Projects Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. Use the following Public Document Library url to access PDF & EXCEL reports of approved & proposed ANS: List of Approved and Proposed ANS

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

*New Standard*
BSR/ADA Standard No. 1105-202x, Digital Periodontitis Risk Assessment Resources (new standard)
Stakeholders: Dental software and instrument providers, dental researchers, and dental benefit companies.
Project Need: There is considerable variation among both analog and digital periodontitis risk assessment tools currently in the use in the U.S. in terms of input data, scoring methodologies, and reporting formats. This limits the ability to compare population periodontitis risk data to validate the effectiveness of preventive recommendations and develop quality measures for periodontitis prevention. The solution is to develop standardized clinical input, scoring methodology, and reporting formats that will facilitate the interchange of data among stakeholders.
Scope: The standard will describe the functional characteristics and reporting formats for periodontitis risk assessment software applications.

**ADA (American Dental Association)**
211 East Chicago Avenue, Chicago, IL 60611-2678   www.ada.org
Contact: Paul Bralower; bralowerp@ada.org

*New National Adoption*
Stakeholders: Manufacturers, dentists.
Project Need: It is recommended that ANSI/ADA Standard No. 133 be revised by adoption of all parts of ISO 13397 standards for periodontal curettes and dental scalers, with the exception of Part 4 for Excavators. Requirements. A new ISO standard for excavators will be proposed for national adoption when published.
Scope: This standard specifies the general material, performance, and dimensional requirements for periodontal curettes and dental scalers.
ADA (American Dental Association)
211 East Chicago Avenue, Chicago, IL  60611-2678   www.ada.org
Contact: Paul Bralower; bralowerp@ada.org

New National Adoption
BSR/ADA Standard No. 195-202x, Dental Tweezers (identical national adoption of ISO 15098:2020)
Stakeholders: Manufacturers, dentists.
Project Need: An increasing number of new or updated global standards are being developed for dental instruments. To ensure that U.S. dental clinicians have access to standardized instruments, it is necessary to create national standards that are identical to their global equivalents.
Scope: This document specifies general requirements and test methods for metallic dental tweezers of the Meriam type and for College type.

ADA (American Dental Association)
211 East Chicago Avenue, Chicago, IL  60611-2678   www.ada.org
Contact: Paul Bralower; bralowerp@ada.org

New National Adoption
BSR/ADA Standard No. 196-202x, Materials for Dental Instruments - Stainless Steel (identical national adoption of ISO 21850-1:2020)
Stakeholders: Manufacturers, dentists.
Project Need: An increasing number of new or updated global standards are being developed for dental instruments. This document is needed to harmonize standards for the stainless steel materials used in dental instruments across many countries to ensure that U.S. dental practitioners have access to standardized instruments.
Scope: This document specifies stainless steel commonly used in manufacturing dental instruments. It is applicable to stainless steel materials used to manufacture either an entire instrument or a part of the instrument. It is applicable to single-use and reusable dental instruments, whether it is or it is not connected to a power-driven system.

New National Adoption
BSR/ADA Standard No. 197-202x, Spoons and Bone Curettes in Dentistry (identical national adoption of ISO 22570:2020)
Stakeholders: Manufacturers, dentists.
Project Need: An increasing number of new or updated global standards are being developed for dental instruments. To ensure that U.S. dental clinicians have access to standardized instruments, it is necessary to create national standards that are identical to their global equivalents.
Scope: This document specifies requirements and test methods for spoons and bone curettes used in dentistry for oral surgical procedures. It specifies shapes and dimensions as well as information for marking.
ADA (American Dental Association)
211 East Chicago Avenue, Chicago, IL 60611-2678 www.ada.org
Contact: Paul Bralower; bralowerp@ada.org

New National Adoption

Stakeholders: Manufacturers, dentists.

Project Need: ANSI/ADA Standard No. 34 is in need of revision and should be revised with an adoption of the most current version of ISO 9997 which the US TAG voted in favor of. The modification will be to add Unique Device Identification requirements.

Scope: This document specifies requirements and test methods for cartridge syringes used in dentistry. These syringes are of the non-aspirating, aspirating, and self-aspirating types using cartridges with dental local anaesthetics.

Revision
BSR/ASTM D7082-202x, Specification for Polyethylene Stay In Place Form System for End Walls for Drainage Pipe (revision of ANSI/ASTM D7082-2015)

Stakeholders: Plastic Building Products industries.

Project Need: This specification addresses the requirements for polyethylene stay in place forms for end walls or head walls for use with standard storm drainage systems.

Scope: This specification addresses the requirements for polyethylene stay-in-place forms for end walls or head walls for use with standard storm drainage systems.

NFPA (National Fire Protection Association)

Contact: Dawn Michele Bellis; dbellis@nfpa.org

Revision
BSR/NFPA 1-202x, Fire Code (revision of ANSI/NFPA 1-2021)

Stakeholders: Manufacturers, users, installers/maintainers, labor, enforcing authorities, insurance, consumers, special experts, and research and testing.

Project Need: Public interest and need.

Scope: The scope includes, but is not limited to, the following: (1) Inspection of permanent and temporary buildings, processes, equipment, systems, and other fire and related life safety situations; (2) Investigation of fires, explosions, hazardous materials incidents, and other related emergency incidents; (3) Review of construction plans, drawings, and specifications for life safety systems, fire protection systems, access, water supplies, processes, hazardous materials, and other fire and life safety issues; (4) Fire and life safety education of fire brigades, employees, responsible parties, and the general public; (5) Existing occupancies and conditions, the design and construction of new buildings, remodeling of existing buildings, and additions to existing buildings; (6) Design, installation, alteration, modification, construction, maintenance, repairs, servicing, and testing of fire protection systems and equipment; (7) Installation, use, storage, and handling of medical gas systems; (8) Access requirements for fire department operations; (9) Hazards from outside fires in vegetation, trash, building debris, and other materials; (10) Regulation and control of special events including, but not limited to, assemblage of people, exhibits, trade shows, amusement parks, haunted houses, outdoor events, and other similar special temporary and permanent occupancies; (11) Interior finish, decorations,..

Revision
BSR/NFPA 30-202x, Flammable and Combustible Liquids Code (revision of ANSI/NFPA 30-2021)
Stakeholders: Manufacturers, users, installers/maintainers, labor, enforcing authorities, insurance, consumers, special experts, and research and testing.
Project Need: Public interest and need.
Scope: This code shall apply to the storage, handling, and use of flammable and combustible liquids, including waste liquids, as defined and classified in this standard. This code is recommended for use as the basis for legal regulations. Its provisions are intended to reduce the hazard to a degree consistent with reasonable public safety, without undue interference with public convenience and necessity, of operations that require the use of flammable and combustible liquids. Compliance with this code does not eliminate all hazards in the use of flammable and combustible liquids.
(See the Flammable and Combustible Liquids Code Handbook for additional explanatory information.) This code shall not apply to the following: (1) Any liquid that has a melting point of 100°F (37.8°C) or greater. Liquids that are solid at 100°F (37.8°C) or above, but are handled, used, or stored at temperatures above their flash points, should be reviewed against pertinent sections of this code. (2) Any liquid that does not meet the criteria for fluidity given in the definition of liquid in Chapter 3 and in the provisions of Chapter 4. The information in (1) also applies here. (3) Any cryogenic fluid or liquefied gas, as defined in...

NFPA (National Fire Protection Association)

Contact: Dawn Michele Bellis; dbellis@nfpa.org

Revision
Stakeholders: Manufacturers, users, installers/maintainers, labor, enforcing authorities, insurance, consumers, special experts, and research and testing.
Project Need: Public interest and need.
Scope: This code is recommended for use as the basis for legal regulations. Its provisions are intended to reduce the hazards of motor fuels to a degree consistent with reasonable public safety, without undue interference with public convenience and necessity. Thus, compliance with this code does not eliminate all hazards in the use of these fuels. See the Flammable and Combustible Liquids Code Handbook for additional explanatory information. This code shall apply to motor-fuel dispensing facilities and motor-fuel dispensing at farms and isolated construction sites. This code shall apply to motor vehicle repair garages. This code shall not apply to those motor-fuel dispensing facilities where only liquefied petroleum gas (LP-Gas), liquefied natural gas (LNG), or compressed natural gas (CNG) is dispensed as motor fuel. See NFPA 52, Vehicular Gaseous Fuel Systems Code, and NFPA 58, Liquefied Petroleum Gas Code, for requirements for facilities where only these fuels are dispensed. This code shall not apply to aircraft fueling.
NFPA (National Fire Protection Association)

Contact: Dawn Michele Bellis; dbellis@nfpa.org

Revision
Stakeholders: Manufacturers, users, installers/maintainers, labor, enforcing authorities, insurance, consumers, special experts, and research and testing.
Project Need: Public interest and need.
Scope: The Code does not address features that solely affect economic loss to private property. General. The Code addresses those construction, protection, and occupancy features necessary to minimize danger to life and property.
Code Title. The provisions of this document shall constitute and be known as NFPA 5000, Building Construction and Safety Code, referred to in this standard as “this Code” or “the Code.”

SCTE (Society of Cable Telecommunications Engineers)
140 Philips Rd, Exton, PA 19341 www.scte.org
Contact: Kim Cooney; kcooney@scte.org

New Standard
BSR/SCTE IPS SP 919-202x, Broadband Radio Frequency Hardline Passives for Cable Systems (new standard)
Stakeholders: Cable Telecommunications industry.
Project Need: Create new standard.
Scope: The purpose of this document is to recommend mechanical, environmental, and electrical standards hardline passives. This specification addresses passives capable of at least 1794 MHz with a housing capable of 3000 MHz. Products covered by this specification include hardline splitters, directional couplers, equalizers, and power inserters. Hardline passives pass RF and AC to some or all of the ports. A hardline splitter divides an input RF signal to 2 or 3 outputs. A hardline directional coupler divides an input RF signal to two outputs with a fixed division ratio. A hardline equalizer provides RF tilt compensation for hardline cable loss. A hardline power inserter combines the AC output of a power supply to the RF network. The devices are intended for an outdoor-rated environment. The standard is not intended to apply to specialty devices, nor is it intended to limit or restrict any manufacturer’s innovation and improvement.
Call for Comment on Standards Proposals

American National Standards

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter’s position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically, in accordance with the developer’s procedures.

Ordering Instructions for "Call-for-Comment" Listings

1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. e-mail: psa@ansi.org

Revision
BSR/AWS D15.2/D15.2M-202x, Specification for Joining Railroad Rail and Related Rail Components (revision of ANSI/AWS D15.2/D15.2M-2012)
This document specifies the minimum standards for the welding of rails and related rail components. Repair procedures for rails and austenitic manganese steel components are covered. Arc welding, thermite welding, flash welding, and rail bonding variables are defined. Procedure qualification, welder performance qualification, and general welding safety procedures are addressed. Inspection methods and acceptance criteria are specified.

Call for Members (ANS Consensus Bodies)

Directly and materially affected parties who are interested in participating as a member of an ANS consensus body for the standards listed below are requested to contact the sponsoring standards developer directly and in a timely manner.

ANSI Accredited Standards Developer

AAMI (Association for the Advancement of Medical Instrumentation)

AAMI (www.aami.org) is actively seeking participation in the following standards development work and in the interest categories specified:

US adoption of AAMI/ISO 5840-1-202x, Cardiovascular implants - Cardiac valve prostheses - Part 1: General requirements. Applicable to heart valve substitutes intended for implantation and provides general requirements. Subsequent parts of the ISO 5840 series provide specific requirements. Applicable to newly developed and modified heart valve substitutes and to the accessory devices, packaging, and labelling required for their implantation and for determining the appropriate size of the heart valve substitute to be implanted. Seeking industry, user, regulator and general interest participation.

US adoption of AAMI/ISO 5840-2-202x, Cardiovascular implants - Cardiac valve prostheses - Part 2: Surgically implanted heart valve substitutes. Applicable to heart valve substitutes intended for implantation in human hearts, generally requiring cardiopulmonary bypass and generally with direct visualization. Applicable to both newly developed and modified surgical heart valve substitutes and to the accessory devices, packaging, and labelling required for their implantation and for determining the appropriate size of the surgical heart valve substitute to be implanted. Seeking industry, user, regulator and general interest participation.

US adoption of AAMI/ISO 5840-3-202x, Cardiovascular implants - Cardiac valve prostheses - Part 3: Heart valve substitutes implanted by transcatheter techniques. Applicable to all devices intended for implantation as a transcatheter heart valve substitute. Applicable to transcatheter heart valve substitutes and to the accessory devices, packaging and labelling required for their implantation and for determining the appropriate size of heart valve substitute to be implanted. Seeking industry, user, regulator and general interest participation.

US adoption of AAMI/ISO 25539-2-202x, Cardiovascular implants - Endovascular devices - Part 2: Vascular stents. Specifies requirements for the evaluation of stent systems (vascular stents and delivery systems) and requirements with respect to nomenclature, design attributes and information supplied by the manufacturer, based upon current medical knowledge. Guidance for the development of in vitro test methods is included. Seeking industry, user, regulator and general interest participation.
Call for Members (ANS Consensus Bodies)

ANSI Accredited Standards Developer

INCITS Executive Board – ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology

The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum of choice for information technology developers, producers and users for the creation and maintenance of formal de jure IT standards. INCITS' mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with oversight of its 40+ Technical Committees. Additionally, the INCITS Executive Board has the international leadership role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, contact Jennifer Garner at jgarner@itic.org or visit http://www.incits.org/participation/membership-info for more information.

Membership in all interest categories is always welcome; however, the INCITS Executive Board seeks to broaden its membership base in the following categories:

- Service Providers
- Users
- Standards Development Organizations and Consortia
- Academic Institutions

ANSI Accredited Standards Developer

LES (Licensing Executives Society (U.S. and Canada))

The LES (Licensing Executives Society (U.S. and Canada)) is soliciting volunteers for the Consensus Body Partnership (CSP) to vote on our first proposed Intellectual Property Standard, Intellectual Property in the Supply Chain. There will be additional Standards for the CSP to vote on in 2021. Any interested parties are invited to join the CSP by applying for a CSP membership: https://members.lesusacanada.org/page/lesstandards.

Please download the membership form: https://cdn.ymaws.com/members.lesusacanada.org/resource/resmgr/docs/standards/les_standards_membership_enr.pdf.

The annual cost for joining the CSP is $250. Voting will commence in January 2021. Be a part of creating a first proposed American National Standard on IP protection in the Supply Chain! If you have any questions, please contact Craig Moss at (203) 221-1843 or craig.moss@ethisphere.com, Nicole Galli at (215) -525-9583 or ndgalli@ndgallilaw.com or Susan Houchins at Licensing Executive Society (703)-234-4059 or shouchins@virtualinc.com. Join us today!

ANSI Accredited Standards Developer

SCTE (Society of Cable Telecommunications Engineers)

SCTE, an ANSI-accredited SDO, is the primary organization for the creation and maintenance of standards for the cable telecommunications industry. SCTE’s standards mission is to develop standards that meet the needs of cable system operators, content providers, network and customer premises equipment manufacturers, and all others who have an interest in the industry through a fair, balanced and transparent process.

SCTE is currently seeking to broaden the membership base of its ANS consensus bodies and is interested in new members in all membership categories to participate in new work in fiber-optic networks, advanced advertising, 3D television, and other important topics. Of particular interest is membership from the content (program and advertising) provider and user communities. Membership in the SCTE Standards Program is open to all directly and materially affected parties as defined in SCTE’s membership rules and operating procedures. More information is available at www.scte.org or by e-mail from standards@scte.org.

Membership in the SCTE Standards Program is open to all directly and materially affected parties as defined in SCTE’s membership rules and operating procedures. More information is available at www.scte.org or by e-mail from standards@scte.org.

Cancel Call for Comment of BSR Z21.21A-202x

CSA America Standards Inc. wishes to retract a recent Call for Comment notice published in the 11/20/2020 Standards Action for:

Additional revisions to this draft addenda will be submitted in the future.

Send inquiries to: David Zimmerman; ansi.contact@csagroup.org.
American National Standards (ANS) Process

Please visit ANSI’s website (www.ansi.org) for resources that will help you to understand, administer and participate in the American National Standards (ANS) process. Documents posted at these links are updated periodically as new documents and guidance are developed, whenever ANS-related procedures are revised, and routinely with respect to lists of proposed and approved ANS. The main ANS-related link is www.ansi.org/asd and here are some direct links as well as highlights of information that is available:

Where to find Procedures, Guidance, Interpretations and More...

Please visit ANSI’s website (www.ansi.org)

- ANSI Standards Action (weekly public review announcements of proposed ANS and standards developer accreditation applications, listing of recently approved ANS, and proposed revisions to ANS-related procedures): www.ansi.org/standardsaction
- ANS Procedures, ExSC Interpretations and Guidance (including a slide deck on how to participate in the ANS process and the BSR-9 form): www.ansi.org/asd
- Lists of ANSI-Accredited Standards Developers (ASDs), Proposed ANS and Approved ANS: www.ansi.org/asd
- American National Standards Key Steps: www.ansi.org/anskeysteps
- American National Standards Value: www.ansi.org/ansvalue
- Information about standards Incorporated by Reference (IBR): https://ibr.ansi.org/
- ANSI - Education and Training: www.standardslearn.org

If you have a question about the ANS process and cannot find the answer, please email us at: psa@ansi.org. Please also visit Standards Boost Business at www.standardsboostbusiness.org for resources about why standards matter, testimonials, case studies, FAQs and more.

If you are interested in purchasing an American National Standard, please visit https://webstore.ansi.org
American National Standards Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provides two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option.

- AAMI (Association for the Advancement of Medical Instrumentation)
- AARST (American Association of Radon Scientists and Technologists)
- AGA (American Gas Association)
- AGSC (Auto Glass Safety Council)
- ASC X9 (Accredited Standards Committee X9, Incorporated)
- ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)
- ASME (American Society of Mechanical Engineers)
- ASTM (ASTM International)
- GBI (Green Building Initiative)
- HL7 (Health Level Seven)
- IES (Illuminating Engineering Society)
- ITI (InterNational Committee for Information Technology Standards)
- MHI (Material Handling Industry)
- NAHBRC (NAHB Research Center, Inc.)
- NBBPVI (National Board of Boiler and Pressure Vessel Inspectors)
- NCPDP (National Council for Prescription Drug Programs)
- NEMA (National Electrical Manufacturers Association)
- NISO (National Information Standards Organization)
- NSF (NSF International)
- PRCA (Professional Ropes Course Association)
- RESNET (Residential Energy Services Network, Inc.)
- SAE (SAE International)
- TCNA (Tile Council of North America)
- TIA (Telecommunications Industry Association)
- UL (Underwriters Laboratories)

To obtain additional information with regard to these standards, including contact information at the ANSI Accredited Standards Developer, please visit ANSI Online at www.ansi.org/asd, select “American National Standards Maintained Under Continuous Maintenance.” Questions? psa@ansi.org.
# ANSI-Accredited Standards Developers Contacts

The addresses listed in this section are to be used in conjunction with standards listed in PINS, Call for Comment and Final Actions. This section is a list of developers who have submitted standards for this issue of Standards Action – it is not intended to be a list of all ANSI-Accredited Standards Developers. Please send all address corrections to Standards Action Editor at standact@ansi.org.

ISO & IEC Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

COMMENTS
Comments regarding ISO documents should be sent to ANSI’s ISO Team (isot@ansi.org); comments on ISO documents must be submitted electronically in the approved ISO template and as a Word document as other formats will not be accepted. Those regarding IEC documents should be sent to Tony Zertuche, General Secretary, USNC/IEC, at ANSI’s New York offices (tzertuche@ansi.org). The final date for offering comments is listed after each draft.

ORDERING INSTRUCTIONS
ISO and IEC Drafts can be made available by contacting ANSI’s Customer Service department. Please e-mail your request for an ISO or IEC Draft to Customer Service at sales@ansi.org. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

ISO/DIS 9680, Dentistry - Operating lights - 2/19/2021, $82.00

INDUSTRIAL AUTOMATION SYSTEMS AND INTEGRATION (TC 184)
ISO/DIS 8000-66, Data quality - Part 66: Data quality management: Assessment indicators for data processing in manufacturing operations - 2/25/2021, $88.00

PACKAGING (TC 122)
ISO/DIS 23416, General specifications and testing methods for temperature-sensitive pharmaceutical packages in good distribution practice principles - 2/25/2021, $67.00

PETROLEUM PRODUCTS AND LUBRICANTS (TC 28)
ISO 20884/DAmd1, Petroleum products - Determination of sulfur content of automotive fuels - Wavelength-dispersive X-ray fluorescence spectrometry - Amendment 1: Addition of the SSD detector to the Monochromatic Excitation part of Table 1 - 2/19/2021, $29.00

PIGMENTS, DYESTUFFS AND EXTENDERS (TC 256)
ISO/DIS 787-2, General methods of test for pigments and extenders - Part 2: Determination of matter volatile at 105 °C - 2/20/2021, $33.00

PLASTICS (TC 61)
ISO/DIS 14782, Plastics - Determination of haze for transparent materials - 2/25/2021, $40.00

ROAD VEHICLES (TC 22)
ISO/DIS 22900-2, Road vehicles - Modular vehicle communication interface (MVCI) - Part 2: Diagnostic protocol data unit (D-PDU API) - 2/21/2021, $258.00

SOLID MINERAL FUELS (TC 27)
ISO/DIS 567, Coke - Determination of bulk density in a small container - 2/20/2021, $40.00

ISO/IEC JTC 1, Information Technology

ISO/IEC 23000-22/DAm1, Information technology - Multimedia application format (MPEG-A) - Part 22: Multi-image application format (MIAF) - Amendment 2: HEVC Advanced HDR profile and other clarifications - 2/19/2021, $62.00

ISO/IEC DIS 27002, Information security, cybersecurity and privacy protection - Information security controls - 2/21/2021, $175.00

ISO/IEC DIS 30118-6, Information technology - Open Connectivity Foundation (OCF) Specification - Part 6: Resource to AllJoyn interface mapping specification - 11/12/2025, $102.00

ISO/IEC DIS 30118-8, Information technology - Open connectivity foundation (OCF) - Part 8: Cloud Specification - 11/12/2025, $88.00

ISO/IEC DIS 30118-9, Information technology - Open connectivity foundation (OCF) - Part 9: OCF resource to oneM2M resource mapping specification - 11/12/2025, $165.00

ISO/IEC DIS 30118-10, Information technology - Open Connectivity Foundation (OCF) - Part 10: Cloud API for cloud services specification - 2/19/2021, $134.00

ISO/IEC DIS 30118-11, Information technology - Open Connectivity Foundation (OCF) - Part 11: Device to cloud services specification - 2/19/2021, $112.00

ISO/IEC DIS 30118-12, Information technology - Open Connectivity Foundation (OCF) - Part 12: Cloud security specification - 2/19/2021, $88.00

ISO/IEC DIS 30118-13, Information technology - Open Connectivity Foundation (OCF) - Part 13: Onboarding tool specification - 2/19/2021, $58.00

ISO/IEC DIS 30118-14, Information technology - Open Connectivity Foundation (OCF) - Part 14: OCF Resource to BLE mapping specification - 2/19/2021, $146.00

ISO/IEC DIS 30118-15, Information technology - Open Connectivity Foundation (OCF) - Part 15: OCF Resource to EnOcean mapping specification - 2/19/2021, $146.00

ISO/IEC DIS 30118-16, Information technology - Open Connectivity Foundation (OCF) - Part 16: OCF resource to UPlus mapping specification - 2/19/2021, $67.00

ISO/IEC DIS 30118-17, Information technology - Open Connectivity Foundation (OCF) - Part 17: OCF resource to Zigbee cluster mapping specification - 2/19/2021, $134.00

ISO/IEC DIS 30118-18, Information technology - Open Connectivity Foundation (OCF) - Part 18: OCF Resource to Z-wave mapping specification - 2/19/2021, $102.00

OTHER

ISO/IEC DIS 17030, Conformity assessment - General requirements for third-party marks of conformity - 2/21/2021, $46.00

IEC Standards

## ISO Standards

### ACOUSTICS (TC 43)

### ANALYSIS OF GASES (TC 158)
- **ISO 19230:2020**, Gas analysis - Sampling guidelines, $185.00

### BAMBOO AND RATTAN (TC 296)
- **ISO 21626-1:2020**, Bamboo charcoal - Part 1: Generalities, $68.00
- **ISO 21626-3:2020**, Bamboo charcoal - Part 3: Purification applications, $45.00

### CLINICAL LABORATORY TESTING AND IN VITRO DIAGNOSTIC TEST SYSTEMS (TC 212)
- **ISO 17822:2020**, In vitro diagnostic test systems - Nucleic acid amplification-based examination procedures for detection and identification of microbial pathogens - Laboratory quality practice guide, $185.00

### CORROSION OF METALS AND ALLOYS (TC 156)
- **ISO 23221:2020**, Pipeline corrosion control engineering life cycle - General requirements, $68.00

### CRANES (TC 96)
- **ISO 4301-2:2020**, Cranes - Classification - Part 2: Mobile cranes, $68.00

### ENVIRONMENTAL MANAGEMENT (TC 207)
- **ISO 14065:2020**, General principles and requirements for bodies validating and verifying environmental information, $162.00

### FINE BUBBLE TECHNOLOGY (TC 281)
- **ISO 20304-1:2020**, Fine bubble technology - Water treatment applications - Part 1: Test method for evaluating ozone fine bubble water generating systems by the decolorization of methylene blue, $103.00

### FINE CERAMICS (TC 206)
- **ISO 23946:2020**, Fine ceramics (advanced ceramics, advanced technical ceramics) - Test methods for optical properties of ceramic phosphors for white light-emitting diodes using a goniometer, $138.00

### GRAPHIC TECHNOLOGY (TC 130)
- **ISO 16612-3:2020**, Graphic technology - Variable data exchange - Part 3: Using PDF/X-6 (PDF/VT-3), $68.00

### IMPLANTS FOR SURGERY (TC 150)
- **ISO 27186:2020**, Active implantable medical devices - Four-pole connector system for implantable cardiac rhythm management devices - Dimensional and test requirements, $232.00

### NUCLEAR ENERGY (TC 85)
- **ISO 23467:2020**, Ice plug isolation of piping in nuclear power plant, $103.00

### PLASTICS (TC 61)
- **ISO 10093:2020**, Plastics - Fire tests - Standard ignition sources, $185.00

### PLASTICS PIPES, FITTINGS AND VALVES FOR THE TRANSPORT OF FLUIDS (TC 138)
- **ISO 15875-3/Amd1:2020**, Plastics piping systems for hot and cold water installations - Crosslinked polyethylene (PE-X) - Part 3: Fittings - Amendment 1, $19.00
- **ISO 15875-5/Amd1:2020**, Plastics piping systems for hot and cold water installations - Crosslinked polyethylene (PE-X) - Part 5: Fitness for purpose of the system - Amendment 1, $19.00
- **ISO 15876-2/Amd1:2020**, Plastics piping systems for hot and cold water installations - Polybutene (PB) - Part 2: Pipes - Amendment 1, $19.00
Newly Published ISO & IEC Standards

ISO 15876-5/Amd1:2020, Plastics piping systems for hot and cold water installations - Polybutene (PB) - Part 5: Fitness for purpose of the system - Amendment 1, $19.00

ISO 22391-5/Amd1:2020, Plastics piping systems for hot and cold water installations - Polyethylene of raised temperature resistance (PE-RT) - Part 5: Fitness for purpose of the system - Amendment 1, $19.00

SOLID RECOVERED FUELS (TC 300)
ISO 21637:2020, Solid recovered fuels - Vocabulary, $45.00

STEEL (TC 17)
ISO 6934-4:2020, Steel for the prestressing of concrete - Part 4: Strand, $68.00

TERMINOLOGY (PRINCIPLES AND COORDINATION) (TC 37)

WATER QUALITY (TC 147)
ISO 5667-1:2020, Water quality - Sampling - Part 1: Guidance on the design of sampling programmes and sampling techniques, $185.00

WATER RE-USE (TC 282)
ISO 16075-1:2020, Guidelines for treated wastewater use for irrigation projects - Part 1: The basis of a reuse project for irrigation, $162.00

ISO 16075-2:2020, Guidelines for treated wastewater use for irrigation projects - Part 2: Development of the project, $138.00

ISO Technical Reports

International Organization for Standardization (ISO)

Call for Comment on ISO Standard

ISO 26000 - Guidance on Social Responsibility Activity

Comment Deadline: January 29, 2021

ISO standard ISO 26000, Guidance on social responsibility, has been circulated to ISO members for its systematic review to determine whether the standard should be revised, reconfirmed, or withdrawn.

ISO 26000, last confirmed in November 2010, is intended to help organizations effectively assess and address social responsibilities that are relevant and significant to their mission and vision; operations and processes; customers, employees, communities, and other stakeholders; and environmental impact. ISO 26000 provides detailed guidance for organizations that are willing to implement the OECD Guidelines but is not meant for ISO certification.

ANSI is seeking U.S. Stakeholders’ input on ISO 26000 to help ANSI determine if ANSI should vote revise, reconfirm as is, or withdraw the standard. Anyone wishing to review ISO 26000 can request a copy by contacting ANSI’s ISO Team (isot@ansi.org), with a submission of comments to Steve Cornish (scornish@ansi.org) by close of business on Friday, January 29, 2021.

Call for U.S. TAG Administrator

ISO/TC 155 – Nickel and nickel alloys

ANSI has been informed that ASTM International, the ANSI-accredited U.S. TAG Administrator for ISO/TC 155, wishes to relinquish their role as U.S. TAG Administrator.

ISO/TC 155 operates under the following scope:

Standardization in the field of nickel and nickel alloys including terminology, specifications and methods of sampling, testing and analysis.

Organizations interested in serving as the U.S. TAG Administrator or participating on a U.S. TAG should contact ANSI’s ISO Team (isot@ansi.org).

Establishment of ISO Technical Committee

ISO/TC 331 - Biodiversity

Comment Deadline: January 6, 2021

A new ISO Technical Committee, ISO/TC 331 – Biodiversity, has been formed. The Secretariat has been assigned to France (AFNOR).

ISO/TC 331 operates under the following scope:

Standardization in the field of Biodiversity to develop requirements, principles, framework, guidance and supporting tools in a holistic and global approach for all relevant organizations, to enhance their contribution to Sustainable Development.

Excluded: standardization of test and measurement methods for ecological quality of water, air, soil and marine environment.

Organizations interested in serving as the U.S. TAG Administrator or participating on the U.S. TAG should contact ANSI’s ISO Team (isot@ansi.org).
ISO New Work Item Proposal

Guidelines for Organizations to Increase Understanding of Online Terms and Conditions

Comment Deadline: January 22, 2021

ISO COPOLCO (the ISO policy development committee on consumer policy) in cooperation with BSI (the ISO member from the United Kingdom) has submitted to ISO a proposal for a new work item proposal for the development of an ISO standard on guidelines for organizations to increase consumer understanding of online terms and conditions, with the following scope statement:

Specification of guidance to the providers of goods, services and digital content on the clear design and presentation of online terms and conditions to maximize consumer understanding and reduce detriment.

Anyone wishing to review the proposal can request a copy by contacting ANSI’s ISO Team (isot@ansi.org), with a submission of comments to Steve Cornish (scornish@ansi.org) by close of business on Friday, January 22, 2021.
Meeting Notices (International)

ANSI Accredited U.S TAG to ISO
ANSI-Accredited Standards Committee: U.S. TAG to ISO TC 299, Robotics

Series of 5 meetings beginning Monday 11 Jan 2021

Meeting Format & Location: Remote via GoToMeeting; Series of 5 meetings beginning Monday 11 Jan 2021.
Meeting Sponsor: Robotic Industries Association (RIA)
Meeting Days/Dates/Times: Important! We will NOT reopen comments handled in earlier sessions. Please make every effort to attend all 5 sessions if you wish to participate.

- Meeting 1 of 5: Monday, Jan 11, 2021, 2 - 4 PM EST
- Meeting 2 of 5: Monday, 18 Jan 2021, 2 - 4 PM EST
- Meeting 3 of 5: Monday, 25 Jan 2021, 2 - 4 PM EST
- Meeting 4 of 5: Friday, 29 Jan 2021, 12 - 2 PM EST (Note different time - earlier)
- Meeting 5 of 5: Monday, 8 Feb 2021, 2 - 4 PM EST (This meeting might be canceled if not needed).

For More Information: Contact Carole Franklin, cfranklin@robotics.org.
**Proposed Foreign Government Regulations**

**Call for Comment**

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations notified by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to notify proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat issues and makes available these notifications. The purpose of the notification requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The USA Inquiry Point for the WTO TBT Agreement is located at the National Institute of Standards and Technology (NIST) in the Standards Coordination Office (SCO). The Inquiry Point distributes the notified proposed foreign technical regulations (notifications) and makes the associated full-texts available to U.S. stakeholders via its online service, Notify U.S. Interested U.S. parties can register with Notify U.S. to receive e-mail alerts when notifications are added from countries and industry sectors of interest to them. To register for Notify U.S., please visit: http://www.nist.gov/notifyus/.

The USA WTO TBT Inquiry Point is the official channel for distributing U.S. comments to the network of WTO TBT Enquiry Points around the world. U.S. business contacts interested in commenting on the notifications are asked to review the comment guidance available on Notify U.S. at: https://tsapps.nist.gov/notifyus/data/guidance/guidance.cfm prior to submitting comments.

For further information about the USA TBT Inquiry Point, please visit: https://www.nist.gov/standardsgov/what-we-do/trade-regulatory-programs/usa-wto-tbt-inquiry-point Contact the USA TBT Inquiry Point at (301) 975-2918; F: (301) 926-1559; E: usatbtep@nist.gov or notifyus@nist.gov.
Registration of Organization Names in the United States

The Procedures for Registration of Organization Names in the United States of America (document ISSB 989) require that alphanumeric organization names be subject to a 90-day Public Review period prior to registration. For further information, please contact the Registration Coordinator at (212) 642-4975.

When organization names are submitted to ANSI for registration, they will be listed here alphanumerically. Alphanumeric names appearing for the first time are printed in bold type. Names with confidential contact information, as requested by the organization, list only public review dates.

Public Review

DISH Wireless

Comments Deadline: February 12, 2021

NOTE: Challenged alphanumeric names are underlined. The Procedures for Registration provide for a challenge process, which follows in brief. For complete details, see Section 6.4 of the Procedures.

A challenge is initiated when a letter from an interested entity is received by the Registration Coordinator. The letter shall identify the alphanumeric organization name being challenged and state the rationale supporting the challenge. A challenge fee shall accompany the letter. After receipt of the challenge, the alphanumeric organization name shall be marked as challenged in the Public Review list. The Registration Coordinator shall take no further action to register the challenged name until the challenge is resolved among the disputing parties.
BSR/UL 583, Standard for Safety for Electric-Battery-Powered Industrial Trucks

1. Proposed Revision to Paragraph 64.2 To Allow for Electronic Distribution of Installation Instructions for Field-installed Accessories

PROPOSAL

64.2 Installation instructions shall be provided on or with each accessory intended for field installation by qualified personnel.

Exception: Electronically distributed instructions are allowed if instructions on how to access them are supplied with each accessory.

2. Proposed Revision To Paragraph 22.4.2 To Correct The Course Length For Towing Tractors

PROPOSAL

22.4.2 The tractor is to be operated over the test course (see 22.1.6) using the following sequence per cycle:

a) The tractor shall operate over the test course (200 m) 200 feet (61 m) without grade, using load configuration 1.

b) The tractor shall operate over the test course (200 m) 200 feet (61 m) including grade, using load configuration.

c) The tractor shall operate over the test course (200 m) 200 feet (61 m) including grade without trailer (no load).

This cycle is to be repeated, allowing time at the starting point for normal coupling and uncoupling operations. If the length of the test course exceeds 300 feet (91 m), the truck is to be stopped and started at intervals of approximately 200 feet (61 m). The cycle shall be completed no less than 6 times per hour.

The maximum duration for this test is 8 hours.

Exception: When the truck employs motor regeneration, plugging or a combination of both for stopping, not including the ramp, the truck shall come to a complete stop every 100 feet (30.4 m).
