The “ANSI Essential Requirements” provides three options for the maintenance of American National Standards (ANS): periodic maintenance, continuous maintenance and stabilized maintenance (See clause 4.7 www.ansi.org/essentialrequirements).

Continuous maintenance is defined as follows:
The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures set-forth in the ANSI Essential Requirements.

In addition, the ANSI Essential Requirements provides for the following:
A PINS is not required for revisions of an American National Standard that is maintained under continuous maintenance and (1) is registered as such on the ANSI website, (2) has a notice in the standard that the standard is always open for comment and how to submit comments, and (3) has information on the developer’s website that the standard is under continuous maintenance and how to submit comments.

These ANSI-accredited standards developers maintain some or all of their American National Standards using Continuous Maintenance:
- AAMI (Association for the Advancement of Medical Instrumentation)
- AARST (The AARST Consortium on National Radon Standards)
- AGA (American Gas Association)
- AGA (ASC Z380) (American Gas Association)
- AGSC-AGRSS (Auto Glass Safety Council)
- ASC X9 (Accredited Standards Committee X9, Incorporated)
- ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)
- ASME (American Society of Mechanical Engineers)
- ASTM (ASTM International)
- GBI (The Green Building Initiative)
- HL7 (Health Level Seven)
- Home Innovation (Home Innovation Research Labs, Inc.)
- IES (The Illuminating Engineering Society)
- MHI (ASC MH10) (Material Handling Industry)
- NBBPVI (National Board of Boiler and Pressure Vessel Inspectors)
- NCPDP (National Council for Prescription Drug Programs)
- NFRC (National Fenestration Rating Council)
- NISO (National Information Standards Organization)
- NSF (NSF International)
- PHTA (Pool and Hot Tub Alliance)
- PRCA (Professional Ropes Course Association)
- RESNET (Residential Energy Services Network)
- TCNA (Tile Council of North America)
- TIA (Telecommunications Industry Association)
- The Monitoring Association (TMA)
- UL Standards & Engagement (ULSE)
The Association for the Advancement of Medical Instrumentation (AAMI)
Standards Registered Under Continuous Maintenance:

See UL statement: ANSI/AAMI/UL 2800-1-2019, Standard for Safety for Medical Device Interoperability

This standard is maintained under continuous maintenance procedures. AAMI has created a notification registry that will send e-mail announcements when any maintenance activity occurs to the recommended practice.

Comments or proposals for revisions to any part of the standard may be submitted to AAMI any time.

Written comments are to be sent to: Standards Dept., AAMI, 1110 N. Glebe Road, Suite 220, Arlington, VA 22201-4795. Comments may also be e-mailed to: standards@aami.org.

The following person may be contacted by those interested in submitting changes:

Joseph C. Lewelling
Vice President, Standards Development
AAMI
1110 North Glebe Road, Ste. 220, Arlington, Virginia 22205
703-525-4890 ext. 206
703-276-0792
E-mail Address: jlewelling@aami.org

Program for Periodic Publication

<table>
<thead>
<tr>
<th>November (year)*</th>
<th>Solicit requests for change from committee and public. Allow at least two months to submit. Also solicit new committee members.</th>
</tr>
</thead>
<tbody>
<tr>
<td>By end of March (year +1)</td>
<td>Deadline for requests for change.</td>
</tr>
<tr>
<td>First meeting (year +1)</td>
<td>Review new requests for change including any deferred from previous review cycles and agree on which to propose (with or without change) for formal ballot and public review, which to reject and which to defer to the next review cycle.</td>
</tr>
<tr>
<td>By mid-July (year +1)</td>
<td>Document first meeting results and put proposals for change on 6-week ballot and public review.</td>
</tr>
<tr>
<td>By end of August (year +1)</td>
<td>Ballot and public review over.</td>
</tr>
<tr>
<td>Second meeting (year +1)</td>
<td>Review ballot and public review results and respond to comments. If needed and as time permits, begin working on any deferred requests for following year’s revision cycle.</td>
</tr>
</tbody>
</table>

*For the first revision cycle, the request for changes will need to start later than indicated in this schedule (and other dates adjusted as needed)
The AARST Consortium on National Radon Standards (AARST)
The approved American National Standard(s) listed below shall be maintained using the Continuous
Maintenance option. Additional standards may be identified and added to this list in the future, however, if the
procedures used to maintain them vary from those included in this submittal, an additional Continuous
Maintenance Registration form will be submitted.

2023 Catalogue of ANSI/AARST Standards

Homes

- **MAH 2023** Protocol for Conducting Measurements in Homes
- **SGM-SF 2023** Soil Gas Mitigation for Existing Homes
- **CCAH 2023** New Construction of One- & Two-Family Dwellings
- **RRNC 2022** Rough-In of Radon Control Components in New Construction
- **MS-QA 2023** Quality Assurance for Radon Measurement Systems
- **MS-PC 2022** Performance Specifications for Instrumentation Systems Designed to Measure Radon Gas in Air

Larger Buildings

- **CC-1000 2023** Soil Gas Control Systems in New Construction of Multifamily, School, Commercial, and Mixed-Use Buildings

Water

- **MW-RN 2020** Protocol for the Collection, Transfer and Measurement of Radon in Water

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI
Essential Requirements, we agree to the following requirements:

1. A documented program for periodic publication of revisions has been established. A copy is attached.

2. The published standard(s) shall include a clear statement of the intent to consider requests for change and
   information on the process associated with the submittal of such requests. The language of this statement
   is as follows:

   "This standard is under continuous maintenance by the AARST Consortium on National Radon Standards for
   which the Executive Stakeholder Committee has established a documented program for regular publication
   of addenda or revisions, including procedures for timely, documented, consensus action on requests for
   change to any part of the standard. The change submittal form, instructions, and deadlines may be obtained
   in electronic form from at www.radonstandards.us."

   (Note that contact information and address for the AARST administrative office is also provided next to
   these statements as relative to any inquiry such as appeals, etc.)
3. Procedures for timely, documented consensus action on each request for change have been established. A copy is attached here:

4. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

   Name: Gary Hodgden (c/o AARST Administrative Offices)
   Address: 475 South Church Street - Suite 600
   City: Hendersonville, NC 28792
   Phone: 202-830-1110
   Fax: 913-780-2090
   E-mail: StandardsAssist@gmail.com

5. No portion of the standard(s) shall be excluded from the revision process.

6. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.

7. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

AGA (ASC Z380) (American Gas Association)
American National Standards Maintained Under Continuous Maintenance

American Gas Association (AGA), hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted to PSA/ANSI.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements ([www.ansi.org/essentialrequirements](http://www.ansi.org/essentialrequirements)), we agree to the following requirements:

1. A documented program for periodic publication of revisions has been established. A copy is attached.

Section 5.1 A new edition of the Guide shall be published or the existing edition shall be reaffirmed a minimum of every five (5) years. An addendum shall be published as frequently as necessary between editions. Revisions resulting from public proposals shall be published in an addendum or the new edition, whichever is published first. If no changes are made within four years of the ANSI approval date, the committee shall apply for reaffirmation of the Guide.

2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

Section 5.2. The Guide shall contain a proposal submittal form and the following statement:

“GPTC Z380.1, Guide for Gas Transmission, Distribution, and Gathering Piping Systems“, is maintained using the continuous maintenance process. Proposals to revise any part may be submitted to the committee at any time. Written proposals shall be submitted using the proposal submittal form provided at the end of the document. The form may also be obtained on the GPTC website at [www.aga.org/gptc](http://www.aga.org/gptc). Proposals shall be sent to: GPTC Secretary, American Gas Association, 400 N Capitol St NW, Washington, DC 20001.”

3. Procedures for timely, documented consensus action on each request for change have been established. A copy is attached. Please see section 6 of the attached document.

4. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):
Name: Luis Romeo Escobar  
Title: Director, Energy Standards  
Organization: American Gas Association  
Address: 400 N. Capitol St. NW City: Washington, DC 20001  
Phone: 202-824-7058  
E-mail: Lescobar@aga.org and GPTC@aga.org

5. No portion of the standard(s) shall be excluded from the revision process.

6. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.

7. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI ([psa@ansi.org](mailto:psa@ansi.org)) in a timely fashion.
Name: Luis Romeo Escobar  
Title: Director, Energy Standards

Address: 400 N. Capitol St. NW City: Washington, DC 20001  
Phone: 202-824-7058  
E-mail: Lescobar@aga.org and GPTC@aga.org
AGA (ASC B109) Gas Displacement Meters

Continuous Maintenance language applicable to all eligible standards:
NOTICE: This American National Standard may be revised or withdrawn at any time. Whenever any revisions are deemed advisable, recommendations should be forwarded to the American Gas Association. A form is included for that purpose at the end of this standard.

Standards Registered Under Continuous Maintenance:
- B109.1 - Diaphragm Type Gas Displacement Meters (Under 500 Cubic Feet Per Hour Capacity)
- B109.2 - Diaphragm Type Gas Displacement Meters (500 Cubic Feet Per Hour Capacity and Over)
- B109.3 - Rotary Type Gas Displacement Meters
- B109.4 - Self-Operated Diaphragm-Type Natural Gas Service Regulators

Schedule (Relevant sections from ASCB109 Procedures Book copied below):
6.0 REVIEW OF STANDARDS
6.1 Revisions of Standards.
   6.1.1 Each standard under the jurisdiction of the Committee shall be reviewed in light of requests and recommendations, and revisions to standards initiated as warranted.
   6.1.2 Standards may be revised as frequently as necessary in line with indicated safety needs, industry developments or current state-of-the-art.
   6.1.3 A proposed new American National Standard or a proposed revision or reaffirmation of an American National Standard to be approved by the BSR shall be submitted to the secretary of the BSR within one (1) year from the close of the comment period listed in Standards Action using the appropriate form provided by ANSI, unless the standards developer notifies the secretary of the BSR in writing of good cause for a different schedule for submittal. Failure to make the submittal within two (2) years from the close of the comment period listed in Standards Action shall require consideration by the BSR, i.e., withdrawal, extension for cause, or another listing in Standards Action.
6.2 Reaffirmation of Standards.
An existing standard which has not been revised for five (5) years shall be reviewed at the beginning of the fifth year. If it is determined that the standard is needed but that no modification is required, the Committee shall recommend to ANSI the reaffirmation of the standard without revision.
6.3 Withdrawal of Standards.
   6.3.1 Standards which have not been revised (see 6.1) and not reaffirmed (see 6.2) shall be withdrawn. Consideration of withdrawal may be initiated at any time.
6.3.2 Administrative withdrawal:
An American National Standard shall be withdrawn five years following approval, if the standard has not been revised or reaffirmed, unless an extension has been granted by the ExSC or its designee. An American National Standard that has not been reaffirmed or revised within the five-year period, and that has been recommended for withdrawal by the ExSC or its designee, shall be withdrawn at the close of a 30-day public review notice in Standards Action. American National Standards that have not been revised or reaffirmed within ten years from the date of their approval as American National Standards shall be withdrawn and such action shall be announced in Standards Action.
6.3.3 Withdrawal by ANSI-Accredited Standards Developer:
An American National Standard must be supported by an ANSI-Accredited Standards Developer. If an accredited standards developer wishes to withdraw its approval of one or more of its American National Standards, it may do so without a vote of the relevant consensus body; i.e., AGA may administratively withdraw a B109 Standard. Administrative withdrawal by AGA occurs when the B109 Secretary and AGA General Counsel determine that withdrawal is warranted without B109 Committee approval. If an accredited standards developer does withdraw one or more of its American National Standards, then the standards developer shall notify ANSI immediately and the standard shall be withdrawn as an ANS and announced in Standards Action.
6.3.4 Per Section 3.5.2.2(1) of these procedures, the B109 Committee may vote to withdraw a standard.
6.3.5 Other Withdrawal Options:
Discontinuance of standards project and withdrawal for cause are other possible withdrawal alternatives (see most current version of ANSI Essential Requirements)

AGSC (The Auto Glass Safety Council) hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration form will be submitted to PSA/ANSI.

ANSI/AGSC/AGRSS 005-2022

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

8. A documented program for periodic publication of revisions has been established. A copy is attached. AGSC welcomes proposals for amendments to any portion of this Standard. All proposals will be referred to the AGSC AGRSS Standards Committee for consideration. The AGSC AGRSS Standards Committee considers revisions to the Standard at its meetings, normally scheduled twice a year.

9. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows: AGSC welcomes proposals for amendments to any portion of this Standard. These proposals should be in writing and sent to the address below and accompanied by a statement of the rationale for the proposal along with the proponent’s complete contact information. All proposals will be referred to the AGSC AGRSS Standards Committee for consideration. Submit proposals to: AGSC/AGRSS Standards Committee, PO Box 569, Garrisonville, VA 22463, or by email to info@agsc.org.

10. Procedures for timely, documented consensus action on each request for change have been established. A copy is attached.

11. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

Name: Kathy Bimber
Address: PO box 569
City: Garrisonville, VA 22463
Phone: 540 6023263
Fax: 540 7205687
E-mail: kbimber@agsc.org

12. No portion of the standard(s) shall be excluded from the revision process.

13. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.

14. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

ASCX9 Accredited Standards Committee X9, Incorporated
Continuous Maintenance language applicable to all eligible standards:
NOTICE: INSTRUCTIONS FOR SUBMITTING A PROPOSED CHANGE TO THIS ASC X9 STANDARD UNDER CONTINOUS MAINTENANCE

This standard is maintained under continuous maintenance procedures by the Accredited Standards Committee X9, Inc. which has established a documented program/process for regular publication of addenda or revisions, including procedures for timely, documented, consensus action on requests for change to any part of the standard.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of approval.

Standards Registered Under Continuous Maintenance:
   X9.129 Legal Orders Exchange Standard
   X9.138 Distributed Ledger Technologies Terminology

Consideration will be given to proposed changes within 45 days of submittal. Proposed changes must be submitted to:
   continuous_maintenance@x9.org
   using the published change form

The following person(s) may be contacted by those interested in submitting changes:

   Ambria Frazier
   Administrative Assistant
   Accredited Standards Committee X9, Inc.
   275 West Street Annapolis, MD 21401
   Phone: 410-267-7707

American National Standards Maintained Under Continuous Maintenance
ASME

Continuous Maintenance language applicable to all eligible standards:

Revised editions of ASME Codes and Standards result from committee consideration of factors such as technological advances, new data, and changing environmental and industry needs. Proposals for revisions are processed in accordance with ASME's accredited Codes and Standards Development Committee Procedures and supplemental procedures of the pertinent standards development committee.

Requests for revisions may be submitted at any time and on any portion of the code or standard. Requests will be considered by the responsible committee for the next edition of the code or standard, as applicable.

Contacts: See associated standards below the list of technical staff contacts.

NOTE: Mailing address and fax number for all staff members listed below are as follows:

Standards Registered Under Continuous Maintenance

- ANSI/GBI 02-2023, Green Globes Assessment Protocol for Existing Buildings

These Standards are maintained under continuous maintenance procedures. GBI publishes notices for meetings and calls for public comment in ANSI Standards Action as required. GBI has a list of stakeholders that will receive email announcements when any maintenance activity occurs to the recommended practice. GBI’s website contains a place for new stakeholders to register.

Comments or proposals for revisions to any part of these Standards may be submitted to GBI at any time.

The following person may be contacted by those interested in submitting changes:

Name: Emily Marx
E-mail: comment@thegbi.org

Health Level Seven, Inc. (HL7)
Health Level Seven, Inc. (HL7) hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option.

No standards at this time are under Continuous maintenance.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

8. A documented program for periodic publication of revisions has been established. A copy is enclosed. HL7 publishes a Normative Edition once a year, typically in the April timeframe.

9. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows: This American National Standard is maintained using the continuous maintenance process. Comments or proposals for revision to any part of this standard may be submitted to HL7 at any time. Comments or proposals may be submitted online at www.HL7.org or in writing to the Associate Executive Director at Health Level Seven, Inc., 3300 Washtenaw Avenue Suite 227, Ann Arbor, Michigan 48104-4261. Comments or proposals submitted in writing must identify the standard in question and include the submitter’s name, affiliation, telephone number, and e-mail address.

10. Procedures for timely, documented consensus action on each request for change have been established. A copy is enclosed. Refer to section 15.04.03.01 of the HL7 Governance and Operations Manual (attached).

11. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

   Karen Van Hentenryck
   Associate Executive Director
   Health Level Seven
   3300 Washtenaw Ave., Suite 227
   Ann Arbor, MI

12. No portion of the standard(s) shall be excluded from the revision process.

13. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard(s) shall be taken in accordance with clause 4.7 of the ANSI Essential Requirements.

14. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI in a timely fashion.

   Returned by:
   Name: Karen Van Hentenryck
   Title: Associate Executive Director

   Address: 3300 Washtenaw Avenue, Suite 227, Ann Arbor, MI 48104
Home Innovation Research Labs hereby informs ANSI that the following approved American National Standard National Green Building Standard ICC 700 shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration form will be submitted to PSA/ANSI.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

Standards Maintained Under Continuous Maintenance:
ICC 700, National Green Building Standard

The following website details the maintenance schedule and contact information for the National Green Building Standard ICC 700.

https://www.HomeInnovation.com/NGBS This website was established for the initial printing of ICC 700 and has been maintained continuously.

1. A documented program for periodic publication of revisions has been established.
(see website)

2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

   The development process for the National Green Building Standard™ is managed by Home Innovation Research Labs, an ANSI-Accredited Standards Developer. The NGBS is revised on a continuous maintenance basis in accordance with ANSI requirements. Proposals for revising the 2020 edition of the National Green Building Standard™ are welcome. Please visit the Home Innovation Research Labs website (www.homeinnovation.com/NGBS) for a proposal form and instructions.

3. Procedures for timely, documented consensus action on each request for change have been established.
(see website)

4. The following person(s) may be contacted by those interested in submitting:

Kevin Kauffman
5. No portion of the standard(s) shall be excluded from the revision process. Every section is represented by the online proposal form located at https://www.HomeInnovation.com/NGBS

6. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard(s) shall be taken in accordance with clause 4.7 of the ANSI Essential Requirements.

(see section #5 above)

7. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI in a timely fashion.

Schedule:

All submittals received by IES are acknowledged and forwarded to the Committee for consideration. The Committee will inform submitters of the disposition of their substantive proposals. Committee consideration will be given to proposed changes according to the following schedule:

Deadline: December 31
Proposal Considered: By June 30

Committee consideration will be given to proposed changes by June 30 if proposed changes are received by the Director of Standards no later than December 31. Proposals received after December 31 shall be considered by the Committee no later than June 30 of the following year.

NOTICE INSTRUCTIONS FOR SUBMITTING A PROPOSED CHANGE TO THESE STANDARDS UNDER CONTINUOUS MAINTENANCE

This standard is maintained under continuous maintenance procedures for which IES has an established and documented program for regular publication of addenda or revisions, including procedures for timely, documented, consensus action on requests for change to any part of the standard. Committee consideration will be given to proposed changes by June 30 if proposed changes are received by the IES Director of Standards no later than December 31. Proposals received after December 31 shall be considered by the Committee no later than June 30 of the following year.

Submittal Format

Proposed changes must be submitted to the IES Director of Standards in the announced published format. However, changes may be accepted in an earlier published format, if the differences are immaterial to the proposed change submittal. If the Director of Standards concludes that a current form must be utilized, the proposer may be given up to 20 additional days to resubmit the proposed changes in the current format.

Specific changes in the text or values are required and must be substantiated. Any change proposals that do not meet these requirements will be returned to the proposer. Supplemental background documents to support changes submitted may be included.

Submission to the Committee Chair

The Director of Standards shall forward proposed changes received on appropriate forms to the Committee chair for assigning to designated Committee members (responders) to develop responses to submitters of proposed changes.

Review and Clarification

Responders shall review proposals and should contact the proposer if necessary for clarification.

Response Recommendation
Designated responders shall draft a recommended Committee response, including any recommended changes to the standard. The responder’s recommended responses shall be submitted to the Committee chair in electronic form usable by Society Staff, including any recommended change to the standard in response to proposals received. (If a subcommittee is preparing a response see procedure under Exceptions above.)

Options for Committee response are limited to:

a) Proposed change accepted for public review without modification
b) Proposed change accepted for public review with modification
c) Proposed change accepted for further study
d) Proposed change rejected

The responder shall provide reasons for any recommendation other than option a) “accepted for public review without modification.”

The designated responder shall not recommend option c) “proposed change accepted for further study” unless the further study can be completed by October 1 of that year and the Committee can then vote for option a), b), or d) no later than November 15 of that year.

Editing
The Committee chair or his/her designee shall edit the draft responses and circulate the edited drafts to the Committee for review.

To Access Form for Proposing Change to an IES Standard Under Continuous Maintenance:
Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

IES Director of Standards

E-mail: standards@ies.org
Material Handling Industry, MHI (ASC MH10)

Standards Maintained Under Continuous Maintenance:
MH10.8.2; Data Identifier and Application Identifier Standard

Schedule

Proposed changes to the standard that were accepted by the MH10.8.2 Data Identifier Maintenance Committee will be integrated into the previously published version at the recommendation of the committee. Upon approval of the new version by MH10 Subcommittee 8 and the full MH10 committee, the standard will be published as a new version.

The committee plans to incorporate accepted revisions into the standard as frequently as necessary, but in no case will a published revised standard be issued more frequently than yearly, in line with indicated needs and industry developments. Each accepted revision since the last published version shall be identified in a “Document Maintenance Summary” appearing immediately before the Table of Contents of the standard.

National Board of Boiler and Pressure Vessel Inspectors (NBBPVI)

Continuous Maintenance language applicable to all eligible standards:
The NBIC Committee meets regularly to consider revisions of the rules, new rules, and requests for interpretations. Requests for interpretation must be addressed to the Secretary in writing and must give full particulars in order to receive consideration and a written interpretation (see Mandatory Appendix "1" covering preparation of technical inquiries.) Proposed revisions to the code resulting from inquiries will be presented to the NBIC Committee for appropriate action.

Standards Maintained Under Continuous Maintenance:
ANSI/NB 23, The National Board Inspection Code

Schedule:
Colored-sheet Addenda, which include revisions and additions to the Code, are published annually. Addenda are permissive on the date issued and become effective six months after the date of issue. The addenda will be sent automatically to purchasers of the Code up to the publication of the next issue.

How to Submit a Proposed Change to an NCPDP Standard Under Continuous Maintenance

The Data Element Request Form (DERF) is the documentation used to request an addition or modification to an NCPDP standard. Anyone may submit a DERF to NCPDP along with accompanying information, including the proposed standard, implementation guide, data element dictionary, and modification log if needed.

A DERF must be completed and submitted with the proper documentation according to an established schedule in order for it to be reviewed during a quarterly work group meeting. The DERF is distributed to NCPDP members via the NCPDP website prior to the work group meeting.

National Fenestration Rating Council (NFRC)

National Fenestration Rating Council (NFRC), hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration form will be submitted to PSA/ANSI.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements (www.ansi.org/essentialrequirements), we agree to the following requirements:

1. A documented program for periodic publication of revisions has been established for these standards:
   - ANSI/NFRC 203
   - ANSI/NFRC 202
   - ANSI/NFRC 500
   - ANSI/NFRC 400
   - ANSI/NFRC 100
   - ANSI/NFRC 200

2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

   Comments or proposals for revisions on any part of this standard may be submitted to National Fenestration Rating Council at any time. Written comments or proposals must be in writing and be submitted to the NFRC Accredited Standards Developer at standards@nfrc.org.

3. Procedures for timely, documented consensus action on each request for change have been established.

   Any written comments or proposals submitted to NFRC as provided above shall be submitted by NFRC to its consensus body for consideration within a reasonable timeframe not to exceed one year. The submitter will be notified by NFRC of the expected time frame for consideration of the proposal or comments. NFRC shall apply for reaffirmation of this standard regardless any comment or proposals every three years.

4. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

   Name: Jen Padgett, National Fenestration Rating Council (NFRC)
National Information Standards Organization (NISO)
The following standard(s) are maintained under continuous maintenance procedures.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

1. A documented program for periodic publication of revisions has been established. A copy is attached.
2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests.
3. Procedures for timely, documented consensus action on each request for change have been established and no portion of the standard shall be excluded from the revision process. A copy is attached.
4. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.
5. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

ANSI Continuous Maintenance

In accordance with the ANSI Essential Requirements, the ANSI/NISO Z39.96-2019: *JATS: Journal Article Tag Suite* standard is maintained under continuous maintenance procedures.

Proposed Changes

Under continuous maintenance procedures anyone may propose changes at any time. Each change will be considered by the Z39.96 JATS Standing Committee according to a definite schedule, shown in Section 2. The Standing Committee and NISO leadership committees may also propose changes.

The Standing Committee shall follow the procedures in this section in lieu of periodic maintenance and stabilized maintenance procedures. All changes to the Z39.96 standard shall be submitted in compliance with this section.

Section 1. Instructions for Submittal of Proposed Change to ANSI/NISO Standard Z39.96 Under Continuous Maintenance

Comments or proposals for revisions to any part of the standard may be submitted in writing (including electronically) to NISO at any time. Submissions must be accompanied by the submitter’s name, affiliation, and e-mail address.

Written comments are to be submitted via the NISO web site, to a form linked from the JATS page at [https://www.niso.org/standards-committees/jats](https://www.niso.org/standards-committees/jats)

If it is not possible for the submitter to access the web form, alternatively, comments may be sent to:

National Information Standards Organization (NISO) - ANSI/NISO Z39.96  
Attn: Standards Program Manager  
3600 Clipper Mill Road, Suite 302  
Baltimore, MD 21211  
Tel.: 301-654-2512 (main)  
Fax: 410-685-5278  
E-mail: nisohq@niso.org

In addition, the following person(s) may be contacted by those interested in submitting changes:

Jeff Beck  
Co-chair, ANSI/NISO Z39.96 Standing Committee  
National Library of Medicine  
E-mail: beck@ncbi.nlm.nih.gov

B. Tommie Usdin  
Co-chair, ANSI/NISO Z39.96 Standing Committee  
Mulberry Technologies  
E-mail: btusdin@mulberrytech.com
Section 2. Maintenance Review Schedule

All submittals received by NISO or the Standing Committee chairs are acknowledged and forwarded to the JATS Standing Committee for consideration.

The Standing Committee will schedule meetings via teleconference or in person when a substantive number of comments for review have been received, but in any case no less frequently than twice a year if there are unaddressed comments, with meetings to be held more often at the discretion of the co-chairs.

The Standing Committee will inform submitters of the disposition of their proposals within one month following each meeting.

Section 3. Resolution of Proposed Changes

The JATS Standing Committee may respond to submissions in the following ways:

a. Proposed change accepted without modification
b. Proposed change accepted with modification
c. Proposed change accepted for further study
d. Proposed change rejected

Responses are voted upon by the Standing Committee and approved by committee majority.

Accepted changes (response a or b) shall be recorded in a change log which will be posted to the JATS page at https://www.niso.org/standards-committees/jats and circulated to JATS-List (http://www.mulberrytech.com/JATS/JATS-List/).

The Standing Committee shall provide reasons for its responses and an estimated schedule for any action. Proposed changes accepted for further study will be again brought to the Standing Committee for resolution no later than the next quarterly review period.

All submitted changes and Standing Committee responses will be recorded and made available at www.niso.org. In addition, NISO staff will send notifications to JATS-list (http://www.mulberrytech.com/JATS/JATS-List/) when any maintenance activity occurs to the standard.

Interested parties can subscribe to JATS-List by filling out the form at http://www.mulberrytech.com/JATS/JATS-List/subscribe-unsubscribe.html

When a sufficient number of accepted changes have been accumulated, but no later than four years after the previous approval date, the JATS Standing Committee will prepare a revision of the standard and the revision will be processed according to the NISO Operating Procedures provisions for balloting and approving a revised standard.

Section 4. Publication of a New Edition or Reaffirmation

A new edition of a standard under continuous maintenance shall occur within five years of the prior publication date. An existing standard that has not been revised for four (4) years of the original publication date shall be reviewed at the beginning of the fourth year. If it is determined that the standard is needed but that no modification is required, action to reaffirm the standard shall be initiated.

ANSI/NISO Z39.102-2017: STS: Standards Tag Suite standard is maintained under continuous maintenance procedures, in accordance with NISO Operating Procedures Section 7.6 and ANSI Essential Requirements Section 4.7.2. This document was approved by the STS Standing Committee on November 9, 2018 and the NISO Information Creation & Curation Topic Committee on February 8, 2019.

Under continuous maintenance procedures anyone may propose changes at any time. Each change will be considered by the Z39.102 STS Standing Committee according to a definite schedule, shown in Section 2 below. The Standing Committee and NISO leadership committees may also propose changes.

The Standing Committee shall follow the procedures below in lieu of periodic maintenance and stabilized maintenance procedures. All changes to the Z39.102 standard shall be submitted in compliance as described below.

Section 1. Instructions for Submittal of Proposed Change to ANSI/NISO Standard Z39.102 Under Continuous Maintenance
Comments or proposals for revisions to any part of the standard may be submitted in writing (including electronically) to NISO at any time. Submissions must be accompanied by the submitter’s name, affiliation, and e-mail address.

Written comments are to be submitted via the NISO website, to a form linked from the STS Committee page at https://www.niso.org/standards-committees/sts

If it is not possible for the submitter to access the web form, alternatively, comments may be sent to:
National Information Standards Organization (NISO) - ANSI/NISO Z39.102
Attn: Standards Program Manager
3600 Clipper Mill Road, Suite 302
Baltimore, MD 21211
Tel.: 301-654-2512 (main)
Fax: 410-685-5278
E-mail: nisohq@niso.org

In addition, the following person(s) may be contacted by those interested in submitting changes:

Bruce Rosenblum
Co-chair, ANSI/NISO Z39.102 Standing Committee
Inera, Inc.
E-mail: bruce@inera.com

Robert Wheeler
Co-chair, ANSI/NISO Z39.102 Standing Committee
American Society of Mechanical Engineers (ASME)
E-mail: wheeler@asme.org

Section 2. Maintenance Review Schedule
All submittals received by NISO or the Standing Committee chairs are acknowledged and forwarded to the STS Standing Committee for consideration.
The Standing Committee will schedule meetings via teleconference or in person when a sufficient number of substantive comments for review have been received, but in any case no less frequently than once a year if there are unaddressed comments, with meetings to be held more often at the discretion of the co-chairs.

The Standing Committee will inform submitters of the disposition of their proposals within one month following each meeting.

**Section 3. Resolution of Proposed Changes**
The STS Standing Committee may respond to submissions in the following ways:

a. Proposed change accepted without modification  
b. Proposed change accepted with modification   
c. Proposed change accepted for further study   
d. Proposed change rejected

Proposed changes are resolved through consensus reached by Standing Committee discussion. (According to ANSI Essential Requirements, “Consensus means substantial agreement has been reached by directly and materially affected interests. This signifies the concurrence of more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that an effort be made toward their resolution.”)

Responses to submissions shall be recorded in a change log which will be posted to the STS Committee page at [https://www.niso.org/standards-committees/sts](https://www.niso.org/standards-committees/sts) and circulated to the sts-announce mailing list ([https://groups.niso.org/lists/sts-announce/](https://groups.niso.org/lists/sts-announce/)).

The Standing Committee shall provide reasons for its responses and an estimated schedule for any action. Proposed changes accepted for further study will be again brought to the Standing Committee for final resolution no later than the next annual review period.

All submitted changes and Standing Committee responses will be recorded and made available linked from [https://www.niso.org/standards-committees/sts](https://www.niso.org/standards-committees/sts). In addition, NISO staff will send notifications to the sts-announce mailing list ([https://groups.niso.org/lists/sts-announce/](https://groups.niso.org/lists/sts-announce/)) when any maintenance activity occurs to the standard.

Interested parties can subscribe to the sts-announce mailing list by sending email to sts-announce-subscribe@list.niso.org

When a sufficient number of accepted changes have been accumulated, but no later than four years after the previous approval date, the STS Standing Committee will prepare a revision of the standard and the revision will be processed according to the NISO Operating Procedures provisions for balloting and approving a revised standard (Section 7.5).

**Section 4. Publication of a New Edition or Reaffirmation**
A new edition of a standard under continuous maintenance shall occur within five years of the prior publication date. An existing standard that has not been revised for four (4) years of the original publication date shall be reviewed at the beginning of the fourth year. If it is determined that the standard is needed but that no modification is required, action to reaffirm the standard shall be initiated.

Any comments about these Continuous Maintenance procedures in general may be sent via email to nisohq@niso.org.
NSF International hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted to PSA/ANSI.

**Response**
The following Standards shall be maintained using the Continuous Maintenance Option. Please send comments to the attention of the appropriate Joint Committee Secretariat at:

In accordance with clause 4.7.2  Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

15. A documented program for periodic publication of revisions has been established.  
See NSF International Standards Development and Maintenance Policies, Section 5.2 (AESOP #2419[1]). A copy is attached.
16. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:
   Excerpt from the foreword of NSF/ANSI 140 – Sustainable carpet assessment:
   Comments on this Standard should be sent to NSF International, Standards Department, PO Box 130140, Ann Arbor, Michigan 48113-0140, USA or to standards@nsf.org.

17. Procedures for timely, documented consensus action on each request for change have been established. See NSF International Standards Development and Maintenance Policies, Section 8 (AESOP #2419[1]). A copy is attached.

18. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):
   Jessica Evans, Director
   Standards Department, NSF International
   PO Box 130140
   Ann Arbor, MI 48113-0140
   734-913-5774
   734-769-8010
   jevans@nsf.org

19. No portion of the standard(s) shall be excluded from the revision process.
20. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.
21. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

jevans@nsf.org
Pool and Hot Tub Alliance (PHTA)

The following standard(s) are maintained under continuous maintenance procedures.

Program for Periodic Publication of Revisions to PHTA Standards

Revisions to a standard, or reports that no revisions have been made to a standard, under continuous maintenance will be published at least every two years and made publicly available.

Procedures for Consensus Action on Request for Change

The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. The PHTA website shall also include this statement and information. No portion of the standard shall be excluded from the revision process.

Each request for change will be considered by the PHTA Standard Consensus Committee (SCC) within one year of the date received using consensus ballots. PHTA will confirm receipt of a proposal by a commenter in writing and notify the commenter of the schedule.

The SCC shall respond to each request for change in writing, with one of the following:

- Accept proposed change for public review as submitted;
- Accept proposed change for public review as modified;
- Designate proposed change for further study;
- Reject proposed change as non-persuasive; or
- Reject proposed change as non-germane to standard.

If the proposed change is designated for further study, the SCC shall reconsider it within one year.

The submitter of the change request shall be notified in writing of the SCC action, and reasons thereof, within 90 days of the action.

Requests for change accepted for public review will be subject to PHTA Public Review followed by (a) review and resolution of comments and objections, (b) recirculation ballot(s) for unresolved negatives and substantive changes, and finally (c) submittal to ANSI.

The following person(s) may be contacted by those interested in submitting changes

Name: Justin Wiley, Vice President, Government Relations, Standards, and Codes
Address: Pool and Hot Tub Alliance, 1650 King Street, Suite 602
City: Alexandria State: VA Zip: 22314
Phone: 703-838-0083
Professional Ropes Course Association (PRCA) Standards registered under Continuous Maintenance option.

(Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted to PSA/ANSI.)

ANSI/PRCA 1.0 - .03 – 2014 Ropes Challenge Course Installation, Operation & Training Standards

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

A documented program for periodic publication of revisions has been established. A copy is attached. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

Statement on Cover: This American National Standard is subject to revision by the PRCA Standards Committee at any time. The standard must at a minimum be reviewed every five years, revised, reaffirmed or withdrawn. The standard is under continuous review and a form for your comments is included at the end of each section. Comments received will be reviewed and receive careful consideration by the Standards Committee at least annually. The Committee will respond in writing to all comments received after consideration.

Statement in forward of each section: This standard is under review on a continual maintenance basis and is subject to revision at any time by the Standard Management Committee (SMC). The SMC has adopted a program for regular review, publication of addenda, revisions and interpretations, procedures for timely consensus action on requests to change any portion of the standard. At a minimum this standard shall be reviewed and revised every five years, or must be reaffirmed or withdrawn. Suggestions for improvement of this standard or the development of additional standards are welcome. Your comments for revisions of this standard, or any part thereof, must be addressed to PRCA headquarters utilizing the form located on the last page of this section of the code or available at www.prcainfo.org. Your comments will receive careful consideration of the committees at regularly scheduled meetings, and a written response will be forwarded in accordance with the committee guidelines. If you feel that your comment(s) did not receive a fair hearing you must immediately (within 30 days) make your views known in writing to the PRCA Board of Directors.

Procedures for timely, documented consensus action on each request for change have been established. A copy is attached.

The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

Name: Jack Kerns, Acting-Chair, Standards Management Committee
Address: 6260 E Riverside Blvd. #104
City: Rockford
State: IL

The following documented program for periodic publication of revisions has been established.

April 10, 2014

ANSI/PRCA 1.0-.3-2014 under Continuous Maintenance

Program for Periodic Publication of Revisions

Program for periodic publication of revisions or reaffirmation:

• A new edition of the standard under continuous maintenance shall be published within five years of the previous publication date.

• If the standard has not been revised for a period of four (4) years since the previous publication date it shall be submitted to the Standards Committee for review at the beginning of the fourth year.

• If it is determined that the standard is still valid for the industry but that no revision is required, the Standards Management Committee and Standards Committee (consensus body) will take action to reaffirm the standard in accordance with the PRCA’s Accredited Procedures.

• When a sufficient number of approved substantive changes have been accrued or if the Standards Management Committee determines that a revision to a safety related standard(s) is/are necessary the Standards Committee will prepare a revision of the standard.

• The Standards Committee will process the revision in accordance with the PRCA’s Accredited Procedures for consensus balloting and approval of the revised standard.

• In no event is this process to exceed a four (4) year period without the standard being reviewed for revision or reaffirmation or withdrawal.

The following procedures for timely, documented consensus action on each request for change have been established

April 10, 2014
ANSI/PRCA 1.0-3-2014 under Continuous Maintenance

Procedures for Timely, Documented Consensus Action on Each Request for Change

Procedures for timely, documented consensus action on each request for change:

A. Under the continuous maintenance procedures anyone may propose changes to the standard at any time. All sections of the standards are open for comment.

B. Comments and/or a recommended proposal for changes must be submitted in writing utilizing the required formatting and the form provided on the last page of each section of the standards. The form is also available as a download from the PRCA website http://www.prcainfo.org under the ANSI Standards – Forms tab.

C. The completed written form may be submitted to the PRCA electronically as an email attachment to info@prcainfo.org or by mail to PRCA SMC/SC, 6260 E. Riverside Blvd #104, Rockford, Illinois 61111.

D. All submissions received by the PRCA will be acknowledged with an explanation of a proposed timeline and forwarded to the Standards Management Committee for consideration.

E. When a substantive number of comments/proposals for change have been received or when it is determined that a safety standard needs review the Standards Management Committee will schedule Standards Committee meetings, in person or via teleconference, to review the comments/proposals, but not less than annually if there are unaddressed comments/proposals.

F. The Standards Committee will inform the submitters of comments/proposals of the disposition of the comment/proposal within 30 working days of the balloting of findings on the proposal/comment

G. The Standards Committee may respond in the following manner:
   i) Change accepted without modification
   ii) Change accepted with modification
   iii) Change Rejected
   iv) Change accepted for further study
   All responses are voted upon by the Standards Committee and approved by a two thirds majority of the Standards Committee members voting. Abstentions will be recorded
   Changes accepted for further study will be brought to the Standards Committee for resolution at the next scheduled meeting, but not to exceed a period of one year.

H. The Standards Committee/Standards Management Committee will provide their reasons and response to each submitter and provide an estimated schedule for action to be taken.
Residential Energy Services Network (RESNET)
Approved American National Standard(s) maintained using the Continuous Maintenance option.
(Additional standards may be identified and added to this list in the future, however, if the procedures used to
maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from
will be submitted to PSA/ANSI.)

RESNET/ICC 301-2022, Standard for the Calculation and Labeling of the Energy Performance of
Dwelling and Sleeping Units using an Energy Rating Index
RESNET/ACCA/ICC 310-2020, Standard for Grading the Installation of HVAC Systems
RESNET/ICC 380-2022, Standard for Testing Airtightness of Building, Dwelling Unit, and
Sleeping Unit Enclosures; Airtightness of Heating and Cooling Air Distribution Systems; and
Airflow of Mechanical Ventilation Systems
RESNET/ICC 850-2020, Standard for the Calculation and Labeling of the Water Use
Performance of One- and Two-Family Dwellings Using the Water Rating Index
RESNET 1201-2016 (R2021), Standard Method of Test for the Evaluation of Building Energy
Analysis Model Calibration Methods

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI/Esential Requirements, we agree to the following requirements:

• A documented program for periodic publication of revisions has been established. Updates to
standards and amendments to standards are published to the RESNET website upon completion of
the approved standards development process. See Attachment 1 for standards maintenance
publication criteria.
• The published standard(s) shall include a clear statement of the intent to consider requests for
change and information on the process associated with the submittal of such requests. The language
of this statement is as follows:
• “This Standard is under continuous maintenance. In accordance with Section 10.9 of the RESNET
Standard Development Policy and Procedures Manual, continuous maintenance proposals should be
submitted to the Manager of Standards.”
• Procedures for timely, documented consensus action on each request for change have been
established. Continuous maintenance proposals are evaluated upon receipt by RESNET. See
Attachment 1 for procedures.
• The following person(s) may be contacted by those interested in submitting changes (please include
name, address, E-mail, phone and fax):

  Richard Dixon
  Standards Manager
  Residential Energy Services Network, Inc. (RESNET)
  P.O. Box 4561
  Oceanside, CA 92052
  p: (760) 806-3448
e: rick.dixon@resnet.us
w: www.resnet.us.com

• No portion of the standard(s) shall be excluded from the revision process.
• In the event that a BSR-8/108 has not been submitted for an American National Standard under
continuous maintenance within five years of its approval, the standards developer may request an
extension, but shall then maintain the ANS under periodic maintenance.
10.9 Maintenance of RESNET Standards

All RESNET standards shall be maintained on a continuous basis. At a minimum, each standard shall be revised, reaffirmed or withdrawn by the 5th year after its initial approval as an American National Standard.

For the purposes of continuous maintenance, all proposed changes to a published standard shall be reviewed when received. The SMB shall determine whether the change is critical or not.

When a critical change is received, the SMB shall decide whether the proposed change will be handled as an addendum to the published standard or whether it will be handled by updating the published standard. The proposed change shall be forwarded to the SDC as a Proposed NWI and the standards development process would be followed.

When a non-critical proposed change is received, the proposal shall be kept on file to be provided to the SDC when the standard is next updated.

During the 5th year after a RESNET standard is first approved as an American National Standard, the standard shall be reviewed and either revised, reaffirmed or withdrawn. The SMB shall provide the SDC with a Proposed NWI along with any non-critical proposed changes and any policy direction that is deemed necessary.

The SDC shall review the standard and address any of the non-critical proposed changes. The standards development process shall be followed as outlined in this manual beginning with the Proposed NWI stage. If there are no proposed changes and the SDC does not propose any changes, the published standard would be circulated for public comment as published.

The SDC shall;
- reaffirm the standard
- revise the standard
- withdraw the standard
Tile Council of North America (TCNA)

Standards Registered Under Continuous Maintenance:

- A108.01 General Requirements: Subsurfaces and Preparations by Other Trades
- A108.02 General Requirements: Materials, Environmental, and Workmanship
- A108.1A Installation of Ceramic Tile in the Wet-Set Method, with Portland Cement Mortar
- A137.1 Standard Specifications for Ceramic Tile
- A137.2 National Specifications for Glass Tile
- A137.3 Standard Specifications for Gauged Porcelain Tiles and Gauged Porcelain Tile Panels/Slabs

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

- A documented program for periodic publication of revisions has been established. A copy is attached. (See ASC A108 Committee Procedures)
- The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

  "This standard is under continuous maintenance and always open for comment and proposed revisions. Please submit comments and proposed revisions to the Committee Secretary, Katelyn Simpson, ksimpson@tcnatile.com"

- Procedures for timely, documented consensus action on each request for change have been established. (See ASC A108 Committee Procedures)
- The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

  Name: Katelyn Simpson
  Address: 100 Clemson Research Blvd
  City: Anderson State: SC Zip: 29625
  Phone: 864-646-8453
  Fax: 864-646-2821
  E-mail: ksimpson@tileusa.com

Telecommunications Industry Association, TIA

Standards Registered Under Continuous Maintenance:

There are no Continuous Maintenance standards at this time

For additional information, please visit the TIA homepage at www.tiaonline.org
The Monitoring Association (TMA)

ANS to be Maintained Under Continuous Maintenance

The Monitoring Association (TMA) hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration form will be submitted to PSA/ANSI.

- ANSI/TMA AVS-01 2023 Alarm Validation Scoring (AVS) Standard

Document program for periodic publication of revisions

TMA will submit the proposal or comment to its consensus body for consideration within a reasonable time frame, not to exceed two years. The submitter will be notified within 60 days of TMA receiving the proposal, of the expected time frame for consideration of the proposal. If no changes are made within four years of the ANSI approval date, TMA shall apply for reaffirmation of the standard(s).

ANS Labeling

The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of TMA’s statement is as follows:

TMA reserves the right to revise this document at any time. Because TMA policy requires that every standard be reviewed periodically and be revised, reaffirmed, or withdrawn, users of this document are cautioned to obtain and use the most recent edition of this standard. Current information regarding the revision level or status of this or any other TMA standard may be obtained by contacting TMA.

Requests to modify this document are welcome at any time from any party, regardless of membership affiliation with TMA. Such requests, which must be in writing and sent to the address set forth below, must clearly identify the document and text subject to the proposed modification and should include a draft of proposed changes with supporting comments. Such requests will be considered in accordance with TMA’s standards development policies and procedures.

UL Standards & Engagement (ULSE)

Continuous Maintenance language applicable to all eligible Standards:

The most recent approval of UL as an American National Standard (ANS) occurred on ___ and covers the ___ Edition, including revisions through ___. Approval of UL ___ as an American National Standard is maintained using the continuous maintenance process. Comments or proposals for revision on any part of the Standard may be submitted to UL at any time. Written comments are to be sent to the UL staff person listed below.

Procedure to request voting membership on the standing canvass group also known as the Standards Technical Panel:
Contact the UL staff person listed below.

Schedule:

For standards maintained under the continuous maintenance option, UL shall address any comments or proposals for revision submitted for consideration on any part of a standard. UL will submit the proposal or comment to its consensus body for consideration within a reasonable time frame, not to exceed two years. The submitter will be notified of the expected time frame for consideration of the proposal. If no changes are made within four years of the ANSI approval date, UL shall apply for reaffirmation of the standard(s).

- UL 60034-5, Rotating Electrical Machines - Part 5: Degrees of Protection Provided by the Integral Design of Rotating Electrical Machines (IP Code) – Classification
- UL 60065, Standard for Safety for Audio, Video and Similar Electronic Apparatus - Safety Requirements
• UL 60079-0, Standard for Safety for Electrical Apparatus for Explosive Gas Atmospheres - Part 0: General Requirements
• UL 60079-1, Standard for Safety for Explosive Atmospheres – Part 1: Equipment Protection by Flameproof Enclosures “d”
• UL 60079-2, Explosive Atmospheres – Part 2: Equipment Protection by Pressurized Enclosure “p”
• UL 60079-5, Standard for Safety for Explosive Atmospheres - Part 5: Equipment Protection by Powder Filling “q”
• UL 60079-6, Standard for Safety for Explosive Atmospheres - Part 6: Equipment Protection by Oil-Immersion “o”
• UL 60079-7, Standard for Safety for Explosive Atmospheres - Part 7: Equipment Protection by Increased safety “e”
• UL 60079-11, Standard for Safety for Explosive Atmospheres - Part 11: Equipment Protection by Intrinsic Safety “i”
• UL 60079-15, Standard for Safety for Electrical Apparatus for Explosive Gas Atmospheres - Part 15: Construction, Test and Marking of Type of Protection “n” Electrical Apparatus
• UL 60079-17, Standard for Safety for Explosive Atmospheres – Part 17: Electrical Installations Inspection and Maintenance.
• UL 60079-25, Standard for Safety for Explosive Atmospheres – Part 25: Intrinsic Safety Electrical Systems
• UL 60079-26, Standard for Safety for Explosive Atmospheres - Part 26: Equipment with Equipment Protection Level (EPL) Ga
• UL 60079-29-1, Standard for Safety for Explosive Atmospheres - Part 29-1: Gas Detectors - Performance Requirements of Detectors for Flammable Gases
• UL 60079-29-4, Standard for Safety for Explosive Atmospheres - Part 29-4: Gas Detectors - Performance Requirements of Open Path Detectors for Flammable Gases
• UL 60079-31, Standard for Safety for Explosive Atmospheres – Part 31: Equipment Dust Ignition Protection by Enclosure “t”
• UL 60079-33, Standard for Safety for Explosive Atmospheres – Part 33: Equipment Protection by Special Protection “s”.
• UL 60079-46, Recommended Practice for Explosive Atmospheres - Part 46: Equipment Assemblies
• UL 60320-1, Standard for Safety for Appliance Couplers for Household and Similar General Purposes - Part 1: General Requirements
• UL 60320-3, Standard for Safety for Appliance Couplers for Household and Similar General Purposes - Part 3: Standard Sheets and Guages
• UL 60335-1, Standard for Safety for Safety of Household and Similar Electrical Appliances, Part 1: General Requirements
• UL 60335-2-3; Standard for Safety for Household and Similar Electrical Appliances, Part 2: Particular Requirements for Electric Irons.
• UL 60335-2-8, Standard for Safety for Household and Similar Electrical Appliances, Part 2: Particular Requirements for Shavers, Hair Clippers, and Similar Appliances
• UL 60335-2-24, Standard for Safety for Household and Similar Appliances, Particular Requirements for Refrigerating Appliances, Ice Cream Appliances and Ice Makers
• UL 60335-2-29, Household and Similar Electrical Appliances - Safety - Part 2-29: Particular Requirements for Battery Chargers
• UL 60335-2-34, Household and Similar Electrical Appliances, Part 2: Particular Requirements for Motor-Compressors
• UL 60335-2-40, Household and Similar Electrical Appliances, Part 2: Particular Requirements for Electrical Heat Pumps, Air-Conditioners and Dehumidifiers
• UL 60335-2-67, Standard for Safety for Household and Similar Electrical Appliances - Safety - Part 2-67: Particular Requirements for Floor Treatment Machines, for Commercial Use
• UL 60335-2-68, Household and Similar Electrical Appliances - Safety - Part 2-68: Particular Requirements for Spray Extraction Machines, for Commercial Use
• UL 60335-2-72, Standard for Safety for Household and Similar Electrical Appliances - Safety - Part 2-72: Particular Requirements for Floor Treatment Machines With or Without Traction Drive, for Commercial Use
• ANSI/UL 60335-2-113-2023, Standard for Safety for Household and Similar Electrical Appliances - Safety - Part 2-113: Particular Requirements for Beauty Care Appliances Incorporating Lasers and Intense Light Sources
• UL 60691, Thermal-Links - Requirements and Application Guide
• UL 60730-1, Automatic Electrical Controls - Part 1, General Requirements
• UL 60730-2-3, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Thermal Protectors for Ballasts for Tubular Fluorescent Lamps
• UL 60730-2-5, Standard for Safety for Automatic Electrical Controls for Household and Similar Use, Part 2: Particular Requirements for Automatic Electrical Burner Control Systems
• UL 60730-2-6, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Automatic Electrical Pressure Sensing Controls Including Mechanical Requirements
• UL 60730-2-7, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Timers and Time Switches
• UL 60730-2-8, Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Electrically Operated Water Valves, Including Mechanical Requirements
• UL 60730-2-9, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Temperature Sensing Controls
• UL 60730-2-10, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Motor Starting Relays
• UL 60730-2-11, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Energy Regulators
• UL 60730-2-12, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Electrically Operated Door Locks
• UL 60730-2-13, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Humidity Sensing Controls
• UL 60730-2-14, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Electric Actuators
• UL 60730-2-15, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Automatic Electrical Air Flow, Water Flow and Water Level Sensing Controls
• UL 60745-2-4-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-4: Particular Requirements for Sanders and Polishers Other Than Disk Type
• UL 60745-2-6-2006, Safety for Hand-Held Motor-Operated Electric Tools - Safety - Part 2-6: Particular Requirements for Hammers
• UL 60745-2-8-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-8: Particular Requirements for Shears and Nibblers
• UL 60745-2-12-2005, Standard for Safety for Hand-held Motor-operated Electric Tools - Safety - Part 2-12: Particular Requirements for Concrete Vibrators
• UL 60745-2-14-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-14: Particular Requirements for Planers
• UL 60745-2-17-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-17: Particular Requirements for Routers and Trimmers
• UL 60745-2-20, Standard for Hand-Held Motor-Operated Electric Tools - Safety - Part 2-20: Particular Requirements for Band Saws
• UL 60745-2-21, Standard for Hand-Held Motor-Operated Electric Tools - Safety - Part 2-21: Particular Requirements for Drain Cleaners
• UL 60939-3, Passive Filter Units for Electromagnetic Interference Suppression - Part 3: Passive Filter Units for Which Safety Tests are Appropriate
• UL 60947-1, Standard for Safety for Low-Voltage Switchgear and Controlgear - Part 1: General Rules
• UL 60947-4-1, Standard for Safety for Low-Voltage Switchgear and Controlgear; Part 4-1: Contactors and motor-starters; Electromechanical contactors and motor-starters
• UL 60947-4-2, Low-Voltage Switchgear and Controlgear - Part 4-2: Contactors and Motor-Starters - AC Semiconductor Motor Controllers and Starters
• UL 60947-5-1, Low-Voltage Switchgear and Controlgear - Part 5-1: Control Circuit Devices and Switching Elements - Electromechanical Control Circuit Devices
• UL 60947-5-2, Low-Voltage Switchgear and Controlgear - Part 5-2: Control Circuit Devices and Switching Elements - Proximity Switches
• UL 60947-7-1, Low-Voltage Switchgear And Controlgear - Part 7-1: Ancillary Equipment - Terminal Blocks for Copper Conductors
• UL 60947-7-2, Low-Voltage Switchgear and Controlgear - Part 7-2: Ancillary Equipment - Protective Conductor Terminal Blocks for Copper Conductors
• UL 60947-7-3, Standard for Fuse Terminal Blocks
• UL 60947-7-4, Standard for Safety for Low-Voltage Switchgear and Controlgear - Part 7-4: Ancillary Equipment-PCB Terminal Blocks for Copper Conductors
• UL 60950-1, Information Technology Equipment - Safety - Part 1: General Requirements
• UL 60950-21, Information Technology Equipment -- Safety -- Part 21: Remote Power Feeding
• UL 60950-22, Information Technology Equipment - Safety - Part 22: Equipment to be Installed Outdoors
- UL 60950-23-2007, Information Technology Equipment - Safety - Part 23: Large Data Storage Equipment
- UL 61010-1, Electrical Equipment for Measurement, Control, and Laboratory Use; Part 1: General Requirements
- UL 61010-031, Standard for Safety for Safety Requirements for Measurement, Control, and Laboratory Use - Part 031: Safety Requirements for Hand-Held Probe Assemblies for Electrical Measurement and Test
- UL 61010-2-020, Standard for Safety for Safety Requirements for Measurement, Control, and Laboratory Use - Part 2-020: Particular Requirements for Laboratory Centrifuges
- UL 61010-2-030, Standard for Safety for Safety Requirements for Electrical Equipment for Measurement, Control and Laboratory Use - Part 2-030: Particular Requirements for Equipment Having Testing or Measuring Circuits
- UL 61010-2-033, Electrical Equipment for Measurement, Control, and Laboratory Use, Part 2-033: Particular Requirements for Hand-Held Multimeters and Other Meters, for Domestic and Professional Use, Capable of Measuring Mains Voltage
- UL 61010-2-091, Electrical Equipment for Measurement, Control, and Laboratory Use, Part 2-091: Particular Requirements for Cabinet X-Ray Systems
- UL 61010-2-201, Safety Requirements for Electrical Equipment for Measurement, Control, and Laboratory Use - Part 2-201: Particular Requirements for Control Equipment
• UL 61058-1, Switches for Appliances - Part 1: General Requirements
• UL 61058-1-1, Standard for Safety for Switches for Appliances - Part 1-1: Requirements for Mechanical Switches
• UL 61058-1-2, Standard for Safety for Switches for Appliances - Part 1-2: Requirements for Electronic Switches
• UL 61215-1, Standard for Terrestrial photovoltaic (PV) modules - Design qualification and type approval - Part 1: Test requirements
• UL 61215-1-1, Standard for Terrestrial photovoltaic (PV) modules - Design qualification and type approval - Part 1-1: Special requirements for testing of crystalline silicon photovoltaic (PV) modules
• UL 61215-1-2, Standard for Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-2: Special requirements for testing of thin-film Cadmium Telluride (CdTe) based photovoltaic (PV) modules
• UL 61215-1-3, Standard for Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-3: Special requirements for testing of thin-film amorphous silicon based photovoltaic (PV) modules
• UL 61215-1-4, Standard for Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-4: Special requirements for testing of thin-film Cu(In,Ga)(S,Se)2 based photovoltaic (PV) modules
• UL 61215-2, Standard for Terrestrial photovoltaic (PV) modules - Design qualification and type approval - Part 2: Test procedures
• UL 61496-2, Standard for Safety for Electro-Sensitive Protective Equipment, Part 2: Particular Requirements for Equipment Using Active Opto-Electronic Devices
• UL 61646, Standard for Thin-Film Terrestrial Photovoltaic (PV) Modules - Design Qualification and Type Approval
• UL 61724-1, Standard for Photovoltaic System Performance - Part 1: Monitoring
• UL 61724-2, Standard for Specification for Photovoltaic system performance - Part 2: Capacity evaluation method
• UL 61724-3, Standard for Photovoltaic system performance - Part 3: Energy evaluation method
• UL 61730-1, Photovoltaic (PV) Module Safety Qualification - Part 1: Requirements for Construction
• UL 61730-2, Photovoltaic (PV) Module Safety Qualification - Part 2: Requirements for Testing
• UL 61810-1, Standard for Safety for Electromechanical Elementary Relays - Part 1: General Requirements
• UL 61800-5-1, Adjustable Speed Electrical Power Drive Systems - Part 5-1: Safety Requirements - Electrical, Thermal and Energy
• UL 61800-5-2, Adjustable Speed Electrical Power Drive Systems - Part 5-2: Safety Requirements – Functional
• UL 61965 Standard for Mechanical Safety for Cathode Ray Tubes
• UL 62093, Standard for Balance-of-System Components for Photovoltaic Systems - Design Qualification Natural Environments

• UL 62108, Standard for Concentrator Photovoltaic (CPV) Modules and Assemblies - Design Qualification and Type Approval
• UL 62109-1, Standard for Safety of power converters for use in photovoltaic power systems - Part 1: General requirements
• UL 62133, Standard for Safety for Secondary Cells and Batteries Containing Alkaline or Other Non-Acid Electrolytes - Safety Requirements for Portable Sealed Secondary Cells, and for Batteries Made From Them, for Use in Portable Applications
• UL 62275, Cable Management Systems - Cable Ties for Electrical Installations
• UL 62368-1, Audio/video, information and communication technology equipment - Part 1: Safety requirements
• UL 62446-1, Photovoltaic (PV) Systems - Requirements for Testing, Documentation and Maintenance - Part 1: Grid Connected Systems - Documentation, Commissioning Tests and Inspection
• UL 62446-2, Photovoltaic (PV) Systems - Requirements for Testing, Documentation and Maintenance - Part 2: Grid Connected Systems - Maintenance of PV Systems
• UL 62790, Standard for Junction Boxes for Photovoltaic Modules - Safety Requirements and Tests
• UL 62817, Photovoltaic systems – Design qualification of solar trackers
• UL 62841-1, Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 1: General Requirements
• UL 62841-2-4: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 2-4: Particular Requirements for Sanders and Polishers Other Than Disc Type
• UL 62841-2-8, Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 2-8: Particular Requirements For Hand-Held Shears and Nibblers

• UL 62841-2-11, Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 2-11 Particular Requirements for Hand-Held Reciprocating Saws

• UL 62841-2-14: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 2-14: Particular Requirements for Planers

• UL 62841-2-17, Electric Motor-Operated Hand-Held Tools, Transportable Tools and Lawn and Garden Machinery - Safety - Part 2-17: Particular Requirements for Hand-Held Routers

• UL 62841-3-1: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 3-1: Particular Requirements for Screwdrivers and Transportable Table Saws

• UL 62841-3-4 Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 3-4: Particular Requirements for Transportable Bench Grinders

• UL 62841-3-6: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 3-6: Particular Requirements for Transportable Diamond Drills With Liquid System

• UL 62841-3-9, Standard for Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery – Safety – Part 3-9: Particular Requirements for Transportable Mitre Saws

• UL 62841-3-10: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 3-10: Particular Requirements for Transportable Cut-Off Machines

• UL 62841-4-1: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery – Safety – Part 4-1: Particular Requirements For Chain Saws

• UL 62841-4-2: Standard for Safety for Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 4-2 Particular Requirements for Hedge Trimmers

• UL 62841-4-4, Standard for Safety for Electric Motor-Operated Hand-Held Tools, Transportable Tools and Lawn and Garden Machinery – Safety – Part 4-4: Particular Requirements for Lawn Trimmers, Lawn Edge Trimmers, Grass Trimmers, Brush Cutters and Brush Saws

• UL 62841-4-1000: Safety for Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - 62841-4-1000: Particular Requirements For Utility Machines

• UL 62852, Connectors for DC-Application in Photovoltaic Systems-Safety Requirements and Tests
UL 62915, Standard for Photovoltaic (PV) Modules – Type Approval, Design and Safety Qualification – Retesting
UL 62986, Standard for Safety for Plugs, Socket-Outlets and Couplers with Arcuate Contacts

UL 120002, Certificate Standard for AEx Equipment for Hazardous (Classified) Locations
UL 120101, Standard for Safety for Definitions and Information Pertaining to Electrical Equipment in Hazardous Locations
UL 120202, Standard for Safety for Recommendations for the Preparation, Content, and Organization of Intrinsic Safety Control Drawings
UL 120404, Standard for Safety for Pressurized Enclosures
UL 122001, General Requirements for Electrical Ignition Systems for Internal Combustion Engines in Class 1, Division 2 or Zone 2, Hazardous (Classified) Locations
UL 121201, Standard for Safety for Nonincendive Electrical Equipment for Use in Class I and II, Division 2 and Class III, Divisions 1 and 2 Hazardous (Classified) Locations
UL 121203, Recommended Practice for Portable/Personal Electronic Products Suitable for Use in Class I, Division 2, Class I, Zone 2, Class II, Division 2, Class III, Division 1, Class III, Division 2, Zone 21 and Zone 22 Hazardous (Classified) Locations.
UL 122701, Standard for Safety for Requirements for Process Sealing Between Electrical Systems and Flammable or Combustible Process Fluids
UL 920001, Standard for Performance Requirements for Toxic Gas Detectors
UL 920004, Standard for Safety for Performance Requirements for Open Path Toxic Gas Detectors
UL 920401, Part 1, Standard for Safety for Performance Requirements for Instruments Used to Detect Oxygen-Deficient/Oxygen-Enriched Atmospheres
