This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically, in accordance with the developer’s procedures.

Ordering Instructions for “Call-for-Comment” Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix, for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

NSF (NSF International)

Revision

BSR/NSF 58-201x (i67r2), Reverse Osmosis Drinking Water Treatment Systems (revision of ANSI/NSF 58-2013)

The point-of-use reverse osmosis drinking water treatment systems addressed by this Standard are designed to be used for the reduction of specific substances that may be present in drinking water supplies (public or private) considered to be microbiologically safe and of known quality (except that claims for the reduction of filterable cysts may be permitted). Systems covered by this Standard are intended for reduction of total dissolved solids (TDS) and other contaminants specified in this standard. Systems with components or functions covered under other NSF or ANSI/NSF Standards or Criteria shall conform to the applicable requirements therein.

UL (Underwriters Laboratories, Inc.)

Revision

BSR/UL 360-201X, Standard for Safety for Liquid-Tight Flexible Metal Conduit (revision of ANSI/UL 360-2014)

Document (dated 10-24-14) proposes the replacement of references to ASTM Oil No. 2 with IRM 902 oil and a correction to a typo in Xenon-arc conditioning clause 21.3.3

Send comments (with copy to psa@ansi.org) to: Paul Lloret, (408) 754-6618, Paul.E.Lloret@ul.com

Comment Deadline: December 8, 2014

ASABE (American Society of Agricultural and Biological Engineers)

New Standard

BSR/ASABE S623 MONYEAR-201x, Determining Landscape Plant Water Requirements (new standard)

Provides an estimate of plant water requirements of permanently installed, non-production based, established landscape materials. Provides minimum water requirements for acceptable plant appearance and function. This standard does not cover plants for sports fields, golf courses, or food production.

Single copy price: $55.00

ATIS (Alliance for Telecommunications Industry Solutions)

Reaffirmation

BSR/ATIS 0600401.01-2000 (R201x), Network to Customer Installation Interfaces - Analog Voicegrade Switched Access Lines Using Loop-Start or Ground Start Signaling with Line-Side Answer Supervision Feature (reaffirmation of ANSI/ATIS 0600401.01-2000 (R2010))

This standard provides the signaling requirements associated with the line-side answer supervision feature on analog switched access lines using loop-started or ground-start signaling when the network provides this capability. Requirements are specified at the interface between telecommunications carriers and customer installation wiring and equipment. This standard is intended to be used in conjunction with American National Standard for Telecommunications - Network-to-Customer Installation Interfaces - Analog Voicegrade Switched Access Lines Using Loop-Start and Ground-Start Signaling, ATIS 0600401.2000(R2005).

Single copy price: $110.00

Obtain an electronic copy from: kconn@atis.org

ATIS (Alliance for Telecommunications Industry Solutions)

Reaffirmation
BSR/ATIS 0600401.04-2000 (R201x). Network and Customer Installation Interfaces - Analog Voicegrade Switched Access Lines with the Call Waiting, Distinctive Call Waiting, or Calling Identity Delivery on Call Waiting Feature (reaffirmation of ANSI/ATIS 0600401.04-2000 (R2010))

This standard provides the signaling and data transmission requirements associated with Call Waiting (CW), Distinctive Call Waiting (DCW), and Calling Identity Delivery on Call Waiting (CICDIN) features on analog voicegrade switched access lines. When the network provides the CW or DCW feature, a customer installation (CI), while off-hook on an existing call, receives a CW alerting tone or a DCW alerting tone pattern when an incoming call is waiting to be answered.

Single copy price: $145.00

This standard establishes common criteria for Synchronous Optical NETwork (SONET) interfaces at standard rates associated with the Network Interface (NI) criteria. Covered in this standard include maintenance and operation functionality at the SONET Section, Line, and Path layers, and other necessary criteria for compliance with the proper interfacing of the connecting customer installation equipment. Compliance with this standard is intended to ensure compatibility at the SONET NI and should not be construed as a constraint on the internal operations of the network or customer installation equipment. BSR/ANSLG C81.64-2005 (R201x), Guidelines and General Information for Electric Lamp Bases, Lampholders and Gauges (reaffirmation of ANSI/IEC C81.64-2005)

This standard gives guidance and information to designers and testing personnel on the use of ANSI/IEC C81.61, ANSI/IEC C81.62, and ANSI/IEC C81.63 and their supplements. It includes the designation system and general information regarding bases (caps), lampholders, and gauges. Many parts of this standard reference the adopted parts of IEC 60061-4, Lamp Caps and Holders Together with Gauges for Control of Interchangeability and Safety - Part 4: Guidelines and General Information. This standard is intended for use by standards engineers. In those cases where new proposals have to be prepared, so as to achieve uniformity in base/lampholder/gauge standards and testing procedures. It contains information from ANSI and the IEC in regard to bases (caps) and holders in general use today, together with their relevant gauges. The gauges illustrated, although generally accepted in principle, are not necessarily the only form in which they can be made. This standard is applicable to bases, lampholders, and gauges with the object of securing international interchangeability and safety.

NSF (NSF International)

**New Standard**

BSR/NSF 385-201x (i1r2), Disinfection Mechanics (new standard)

This Standard is intended for use with devices intended to disinfect wastewater after secondary treatment and prior to discharge from residential wastewater treatment systems having rated treatment capacities between 757 L/day (200 gal/day) and 5678 L/day (1500 gal/day) or commercial wastewater treatment systems having a rated treatment capacity exceeding 5678 L/day (1500 gal/day). This applies to devices intended to be used in water reclamation and reuse. Specific requirements exist for construction and testing of individual disinfection devices based on the specific technology used by the device.

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

ABYC (American Boat and Yacht Council)

Office: 613 Third Street, Suite 10
        Annapolis, MD 21403

Contact: Lynn Lipsey
E-mail: llipsey@abycinc.org

* BSR/ABYC A-4-200x, Fire Fighting Equipment (new standard)
  Stakeholders: Consumers, surveyors, boat manufacturers, insurance personnel, trade organizations.
  Project Need: This standard identifies safety issues with fire fighting equipment on boats.
  This standard is a guide for the design, construction, and installation of portable handheld fire extinguishers and fixed fire extinguishing systems on boats.

* BSR/ABYC A-14-200x, Gasoline and Propane Gas Detection Systems (new standard)
  Stakeholders: Consumers, surveyors, boat manufacturers, insurance personnel, trade organizations.
  Project Need: This standard identifies safety issues with gasoline and propane gas detection systems on boats.
  This standard is a guide for the design, construction, and installation of gasoline and propane gas detection and indicating equipment on boats.

* BSR/ABYC A-24-200x, Carbon Monoxide Detection Systems (new standard)
  Stakeholders: Consumers, surveyors, boat manufacturers, insurance personnel, trade organizations.
  Project Need: This standard identifies safety issues with carbon monoxide detection systems on boats.
  This standard is a guide for the design, construction, and installation of carbon monoxide detection systems on boats.

* BSR/ABYC A-31-201x, Battery Chargers and Inverters (revision of ANSI/ABYC A-31-2010)
  Stakeholders: Consumers, surveyors, boat manufacturers, insurance personnel, trade organizations.
  Project Need: This standard identifies safety issues with battery chargers and inverters on boats.
  This standard is a guide for the design, construction, and installation of permanently installed marine alternating current (AC) battery chargers, power inverters, and inverter/chargers.

* BSR/ABYC A-33-201x, Emergency Engine/Propulsion Cut-Off Devices (revision of ANSI/ABYC A-33-2009)
  Stakeholders: Consumers, surveyors, boat manufacturers, insurance personnel, trade organizations.
  Project Need: This standard identifies safety issues with propulsion engines under emergency conditions.
  This standard is a guide for the design, construction, installation and performance of a system used to disable the propulsion engine when the operator is unexpectedly displaced from the boat.

* BSR/ABYC H-4-201x, Cockpit Drainage Systems (new standard)
  Stakeholders: Consumers, surveyors, boat manufacturers, insurance personnel, trade organizations.
  Project Need: This standard identifies safety issues with cockpit drainage systems on boats.
  This standard is a guide for the design, construction, material, and testing of inflatable boats, including RIBS.

* BSR/ABYC P-6-201x, Propeller Shafting Systems (revision of ANSI/ABYC P-6-2010)
  Stakeholders: Consumers, surveyors, boat manufacturers, insurance personnel, trade organizations.
  Project Need: This standard identifies safety issues with propeller shafting systems on boats.
  This standard is a guide for the design, construction, and materials for propeller shafts and struts, and the installation of shaft bearings, stern bearings, struts, shaft seals, shaft logs, shaft couplings, and propellers.

* BSR/ABYC P-14-201x, Mechanical Propulsion Control Systems (new standard)
  Stakeholders: Surveyors, consumers, trade organizations, insurance personnel, boat manufacturers.
  Project Need: This standard identifies safety issues with mechanical propulsion control systems.
  This standard is a guide for the design, construction, testing, and installation of systems for mechanical remote control of the forward and reverse thrust, speed, and trim/tilt of propulsion machinery on boats.
* BSR/ABYC S-7-201x, Boat Capacity Labels (revision of ANSI/ABYC S-7-2010)
Stakeholders: Surveyors, consumers, insurance personnel, trade organizations, boat manufacturers.
Project Need: This standard identifies safety issues with boat capacity labels.
This industry conformity standard establishes methods for the display of capacity information on boats.

* BSR/ABYC S-8-201x, Boat Measurement and Weight (revision of ANSI/ABYC S-8-2010)
Stakeholders: Surveyors, consumers, boat manufacturers, insurance personnel, trade organizations.
Project Need: This standard identifies safety issues with boat measurements and weight.
This industry conformity standard is intended as a guide to establish uniformity in describing boat dimensions and weight specifications.

ASME (American Society of Mechanical Engineers)
Office: Two Park Avenue
New York, NY 10016
Contact: Mayra Santiago
Fax: (212) 591-8501
E-mail: ansibox@asme.org

BSR/ASME PTC 36-201x, Measurement of Industrial Sound (revision of ANSI/ASME PTC 36-2004 (R2013))
Stakeholders: Organizations, companies, and individuals involved with the measurement of industrial sound.
Project Need: Revised to reflect the state of the art.
The scope of this Code includes measurement procedures in a variety of acoustical environments, including outdoor settings influenced by background noise. Generally, sound pressure levels and/or sound power levels in prescribed frequency bands are used to quantify the sound emission of industrial equipment and facilities. Sound pressure level measurements or sound intensity measurements obtained using the procedures of this Code may be used to calculate sound power level.

ASTM (ASTM International)
Office: 100 Barr Harbor Drive
West Conshohocken, PA 19428-2959
Contact: Corice Leonard
Fax: (610) 834-3683
E-mail: accreditation@astm.org

BSR/ASTM WK47437-201x, New Test Method for pick up efficiency and flow measurement of vacuum cleaners (new standard)
Stakeholders: Performance (Test Methods) industry.
Project Need: This test method is based on actual flow measurement of suction on the carpet which then can corresponds to particle pick up by measuring the count and size of the particles picked up by vacuum cleaners.
http://www.astm.org/DATABASE.CART/WORKITEMS/WK47437.htm

BSR/ASTM WK47448-201x, New Specification for HEPA System Filtration Performance of Residential & Commercial Vacuum Cleaners (new standard)
Stakeholders: HEPA Definition industry.
Project Need: This specification defines industry-acceptable test methods and approaches for evaluating residential and commercial vacuum cleaner systems to HEPA filtration performance levels.
http://www.astm.org/DATABASE.CART/WORKITEMS/WK47448.htm

ATCC (American Type Culture Collection)
Office: 10801 University Boulevard
Manassas, VA 20110
Contact: Christine Alston-Roberts
Fax: (703) 334-2944
E-mail: calston-roberts@atcc.org

H BSR/ATCC ASN-0001.1-201x, Standardization of in Vitro Assays to Determine Anthrax Toxin Activities (revision of ANSI/ATCC ASN-0001-2009)
Stakeholders: Researchers in the anthrax and biodefense fields.
Project Need: Periodic maintenance of American National Standards within the 5-year period. Standardization of the various preparations of anthrax toxin components will enable investigators to better compare research data and decide which preparation is most appropriate for the studies being conducted.
This practice standard provides a reference method for performing in vitro assays to determine anthrax toxin activities. The anthrax toxins to be assayed are lethal toxin [LT: protective antigen (PA) + lethal factor (LF)] and edema toxin [ET: PA + edema factor (EF)]. The assay for LT is based on cytotoxicity to cultured murine macrophages. The assay for ET is based on its adenylate cyclase activity and cyclic adenosine monophosphate (cAMP) production in host cells. These assays may be used to determine activities of various LT and ET preparations for experimental comparison between the same or different groups of investigators.

ATIS (Alliance for Telecommunications Industry Solutions)
Office: 1200 G Street, NW
Suite 500
Washington, DC 20005
Contact: Kerrianne Conn
Fax: (202) 347-7125
E-mail: kconn@atis.org

BSR/ATIS 0600015.04-201x, Energy Efficiency for Telecommunication Equipment: Methodology for Measurement and Reporting DC Power Plant - Rectifier Requirements (revision of ANSI/ATIS 0600015.04-2010)
Stakeholders: Communication industry.
Project Need: To define how to measure the Telecommunication Energy Efficiency Ratio (TEER) of DC Power Plant Rectifiers.
This document defines how to measure the Telecommunication Energy Efficiency Ratio (TEER) of DC Power Plant Rectifiers. The standard also provides requirements for how equipment vendors shall respond to a TEER request based on a specific application description by making use of relevant data from internal and independent test reports.
Standards Action - October 24, 2014 - Page 17 of 34 Pages

AWWA (American Water Works Association)
Office: 6666 W. Quincy Ave.

BSR/CEA C223a-201x, Fabricated Steel and Stainless-Steel Tapping Sleeves (supplement to ANSI/AWWA C223-2013)
Stakeholders: Drinking water treatment and supply industry, water utilities, consulting engineers, water treatment equipment manufacturers.
Project Need: The purpose of this addendum to C223-13 is to modify the materials of construction section for tapping flanges for stainless-steel tapping sleeves, add additional information on design of flange attachments, and add a figure for typical flange connections.
This addendum includes a revision to materials of construction for Section 4.2.3.2, Tapping flanges for stainless-steel tapping sleeves; a revision to design information in Section 4.3.2, Body thickness, flange gaskets, and flange class and drills; and the addition of Figure 2, Typical flange connection.

CEA (Consumer Electronics Association)
Office: 1919 South Eads Street
Arlington, VA 22202
Contact: Veronica Lancaster
Fax: (703) 907-4197
E-mail: viancaster@cea.org; dwilson@cea.org

Stakeholders: Consumers, manufacturers.
Project Need: Develop a standard to ensure interoperability between various control networking protocol implementations.
This specification contains all the information necessary to facilitate the exchange of data and control information in an interoperable fashion using ANSI/CEA-709.1 and its associated data-transport media specifications. This specification establishes a minimal set of rules for compliance. It allows for extended services to be provided, given that the rules are adhered to within the system. This standard permits extended services to coexist and defines the bounds in which those services function, including the format for internal device-documentation of those services. Services outside the scope of this specification, so long as they are adherent to the system, are permitted but will not necessarily be interoperable with any other devices and shall not be essential for the functioning of the device.

IEEE (Institute of Electrical and Electronics Engineers)
Office: 445 Hoes Lane

BSR/IEEE 11073-10404a-201X, Health Informatics - Personal Health Device Communication - Device Specialization - Pulse Oximeter Amendment (new standard)
Stakeholders: People who use personal health devices in home and mobile environments, personal health device vendors, personal health manager vendors, institutions that may ultimately receive data from these devices (e.g., hospitals, doctor’s offices, diet and fitness companies), payers (e.g., insurance companies), regulatory agencies (e.g., food and drug administration), telemedicine consultants and businesses.
Project Need: To clarify known issues in the IEEE 11073-10404:2008 standard and extend the original framework to support the Base-Offset-Time feature.
The amendment contains the correction to the original standard to make it easier to implement in an interoperable fashion. It is intended cover the Base-Offset-Time feature that is required to satisfy the new user. This feature has already been included in the published IEEE std 11073-20601a-2010. Implementing this feature will ensure the compatibility between this standard and IEEE std 11073-20601a-2010.

BSR/IEEE 11073-10407a-201X, Health Informatics - Personal Health Device Communication - Device Specialization - Blood Pressure Monitor Amendment (new standard)
Stakeholders: People who use personal health devices in home and mobile environments, personal health device vendors, personal health manager vendors, institutions that may ultimately receive data from these devices (e.g., hospitals, doctor’s offices, diet and fitness companies), payers (e.g., insurance companies), regulatory agencies (e.g., food and drug administration), telemedicine consultants and businesses.
Project Need: To clarify known issues in the IEEE 11073-10407:2008 standard and extend the original framework to support the Base-Offset-Time feature.
The amendment contains the correction to the original standard to make it easier to implement in an interoperable fashion. It is intended cover the Base-Offset-Time feature that is required to satisfy the new user. This feature has already been included in the published IEEE std 11073-20601a-2010. Implementing this feature will ensure the compatibility between this standard and IEEE std 11073-20601a-2010.

BSR/IEEE 11073-10408a-201X, Health informatics - Personal health device communication - Part 10408: Device specialization - Thermometer Amendment (new standard)
Stakeholders: People who use personal health devices in home and mobile environments, personal health device vendors, personal health manager vendors, institutions that may ultimately receive data from these devices (e.g., hospitals, doctor’s offices, diet and fitness companies), payers (e.g., insurance companies), regulatory agencies (e.g., food and drug administration), telemedicine consultants and businesses.
Project Need: To clarify known issues in the IEEE 11073-10408:2008 standard and extend the original framework to support the Base-Offset-Time feature.
The amendment contains the correction to the original standard to make it easier to implement in an interoperable fashion. It is intended cover the Base-Offset-Time feature that is required to satisfy the new user. This feature has already been included in the published IEEE std 11073-20601a-2010. Implementing this feature will ensure the compatibility between this standard and IEEE std 11073-20601a-2010.
BSR/TAPPI T 213 om-201x, Dirt in pulp - Chart method (revision of ANSI/TAPPI T 213 om-2010)

Stakeholders: Manufacturers of pulp, paper, packaging, or related products, consumers or converters of such products, and suppliers of equipment, supplies, or raw materials for the manufacture of such products.

Project Need: To conduct required five-year review of an existing TAPPI/ANSI standard in order to determine if a revision is needed to address new technology or correct errors.

This method is adapted to the numerical estimation of dirt in pulp and recycled pulp in terms of equivalent black area.

BSR/TIA 455-78-B-201x, Optical Fibres - Part 1-40: Measurement Methods and Test Procedures - Attenuation (identical national adoption of IEC 60793-1-40)

Stakeholders: Telecom, optical fiber manufacturers, developers, and users.

Project Need: Adopt identical ISO or IEC standard.

Establishes requirements for measuring the attenuation of optical fiber, thereby assisting in the inspection of fibers and cables for commercial purposes.

BSR/UL 62093-201x, Standard for Balance-of-System Components for Photovoltaic Systems - Design Qualification Natural Environments (national adoption with modifications of IEC 62093)

Stakeholders: UL, manufacturers, and installers of components used in terrestrial photovoltaic (PV) systems.

Project Need: ANSI approval of a new UL IEC-based standard.

This standard includes requirements for the design qualification of balance-of-system (BOS) components used in terrestrial photovoltaic (PV) systems. It is suitable for operation in indoor, conditioned or unconditioned; or outdoor in general open-air climates as defined in IEC 60721-2-1, protected or unprotected. It is written for dedicated solar components such as batteries, inverters, charge controllers, system diode packages, heat sinks, surge protectors, system junction boxes, maximum-power point tracking devices and switchgear, but may be applicable to other BOS system components. This standard does not apply to photovoltaic modules.

BSR/UL 62446-201x, Standard for Grid Connected Photovoltaic Systems - Minimum Requirements for System Documentation, Commissioning Tests and Inspection (national adoption with modifications of IEC 62446)

Stakeholders: System designers and Installers of grid-connected solar PV systems.

Project Need: ANSI approval of a new UL IEC-based standard.

This standard defines the minimal information and documentation required to be handed over to a customer following the installation of a grid connected PV system. It describes the minimum commissioning tests, inspection criteria, and documentation expected to verify the safe installation and correct operation of the system. It does not cover AC module systems or systems that utilize energy storage (e.g., batteries) or hybrid systems.
American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provides two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMI (Association for the Advancement of Medical Instrumentation)
- AAMVA (American Association of Motor Vehicle Administrators)
- AGA (American Gas Association)
- AGSC (Auto Glass Safety Council)
- ASC X9 (Accredited Standards Committee X9, Incorporated)
- ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)
- ASME (American Society of Mechanical Engineers)
- ASTM (ASTM International)
- GBI (The Green Building Initiative)
- GEIA (Greenguard Environmental Institute)
- HL7 (Health Level Seven)
- IESNA (The Illuminating Engineering Society of North America)
- MHI (ASC MH10) (Material Handling Industry)
- NAHBRC (NAHB Research Center, Inc.)
- NBBPVI (National Board of Boiler and Pressure Vessel Inspectors)
- NCPDP (National Council for Prescription Drug Programs)
- NISO (National Information Standards Organization)
- NSF (NSF International)
- PRCA (Professional Ropes Course Association)
- RESNET (Residential Energy Services Network)
- TIA (Telecommunications Industry Association)
- UL (Underwriters Laboratories, Inc.)

To obtain additional information with regard to these standards, including contact information at the ANSI Accredited Standards Developer, please visit ANSI Online at www.ansi.org/asd; select “Standards Activities,” click on “Public Review and Comment” and “American National Standards Maintained Under Continuous Maintenance.” This information is also available directly at www.ansi.org/publicreview.

Alternatively, you may contact the Procedures & Standards Administration department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
ANSI-Accredited Standards Developers Contact Information

The addresses listed in this section are to be used in conjunction with standards listed in PINS, Call for Comment and Final Actions. This section is a list of developers who have submitted standards for this issue of Standards Action – it is not intended to be a list of all ANSI-Accredited Standards Developers. Please send all address corrections to Standards Action Editor at standact@ansi.org.

This section lists proposed standards that the International Organization for Standardization (ISO) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

### Ordering Instructions
ISO Drafts can be made available by contacting ANSI's Customer Service department. Please e-mail your request for an ISO Draft to Customer Service at sales@ansi.org. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

#### Comments
Comments regarding ISO documents should be sent to ANSI’s ISO Team (isot@ansi.org). The final date for offering comments is listed after each draft.

### ISO Draft International Standards

<table>

</tbody>
</table>
SURFACE CHEMICAL ANALYSIS (TC 201)
ISO/DIS 18554, Surface chemical analysis - X-ray Photoelectron Spectroscopy - Procedures for identifying, estimating and correcting for unintended degradation by X-rays in a material undergoing analysis - 11/21/2014, $71.00

TOBACCO AND TOBACCO PRODUCTS (TC 126)
ISO/DIS 6565, Tobacco and tobacco products - Draw resistance of cigarettes and pressure drop of filter rods - Standard conditions and measurement - 11/23/2014, $82.00

TRACTORS AND MACHINERY FOR AGRICULTURE AND FORESTRY (TC 23)
ISO/DIS 4254-7, Agricultural machinery - Safety - Part 7: Combine harvesters, forage harvesters, cotton harvesters and sugar cane harvesters - 1/22/2015, $119.00

WATER QUALITY (TC 147)
ISO/DIS 17294-2, Water quality - Application of inductively coupled plasma mass spectrometry (ICP-MS) - Part 2: Determination of selected elements including uranium isotopes - 1/22/2015, $98.00

ISO/IEC JTC 1, Information Technology
Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization – and IEC – the International Electrotechnical Commission. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Standards resellers (http://webstore.ansi.org/faq.aspx#resellers).

ISO Standards

ANAESTHETIC AND RESPIRATORY EQUIPMENT (TC 121)
ISO 5367:2014, Anaesthetic and respiratory equipment - Breathing sets and connectors, $173.00
ISO 8836:2014, Suction catheters for use in the respiratory tract, $156.00

CORK (TC 87)
ISO 7322:2014, Composition cork - Test methods, $66.00

DENTISTRY (TC 106)
ISO 9680:2014, Dentistry - Operating lights, $123.00

IMPLANTS FOR SURGERY (TC 150)
ISO 14242-1:2014, Implants for surgery - Wear of total hip-joint prostheses - Part 1: Loading and displacement parameters for wear-testing machines and corresponding environmental conditions for test, $88.00

INFORMATION AND DOCUMENTATION (TC 46)
ISO 21127:2014, Information and documentation - A reference ontology for the interchange of cultural heritage information, $275.00

OPTICS AND OPTICAL INSTRUMENTS (TC 172)
ISO 14490-6:2014, Optics and photonics - Test methods for telescopic systems - Part 6: Test methods for veiling glare index, $77.00

PAINTS AND VARNISHES (TC 35)
ISO 4618:2014, Paints and varnishes - Terms and definitions, $295.00

PERSONAL SAFETY - PROTECTIVE CLOTHING AND EQUIPMENT (TC 94)

PLASTICS (TC 61)
ISO 17855-1:2014, Plastics - Polyethylene (PE) moulding and extrusion materials - Part 1: Designation system and basis for specifications, $88.00

PROJECT COMMITTEE: ENERGY MANAGEMENT (TC 242)
ISO 50003:2014, Energy management systems - Requirements for bodies providing audit and certification of energy management systems, $123.00

RUBBER AND RUBBER PRODUCTS (TC 45)
ISO 1656:2014, Rubber, raw natural, and rubber latex, natural - Determination of nitrogen content, $132.00

IEC Standards

CAPACITORS AND RESISTORS FOR ELECTRONIC EQUIPMENT (TC 40)
IEC 60115-8-1 Ed. 2.0 b:2014, Fixed resistors for use in electronic equipment - Part 8-1: Blank detail specification: Fixed surface mount (SMD) low power film resistors for general electronic equipment, classification level G, $278.00

DOCUMENTATION AND GRAPHICAL SYMBOLS (TC 3)
IEC 82045-2 Ed. 1.0 b cor 1:2014, Corrigendum 1 - Document management - Part 2: Metadata elements and information reference model, $0.00
FLAT PANEL DISPLAY DEVICES (TC 110)
IEC 61747-4-1 Ed. 2.0 en:2014, Liquid crystal display devices - Part 4 -1: Matrix colour LCD modules - Essential ratings and characteristics, $43.00

INDUSTRIAL-PROCESS MEASUREMENT AND CONTROL (TC 65)
IEC 62682 Ed. 1.0 b:2014, Management of alarm systems for the process industries, $351.00

INSULATING MATERIALS (TC 15)

PERFORMANCE OF HOUSEHOLD ELECTRICAL APPLIANCES (TC 59)
IEC 60704-2-5 Amd.1 Ed. 2.0 b:2014, Amendment 1 - Household and similar electrical appliances - Test code for the determination of airborne acoustical noise - Part 2-5: Particular requirements for electric thermal storage room heaters, $14.00
IEC 60704-2-5 Ed. 2.1 b:2014, Household and similar electrical appliances - Test code for the determination of airborne acoustical noise - Part 2-5: Particular requirements for electric thermal storage room heaters, $91.00

IEC Technical Reports

AUDIO, VIDEO AND MULTIMEDIA SYSTEMS AND EQUIPMENT (TC 100)
IEC/TR 62907 Ed. 1.0 en:2014, Use cases related to ambient assisted living (AAL) in the field of audio, video and multimedia systems and equipment, $303.00

ELECTROMAGNETIC COMPATIBILITY (TC 77)
IEC/TR 61000-1-6 Ed. 1.0 en cor.1:2014, Corrigendum 1 - Electromagnetic compatibility (EMC) - Part 1-6: General - Guide to the assessment of measurement uncertainty, $0.00

SURFACE MOUNTING TECHNOLOGY (TC 91)
IEC/TR 60068-3-12 Ed. 2.0 b:2014, Environmental testing - Part 3-12: Supporting documentation and guidance - Method to evaluate a possible lead-free solder reflow temperature profile, $97.00
Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on “Subscribe”.

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.
American National Standards

INCITS Executive Board

ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology

The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum of choice for information technology developers, producers and users for the creation and maintenance of formal de jure IT standards. INCITS’ mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with its oversight of programs of its 40+ Technical Committees. Additionally, the INCITS Executive Board exercises international leadership in its role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

The INCITS Executive Board has eleven membership categories that can be viewed at http://www.incits.org/participation/membership-info. Membership in all categories is always welcome. INCITS also seeks to broaden its membership base and looks to recruit new participants in the following under-represented membership categories:

- **Producer – Hardware**
  This category primarily produces hardware products for the ITC marketplace.

- **Producer – Software**
  This category primarily produces software products for the ITC marketplace.

- **Distributor**
  This category is for distributors, resellers or retailers of conformant products in the ITC industry.

- **User**
  This category includes entities that primarily reply on standards in the use of a product/service, as opposed to producing or distributing conformant products/services.

- **Consultants**
  This category is for organizations whose principal activity is in providing consulting services to other organizations.

- **Standards Development Organizations and Consortia**
  o “Minor” an SDO or Consortium that (a) holds no TAG assignments; or (b) holds no SC TAG assignments, but does hold one or more Work Group (WG) or other subsidiary TAG assignments.

- **Academic Institution**
  This category is for organizations that include educational institutions, higher education schools or research programs.

- **Other**
  This category includes all organizations who do not meet the criteria defined in one of the other interest categories.

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, please contact Jennifer Garner at 202-626-5737 or jgarner@itic.org. Visit www.INCITS.org for more information regarding INCITS activities.

**Calls for Members**

**Society of Cable Telecommunications**

SCTE, an ANSI-accredited SDO, is the primary organization for the creation and maintenance of standards for the cable telecommunications industry. SCTE’s standards mission is to develop standards that meet the needs of cable system operators, content providers, network and customer premises equipment manufacturers, and all others who have an interest in the industry through a fair, balanced and transparent process.

SCTE is currently seeking to broaden the membership base of its ANSI consensus bodies and is interested in new members in all membership categories to participate in new work in fiber-optic networks, advanced advertising, 3D television, and other important topics. Of particular interest is membership from the content (program and advertising) provider and user communities.

Membership in the SCTE Standards Program is open to all directly and materially affected parties as defined in SCTE’s membership rules and operating procedures. More information is available at www.scte.org or by e-mail from standards@scte.org.

**ANSI Accredited Standards Developers**

**Approvals of Reaccreditations**

**American Chemistry Council (ACC)**

At the direction of ANSI’s Executive Standards Council (ExSC), the reaccreditation of the American Chemistry Council (ACC), an ANSI organizational member, has been approved under its recently revised operating procedures for documenting consensus on ACC-sponsored American National Standards, effective October 16, 2014. For additional information, please contact: Ms. Susan Blanco, Executive Assistant, Regulatory & Technical Affairs, American Chemistry Council, 700 2nd Street NE, Washington, DC 20002; phone: 202.249.6402; e-mail: Susan_Blanco@americanchemistry.com.

**American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE)**

ANSI’s Executive Standards Council has approved the reaccreditation of the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE), an ANSI Organizational Member, under its recently revised Procedures for ASHRAE Standards Actions for documenting consensus on ASHRAE-sponsored American National Standards, effective October 22, 2014. For additional information, please contact: Ms. Tanisha Meyers-Lisle, Procedures Administrator, ASHRAE, 1791 Tullie Circle, Atlanta, GA 30329; phone: 678.539.1111; e-mail: TMeyers-Lisle@ashrae.org.
IPC – Association Connecting Electronics Industries

ANSI’s Executive Standards Council has approved the reaccreditation of IPC – Association Connecting Electronics Industries, an ANSI Organizational Member, under its recently revised operating procedures for documenting consensus on IPC-sponsored American National Standards, effective October 22, 2014. For additional information, please contact: Ms. Jeanne Cooney, Manager, ANSI Programs, IPC – Association Connecting Electronics Industries, 301 Apache Drive, Suite 309S, Bannockburn, IL 60015; phone: 847.597.2842; e-mail: JeanneCooney@ipc.org.

Reaccreditations

3-A Sanitary Standards, Inc.

Comment Deadline: November 24, 2014

3-A Sanitary Standards Inc., an ANSI Organizational Member, has submitted revisions to its currently accredited operating procedures for documenting consensus on 3-A SSI-sponsored American National Standards, last reaccredited in 2013. As the revisions appear to be substantive in nature, the reaccreditation process is initiated. To obtain copies of 3-A SSI’s revised procedures or to offer comments, please contact: Mr. Eric Schweitzer, Director, Standards & Certification, 3-A Sanitary Standards, Inc., 6888 Elm Street, Suite 2D, McLean, VA 22101-3829; phone: 703.790.0295; e-mail: erics@3-a.org. You may view/download a copy of the revisions during the public review period at the following URL: www.ansi.org/accredPR. Please submit any public comments on the revised procedures by November 24, 2014, with a copy to the ExSC Recording Secretary in ANSI’s New York Office (e-mail: Jthompso@ANSI.org).

ASC INCITS – InterNational Committee for Information Technology Standards

Comment Deadline: November 24, 2014

ASC INCITS, InterNational Committee for Information Technology Standards has submitted to ANSI revisions to its accredited procedures for documenting consensus on ASC INCITS-sponsored American National Standards, under which it was last reaccredited in 2013. The current revision is a complete rewrite of the INCITS procedures combining two reference documents, the INCITS/RD-1, Policies and Guidelines, and INCITS/RD-2, Organization and Procedures, into one new document. As the development of these revisions occurred over a number of meetings in stages, five different redline versions of the document have been provided for review. As the revisions appear to be substantive in nature, the reaccreditation process is initiated.

To obtain a copy of the revised procedures or to offer comments, please contact the Secretariat of ASC INCITS: Ms. Lynn Barra, Director, Standards Operations, ASC INCITS/Information Technology Industry Council, 1101 K Street NW, Suite 610, Washington, DC 20005; phone: 202.626.5739; e-mail: lbarra@itic.org. You may view/download a copy of the revisions during the public review period at the following URL: www.ansi.org/accredPR. Please submit any public comments on the revised procedures to ASC INCITS by November 24, 2014, with a copy to the ExSC Recording Secretary in ANSI’s New York Office (e-mail: Jthompso@ANSI.org).

International Organization for Standardization (ISO)

Call for comments

ISO/TMB – Standards under Systematic Review

Every International Standard published by ISO shall be subject to systematic review in order to determine whether it should be confirmed, revised/amended, converted to another form of deliverable, or withdrawn at least once every five years.

ISO has launched Systematic Review ballots on the following standards that are the responsibility of the ISO/TMB:

As there is no accredited U.S. TAG to provide the U.S. consensus positions on this document, we are seeking comments from any directly and materially affected parties.

Organizations or individuals interested in submitting comments or in requesting additional information should contact ISOT@ansi.org.

ISO/IEC Guides

Comment Deadline: January 30, 2015

Every International Standard published by ISO shall be subject to systematic review in order to determine whether it should be confirmed, revised/amended, converted to another form of deliverable, or withdrawn at least once every five years.

ISO has launched Systematic Review ballots on the following standards that are the responsibility of the ISO/TMB:

As there is no accredited U.S. TAG to provide the U.S. consensus positions on these documents, we are seeking comments from any directly and materially affected parties.

Organizations or individuals requesting additional information should contact ANSI’s ISO Team (isot@ansi.org) with submission of comments to Steve Cornish (scornish@ansi.org) by close of business on Friday, January 30, 2015.
Call for US/TAG Administrator

ISO/TC 131/SC 2 – Pumps, motors and integral transmissions

ANSI has been informed that, National Fluid Power Association (NPFA), the ANSI accredited US/TAG administrator for ISO/TC 131/SC 2, wishes to relinquish the role as US/TAG administrator. ANSI has changed its membership status to Non-Member.

ISO/TC 131/SC 2 operates under the following scope:

Standardization in the field of fluid power systems and components, comprising terminology, construction, principal dimensions, safety requirements and testing and inspection methods.

To include such components as: accumulators, compressed air dryers, conductors (rigid and flexible), cylinders, electro-hydraulic and electro-pneumatic components and systems, fittings, fluidic devices, hose fittings and assemblies, filters and separators, fluids, hydraulic pumps, motors, moving-part fluid-controls, pneumatic lubricators, regulators, quick-action couplings, reservoirs, sealing devices, valves.

Organizations interested in serving as the US/TAG administrator should contact ISOT@ansi.org.

Establishment of New ISO Subcommittees

ISO/TC 22 – Road Vehicles

Eleven new subcommittees

TC 22, Road vehicles, has reorganized its committee structure and has created the following new ISO Subcommittees:

- TC 22/SC 31 – Data communication. The secretariat has been assigned to Germany (DIN).
- TC 22/SC 32 – Electrical and electronic components and general system aspects. The secretariat has been assigned to Japan (JISC).
- TC 22/SC 33 – Vehicle dynamics and chassis components. The secretariat has been assigned to Germany (DIN).
- TC 22/SC 34 – Propulsion, powertrain and powertrain fluids. The secretariat has been assigned to the United States (ANSI).
- TC 22/SC 35 – Lighting and visibility. The secretariat has been assigned to Italy (UNI).
- TC 22/SC 36 – Safety aspects and impact testing. The secretariat has been assigned to France (AFNOR).
- TC 22/SC 37 – Electrically propelled vehicles. The secretariat has been assigned to Germany (DIN).
- TC 22/SC 38 – Motorcycles and mopeds. The secretariat has been assigned to Italy (UNI).
- TC 22/SC 39 – Ergonomics. The secretariat has been assigned to the United States (ANSI).
- TC 22/SC 40 – Specific aspects for commercial vehicles, busses and trailers. The secretariat has been assigned to Italy (UNI).
- TC 22/SC 41 – Specific aspects for gaseous fuels. The secretariat has been assigned to Italy (UNI).

The previous Subcommittees under TC 22 will be disbanded.

SAE International has committed to administer the US/TAGs. Organizations interested in participating on the US/TAGs should contact ANSI’s ISO Team at isot@ansi.org.

ISO/TC 188/SC 2 – Engines and Propulsion Systems

TC 188, Small craft, has created a new ISO Subcommittee on Engines and propulsion systems (TC 188/SC 2). The secretariat has been assigned to Sweden (SIS).

The American Boat and Yacht Council (ABYC) has committed to administer the US/TAG. Organizations interested in participating on the US/TAG should contact ANSI’s ISO Team at isot@ansi.org.

Meeting Notices

AHRI Meeting

Revision of AHRI Standard 540, Performance Rating of Positive Displacement Refrigerant Compressors and Compressor Units

The Air-Conditioning, Heating, and Refrigeration Institute (AHRI) will be holding an online meeting on October 28 from 1 p.m. to 2 p.m. If you are interested in participating in the meeting or providing comments on the standard, please contact AHRI staff member Justin Prosser at jprosser@ahrinet.org.

ASC O1

The Accredited Standards Committee O1 will be hosting a virtual meeting on Monday, December 15th at 10am ET to work on standard development. Individuals interested in participating should contact WMMA Associate Director Jennifer Miller at jennifer@wmma.org.
Information Concerning

International Organization for Standardization (ISO)

ISO/TMB member survey on Guides 21-1 and 21-2

Comment Deadline: November 7, 2014

The ISO Technical Management Board (ISO/TMB) has noted that the following ISO/IEC Guides were last addressed and published in 2005:

*ISO/IEC Guide 21-1 (Regional or national adoption of International Standards and other International Deliverables – Part 1: Adoption of International Standards)*

*ISO/IEC Guide 21-2 (Regional or national adoption of International Standards and other International Deliverables – Part 2: Adoption of International Deliverables other than International Standards)*

At its September meeting, the ISO/TMB agreed to conduct a survey of the 14 national standards bodies represented on the ISO/TMB to determine if there is agreement on the need for revision of these Guides. This survey has now been launched with a deadline date of December 31, 2014 for responses.

ANSI is soliciting input from those who may have interest in or may be affected by these Guides. If you wish to review ISO/IEC Guide 21-1 or 21-2 or the related survey, please contact the ANSI ISO Team (isot@ansi.org) for copies. If you wish to comment, please send your input on this survey to the ANSI TMB Representative, Steven Cornish (scornish@ansi.org), by close of business on Friday, November 7, 2014.

After November 7, ANSI staff will craft that input into a proposed ANSI response that will be presented for AIC approval before the December 31 deadline.

Please note that if the consensus among the 14 national standards bodies on the ISO/TMB is to proceed with a revision effort, it is assumed that ISO will ask IEC to concur with proceeding with the revision, as these documents are joint ISO/IEC Guides.
7 Elective performance claims – test methods

7.2.3 Turbidity reduction (organic and inorganic solids) claims

7.2.3.4 Influent challenge

The fine test dust specified in 7.2.2.4 shall be added to the general test water specified in 7.2.3.3 to achieve a turbidity level of 11 ± 1 NTU.

The influent turbidity level shall be allowed to exceed 12 NTU if the manufacturer requests the turbidity reduction test is to be run concurrently with the cyst reduction test using fine test dust.

8 Instructions and information

8.3 Performance data sheet

8.3.2 Where applicable and appropriate, the following information shall be included:
### Table 10 – Performance data sheet requirements

</tr>
</tbody>
</table>

\(^a\) The methods of preparation of samples, of selection and conditioning of specimens and of making the measurements and calculations for ultimate elongation and tensile strength are indicated in 17.2.1.1 - 17.4.4.3.

\(^b\) ASTM oil No. 2 IRM 902 oil is medium swelling and of a petroleum base. Measured at 210.0°F (98.9°C), its Saybolt Universal viscosity is 100 ±5 seconds (443 - 490 m² seconds at 310 K). Its aniline point is 93.0 ±3.0°C (199.4 ±5.4°F). Its open-cup flash point is 475.0 ±10.0°F (246.1 ±5.6°C).

23.3 Three of the specimens of complete conduit are to be aged for 168 hours in a full-draft circulating-air oven operating at a temperature of 70.0 ±1.0°C (158.0 ±1.8°F) and are then to be removed from the oven and cooled in still air to room temperature for approximately 1 hour before being tested. Three other specimens are to be immersed for 24 hours in water kept at a temperature of 60.0 ±1.0°C (140.0 ±1.8°F) and are then to be removed from the water, shaken to remove most of the water, and then given time to
dry and cool to room temperature for approximately 1 hour before being tested. Three different specimens are to be immersed for 24 hours in ASTM oil No. 2 IRM 902 oil (see Note b to Table 17.1) kept at a temperature of 60.0 ±1.0°C (140.0 ±1.8°F) and are then to be removed from the oil, wiped with a soft absorbent cloth that is clean, and then given time to cool to room temperature for approximately 1 hour before being tested. The three remaining specimens are to be tested without any conditioning.

2. Correction to typo in Xenon-arc conditioning clause 21.3.3

21.3.3 All points of each specimen are to be subjected to a fine spray of water once during the 18-minute portion of a 2-hour programmed cycle of 102 minutes of light followed by 18 minutes of light and water spray each time that the cycle is repeated as noted in 1200.6. The water used in the spray is to be clean (it is not to leave any deposit on the specimens and is not to stain the specimens), its pH is to be 6.0 - 8.0, and its temperature is to be 16.0 ±5.0°C (60.0 ±9.0°F). The water used in the spray is not to be recirculated unless these conditions are maintained. While the xenon arc is in operation and the spray is off, the equilibrium black-panel temperature at the specimens is to be 63.0 ±3.0°C (145.0 ±5.4°F).
