ELECTRICAL APPLIANCES (TC 61)
IEC 60335-2-13 Ed. 5.1 b:2004, Household and similar electrical appliances - Safety - Part 2-13: Particular requirements for deep fat fryers, frying pans and similar appliances, $92.00
IEC 60335-2-36 Ed. 5.1 b:2004, Household and similar electrical appliances - Safety - Part 2-36: Particular requirements for commercial electric cooking ranges, ovens, hobs and hob elements, $148.00
IEC 60335-2-39 Ed. 5.1 b:2004, Household and similar electrical appliances - Safety - Part 2-39: Particular requirements for commercial electric multi-purpose cooking pans, $133.00
IEC 60335-2-40 Ed. 4.2 b:2005, Household and similar electrical appliances - Safety - Part 2-40: Particular requirements for electrical heat pumps, air-conditioners and dehumidifiers, $265.00
IEC 60335-2-41 Ed. 3.1 b:2004, Household and similar electrical appliances - Safety - Part 2-41: Particular requirements for pumps, $112.00
IEC 60335-2-42 Ed. 5.1 b:2009, Household and similar electrical appliances - Safety - Part 2-42: Particular requirements for commercial electric forced convection ovens, steam cookers and steam-convection ovens, $148.00
IEC 62115 Ed. 1.1 b:2004, Electric toys - Safety, $179.00

SAFETY OF MEASURING, CONTROL, AND LABORATORY EQUIPMENT (TC 66)
IEC 61010-2-081 Ed. 1.1 b:2009, Safety requirements for electrical equipment for measurement, control, and laboratory use - Part 2-081: Particular requirements for automatic and semi-automatic laboratory equipment for analysis and other purposes, $112.00

SWITCHGEAR AND CONTROLGEAR (TC 17)
IEC/PAS 62026-7 Ed. 1.0 en:2009, Low-voltage switchgear and controlgear - Controller-Device Interfaces (CDIs) - Part 7: CompoNet, $286.00
IEC 60470 Ed. 2.0 b:1999, High-voltage alternating current contactors and contactor-based motor-starters, $250.00
Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on “Subscribe”.

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.
Information Concerning

American National Standards
INCITS Executive Board
ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology
The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum for information technology developers, producers and users to create and maintain formal de jure IT standards. INCITS' mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with its oversight of programs of its 30+ Technical Committees. Additionally, the INCITS Executive Board exercises international leadership in its role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

The INCITS Executive Board seeks to broaden its membership base and is recruiting new participants in all membership categories:
- special interest (user, academic, consortia)
- non-business (government and major/minor SDOs)
- business (large/small businesses and consultants)

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, please contact Jennifer Garner at 202-626-5737 or jgarner@itic.org.

Tentative Interim Amendment
ANSI/IAPMO UPC 1-2006, Uniform Plumbing Code
Comment Deadline: Thursday, September 24, 2009
The following Tentative Interim Amendment to the Uniform Plumbing Code, UPC 1-2006, is available for public review:

TIA UPC 030-06 amends Sections 1203.6, 1203.7, and 1214.5.1
Copies may be obtained from Lynne Simnick, Director of Code Development, IAPMO, 5001 E. Philadelphia, Ontario, CA 91761; Phone: (909) 472-4110; E-mail: lynne.simnick@iapmo.org.

ANSI Accredited Standards Developers
Administrative Reaccreditation
ASC Z80 – Ophthalmic Standards
Accredited Standards Committee Z80, Ophthalmic Standards has been administratively reaccredited at the direction of ANSI's Executive Standards Council, under operating procedures revised to bring the document into compliance with the 2009 version of the ANSI Essential Requirements, effective September 2, 2009. For additional information, please contact The Vision Council, the Secretariat of ASC Z80: Mr. Ken Wood, Technical Director, The Vision Council, 1700 Diagonal Road, Suite 500, Alexandria, VA 22314; PHONE: (303) 678-7582; FAX: (703) 548-4580; E-mail: ken@woodcolorado.com.

Approvals of Reaccreditation
ASC O5 – Wood Poles and Other Wood Products
ANSI's Executive Standards Council has approved the reaccreditation of Accredited Standards Committee O5, Wood Poles and Other Wood Products under operating procedures revised to bring the document into compliance with the 2009 version of the ANSI Essential Requirements, effective September 11, 2009. For additional information, please contact the Secretariat of ASC O5: Ms. Kerrianne Conn, Administrator of Standards Processes and Publications, Alliance for Telecommunications Industry Solutions, 1200 G Street NW, Suite 500, Washington, DC 20005; PHONE: (202) 434-8841; FAX: (202) 347-7125; E-mail: kconn@atis.org.

Consumer Electronics Association (CEA)
ANSI's Executive Standards Council has approved the reaccreditation of the Consumer Electronics Association (CEA), a full ANSI Organizational Member, under its revised Consumer Electronics Association Technology & Standards Procedures Manual, effective September 11, 2009. For additional information, please contact: Ms. Shazia McGeehan, Director, Standards Programs and Compliance, 1919 S. Eads Street, Arlington, VA 22202; PHONE: (703) 907-7697; FAX: (703) 907-7601; E-mail: smcgee@ce.org.

Withdrawal of Accreditation Application
USDA/AMS Livestock and Seed Program
At the request of the U.S. Department of Agriculture/Agricultural Marketing Service, the standards developer accreditation application of the USDA/AMS Livestock and Seed Program, recently announced in the July 31, 2009 issue of Standards Action, has been formally withdrawn from consideration. Please direct any related inquiries to: Mr. Martin E. O’Connor, Chief, Standards, Analysis and Technology Branch, Livestock & Seed Program, Agricultural Marketing Service, USDA, 1400 Independence Avenue, SW, Room 2607-S, Washington, DC 20250; PHONE: (202) 720-7046; E-mail: Martin.OConnor@ams.usda.gov.
ANSI Accreditation Program for Third Party Product Certification Agencies

Request for Scope Extension

PrimusLabs.com

Comment Deadline: October 19, 2009

Al Quaglino
Quality Assurance Manager
PrimusLabs.com
2810 Industrial Parkway
Santa Maria, CA 93455
PHONE: (805) 922-0055
FAX: (805) 922-2462
E-mail: al@primuslabs.com
Website: www.primuslabs.com

PrimusLabs.com, an ANSI-accredited certification body, has requested an expansion of scope of ANSI accreditation to include the following scope:

SCOPE(S)

PrimusLabGFS

Please send your comments by October 19, 2009 to Reinaldo Balbino Figueiredo, Sr. Program Director, Product Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036; FAX: (202) 293-9287 or E-mail: rfigueir@ansi.org, or Nikki Jackson, Program Manager, Product Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036; FAX: (202) 293-9287 or E-mail: njackson@ansi.org.

Voluntary Withdrawal of Accreditation

W.Q.S. Certificacoes De Produtos LTDA (World Quality Services – WQS)

W.Q.S. Certificacoes De Produtos LTDA (World Quality Services – WQS) requested ANSI to voluntarily withdraw accreditation for the following scope(s) as of September 15, 2009:

SCOPE(S)

GLOBALGAP

If you have any questions regarding this or other matters related to Product Certification Accreditation, please contact Reinaldo Balbino Figueiredo, Sr. Program Director, Product Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036; FAX: (202) 293-9287 or E-mail: rfigueir@ansi.org, or Nikki Jackson, Program Manager, Product Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036; FAX: (202) 293-9287 or E-mail: njackson@ansi.org.

International Organization for Standardization (ISO)

Call for International Secretariat

Comment Deadline: October 4, 2009

The American Association of Textile Chemists and Colorists (AATCC) has advised ANSI they no longer wish to serve the role of US Delegated Secretariat for these ISO Subcommittees.

The work of these subcommittees is covered by the scope of the ISO Technical Committee 38, as follows:

Standardization of:
- fibres, yarns, threads, cords, rope, cloth and other fabricated textile materials; and the methods of test, terminology and definitions relating thereto;
- textile industry raw materials, auxiliaries and chemical products required for processing and testing;
- specifications for textile products.

Information regarding the United States retaining the secretariat of either or both of these ISO Subcommittees can be obtained by contacting Rachel Howenstine, ANSI, at rhowenstine@ansi.org by October 4th.

Comment Deadline: October 19, 2009

ANSI has been informed by ASTM International; the ANSI delegated Secretariat of ISO/TC 61 and SC’s 5 and 9, that they wish to relinquish the delegation of the secretariat of these ISO committees.

The scope of ISO/TC 61 is as follows:

Standardization of nomenclature, methods of test, and specifications applicable to materials and products in the field of plastics.

Excluded : rubber, lac.

NOTE: By agreement, standards in relation to thermoplastic elastomers are developed and maintained by ISO/TC 45 and by ISO/TC 61.

Information concerning the United States retaining the role of international secretariat of any of these committees may be obtained by contacting Rachel Howenstine via e-mail at rhowenstine@ansi.org by October 19th. After that date, if there is no interesting this secretariat, ISO headquarters will be advised of the relinquishments.
ISO Proposal for a New Field of ISO Technical Activity

Mechatronics

Comment Deadline: September 18, 2009

AFNOR (France) has submitted to ISO a proposal for a new field of ISO technical activity on the subject of Mechatronics, with the following scope statement:

Standardization in the field of mechatronics, which is an approach aiming at the synergistic integration of mechanics, electronics, control theory, and computer science within product design and manufacturing, in order, in particular, to improve and/or optimize the functionality of mechanical products.

The word "mechatronics" was invented in 1969 by Mr. Tetsuro Mori, executive officer of the Japanese company Yaskawa Electric Corporation, a manufacturer of automation systems and components. The word "mechatronics" was built by the combination of "mecha" from "mechanism" and "tronics" from electronics. The word was first registered as a trademark. Due to its large use worldwide, Yaskawa gave up its rights in 1982. This proposal has been sent to the members of the ANSI International Committee (AIC).

Anyone wishing to review the new work item can request a copy of the proposal by contacting Henrietta Scully, ANSI, via e-mail at hscully@ansi.org by September 18th, with submission of comments to Steven Cornish, ANSI, scornish@ansi.org, by September 25, 2009.

Invitation to ISO Workshop

AFNOR (France)

Following approval by the Technical Management Board of a proposal from AFNOR (France) regarding the classification of glass clarity, AFNOR has invited all ISO member bodies to participate in the first ISO Workshop meeting October 15-16th, 2009 in Paris, France. Those interested in more information and/or participating should contact Rachel Howenstine, ANSI, (rhowenstine@ansi.org).

International Electrotechnical Commission (IEC)

IEC Reactivating IEC/TC 5 - Steam Turbines

The IEC Standardization Management Board has been officially asked to reactivate IEC/TC 5 - Steam Turbines, which has been in Stand-by status. The industries depending on steam turbines have shown an intensive interest in revival of TC 5, which led to the circulation of a survey calling for Participating and Observer Members. As a result, 11 countries registered as P Members and 16 as O Members. Several months ago, the TC Secretary visited the US to meet with representatives of the related US industry to discuss their possible interest. Representatives of several companies have approached the USNC Office to advise that they are interested in joining this effort and would become active members of a rejuvenated USNC Technical Advisory Group if one were to be established. The USNC has been a Non-member of this TC for several years because there was not sufficient interest to maintain active participation and support a TAG. That situation may be changing. If the USNC is to again become a Participating Member of IEC/TC 5, a Technical Advisor, TAG Administrator, and TAG Secretary would have to be appointed and a TAG formed of all material interests.

Scope: The preparation of specifications and standards for the rating and testing of steam turbines.

If anyone is interested in the reactivation of IEC/TC 5, they are invited to contact Charlie Zegers, USNC General Secretary, at czegers@ansi.org.

Meeting Notices

2009 ASC A92 Annual Meeting

The Scaffold Industry Association (SIA) is pleased to announce the 2009 ASC A92 Annual Meeting at Harrah’s in Las Vegas, NV on October 25-27, 2009.

The SIA serves as Secretariat for the ANSI Accredited Standards Committee A92 for Aerial Work Platforms. Those who have interest in the committee are encouraged to attend.

Please contact A92 Secretariat, Emily Bannwarth, at (816) 595-4860 or emily@scaffold.org, or visit www.scaffold.org for further information.

ASC Z133

The next meeting of ASC Z133 (Arboriculture Safety Standard Committee) will occur on Tuesday, October 13, 2009, at the Westin Baltimore-Washington Airport-BWI, Linthicum, Maryland. For more information, please contact Janet Huber, ASC Z133 Secretariat, at ISA (217) 355-9411, x259, or e-mail jhuber@isa-arbor.com.

CGATS SC3 (Metrology), CGATS SC4 (Process Control), US TAG to ISO TC 130 WG3 (Process Control and Related Metrology), and US TAG to ISO TC 130 WG4 (Media and Materials)

A Joint Meeting of CGATS SC3 (Metrology), CGATS SC4 (Process Control) and the US TAG to ISO TC 130 WG3 (Process Control and Related Metrology) and ISO TC 130 WG4 (Media and Materials) will be held November 2-3, 2009 in Mesa, AZ. This meeting is open to anyone having an interest. Users in the printing and publishing industry are especially encouraged to participate. For additional information, contact Debbie Orf, NPES, at dorf@npes.org or (703) 264-7200.

US TAG to ISO/PC 242 (Energy Management)

The U.S. Technical Advisory Group to ISO/PC 242 Energy Management will be holding a meeting at the Marriot Courtyard Portland City Center located at 550 SW Oak Street Portland, OR 97204 on October 26, 2009 to October 28, 2009. The objectives of the meeting include (a) to review the international comments on the committee draft, (b) to determine the U.S. responses to the comments, and (c) to discuss administrative issues for the TAG. Members and interested parties are invited to contact Deann Desai at deann.desai@gatech.edu with any questions or if they are interested in participating.
International Organization for Standardization (ISO)

ISO Proposal for a New Field of ISO Technical Activity

Asset Management

Comment Deadline: September 29, 2009

BSI (United Kingdom) has submitted to ISO a proposal for a series of three ISO standards on the subject of Asset Management, with the following scope statements for each:

**Asset management – Overview, principles and terminology**

This International Standard provides:

a) an overview of the asset management family of standards;
b) an introduction to asset management;
c) a description of the underlying principles of asset management

d) examples of the application of asset management principles,
e) a brief description of the Plan-Do-Check-Act (PDCA) methodology and its application within the asset management standards; and

f) details of the terms and definitions for use in the asset management family of standards.

This International Standard is applicable to all types of organization (e.g. commercial enterprises, government agencies, non-profit organizations), as well as to all sizes of organization (from small to medium enterprises through to multinationals).

This International Standard consists of guidance and recommendations and is not intended for certification, regulatory, or contractual use.

**Asset management – Requirements**

This International Standard specifies the requirements for an asset management system to optimally and sustainably manage physical assets and asset systems over their life cycles.

This International Standard is applicable to any organization that wishes to:

a) establish an asset management system to optimally and sustainably manage its physical assets over their life cycles or over a defined long-term period;
b) implement, maintain and improve the management of its assets;
c) assure itself of conformity with its stated asset management policy and strategy,
d) demonstrate conformity with this International Standard by making a self-determination and self-declaration, or

e) seeking confirmation of its conformance by parties having an interest in the organization, such as customers, or

f) seeking confirmation of its self-declaration by a party external to the organization, or

g) seeking certification/registration of its asset management system by an external organization.
This International Standard is applicable to all types of organization (e.g., commercial enterprises, government agencies, non-profit organizations), as well as to all sizes of organization (from small to medium enterprises through to multinationals).

NOTE 1
The management of physical assets is inextricably linked to the management of other asset types (for example, the optimal life cycle management of physical assets is heavily dependent upon information and knowledge, human assets and financial resources, and often has a significant impact on reputation and customer satisfaction); these other asset types are addressed within the requirements of this International Standard, insofar as they have a direct impact on the management of physical assets.

NOTE 2
The organization can need to manage its assets optimally for an indefinite period into the future, i.e., in perpetuity; in such situations the organization can define the "long-term period" to be in alignment with the time horizon of its organizational strategic plan, including the life cycles of critical assets.

Asset management – Guidelines on the application of ISO Asset Management Requirements Standard

This International Standard provides guidelines for the application of the requirements specified in the ISO asset management requirements standard. It provides guidance on the establishment, implementation, maintenance and improvement of an asset management system and its coordination with other management systems.

This International Standard does not prescribe mandatory approaches, methods or tools for the implementation of the requirements of the ISO asset management requirements standard, but rather seeks to aid understanding and implementation by means of examples and illustrations.

This International Standard is applicable to all types of organization (e.g., commercial enterprises, government agencies, non-profit organizations), as well as to all sizes of organization (from small to medium enterprises through to multinationals).

This International Standards does not create any additional requirements to those specified in the ISO asset management requirements standard.

This International Standard consists of guidance and recommendations and is not intended for certification, regulatory, or contractual use.

This proposal has been sent to the members of the ANSI International Committee (AIC).

Anyone wishing to review the new work items can request a copy of the proposal by contacting Henrietta Scully, ANSI, via e-mail: hscully@ansi.org by September 29th with submission of comments to Steven Cornish, ANSI, scornish@ansi.org by October 2, 2009.
BSR/UL 21
Standard for LP-Gas Hose

1. Addition of Moist Ammonia-Air Stress Cracking Test

17C Moist Ammonia-Air Stress Cracking Test

17C.1 After being subjected to the conditions described in 17C.2 - 17C.5, a brass part containing more than 15 percent zinc shall show no evidence of cracking when examined using 25X magnification.

17C.2 Each test sample is to be subjected to the physical stresses normally imposed on or within a part as the result of assembly with other components. Such stresses are to be applied to the sample prior to and maintained during the test. A ferrule or end-connecting fitting used in the assembly of a flexible connector is to be tested prior to crimping the hose.

17C.3 Pipe-threaded ends (NPT) are to be torqued to brass companion fittings as specified in Table 17C.1. Other threaded parts are to be tightened to the brass companion fittings to the degree required to produce a leaktight assembly. Teflon tape or pipe thread compound are not to be used on the threads.

\(^a\)ANSI/ASME B1.20.1

17C.4 Three samples are to be degreased and then continuously exposed in a set position for ten days to a moist ammonia-air mixture maintained in a glass chamber 12 by 12 by 12 inches (305 by 305 by 305 mm) having a glass cover.

17C.5 Aqueous ammonia (600 ml) having a specific gravity of 0.94 is to be maintained at the bottom of the glass chamber below the samples. The samples are to be positioned 1-1/2 in (38.1 mm) above the aqueous ammonia solution and supported by an inert tray. The moist ammonia-air mixture in the chamber is to be maintained at atmospheric pressure and at a temperature of 34 ±2°C (93 ±3.6°F).
4A Installation and Operating Instructions Physical Media

4A.1 The installation diagram(s) and any special field installation instructions shall be attached to the unit or, when separate, shall be provided in printed hardcopy format. A copy shall be supplied with each individual product or with each single shipment when multiples of the same products are shipped directly (to an end customer) in a single shipment.

4A.2 The following sections contain information that shall be provided in printed hardcopy format and supplied with the unit(s):

a) 4.2(a); 
b) 12.2.3.1(c); 
c) 12.2.3.2(a); 
d) 12.2.3.2(b); 
e) 12.2.3.2(c); 
f) 12.3; 
g) 108.1, Exception No. 1; 
h) 108.3; 
i) 108.4; and 
j) 108.11.
4A.3 Other installation instructions, operating and test instructions shall be made available by printed hardcopy or by physical electronic media such as a CD, DVD, etc. A copy shall be supplied with each individual product or with each single shipment when multiples of the same products are shipped directly (to an end customer) in a single shipment.
