American National Standards

Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically, in accordance with the developer’s procedures.

Ordering Instructions for "Call-for-Comment" Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

* Standard for consumer products
Comment Deadline: December 28, 2015

NSF (NSF International)

Revision

BSR/NSF 173-201x (i57r1), Dietary Supplements (revision of ANSI/NSF 173-2012)

This Standard contains requirements for dietary supplements that contain one or more of the following dietary ingredients: a vitamin; a mineral; an herb or other botanical; an amino acid; a dietary substance for use by humans to supplement the diet by increasing the total dietary intake; or a concentrate, metabolite, constituent, extract, or combinations of these ingredients.

ABMA (ASC B3) (American Bearing Manufacturers Association)

Revision

BSR/ABMA/ISO 104-201x, Rolling bearings - Thrust bearings - Boundary dimensions, general plan (revision of ANSI/ABMA/ISO 104-1994 (S2010))

ISO 104:2015 specifies preferred boundary dimensions for single-direction and double-direction thrust bearings with flat back faces. In addition, it gives the minimum bore diameters of housing washers and maximum outside diameters of shaft washers of bearings in dimension series 11, 12, 13, 14, 22, 23, and 24. Guidelines for the extension of this International Standard for single-direction thrust bearings are given in Annex A. NOTE: Boundary dimensions for aligning thrust bearings (none flat back faces) and aligning seat washers are given in ISO 20516.

API (American Petroleum Institute)

New Standard
BSR/API MPMS Chapter 9.4, 1st edition-201x, Continuous Density Measurement Under Dynamic (Flowing) Conditions (new standard)
This standard covers the continuous/on-line determination and application of flowing liquid densities for custody transfer. This standard covers liquid and dense phase fluids including: natural gas liquids, refined products, chemicals, crude oil, and other liquid products commonly encountered in the petroleum industry. This document does not apply to the density measurement of natural gas; LNG; multiphase mixtures; semi-solid liquids, such as asphalt; and solids such as coke and slurries. This standard also provides criteria and procedures for designing, installing, operating, and proving continuous/on-line density measurement systems for custody transfer.

API (American Petroleum Institute)

New Standard
BSR/API Standard 537-201x, Flare Details for Petroleum, Petrochemical and Natural Gas Industries (new standard)
Specifies requirements and gives guidance for the selection, design, specification, operation, and maintenance of flares and related combustion and mechanical components used in pressure-relieving and vapor-depressurizing systems for petroleum, petrochemical, and natural gas industries. This standard is primarily for onshore facilities, but guidance for offshore applications is included. Annexes A, B, C, and D provide further guidance for the selection, specification and mechanical details for flares and on the design, operation and maintenance of flare combustion and related equipment. Annex E explains how to use the data sheets provided in Annex F.

ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)

**Revision**

BSR/ASHRAE B30.3-20xx, Tower Cranes (revision of ANSI/ASME B30.3-2012)

B30.3 Volume applies to “construction tower cranes” and “permanently mounted tower cranes” that are powered by electric motors or internal combustion engines and that adjust their operating radius by means of a luffing boom mechanism, a trolley traversing a horizontal jib, or a combination of the two. The cranes may be mounted on “fixed bases” or “traveling bases” and may have tower and supporting structure arrangements that permit the crane to climb in a structure being built or that permits increasing the crane’s tower height as the structure rises. Variations of the above physical characteristics that provide the same fundamental operating characteristics are included in the scope of this Volume; however, the requirements of this Volume are only applicable to the cranes within this scope when they are used in lifting operations.

PLASA (PLASA North America)

Reaffirmation
BSR E1.3-2001 (R201x), Entertainment Technology - Lighting Control Systems - 0 to 10V Analog Control Specification (reaffirmation of ANSI E1.3 -2001 (R2010))
The standard describes a method of controlling current-sink devices and equipment by means of an analog control voltage in the nominal range from zero to 10 volts positive. It is primarily intended for theatrical lighting controllers and controlled devices (e.g., dimmers), but any device could use this control method. E1.3 controllers are current-source devices. The working group proposes to reaffirm the existing standard, which was previously reaffirmed in 2011.

UAMA (ASC B74) (Unified Abrasives Manufacturers’ Association)

**Revision**

BSR/B74.13-201x, Markings for Identifying Grinding Wheels and Other Bonded Abrasives (revision of ANSI B74.13-1990 (R2007))

This standard applies to grinding wheels and other bonded abrasives: segments, bricks, sticks, hones, rubs, and other shapes, which are tools used to remove material, alter shape or size, produce a desired surface or accuracy of dimension, or a combination of these objectives. The standard does not apply to specialties such as sharpening stones, or to grinding wheels normally distributed in resale and certain specialized industrial markets, where radically different symbols are commonly used.

ANS (American Nuclear Society)

Revision

BSR/ANS 2.23-201x, Nuclear Plant Response to an Earthquake (revision of ANSI/ANSI 2.23-2002 (R2009))

This standard is a major update of ANSI Standard 2.23-2002. It provides criteria that the owner of a nuclear power plant can adopt to prepare for, and respond to, a felt earthquake at his plant(s), including the need for plant shutdown, assessment of damage, and actions to determine the readiness of the plant to resume operation and to verify the long-term integrity of the plant. The criteria will be expanded to consider the severity of a felt and recorded earthquake as well as the level of any observed damage in defining a graded approach to determine the damage potential of an earthquake and the actions needed to demonstrate readiness of a plant to restart.

ASME (American Society of Mechanical Engineers)

Revision

BSR/ASME HST-4-20xx, Performance Standard for Overhead Electric Wire Rope Hoists (revision of ANSI/ASME HST-4-1999 (R2010))

(a) This Standard establishes performance requirements for electric wire rope hoists for vertical lifting service involving material handling of freely suspended (unguided) loads using wire rope with one of the following types of suspension: (1) lug; (2) hook; (3) trolley; (4) base or deck mounted (does not include base mounted winches of the type covered by ASME B30.7); and (5) wall or ceiling mounted (does not include base-mounted winches of the type covered by ASME B30.7).

(b) This Standard is applicable to hoists manufactured after the date on which this Standard is issued. This Standard is not applicable to: (1) damaged or malfunctioning hoists; (2) hoists that have been misused or abused; (3) hoists that have been altered without authorization of the manufacturer or a qualified person; (4) hoists used for the purpose of lifting or lowering people; and (5) hoists used for the purpose of drawing both the load and the hoist up or down the hoist’s own wire rope;

(c) Hoists used for marine and other applications required by the Department of Defense (DOD) shall meet requirements specified in non-mandatory Appendix A.

The requirements of this Standard shall be applied together with the requirements of ASME B30.16. Please also refer to ASME B30.16 for requirements pertaining to marking, construction, and installation; inspection, testing, and maintenance; and operations.

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANSI and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANSIs that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANSIs, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

AWS (American Welding Society)

Office: 8669 NW 36th Street
         Suite #130
         Miami, FL 33166-6672

Contact: Jennifer Rosario
Fax: (305) 443-5951
E-mail: jrosario@aws.org

BSR/AWS-NAVSEA B2.1-1-301-201x, Standard Welding Procedure Specification for Naval Applications (SWPS-N) for Gas Tungsten Arc Welding of Carbon Steel (S-1), 1/8 inch [3 mm] through 1-1/2 inch [38 mm] Thick, MIL-70S-2, in the As-Welded or PWHT Condition, Primarily Plate and Structural Naval Applications (new standard)

Stakeholders: Navy, manufacturers, welders, engineers, and CWIs.

Project Need: Need for pretested welding procedures that satisfy the technical requirements for the commonly used construction codes and specifications.

This standard contains the essential welding variables for carbon steel in the thickness range of 1/8 inch [3 mm] through 1-1/2 inch [38 mm], using manual gas tungsten arc welding. It cites the base metals and operating conditions necessary to make the weldment, the filler metal specifications, and joint designs for fillet welds, part-penetration groove welds, and joints welded from both sides. This SWPS-N was developed primarily for naval applications that require performance to NAVSEA Technical Publication S9074-AQ-GIB-010/248, Requirements for Welding and Brazing Procedure and Performance Qualification.

BSR/AWS-NAVSEA B2.1-1-311-201x, Standard Welding Procedure Specification for Naval Applications (SWPS-N) for Gas Tungsten Arc Welding of Carbon Steel (S-1), 1/8 inch [3 mm] through 1-1/2 inch [38 mm] Thick, MIL-70S-2, in the As-Welded or PWHT Condition, Primarily Pipe for Naval Applications (new standard)

Stakeholders: Navy, manufacturers, welders, engineers, and CWIs.

Project Need: Need for pretested welding procedures that satisfy the technical requirements for the commonly used construction codes and specifications.

This standard contains the essential welding variables for carbon steel in the thickness range of 1/8 inch [3 mm] through 1-1/2 inch [38 mm], using manual gas tungsten arc welding. It cites the base metals and operating conditions necessary to make the weldment, the filler metal specifications, and joint designs for fillet welds, full-penetration groove welds, and joints welded from both sides. This SWPS-N was developed primarily for naval applications that require performance to NAVSEA Technical Publication S9074-AQ-GIB-010/248, Requirements for Welding and Brazing Procedure and Performance Qualification.

BSR/AWS-NAVSEA B2.1-8-309-201x, Standard Welding Procedure Specification for Naval Applications (SWPS-N) for Shielded Metal Arc Welding of Austenitic Stainless Steel (S-8), 1/8 inch [3 mm] through 1-1/2 inch [38 mm] Thick, MIL-3XX-XX, in the As-Welded Condition, Primarily Plate and Structural Naval Applications (new standard)

Stakeholders: Navy, manufacturers, welders, engineers, and CWIs.

Project Need: Need for pretested welding procedures that satisfy the technical requirements for the commonly used construction codes and specifications.

This standard contains the essential welding variables for austenitic stainless steel in the thickness range of 1/8 inch [3 mm] through 1-1/2 inch [38 mm], using manual shielded metal arc welding. It cites the base metals and operating conditions necessary to make the weldment; the filler metal specifications; and joint designs for fillet welds, part-penetration groove welds, full-penetration groove welds, and joints welded from both sides. This SWPS-N was developed primarily for naval applications that require performance to NAVSEA Technical Publication S9074-AQ-GIB-010/248, Requirements for Welding and Brazing Procedure and Performance Qualification.

BSR/AWS-NAVSEA B2.1-8-319-201x, Standard Welding Procedure Specification for Naval Applications (SWPS-N) for Shielded Metal Arc Welding of Austenitic Stainless Steel (S-8), 1/8 inch [3 mm] through 1-1/2 inch [38 mm] Thick, MIL-3XX-XX, in the As-Welded Condition, Primarily Pipe for Naval Applications (new standard)

Stakeholders: Navy, manufacturers, welders, engineers, and CWIs.

Project Need: Need for pretested welding procedures that satisfy the technical requirements for the commonly used construction codes and specifications.

This standard contains the essential welding variables for austenitic stainless steel in the thickness range of 1/8 inch [3 mm] through 1-1/2 inch [38 mm], using manual shielded metal arc welding. It cites the base metals and operating conditions necessary to make the weldment; the filler metal specifications; and joint designs for fillet welds, full-penetration groove welds, and joints welded from both sides. This SWPS-N was developed primarily for naval applications that require performance to NAVSEA Technical Publication S9074-AQ-GIB-010/248, Requirements for Welding and Brazing Procedure and Performance Qualification.
BSR/NACE SP0502-20XX, Pipeline External Corrosion Direct Assessment (revision of ANSI/NACE SP0502-2010)
Stakeholders: Pipeline operators and others who must manage pipeline integrity.
Project Need: Standard is being updated to reflect new technologies.
This standard covers the NACE external corrosion direct assessment (ECDA) process for buried onshore ferrous pipeline systems. This standard is intended to serve as a guide for applying the NACE ECDA process on typical pipeline systems.

NASBLA (National Association of State Boating Law Administrators)
Office: 1648 McGrathiana Parkway
           Suite 360
           Lexington, KY 40511
Contact: Pamela Dillon
E-mail: pam@nasbla.org
BSR/NASBLA 103.1-201X, Supplement - Basic Boating Knowledge - Water Jet Propelled (new standard)
Stakeholders: Course providers; Federal/ State/ Local governments; NGOs; boating public.
Project Need: This document provides supplementary content for BSR/NASBLA 103-201X, Basic Boating Knowledge – Power, to address basic recreational water-jet propelled knowledge with a primary focus on safety and mitigation of risks associated with recreational boating. Developed for optional use with BSR/NASBLA 103-201X, Basic Boating Knowledge – Power, this supplement contains the basic knowledge elements that a beginner (entry-level) operator should have in order to safely operate a water-jet propelled watercraft.
This supplement applies to basic boating knowledge education and proficiency assessment in the United States, U.S. Territories, and the District of Columbia.

NEMA (ASC C119) (National Electrical Manufacturers Association)
Office: 1300 North 17th Street
           Suite 900
           Rosslyn, VA 22209
Contact: Paul Orr
Fax: (703) 841-3327
E-mail: Pau_orr@nema.org
BSR C119.1-201x, Electric Connectors - Sealed Insulated Underground Connector Systems Rated 600 Volts (revision of ANSI C119.1-2011)
Stakeholders: Connector manufacturers, utilities.
Project Need: Update existing standard to remove common tests as they are now in ANSI C119.0-2015.
This standard covers sealed, insulated underground connector systems rated at six hundred (600) volts for utility applications and establishes electrical, mechanical, and sealing requirements for sealed insulated underground connector systems.

BSR C119.5-201x, Electric Connectors - Insulation Piercing Connector Systems, Rated 600 Volts or Less (Low-Voltage Aerial Bundled Cables and Insulated and Non-Insulated Line Wires) (revision of ANSI C119.5-2009)
Stakeholders: Utilities, connector manufacturers.
Project Need: Update existing standard with latest requirements.
This standard covers insulation-piercing connectors used for making electrical connections between insulated, insulated-to-bare, and bare-to-bare conductors rated 600 V or less and 90°C (low-voltage aerial bundled cables and bare and insulated line wires) on overhead distribution lines for electric utilities. Underground insulation-piercing connector systems rated at 600 V are covered by ANSI C119.1.

PLASA (PLASA North America)
Office: 630 Ninth Avenue
           Suite 609
           New York, NY 10036-3748
Contact: Karl Ruling
Fax: (212) 244-1502
E-mail: standards.na@plasa.org
BSR E1.20-201x, Entertainment Technology - Remote Device Management over USITT DMX512 (revision of ANSI E1.20-2010)
Stakeholders: Manufacturers, vendors, and users of stage-lighting control equipment.
Project Need: Revise current ANSI to clarify ambiguities, fix bugs, and address necessary changes.
ANSI E1.20-2010, Entertainment Technology - Remote Device Management over USITT DMX512, is being revised to clarify ambiguities, fix bugs, and incorporate necessary changes. ANSI E1.20 is an extension to USITT DMX512 and ANSI E1.11 that allows for bi-directional communication on the primary data link. This allows a controller to discover RDM-enabled devices on the link, to set starting addresses and other configuration settings, and to request status messages.
American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provides two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMI (Association for the Advancement of Medical Instrumentation)
- AAMVA (American Association of Motor Vehicle Administrators)
- AGA (American Gas Association)
- AGSC (Auto Glass Safety Council)
- ASC X9 (Accredited Standards Committee X9, Incorporated)
- ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)
- ASME (American Society of Mechanical Engineers)
- ASTM (ASTM International)
- GBI (The Green Building Initiative)
- GEIA (Greenguard Environmental Institute)
- HL7 (Health Level Seven)
- IESNA (The Illuminating Engineering Society of North America)
- MHI (ASC MH10) (Material Handling Industry)
- NAHBRC (NAHB Research Center, Inc.)
- NBBPVI (National Board of Boiler and Pressure Vessel Inspectors)
- NCPDP (National Council for Prescription Drug Programs)
- NISO (National Information Standards Organization)
- NSF (NSF International)
- PRCA (Professional Ropes Course Association)
- RESNET (Residential Energy Services Network)
- TIA (Telecommunications Industry Association)
- UL (Underwriters Laboratories, Inc.)

To obtain additional information with regard to these standards, including contact information at the ANSI Accredited Standards Developer, please visit ANSI Online at www.ansi.org/asd; select “Standards Activities,” click on “Public Review and Comment” and “American National Standards Maintained Under Continuous Maintenance.” This information is also available directly at www.ansi.org/publicreview.

Alternatively, you may contact the Procedures & Standards Administration department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
ANSI-Accredited Standards Developers Contact Information

The addresses listed in this section are to be used in conjunction with standards listed in PINS, Call for Comment and Final Actions. This section is a list of developers who have submitted standards for this issue of Standards Action – it is not intended to be a list of all ANSI-Accredited Standards Developers. Please send all address corrections to Standards Action Editor at standact@ansi.org.

ISO & IEC Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments

Comments regarding ISO documents should be sent to ANSI’s ISO Team (isot@ansi.org); those regarding IEC documents should be sent to Charles T. Zegers, General Secretary of the USNC (czegers@ansi.org). The final date for offering comments is listed after each draft.

Ordering Instructions

ISO and IEC Drafts can be made available by contacting ANSI’s Customer Service department. Please e-mail your request for an ISO or IEC Draft to Customer Service at sales@ansi.org. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

ISO Standards

ADDITIVE MANUFACTURING (TC 261)

ISO/ASTM DIS 52901, Additive manufacturing - General principles - Requirements for purchased AM parts - 12/7/2015, $67.00

AIRCRAFT AND SPACE VEHICLES (TC 20)

ISO/DIS 20683-1, Aircraft ground equipment - Design, test and maintenance for towbarless towing vehicles (TLTV) interfaced with nose-landing gear - Part 1: Main-line aircraft - 12/7/2015, $88.00
ISO/DIS 20683-2, Aircraft ground equipment - Design, test and maintenance for towbarless towing vehicles (TLTV) interfaced with nose-landing gear - Part 2: Regional aircraft - 12/7/2015, $71.00

APPLICATIONS OF STATISTICAL METHODS (TC 69)

ISO 11843-5/DAmd1, Capability of detection - Part 5: Methodology in the linear and non-linear calibration cases - Amendment 1 - 12/7/2015, $29.00

BIOLOGICAL EVALUATION OF MEDICAL AND DENTAL MATERIALS AND DEVICES (TC 194)

ISO/DIS 10993-11, Biological evaluation of medical devices - Part 11: Tests for systemic toxicity - 12/7/2015, $102.00

GAS CYLINDERS (TC 58)

ISO 12209/DAmd1, Gas cylinders - Outlet connections for gas cylinder valves for compressed breathable air - Amendment 1: Outlet connection up to a maximum cylinder working pressure of 500 bar - 12/7/2015, $53.00
ISO/DIS 19016, Gas cylinders - Cylinders and tubes of composite construction - Modal acoustic emission (MAE) testing for periodic inspection and testing - 12/6/2015, $82.00

GRAPHIC TECHNOLOGY (TC 130)

ISO/DIS 17972-3, Graphic technology - Colour data exchange format (CxF/X) - Part 3: Output target data (CxF/X-3) - 12/7/2015, $71.00

GRAPHICAL SYMBOLS (TC 145)

ISO 7010/DAmd182, Graphical symbols - Safety colours and safety signs - Registered safety signs - Amendment 182: Safety sign E025: Emergency hammer - 12/7/2015, $29.00
ISO 7010/DAmd183, Graphical symbols - Safety colours and safety signs - Registered safety signs - Amendment 183: Safety sign P040: Do not set off fireworks - 12/7/2015, $29.00
ISO 7010/DAmd184, Graphical symbols - Safety colours and safety signs - Registered safety signs - Amendment 184: Safety sign P041: No leaning against - 12/7/2015, $29.00
ISO 7010/DAmd185, Graphical symbols - Safety colours and safety signs - Registered safety signs - Amendment 185: Safety sign P042: No pregnant women allowed - 12/7/2015, $29.00
ISO/DIS 3864-2, Graphical symbols - Safety colours and safety signs - Part 2: Design principles for product safety labels - 12/7/2015, $77.00

INDUSTRIAL AUTOMATION SYSTEMS AND INTEGRATION (TC 184)

ISO/DIS 19649, Robots and robotic devices - Vocabulary for mobile robots - 2/6/2016, $46.00

MECHANICAL VIBRATION AND SHOCK (TC 108)

ISO 5344/DAmd1, Electrodynamic vibration generating systems - Performance characteristics - Amendment 1 - 12/7/2015, $29.00
ISO 8626/DAmd1, Servo-hydraulic test equipment for generating vibration - Method of describing characteristics - Amendment 1 - 12/7/2015, $29.00

NON-DESTRUCTIVE TESTING (TC 135)

ISO/DIS 18251-1, Non-destructive testing - Infrared thermography - System and equipment - Part 1: Description of characteristics - 12/7/2015, $58.00

PAINTS AND VARNISHES (TC 35)

ISO/DIS 12944-1, Paints and varnishes - Corrosion protection of steel structures by protective coating systems - Part 1: General introduction - 2/28/2016, $46.00
ISO/DIS 12944-2, Paints and varnishes - Corrosion protection of steel structures by protective coating systems - Part 2: Classification of environments - 2/28/2016, $58.00
ISO/DIS 12944-3, Paints and varnishes - Corrosion protection of steel structures by protective coating systems - Part 3: Design considerations - 2/28/2016, $62.00
ISO/DIS 12944-7, Paints and varnishes - Corrosion protection of steel structures by protective coating systems - Part 7: Execution and supervision of paint work - 2/28/2016, $53.00
PERSONAL SAFETY - PROTECTIVE CLOTHING AND EQUIPMENT (TC 94)
ISO/DIS 15025, Protective clothing - Protection against flame - Method of test for limited flame spread - 12/7/2015, $82.00

PETROLEUM PRODUCTS AND LUBRICANTS (TC 28)
ISO/DIS 19291, Testing of lubricants - Tribological test in the translatory oscillation apparatus - Determination of tribological quantities for oils and greases in the translatory oscillation apparatus - 12/7/2015, $67.00

PLASTICS (TC 61)
ISO/DIS 19209, Classification of thermoplastic wood adhesives for non-structural applications - 2/28/2016, $33.00
ISO/DIS 19210, Adhesives - Thermoplastic wood adhesives for non-structural applications - Determination of tensile shear strength of lap joints - 2/28/2016, $53.00

PLASTICS PIPES, FITTINGS AND VALVES FOR THE TRANSPORT OF FLUIDS (TC 138)
ISO/DIS 10639, Plastics piping systems for water supply with or without pressure - Glass-reinforced thermosetting plastics (GRP) based on unsaturated polyester (UP) resin - 12/10/2011, $134.00
ISO/DIS 10928, Plastics piping systems - Glass-reinforced thermosetting plastics (GRP) pipes and fittings - Methods for regression analysis and their use - 2/5/2016, $112.00
ISO/DIS 16611, Plastics piping systems for drainage and sewerage without pressure - Non-circular pipes and joints made of glass-reinforced thermosetting plastics (GRP) based on unsaturated polyester resins (UP) - Dimensions, requirements and tests - 2/5/2016, $88.00

POWDER METALLURGY (TC 119)
ISO/DIS 3928, Sintered metal materials, excluding hardmetals - Fatigue test pieces - 12/7/2015, $46.00

SIEVES, SIEVING AND OTHER SIZING METHODS (TC 24)
ISO/DIS 22412, Particle size analysis - Dynamic light scattering (DLS) - 12/7/2015, $107.00

(TC 278)
ISO/DIS 37001, Anti-bribery management systems - 2/5/2016, $112.00

(TC 286)
ISO/DIS 11000, Collaborative business relationship management - Framework - 2/6/2016, $112.00

TECHNICAL DRAWINGS, PRODUCT DEFINITION AND RELATED DOCUMENTATION (TC 10)
ISO/DIS 61346-12, Industrial systems, installations and equipment and industrial products - Structuring principles and reference designations - Part 12: Construction works and building services - 2/6/2016, $119.00

TIMBER STRUCTURES (TC 165)
ISO/DIS 19323, Timber structures - Joist hangers - Test methods - 2/6/2016, $62.00

TRANSPORT INFORMATION AND CONTROL SYSTEMS (TC 204)
ISO/DIS 14823, Intelligent transport systems - Graphic data dictionary - 12/7/2015, $155.00

WATER QUALITY (TC 147)

WELDING AND ALLIED PROCESSES (TC 44)
ISO/DIS 15296, Gas welding equipment - Vocabulary - Terms used for gas welding equipment - 2/28/2016, $67.00
ISO/DIS 5175-1, Gas welding equipment - Safety devices - Part 1: Incorporating a flame (flashback) arrester - 2/28/2016, $71.00
ISO/DIS 5175-2, Gas welding equipment - Safety devices - Part 2: Not incorporating a flame (flashback) arrester - 2/28/2016, $58.00

ISO/IEC JTC 1, Information Technology
ISO/IEC 23008-5/DAmc4, Information technology - High efficiency coding and media delivery in heterogeneous environments - Part 5: Reference software for high efficiency video coding - Amendment 4: Reference software for 3D Main profile - 12/7/2015, $29.00
ISO/IEC DIS 2382-37, Information technology - Vocabulary - Part 37: Biometrics - 12/7/2015, $98.00
ISO/IEC DIS 29155-4, Systems and software engineering - Information technology project performance benchmarking framework - Part 4: Guidance for data collection and maintenance - 12/7/2015, $102.00
ISO/IEC DIS 14496-15, Information technology - Coding of audio-visual objects - Part 15: Carriage of NAL unit structured video in the ISO Base Media File Format - 12/7/2015, $185.00

IEC Standards
9/2093/DTS, IEC 61375-2-4 TS Ed.1: Electronic railway equipment - Train Communication Network (TCN) - Part 2-4: TCN Application profile, 02/12/2016
11/238/CD, IEC 61854/Ed2: Overhead lines - Requirements and tests for spacers, 01/08/2016
21/874/FDIS, IEC 62877-1: Electrolyte and water for vented lead acid accumulators - Part 1: Requirements for electrolyte, 01/08/2016
21/875/FDIS, IEC 62788-2: Electrolyte and water for vented lead acid accumulators - Part 2: Requirements for water, 01/08/2016
23A/798/CD, IEC 62275 A1 Ed.2: Cable management systems - Cable ties for electrical installations, 03/11/2016
23E/919/FDIS, IEC 62752 Ed.1: In-cable Control and Protection Device for mode 2 charging of electric road vehicles (IC-CPDS), 01/08/2016
47A/978/FP, Future IEC 63011-1 Integrated circuits - Three dimensional integrated circuits - Part 1: General conditions and definitions, 02/12/2016
55/1554/CD, IEC 60317-0-7/Ed2: Specifications for particular types of winding wires - Part 0-7: General requirements - Fully insulated (FIW) zero-defect enamelled winding wires, 02/12/2016
55/1555/CD, IEC 60317-56/Ed2: Specifications for particular types of winding wires - Part 56: Solderable fully insulated (FIW) zero-defect polyurethane enamelled winding wire, class 180, 02/12/2016
65A/777/FDIS, IEC 61511-1 Ed. 2.0: Functional safety - Safety instrumented systems for the process industry sector - Part 1: Framework, definitions, system, hardware and application programming requirements, 01/08/2016
65C/834/FDIS, IEC 62439-x Ed 2.0: Industrial communication networks - High availability automation networks, 01/08/2016
Newly Published ISO & IEC Standards

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization – and IEC – the International Electrotechnical Commission. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Standards resellers (http://webstore.ansi.org/faq.aspx#resellers).

ISO Standards

ISO/IEC JTC 1 Technical Reports

ISO/IEC TR 30109:2015, Information technology - User interfaces - Worldwide availability of personalized computer environments, $88.00
ISO/IEC TR 30110:2015, Information technology - Cross jurisdictional and societal aspects of implementation of biometric technologies - Biometrics and children, $88.00

AGRICULTURAL FOOD PRODUCTS (TC 34)
ISO 22630:2015, Oilseed meals - Determination of oil content - Rapid extraction method, $88.00

AIRCRAFT AND SPACE VEHICLES (TC 20)
ISO 18238:2015, Space systems - Closed loop problem solving management, $123.00

BIOLOGICAL EVALUATION OF MEDICAL AND DENTAL MATERIALS AND DEVICES (TC 194)
ISO 22442-1:2015, Medical devices utilizing animal tissues and their derivatives - Part 1: Application of risk management, $173.00
ISO 22442-2:2015, Medical devices utilizing animal tissues and their derivatives - Part 2: Controls on sourcing, collection and handling, $123.00

BUILDING CONSTRUCTION (TC 59)
ISO 19861:2015, Buildings and civil engineering works - Sealants - Determination of curing behaviour, $51.00
ISO 19862:2015, Buildings and civil engineering works - Sealants - Durability to extension compression cycling under accelerated weathering, $88.00

CONTROL AND SAFETY DEVICES FOR NON INDUSTRIAL GAS-FIRED APPLIANCES AND SYSTEMS (TC 161)
ISO 23550/Amd1:2015, Safety and control devices for gas burners and gas-burning appliances - General requirements - Amendment 1, $22.00

CORROSION OF METALS AND ALLOYS (TC 156)
ISO 18070:2015, Corrosion of metals and alloys - Crevice corrosion formers with disc springs for flat specimens or tubes made from stainless steel, $88.00

ISO 18089:2015, Corrosion of metals and alloys - Determination of the critical crevice temperature (CCT) for stainless steels under potentiostatic control, $123.00

CRANES (TC 96)
ISO 15442/Amd1:2015, Cranes - Safety requirements for loader cranes - Amendment 1, $22.00

FURNITURE (TC 136)
ISO 9221-2:2015, Furniture - Childrens high chairs - Part 2: Test methods, $149.00

INDUSTRIAL TRUCKS (TC 110)
ISO 10896-4:2015, Rough-terrain trucks - Safety requirements and verification - Part 4: Additional requirements for variable-reach trucks handling freely suspended loads, $88.00

IRON ORES (TC 102)
ISO 2597-2:2015, Iron ores - Determination of total iron content - Part 2: Titrimetric methods after titanium(III) chloride reduction, $123.00

MECHANICAL TESTING OF METALS (TC 164)
ISO 11531:2015, Metallic materials - Sheet and strip - Earing test, $51.00

MECHANICAL VIBRATION AND SHOCK (TC 108)
ISO 8727/Amd1:2015, Mechanical vibration and shock - Human exposure - Biodynamic coordinate systems - Amendment 1, $22.00

PACKAGING (TC 122)
ISO 8317:2015, Child-resistant packaging - Requirements and testing procedures for reclosable packages, $123.00

PAPER, BOARD AND PULPS (TC 6)

PERSONAL SAFETY - PROTECTIVE CLOTHING AND EQUIPMENT (TC 94)
ISO 11999-5:2015, PPE for firefighters - Test methods and requirements for PPE used by firefighters who are at risk of exposure to high levels of heat and/or flame while fighting fires occurring in structures - Part 5: Helmets, $149.00
ISO 16900-14:2015, Respiratory protective devices - Methods of test and test equipment - Part 14: Measurement of sound level, $88.00

PIGMENTS, DYESTUFFS AND EXTENDERS (TC 256)
ISO 18451-1:2015, Pigments, dyestuffs and extenders - Terminology - Part 1: General terms, $149.00
ISO 18451-2:2015, Pigments, dyestuffs and extenders - Terminology - Part 2: Classification of colouring materials according to colouristic and chemical aspects, $123.00
PLASTICS (TC 61)
ISO 18263-2:2015, Plastics - Mixtures of polypropylene (PP) and polyethylene (PE) recyclate derived from PP and PE used for flexible and rigid consumer packaging - Part 2: Preparation of test specimens and determination of properties, $88.00
ISO 19062-1:2015, Plastics - Acrylonitrile-butadiene-styrene (ABS) moulding and extrusion materials - Part 1: Designation system and basis for specifications, $88.00
ISO 19063-1:2015, Plastics - Impact-resistant polystyrene (PS-I) moulding and extrusion materials - Part 1: Designation system and basis for specifications, $88.00
ISO 19064-1:2015, Plastics - Styrene/acylonitrile (SAN) moulding and extrusion materials - Part 1: Designation system and basis for specifications, $51.00

ROAD VEHICLES (TC 22)
ISO 28981/Amd1:2015, Motorcycles - Measurement method for the measurement of potential spray drift from horizontal boom sprayers by the use of a test bench, $88.00
ISO 6460-1/Amd1:2015, Motorcycles - Measurement method for gaseous exhaust emissions and fuel consumption - Part 1: General test requirements - Amendment 1, $22.00
ISO 6460-3/Amd1:2015, Motorcycles - Measurement method for gaseous exhaust emissions and fuel consumption - Part 3: Fuel consumption measurement at a constant speed - Amendment 1, $22.00

ROLLING BEARINGS (TC 4)
ISO 454:2015, Rolling bearings - Radial bearings with locating snap ring - Dimensions, geometrical product specifications (GPS) and tolerance values, $123.00

RUBBER AND RUBBER PRODUCTS (TC 45)
ISO 705:2015, Rubber latex - Determination of density between 5 degrees C and 40 degrees C, $51.00
ISO 4079:2015, Rubber hoses and hose assemblies - Textile-reinforced hydraulic types for oil-based or water-based fluids - Specification, $88.00

SAFETY OF MACHINERY (TC 199)
ISO 14120:2015, Safety of machinery - Guards - General requirements for the design and construction of fixed and movable guards, $173.00

SURFACE CHEMICAL ANALYSIS (TC 201)
ISO 19830:2015, Surface chemical analysis - Electron spectroscopies - Minimum reporting requirements for peak fitting in X-ray photoelectron spectroscopy, $149.00

TEXTILE MACHINERY AND ALLIED MACHINERY AND ACCESSORIES (TC 72)
ISO 18600:2015, Textile machinery and accessories - Web roller cards - Terms and definitions, $88.00

TRACTORS AND MACHINERY FOR AGRICULTURE AND FORESTRY (TC 23)
ISO 22401:2015, Equipment for crop protection - Method for measurement of potential spray drift from horizontal boom sprayers by the use of a test bench, $88.00

TRADITIONAL CHINESE MEDICINE (TC 249)
ISO 18665:2015, Traditional Chinese medicine - Herbal decoction apparatus, $88.00
ISO 18666:2015, Traditional Chinese medicine - General requirements of moxibustion devices, $88.00

TRANSPORT INFORMATION AND CONTROL SYSTEMS (TC 204)
ISO 15784-2:2015, Intelligent transport systems (ITS) - Data exchange involving roadside modules communication - Part 2: Centre to field device communications using SNMP, $200.00

VALVES (TC 153)
ISO 28921-2:2015, Industrial valves - Isolating valves for low-temperature applications - Part 2: Type testing, $123.00

ISO Guides
OTHER
ISO Guide 31:2015, Reference materials - Contents of certificates, labels and accompanying documentation, $88.00

ISO Technical Reports
AGRICULTURAL FOOD PRODUCTS (TC 34)
ISO/TR 17622:2015, Molecular biomarker analysis - SSR analysis of sunflower, $51.00

GAS CYLINDERS (TC 58)
ISO/TR 17329:2015, Gas cylinders - Identification of gas cylinder manufacturer marks and their assigned radio frequency identification (RFID) codes, $173.00

ISO Technical Specifications
APPLICATIONS OF STATISTICAL METHODS (TC 69)
ISO/TS 17503:2015, Statistical methods of uncertainty evaluation - Guidance on evaluation of uncertainty using two-factor crossed designs, $149.00

OPTICS AND OPTICAL INSTRUMENTS (TC 172)
ISO/TS 18339:2015, Endotherapy devices - Eyepiece cap and light guide connector, $51.00

ISO/IEC JTC 1, Information Technology
ISO/IEC 27002/Cor2:2015, Information technology - Security techniques - Code of practice for information security controls - Corrigendum, FREE
ISO/IEC 14496-3/Cor7:2015, Information technology - Coding of audio-visual objects - Part 8: Carriage of ISO/IEC 14496 contents over IP networks - Corrigendum, FREE
ISO/IEC 19794-5/Cor4:2015, Information technology - Biometric data interchange formats - Part 5: Face image data - Corrigendum, FREE
ISO/IEC 19794-27/Amd5:2015, Information technology - Coding of audio-visual objects - Part 27: 3D Graphics conformance - Amendment 5: Multi-resolution 3D mesh compression, $22.00
ISO/IEC 24711:2015, Method for the determination of ink cartridge yield for colour inkjet printers and multi-function devices that contain printer components, $173.00
ISO/IEC 30191:2015, Information technology - Digitally recorded media for information interchange and storage - 120 mm Triple Layer (100,0 Gbytes single sided disk and 200,0 Gbytes double sided disk) and Quadruple Layer (128,0 Gbytes single sided disk) BD Recordable disk, $265.00
IEC Standards

CABLES, WIRES, WAVEGUIDES, R.F. CONNECTORS, AND ACCESSORIES FOR COMMUNICATION AND SIGNALLING (TC 46)

IEC 62153-4-10 Ed. 2.0 en:2015, Metallic communication cable test methods - Part 4-10: Electromagnetic compatibility (EMC) - Transfer impedance and screening attenuation of feed-throughs and electromagnetic gaskets - Double coaxial test method, $206.00

ELECTROACOUSTICS (TC 29)

IEC 61669 Ed. 2.0 b:2015, Electroacoustics - Measurement of real-ear acoustical performance characteristics of hearing aids, $254.00

ELECTROMAGNETIC COMPATIBILITY (TC 77)

IEC 61000-4-24 Ed. 2.0 b:2015, Electromagnetic compatibility (EMC) - Part 4-24: Testing and measurement techniques - Test methods for protective devices for HEMP conducted disturbance, $278.00

FIBRE OPTICS (TC 86)

IEC 62077 Ed. 3.0 en:2015, Fibre optic interconnecting devices and passive components - Fibre optic circulators - Generic specification, $182.00

TERMINOLOGY (TC 1)

IEC 60050-815 Ed. 2.0 b:2015, International Electrotechnical Vocabulary - Part 815: Superconductivity, $363.00

WINDING WIRES (TC 55)

IEC 60317-59 Ed. 1.0 b:2015, Specifications for particular types of winding wires - Part 59: Polyamide-imide enamelled round copper wire, class 240, $48.00
Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on “Subscribe”.

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.
American National Standards

INCITS Executive Board
ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology

The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum of choice for information technology developers, producers and users for the creation and maintenance of formal de jure IT standards. INCITS' mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with its oversight of programs of its 40+ Technical Committees. Additionally, the INCITS Executive Board exercises international leadership in its role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

The INCITS Executive Board has eleven membership categories that can be viewed at http://www.incits.org/participation/membership-info. Membership in all categories is always welcome. INCITS also seeks to broaden its membership base and looks to recruit new participants in the following under-represented membership categories:

- **Producer – Hardware**
  This category primarily produces hardware products for the ITC marketplace.

- **Producer – Software**
  This category primarily produces software products for the ITC marketplace.

- **Distributor**
  This category is for distributors, resellers or retailers of conformant products in the ITC industry.

- **User**
  This category includes entities that primarily reply on standards in the use of a products/service, as opposed to producing or distributing conformant products/services.

- **Consultants**
  This category is for organizations whose principal activity is in providing consulting services to other organizations.

- **Standards Development Organizations and Consortia**
  - "Minor" an SDO or Consortia that (a) holds no TAG assignments; or (b) holds no SC TAG assignments, but does hold one or more Work Group (WG) or other subsidiary TAG assignments.

- **Academic Institution**
  This category is for organizations that include educational institutions, higher education schools or research programs.

- **Other**
  This category includes all organizations who do not meet the criteria defined in one of the other interest categories.

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, please contact Jennifer Garner at 202-626-5737 or jgarner@itic.org. Visit www.incits.org for more information regarding INCITS activities.

Calls for Members
Society of Cable Telecommunications

ANSI Accredited Standards Developer

SCTE, an ANSI-accredited SDO, is the primary organization for the creation and maintenance of standards for the cable telecommunications industry. SCTE's standards mission is to develop standards that meet the needs of cable system operators, content providers, network and customer premises equipment manufacturers, and all others who have an interest in the industry through a fair, balanced and transparent process.

SCTE is currently seeking to broaden the membership base of its ANSI consensus bodies and is interested in new members in all membership categories to participate in new work in fiber-optic networks, advanced advertising, 3D television, and other important topics. Of particular interest is membership from the content (program and advertising) provider and user communities.

Membership in the SCTE Standards Program is open to all directly and materially affected parties as defined in SCTE's membership rules and operating procedures. More information is available at www.scte.org or by e-mail from standards@scte.org.

PINS Withdrawals

AIIM: Withdrawal of PINS from the ANS Process

AIIM has withdrawn the following project from consideration within the American National Standards process: BSR/AIIM 24, Standard Recommended Practice – Strategy Markup Language – Part 3: Additional Elements. Questions may be directed to: Betsy Fanning, bfanning@aiim.org.

ANSI Accredited Standards Developers

Approval of Accreditation as an ANSI ASD

Commission on Accreditation of Ambulance Services (CAAS)

ANSI's Executive Standards Council has approved the Commission on Accreditation of Ambulance Services (CAAS), a new ANSI Organizational Member in 2015, as an ANSI Accredited Standards Developer (ASD) under its proposed operating procedures for documenting consensus on CAAS-sponsored American National Standards, effective November 6, 2015. For additional information, please contact: Ms. Marcie McGlynn, Director of Administration, Commission on Accreditation of Ambulance Services, 1926 Waukegan Road, Suite 300, Glenview, IL 60025; phone: 847.657.6828, ext. 3016; e-mail: marciem@tcag.com.
Approval of Reaccreditation

ASC Z80 – Ophthalmic Standards
At the direction of ANSI’s Executive Standards Council, the reaccreditation of the Accredited Standards Committee Z80, Ophthalmic Standards under its recently revised operating procedures for documenting consensus on ASC Z80-sponsored American National Standards, has been approved effective November 11, 2015. For additional information, please contact the Secretariat of ASC Z80: Ms. Amber Robinson, Senior Manager, Member & Technical Programs, Low Vision Division Liaison, The Vision Council, 225 Reinekers Lane, Suite 700, phone: 703.740.1094; e-mail: arobinson@thevisioncouncil.org.

American Dental Association (ADA)
At the direction of ANSI’s Executive Standards Council, the reaccreditation of the American Dental Association (ADA), an ANSI Member and Accredited Standards Developer, under its recently revised operating procedures for documenting consensus on ADA-sponsored American National Standards, has been approved effective November 10, 2015. For additional information, please contact: Mr. Paul Bralower, Manager, Standards, Center for Informatics and Standards, American Dental Association, 211 E. Chicago Avenue, Chicago, IL 60611; phone: 312.587.4129; e-mail: bralowerp@ada.org.

Consumer Electronics Association (CEA)
On behalf of ANSI’s Executive Standards Council, the reaccreditation of the Consumer Electronics Association (CEA), an ANSI Member and Accredited Standards Developer, under its recently revised operating procedures for documenting consensus on CEA-sponsored American National Standards has been approved effective November 6, 2015. For additional information, please contact: Ms. Veronica Lancaster, AStd, Director, Standards Programs, Consumer Electronics Association, 1919 S. Eads Street, Arlington, VA 22202; phone: 703.907.7697; e-mail: VLancaster@ce.org.

International Institute of Ammonia Refrigeration (IIAR)
ANSI’s Executive Standards Council has approved the reaccreditation of the International Institute of Ammonia Refrigeration (IIAR), an ANSI Member and Accredited Standards Developer, under its recently revised operating procedures for documenting consensus on IIAR-sponsored American National Standards, effective November 11, 2015. For additional information, please contact: Mr. Eric M. Smith, P.E., Vice-President & Technical Director, International Institute of Ammonia Refrigeration, 1001 N. Fairfax Street, Suite 503, Alexandria, VA 22314; phone: 703.312.4200; e-mail: eric.smith@iiar.org.

International Organization for Standardization (ISO)

New Work Item Proposal
Consumer warranties and guarantees
Comment Deadline: December 4, 2015
COPOLCO (ISO’s Policy Group on Consumer Issues) has submitted to ISO a proposal for a new ISO standard regarding Guidelines on consumer warranties and guarantees, with the following scope statement:

The standard is intended for use by producers or sellers of goods and services to offer best practices and requirements for effective warranties when these are provided with goods and services.

It should be noted that COPOLCO had previously submitted this proposal in 2012. While the proposal passed ISO membership voting, it has not been able to proceed due to lack of an ISO national standards body wishing to assume the committee secretariat. The ISO national standards body for Malaysia (DSM) has now indicated its interest in assuming this secretariat. However, as at least three years have now passed since this proposal was voted, ISO/CS has made the decision that the proposal should be subjected to ISO member voting again to confirm consensus support for it. For your reference, in 2012 the ANSI ISO Council (AIC) approved the ANSI position to oppose the proposal with a number of comments.

Anyone wishing to review the new work item proposal, or the comments submitted and approved in 2012, can request a copy of the proposal or comments by contacting ANSI’s ISO Team via e-mail: isot@ansi.org with submission of comments to Steve Cornish (scornish@ansi.org) by close of business on Friday, December 4, 2015.

U.S. Technical Advisory Groups

Approval of TAG Accreditation

U.S. TAG to ISO PC 286 – Collaborative Business Relationship Management – Framework
ANSI’s Executive Standards Council (ExSC) has formally approved the accreditation of the U.S. Technical Advisory Group to ISO PC 286, Collaborative business relationship management – Framework, under the Model Operating Procedures for U.S. Technical Advisory Groups to ANSI for ISO Activities (Annex A of the ANSI International Procedures) and with the Association of Strategic Alliance Professionals (ASAP) serving as TAG Administrator, effective November 10, 2015. For additional information, please contact: Ms. Norma Watenpaugh, Director, Association of Strategic Alliance Professionals, 2595 Roop Road, Gilroy, CA 95020; phone: 408.848.9514; e-mail: Normaw@phoenixcg.com.
ESMA, the ISO member body for the United Arab Emirates, has submitted to ISO a proposal for a new field of ISO technical activity on Halal, with the following scope statement:

The Halal Technical Committee will draft International Standards for Halal products and services, including requirements for personnel competency requirements, management system requirements for organizations. This shall define and include best practices, policies, processes and guidelines for developing Halal Standards or other Technical Specification/requirements, Sampling and Testing Methods, as well as sector application conformity assessment documents on Inspection, Certification, and Accreditation. Sector applications of Conformity Assessment standards shall be developed in a Joint Working Group (JWG) under the leadership of CASCO using the CASCO toolbox. In addition these standards will promote mutual recognition and acceptance of national and regional Conformity Assessment Systems and Marks/labeling standards.

This committee shall also include market monitoring procedures and applicable corrective actions in local and international settings, such as rapid exchange of information and alert systems, recalls and other mitigating measures.

Halal products and services include food (fresh, frozen, processed etc.), beverages, cosmetics and personal care, pharmaceuticals, apparel, logistics, finance, tourism and hospitality and more.
Excluded:

- Matters not falling under scope and not applicable to the Halal concept;
- Generic food standards falling under the scope of ISO/TC 34 Food products;
- Clothing and textile standards falling under the scope of ISO/TC 38 Textiles and ISO/TC 133 Clothing sizing systems - size designation, size measurement methods and digital fittings;
- Pharmaceutical standards falling under the scope of ISO/TC 76, Transfusion, infusion and injection equipment for medical and pharmaceutical use; ISO/TC 194 Biological and clinical evaluation of medical devices, and ISO/TC 212 Clinical laboratory testing and in vitro diagnostic test systems;
- Generic packaging standards falling under the scope of ISO/TC 122 Packaging;
- Generic cosmetics standards falling under the scope of ISO/TC 217 Cosmetics;
- Generic tourism and related services standards falling under the scope of ISO/TC 228 Tourism and related services; and
- Consumer Policy standards falling under the scope of COPOLCO.

Anyone wishing to review this new proposal can request a copy by contacting ANSI’s ISO Team via email: isot@ansi.org with submission of comments to Steve Cornish (scornish@ansi.org) by close of business on Friday, December 11, 2015.
NSF International Standard
for Food Equipment –

Food equipment

2 Normative references

The following documents contain provisions that, through reference, constitute provisions of this NSF/ANSI Standard. At the time this standard was balloted, the editions listed below were valid. All documents are subject to revision, and parties are encouraged to investigate the possibility of applying the most recent editions of the documents indicated below.

ANSI/UL 471 – 2006, Standard for Commercial Refrigerators and Freezers

ASHRAE Refrigeration Handbook

ASTM A653/A653M, Specification for Steel Sheet, Zinc-Coated (Galvanized) or Zinc-Iron Alloy-Coated (Galvannealed) by the Hot Dip Process, Vol. 01.06

ASTM A924/A924M, Specification for General Requirements Steel Sheet, Metallic-Coated by the Hot Dip Process, Vol. 01.06

NSF/ANSI 2. Food equipment

NSF/ANSI 51. Food equipment materials

NSF/ANSI 170. Glossary of food equipment terminology
NF/ANSI Standard for Drinking Water Treatment Chemicals – Health Effects

3 General requirements

3.2 Formulation submission and review

3.2.3 If the finished product contains water, the formulation information provided by the manufacturer shall be reviewed to determine if the water source used in the manufacturing of the finished product requires testing.

3.2.3.1 Water sources that require testing include, but are not limited to, the following: non-treated surface water; non-treated ground water; non-treated rain water; and water collected from other non-treated sources. Testing of water sources shall include the following analyses: metals, VOCs, base/neutral/acid scan, radionuclides, herbicides/pesticides, and dioxin/furan scan.

3.2.3.2 Water sources that do not require testing include the following: treated or non-treated water sources that comply with state or national drinking water standards, deionized water, distilled water, demineralized water, water treated on-site to drinking water quality with the exception of disinfection, drinking water treated with a reverse osmosis system, and ground water treated on-site to drinking water quality or a higher purity grade and recirculated water or condensate water originating from water sources that do not require testing.

NOTE 1 - Testing related to water sources may be performed on the finished product or on a separate water sample; however, any test conducted on the finished product itself, as part of such product’s certification testing battery, may be omitted from testing performed on a separate water sample.

NOTE 2 – Metals analysis shall include antimony, arsenic, barium, beryllium, cadmium, chromium, copper, lead, mercury, selenium, and thallium.

Reason: (1) Section IDs added to these two paragraphs to enable citation from another section of the standard. (2) “…recirculated water or condensate water originating from water sources that do not require testing” were removed from this section as they can have many different type of chemicals added to them (corrosion and scale control, biocides, etc.) and the appropriateness of any needs to be considered on a case-by-case basis.

...
3.6 Formulation control

The manufacturer shall have practices in place to ensure that the product is manufactured according to the approved formulation, and to ensure that no changes in manufacturing processes, product composition, or raw materials can occur without prior authorization by the certification body. The practices shall ensure that no contamination is introduced by product packaging, transfer and storage equipment, or dilution water. Containers shall either be dedicated to one category of chemical, or written records of cleaning (e.g. wash tickets) must be available for review. Documentation of these practices shall be available for review.

3.6.1 Hazard assessment procedures for process water

3.6.1.1 If the finished product contains water supplied by a public water system, the manufacturer shall have procedures in place that identify steps to be taken when utilities issue warnings such as a boil water alert, or do not drink, or do not use order.

3.6.1.2 If the finished product contains water sourced through other than a public water system, the manufacturer shall have procedures that periodically monitor the water for chemicals of concern. The procedure shall also specify treatment the source water, or preclude its use, when significant quality changes may introduce unacceptable levels of contaminants to the product.

NOTE – Significant water quality changes can occur seasonally, after heavy rains or droughts, or other events such as chemical spills. Manufacturers need processes in place that identify steps to be taken when utilities issue warnings such as a boil water alert, or do not drink, or do not use order. Similar hazards can occur with non-utility waters. Steps need to be taken to reduce the potential contamination of treatment chemicals during these periods of varying water quality.

Reason: See NOTE text above.

5 Chemicals for corrosion and scale control, softening, precipitation, sequestering, and pH adjustment

5.3 General requirements

General information and evaluation requirements for the products covered in this section are summarized in Table 5.1.

5.3.1 Minimizing risk for pathogen transmittal in chemicals

To minimize the risk for pathogen transmittal in chemicals evaluated under this section, those that contain water in the finished product shall only be produced using waters meeting the criteria of 3.2.3.2.

NOTE: The chemicals in section 5 may be added to drinking water post disinfection or in drinking water systems not adding disinfectant to the treated water. As such, this section is intended to minimize the potential for pathogen introduction from treatment chemicals where other measures are not in place to prevent it.

The following water treatment chemicals are exempted from this restriction.
7 Miscellaneous treatment applications

7.3 General requirements

7.3.4 Minimizing risk for pathogen transmittal in chemicals

To minimize the risk for pathogen transmittal in chemicals evaluated under this section, those that contain water in the finished product shall only be produced using waters meeting the criteria of 3.2.3.2.

NOTE: The chemicals in section 7 may be added to drinking water post disinfection or in drinking water systems not adding disinfectant to the treated water. As such, this section is intended to minimize the potential for pathogen introduction from treatment chemicals where other measures are not in place to prevent it.

The following water treatment chemicals are exempted from this restriction.

— Those with a pH less than or equal to 2 or greater than or equal to a pH of 11, or
— Those where the product literature limits the use of the treatment chemical to applications where the water is disinfected post addition of the chemical.

Reason: This language was added directly to Sections 5 and 7 because all of the chemicals noted with either a potential to be used post disinfection or used on a water system which doesn't add disinfectant fall under these sections only.
2 Definitions

2.x chain of custody: A record documenting the existence of positive control and security over an item with counter signatures or other acknowledgements (receiver/deliverer) at each stage of transition of control/security responsibility.

2.x bonded individual: A bond is a promise that a contractor, or driver, will fulfill his obligations. If a driver is bonded, a third-party company or his trucking company backs his performance and promises he will complete the task as agreed upon. Therefore, a bond provides assurance that the contracted work will be satisfactorily completed. If a loss occurs, however, a separate insurance policy may be required to cover the property, not the bond.

3 General requirements

3.9 Product security

Products to be sold for drinking water treatment applications shall be protected to maintain the quality required by this standard. Appropriate, effective measures shall be made to control access to products at all points of manufacturing, blending, diluting, packaging, repackaging, storage, shipping and handling and to provide the manufacturer and the purchasing user of product with the ability to detect tampering (see Annex F).

3.9.1 Definition of tamper-evident packaging

Packaging having one or more indicators or barriers to entry which, if breached or missing, can reasonably be expected to provide visible evidence that tampering has occurred.

3.9.2 Security requirements for packaged products

Packaged product shall be stored, shipped, and delivered in tamper-evident packaging as defined in Section 3.9.1. Properly constructed, labeled, and sealed multi-wall containers such as bags and fiber drums constitute two forms of acceptable tamper-evident packaging.

Refer to Annex F for a list of product categories that are exempt from product security requirements.
3.9.2.1 Bags and super sacks

Packages for product shipped without reusable openings shall be constructed and properly sealed to make opening or substitution obvious to the purchaser. The packages shall display the company’s name, and employ seals that are destroyed upon opening, or that make resealing unlikely (e.g. serialized tags), or other equivalent tamper-evident measures so that once opened, the tamper-evident feature of the seal on the packaging cannot be restored nor readily duplicated is unable to be restored or readily duplicated.

3.9.2.2 Drums and small containers

Drums and small containers used for product shall be constructed and properly sealed to make opening or substitution obvious to the purchaser. Openings in the containers shall be sealed with tamper-evident seals and the packages shall display the company’s name. Packages shall employ seals that are destroyed upon opening, or that make resealing unlikely (e.g. ultrasonic seals), or other equivalent tamper-evident measures so that once opened, the tamper-evident feature of the seal cannot is unable to be restored nor readily duplicated.

Reason: This text was revised as the guidelines for standards prohibit the use of the work “cannot”.

3.9.3 Security requirements for bulk shipments and large reusable containers (totes)

Bulk quantities of product Drinking water treatment chemicals shipped in bulk2 shall be secured during storage and distribution by employing one or more of the following security measures (see 3.9.3.1, 3.9.3.2 and 3.9.3.3). These requirements are applicable to a single load delivered to one or to multiple locations3. This requirement applies to all tank truck chemical deliveries, and to railcar chemical deliveries that are direct to drinking water utilities or to other end users involved in the addition of the delivered chemical to drinking water. and to truck deliveries whether to a single destination or by milk run deliveries.

3.9.3.1 Tamper-evident seals

Bulk shipping containers Containers used for bulk shipments shall have tamper protection provided at all openings capable of loading or unloading chemicals. Vents shall have tamper protection provided unless they are protected by construction that makes them incapable of receiving chemicals. Bulk shipping containers may be sealed with a uniquely numbered, non-reusable, tamper-evident seal on each opening in the shipping container. If tamper-evident seals are used, the seals shall remain in place until removed at the point of delivery. Seal numbers shall be recorded and disclosed on shipping documents provided to the purchaser at the time of delivery and kept available for review by the certification body. If tamper-evident seals are used in milk run deliveries, a new seal shall be applied after each partial off-loading and noted in the consignment records after each partial delivery.

---

2 The term “bulk” is used for shipments being transported in a container having a volume of more than 1,000 L and applies to containers holding solid, liquid and gaseous products. Such containers can be multi-modal containers, tank trucks or tank cars appropriate to the physical characteristics of the product being transported.

3 Multiple destination shipments are referred to as “milk run deliveries”.

---

Standards Action - November 13, 2015 - Page 33 of 39 Pages
3.9.3.2 Chain of custody

An auditable continuous chain of custody protocol may be used to document secure distribution of product. Maintaining a continuous chain of custody requires that the product is under the continuous control of bonded and designated responsible individuals, that direct access to the product is restricted to those individuals, and that the shipping container is sealed or locked or secured at all times during shipping transport from the place of shipment to the place of delivery. If chain of custody is used, a copy of a completed, signed chain of custody form record showing continuous and secure custody between the certification holder and to the purchaser shall be provided by the transporter to the certification holder and to the purchaser at the time of delivery. The completed chain of custody record returned to the certification holder shall be kept available for review by the certification body.

NOTE - For the custody procedure during transport by road of certain drinking water treatment chemicals, there may be a requirement for two persons to be assigned to the distribution activity, with the vehicle being under the direct supervision of at least one person at all times.

Where a paper-based chain of custody procedure is used for milk run deliveries, the documentation shall have sufficient copies that a copy of the documentation shall be signed and provided to each consignee noting the quantity delivered at that destination, and the balance remaining in the shipment. A copy of the complete series of deliveries shall be provided by the transporter to the certification holder.

Where an electronically-based chain of custody procedure is used for milk run deliveries, the record of the custody and deliveries shall be provided by the transporter to the certification holder.

NOTE - It is normal transport procedure for the transporter to retain duplicate records of all cargo acceptances and deliveries, including chain of custody documents or records. These may be accessed if necessary to verify chain of custody.

3.9.3.3 Alternative method

An alternative method or methods agreed upon by the certification holder and the purchaser may be used for bulk shipments if the alternative method provides protection against tampering that is equivalent to this Standard. If alternative methods are used, the agreement with the purchaser and description of the alternative methods shall be in written form and kept available for review by the certification body.

3.9.4 Tamper-evident integrity

The tamper-evident features employed on all final product packaging, seals, and bulk shipping containers used for bulk shipments shall be designed to remain intact when handled in a reasonable manner during manufacture, storage, shipment and delivery to the purchaser.

---

4 Alternative methods may include secured electronic tracking and communication methods.
5.6 Caffeine

Supplements containing caffeine shall have caffeine content tested and verified. The amount of caffeine consumed shall not exceed 200 mg/serving every 4 hours and 800 mg/day. The product use instructions shall indicate no more than 200 mg of caffeine is to be consumed every 4 hours. In addition, if the product contains caffeine in the amount of 100 mg/serving or greater the following warnings (or equivalent) must be present on the label:

- Do not use if sensitive to caffeine.
- Not recommended for use by children under 18 years of age.
- Not recommended for use by pregnant or nursing women.
Dietary supplements

5 Product requirements

5.5 Oils

Supplements containing oils, listed in the attached table, at greater than 2% by weight of the formulation shall demonstrate non-rancidity of the ingredients by having a peroxide value (PV) less than 10 milliequivalents/Kg oil, a p-anisidine value (p-AV) less than 20, and a total oxidation (Totox) number (p-AV + 2PV) less than 26.

7 Test methods used by testing laboratories for detection of contaminants – raw materials and finished products

7.4 Test methods for chemical contaminants

Unless a manufacturer has controls in place to assess the rancidity of oil ingredients, the following testing shall be performed. The Peroxide Value of the oil shall be tested according to AOAC Method 965.33 (which is equivalent to AOCS 8-53). The p-Anisidine Value of the oil shall be tested by AOCS Cd 18-90. The Totox Number shall be calculated as the sum of the p-Anisidine Value and two times the Peroxide Value.
8 Good Manufacturing Practices

8.5 Requirement for Oils

For products containing oils listed in Annex A, Table A2, manufacturers shall have controls in place to assess and prevent rancidity. Written procedures shall be established and followed.

*Acceptance criteria: Peroxide value (PV) less than 10 milliequivalents/Kg oil
p-anisidine value (p-AV) less than 20
Total oxidation (ToTox) number (p-AV + 2PV) less than 26.
Oils that are combinations of listed oils or derived from oils on this list are to be considered included under the rancidity control plan test requirement (examples, vegetable oil or diacylglycerol oil).
BSR/UL 705, Standard for Safety for Power Ventilators

1. Addition of a New Appendix to Provide Examples of Controls Intended to be Used as Operating or Protective Controls.

30A.3.1 The following test parameters shall be among the items considered when judging the acceptability of an operating control investigated using the Standard for Automatic Electrical Controls for Household and Similar Use; Part 1: General Requirements, UL 60730-1. Appendix A provides more examples of controls intended to be used as protective operating controls:

a) Control Types 1 or 2;

b) Unless otherwise specified in this standard, manual and automatic controls shall be tested for 6,000 cycles with under maximum normal load conditions, and 50 cycles under overload conditions;

c) Installation Class 2 in accordance with Electromagnetic Compatibility (EMC) - Part 4-5: Testing Measurement Techniques - Surge Immunity Test, IEC 61000-4-5;

d) For the applicable Overvoltage Category, see Table 30A.1;

e) For the applicable Material Group, see Table 30A.2; and

f) For the applicable Pollution Degree, see Table 30A.3.
