Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically, in accordance with the developer's procedures.

Ordering Instructions for "Call-for-Comment" Listings

1. **Order from the organization indicated for the specific proposal.**
2. **Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.**
3. **Include remittance with all orders.**
4. **BSR proposals will not be available after the deadline of call for comment.**

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

Comment Deadline: March 1, 2010

ALI (ASC A14) (American Ladder Institute)

Revisions

BSR A14.9-201x, Disappearing Attic Stairways (revision of ANSI A14.9-2004)

Develops rules to govern the safe design, construction, testing, care and use of permanently installed folding or collapsible fixed aluminum or wood attic ladders of various types.

Reaffirmations

BSR/ASA S1.13-2005 (R201x), Measurement of Sound Pressure Levels in Air (reaffirmation and redesignation of ANSI S1.13-2005)

Specifies requirements and procedures for measurement of sound pressure levels in air at a single point in space. This standard is mainly applicable to measurements performed indoors but may be used in outdoor measurements under specified conditions. It is applicable to a wide range of measurements and to sounds that may differ widely in temporal and spectral characteristics.

NFPA (National Fire Protection Association)

(See [page 6](#) for introduction)

New Standards

BSR/NFPA 1984-201x, Standard on Respirators for Wildland Fire-Fighting Operations (new standard)

Specifies the minimum design, performance, testing, and certification requirements for respirators to provide protection from inhalation hazards for personnel conducting wildland fire fighting operations. This standard shall specify respirator requirements only for use in non-IDLH (Immediate Danger to Life and Health) wildland environments during wildland fire fighting operations.

Revisions

BSR/NFPA 286-201x, Standard Methods of Fire Tests for Evaluating Contribution of Wall and Ceiling Interior Finish to Room Fire Growth (revision of ANSI/NFPA 286-2006)

Describes a method for determining the contribution of interior finish materials to room fire growth during specified fire exposure conditions. This method shall be used to evaluate the flammability characteristics of wall and ceiling interior finish, other than textile wall coverings, where such materials constitute the exposed interior surfaces of buildings.

BSR/NFPA 921-201x, Guide for Fire and Explosion Investigations (revision of ANSI/NFPA 921-2008)

Assists individuals who are charged with the responsibility of investigating and analyzing fire and explosion incidents and rendering opinions as to the origin, cause, responsibility, or prevention of such incidents.

Projects Withdrawn from Consideration

An accredited standards developer may abandon the processing of a proposed new or revised American National Standard or portion thereof if it has followed its accredited procedures. The following projects have been withdrawn accordingly:

UL (Underwriters Laboratories, Inc.)

BSR/UL 96-200x, Standard for Lightning Protection Components (revision of ANSI/UL 96-2005)

BSR/UL 96-201x, Standard for Lightning Protection Components (revision of ANSI/UL 96-2005)

30 Day Notice of Withdrawal: ANS 5 to 10 years past approval date

In accordance with clause 4.7.1 Periodic Maintenance of American National Standards of the ANSI Essential Requirements, the following American National Standards have not been reaffirmed or revised within the five-year period following approval as an ANS. Thus, they shall be withdrawn at the close of this 30-day public review notice in Standards Action.

ANSI/CAM-I 104.0-2003, Part 2, Dimensional Measuring Interface Standard - Part 2 - Object Interface Specification

ANSI/HL7 V3 RRNCR, R1-2004, HL7 Version 3 Standard: Notifiable Condition Report

BSR/UL 1647-201x, Standard for Motor-Operated Massage and Exercise Machines (revision of ANSI/UL 1647-2009b)

Covers:

- (1) Proposed revision and addition of requirements to specify requirements for the investigation of treadmills intended for use by dogs;
- (2) Proposed addition of requirements to specify requirements for the investigation of motion simulators used with upholstered furnishings;
- (3) Proposed revision and addition of leakage current requirements to update the unit of measure of current to measurement indication unit (MIU);
- (4) Proposed addition of requirements to specify alternate spacing requirements for printed wiring boards;
- (5) Proposed revision to section 34A.3 and paragraph 52.2.2 to delete the reference to the deceleration of a treadmill belt;
- (6) Proposed revision to the marking requirements in paragraph 34.7 to delete the reference to standing on the side rails and replace it with wording to caution users while stepping onto or off a moving belt;
- (7) Proposed revision to paragraph 24.6 to indicate that either a single-pole or double-pole switch used for the on/off operation shall be connected to the ungrounded conductor of the supply cord;
- (8) Proposed revision to paragraph 46.1 to clarify that the fuse used in the test circuit for the switch and control test is used for testing purposes only and is not a component of the machine;
- (9) Proposed revision to paragraph 59.4 to add an exception that allows parts that are shipped separately to be tested separately using a test that simulates testing the final assembly;
- (10) Proposed addition and revision of requirements to specify requirements for the investigation of agility trainers; and
- (11) Proposed editorial revisions to paragraphs 45.2, 54.3.1, and 64.5 to correct references and clarify requirements.

**NATIONAL FIRE PROTECTION ASSOCIATION (NFPA)
2010 FALL REVISION CYCLE REPORT ON PROPOSALS
COMMENT CLOSING DATE: March 5, 2010**

The National Fire Protection Association, in cooperation with ANSI, has developed a procedure whereby the availability of the semi-annual NFPA Report on Proposals will be announced simultaneously by NFPA and ANSI for review and comment.

Disposition of all comments will be published in the semi-annual NFPA Report on Comments, a copy of which will automatically be sent to all commentors, and to others upon request. All comments for the 2010 Fall Revision Cycle Report on Proposals must be received by March 5, 2010.

The NFPA 2010 Fall Revision Cycle Report on Proposals contains the Reports listed on page 4. If you wish to comment on these Reports, they are available and downloadable from the NFPA Website at www.nfpa.org or request the 2010 Fall Revision Cycle Report on Proposals (ROP 10 FRC) from the:

National Fire Protection Association
Publications/Sales Department
11 Tracy Drive
Avon, MA 02322

Please note that some documents in the Report on Proposals do not contain the complete text of standards that are being revised, reconfirmed, or withdrawn. The full text of the standard is available from NFPA.

Call for Comment Contact Information

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

BSR INCITS PN-2203-L-201x, Information technology - Open Virtualization Format (OVF) Specification (new standard)

Stakeholders: Developers of virtual appliances.

Project Need: To answer the need for a common format to package and distribute virtual computer systems and virtual appliances.

Describes an open, secure, portable, efficient and extensible format for the packaging and distribution of software to be run in virtual machines.

BSR Z80.9-201x, Devices for Low Vision (revision of ANSI Z80.9-2004)

Stakeholders: Medical doctors, medical device manufacturers, optometrists and low vision clinics.

Project Need: To create minimum requirements for safe and effective intra-ocular lenses used to correct visual astigmatism.

Applies to optical and electro-optical devices specified by the manufacturer for use by visually impaired persons as low vision devices. This standard specifies optical and mechanical requirements and test methods. It includes devices with optical and/or electrical and/or electronic components used for image capture or display.

BSR Z80.1-201x, Prescription Spectacle Lenses (revision of ANSI Z80.1-2005)

Stakeholders: Optometrists, ophthalmologists, opticians, lens manufacturers, and optical laboratories.

Project Need: To create minimum requirements for safe and effective spectacle eyewear used for vision correction.

Applies to the processing of all prescription ophthalmic spectacle lenses in edged or assembled form. This standard is a processing guideline for optical laboratories, applicable to prescription eyewear prior to transfer for dispensing and for the dispenser prior to the delivery of the finished eyewear to the patient. Relevant optical specifications and tolerances of this standard should apply also to uncut lenses supplied by an optical laboratory to be used in filling a specific prescription.

American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMI
- AAMVA
- AGA
- AGRSS, Inc.
- ASC X9
- ASHRAE
- ASME
- ASTM
- GEIA
- HL7
- MHI (ASC MH10)
- NBBPVI
- NCPDP
- NISO
- NSF
- TIA
- Underwriters Laboratories, Inc. (UL)

ISO Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments

Comments regarding ISO documents should be sent to Henrietta Scully, at ANSI's New York offices. The final date for offering comments is listed after each draft.

Ordering Instructions

ISO Drafts can be made available by contacting ANSI's Customer Service department. Please e-mail your request for an ISO Draft to Customer Service at sales@ansi.org. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

IEC Draft International Standards

This section lists proposed standards that the International Electrotechnical Commission (IEC) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Ordering Instructions

IEC Drafts are available from IEC directly via their online store at <http://www.iec.ch/>.

Comments

Comments regarding IEC documents should be sent to Charles T. Zegers, at ANSI's New York offices. The final date for offering comments is listed after each draft.

Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology

(NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: <http://www.nist.gov/notifyus/> and click on "Subscribe".

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.

Information Concerning

American National Standards

INCITS Executive Board

ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology

The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum for information technology developers, producers and users to create and maintain formal de jure IT standards. INCITS' mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with its oversight of programs of its 30+ Technical Committees. Additionally, the INCITS Executive Board exercises international leadership in its role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

The INCITS Executive Board seeks to broaden its membership base and is recruiting new participants in all membership categories:

- special interest (user, academic, consortia)
- non-business (government and major/minor SDOs)
- business (large/small businesses and consultants)

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, please contact Jennifer Garner at 202-626-5737 or jgarner@itic.org.

ANSI Accredited Standards Developers

Approval of Reaccreditation

National Board of Boiler and Pressure Vessel Inspectors (NBBPVI)

ANSI's Executive Standards Council has approved the reaccreditation of the National Board of Boiler and Pressure Vessel Inspectors (NBBPVI), a full ANSI Organizational Member, under its recently revised National Board Inspection Code Procedure for documenting consensus on proposed American National Standards, effective January 12, 2010. For additional information, please contact: Ms. Robin Hough, NBIC Committee Coordinator, National Board of Boiler and Pressure Vessel Inspectors, 1055 Crupper Avenue, Columbus, OH 43229; PHONE: (614) 888-8320, ext. 228; E-mail: RHough@nationalboard.org.

Change in Scope of Accreditation

NSF International

NSF International, an ANSI Accredited Standards Developer (ASD) and full organizational member, has advised ANSI that it wishes to expand its ASD scope of accreditation on file. NSF's updated scope of accreditation, which now includes the addition of *automotive parts*, is as follows:

Scope: Public health, safety and environmental standards including, but not limited to: food additives and contaminants (chemical and microbiological), commercial and household food service equipment (powered, preparation, storage, and service products), food processing equipment; water quality and treatment, drinking water additives, drinking water treatment systems, commercial bottled water, home treatment devices, beverage treatment technologies; plumbing products, plastic pipe; recreational water standards, swimming pool, spa, and hot tubs and related equipment; waste water treatment systems (small, commercial, and home treatment systems and technologies), biosolids quality and treatment, waste water additives; air quality, product emissions and filtration equipment; *automotive parts*; and related management system standards.

For additional information, please contact: Ms. Jane M. Wilson, Director of Standards, NSF International, 789 N. Dixboro Road, Ann Arbor, MI 48105; PHONE: (734) 827-6835; FAX: (734) 827-6155; E-mail: Wilson@nsf.org.

Reaccreditation

ASIS International

Comment Deadline: February 15, 2010

ASIS International, a full ANSI Organizational Member, has submitted limited revisions to the operating procedures under which it was last reaccredited in 2008. As these revisions appear to be substantive in nature, the reaccreditation process is initiated.

To obtain a copy of ASIS' revised operating manual, or to offer comments, please contact: Ms. Susan Carioti, Director, Standards & Guidelines, ASIS International, 1625 Prince Street, Alexandria, VA 22314-2818; PHONE: (703) 518-1416; E-mail: Sue.Carioti@asisonline.org. You may view/download a copy of the revisions during the public review period at the following URL:

<http://publicaa.ansi.org/sites/apdl/Documents/Forms/AllItems.aspx?RootFolder=%2fsites%2fapdl%2fDocuments%2fStandards%20Activities%2fPublic%20Review%20and%20Comment%2fANSI%20Accreditation%20Actions&View=%7b21C60355%2dAB17%2d4CD7%2dA090%2dBABEEC5D7C60%7d>. Please submit public comments to ASIS by February 15, 2010, with a copy to the ExSC Recording Secretary in ANSI's New York Office (E-mail: Jthompso@ANSI.org).

International Organization for Standardization (ISO)

Call for International Secretariat

ISO/TC 38/SC 23 – Textiles – Fibres and Yarns

Comment Deadline: February 19, 2010

Cotton Inc. has advised ANSI they no longer wish to serve in the role of US Delegated Secretariat for this ISO Subcommittee.

The work of this subcommittee is covered by the scope of the ISO Technical Committee 38, as follows:

Standardization of:

- fibres, yarns, threads, cords, rope, cloth and other fabricated textile materials; and the methods of test, terminology and definitions relating thereto;
- textile industry raw materials, auxiliaries and chemical products required for processing and testing;
- specifications for textile products.

Information regarding the United States retaining the secretariat of this ISO Subcommittee can be obtained by contacting Rachel Howenstine, ANSI, at rhowenstine@ansi.org by February 19, 2010.

U.S. Technical Advisory Groups

Transfer of U.S. TAG Administrator

ANSI-Accredited U.S. TAG to ISO TC 76 – Transfusion, Infusion and Injection Equipment for Medical or Pharmaceutical Use

The ANSI Accredited U.S. Technical Advisory Group to ISO TC 76, Transfusion, infusion and injection equipment for medical for pharmaceutical use, has approved a transfer of its TAG Administrator from AABB – Advancing Transfusion and Cellular Therapies Worldwide to the Association for the Advancement of Medical Instrumentation (AAMI). The TAG will operate using AAMI's currently accredited procedures for all of the TAGs for which it serves as Administrator. This action is taken, effective January 8, 2010. For additional information, please contact: Mr. Joe Lewelling, Vice-President, Standards Development, AAMI, 1110 North Glebe Road, Suite 220, Arlington, VA 22201; PHONE: (703) 525-4890, ext. 206; E-mail: jlewelling@aami.org.

International Organization for Standardization (ISO)

Call for Administrator and formation of an Accredited US Technical Advisory Group (TAG) for a potential ISO Committee on Asset Management

The August 28, 2009 issue of STANDARDS ACTION announced that BSI (United Kingdom) submitted to ISO a proposal for a series of three ISO standards on the subject of Asset Management, with the following scope statements for each:

Asset management – Overview, principles and terminology

This International Standard provides:

- a) an overview of the asset management family of standards;
- b) an introduction to asset management;
- c) a description of the underlying principles of asset management
- d) examples of the application of asset management principles,
- e) a brief description of the Plan-Do-Check-Act (PDCA) methodology and its application within the asset management standards; and
- f) details of the terms and definitions for use in the asset management family of standards.

This International Standard is applicable to all types of organization (e.g. commercial enterprises, government agencies, non-profit organizations), as well as to all sizes of organization (from small to medium enterprises through to multinationals).

This International Standard consists of guidance and recommendations and is not intended for certification, regulatory, or contractual use.

Asset management – Requirements

This International Standard specifies the requirements for an asset management system to optimally and sustainably manage physical assets and asset systems over their life cycles.

This International Standard is applicable to any organization that wishes to:

- a) establish an asset management system to optimally and sustainably manage its physical assets over their life cycles or over a defined long-term period;
- b) implement, maintain and improve the management of its assets;
- c) assure itself of conformity with its stated asset management policy and strategy,
- d) demonstrate conformity with this International Standard by
- e) making a self-determination and self-declaration, or
- f) seeking confirmation of its conformance by parties having an interest in the organization, such as customers, or
- g) seeking confirmation of its self-declaration by a party external to the organization, or
- h) seeking certification/registration of its asset management system by an external organization.

This International Standard is applicable to all types of organization (e.g. commercial enterprises, government agencies, non-profit organizations), as well as to all sizes of organization (from small to medium enterprises through to multinationals).

NOTE 1

The management of physical assets is inextricably linked to the management of other asset types (for example, the optimal life cycle management of physical assets is heavily dependent upon information and knowledge, human assets and financial resources, and often has a significant impact on reputation and customer satisfaction); these other asset types are addressed within the requirements of this International Standard, insofar as they have a direct impact on the management of physical assets.

NOTE 2

The organization can need to manage its assets optimally for an indefinite period into the future i.e. in perpetuity; in such situations the organization can define the "long-term period" to be in alignment with the time horizon of its organizational strategic plan, including the life cycles of critical assets.

Asset management – Guidelines on the application of ISO Asset Management Requirements Standard

This International Standard provides guidelines for the application of the requirements specified in the ISO asset management requirements standard. It provides guidance on the establishment, implementation, maintenance and improvement of an asset management system and its coordination with other management systems.

This International Standard does not prescribe mandatory approaches, methods or tools for the implementation of the requirements of the ISO asset management requirements standard, but rather seeks to aid understanding and implementation by means of examples and illustrations.

This International Standard is applicable to all types of organization (e.g. commercial enterprises, government agencies, non-profit organizations), as well as to all sizes of organization (from small to medium enterprises through to multinationals).

This International Standards does not create any additional requirements to those specified in the ISO asset management requirements standard.

This International Standard consists of guidance and recommendations and is not intended for certification, regulatory, or contractual use.

BSI has indicated their intention to have a first meeting shortly after ISO Technical Management Board (TMB) acceptance of this new work item. Therefore, it is important, should there be interest for the United States undertaking participating status in this committee, that ANSI be contacted regarding the formation of an accredited US Technical Advisory Group (TAG) for this ISO committee.

International Organization for Standardization (ISO)

Call for Administrator and formation of an Accredited US Technical Advisory Group (TAG) for a potential ISO Committee on Reuse of Treated Wastewater

The June 19, 2009 issue of STANDARDS ACTION announced that Israel (SII) submitted to ISO a proposal for an ISO standard on the subject of Treated Wastewater Reuse (TWW), with the following scope statement:

Standardization in the field of the reuse of treated wastewater

The standard will deal with the requirements and processes involved in the development of health, environmentally viable and sustainable projects for the reuse of treated wastewater in agriculture, landscape and industry.

The standard will state the conditions necessary for the design, construction, operation and maintenance of such projects without endangering or causing damage to the health of the people affected by the projects to the environment, to the soil, or to the crops and to the hydrological situation in the area.

The standardization process shall refer to the complex management of all the internal and external elements that affect or can be affected by the implementation of such projects and will refer to other aspects such as:

- wastewater treatment plants: design, building, operation and maintenance requirements,
- treated wastewater distribution and storage systems: design, building, operation and maintenance requirements,
- irrigation systems: design, operation and maintenance requirements,
- wastewater quality suitability to soils and crops
- wastewater quality demands, specially in hydrological sensible regions

This International guideline will deal with the management of projects, specifying requirements and procedures to integrate health and environmental aspects into design, operation and development processes of projects related to treated wastewater reuse and the products obtained from such projects.

SII has indicated their intention to have a first meeting shortly after ISO Technical Management Board (TMB) acceptance of this new work item. Therefore it is important, should there be interest for the United States undertaking participating status in this committee, that ANSI be contacted regarding the formation of an accredited US Technical Advisory Group (TAG) for this ISO committee.
