The “ANSI Essential Requirements” provides three options for the maintenance of American National Standards (ANS): periodic maintenance, continuous maintenance and stabilized maintenance (See clause 4.7 www.ansi.org/essentialrequirements).

Continuous maintenance is defined as follows:
The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures set-forth in the ANSI Essential Requirements.

In addition, the ANSI Essential Requirements provides for the following:
A PINS is not required for revisions of an American National Standard that is maintained under continuous maintenance and (1) is registered as such on the ANSI website, (2) has a notice in the standard that the standard is always open for comment and how to submit comments, and (3) has information on the developer’s website that the standard is under continuous maintenance and how to submit comments.

These ANSI-accredited standards developers maintain some or all of their American National Standards using Continuous Maintenance:
- AAMI (Association for the Advancement of Medical Instrumentation)
- AARST (The AARST Consortium on National Radon Standards)
- AGA (American Gas Association)
- AGSC-AGRSS (Auto Glass Safety Council)
- ASC X9 (Accredited Standards Committee X9, Incorporated)
- ASHRAE (American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.)
- ASME (American Society of Mechanical Engineers)
- ASTM (ASTM International)
- GBI (The Green Building Initiative)
- HL7 (Health Level Seven)
- IESNA (The Illuminating Engineering Society of North America)
- MHI (ASC MH10) (Material Handling Industry)
- NAHBRC (NAHB Research Center, Inc.)
- NBBPVI (National Board of Boiler and Pressure Vessel Inspectors)
- NCPDP (National Council for Prescription Drug Programs)
- NISO (National Information Standards Organization)
- NSF (NSF International)
- PRCA (Professional Ropes Course Association)
- RESNET (Residential Energy Services Network)
- TIA (Telecommunications Industry Association)
- TCNA (Tile Council of North America)
- UL (Underwriters Laboratories, Inc.)
The Association for the Advancement of Medical Instrumentation (AAMI)
Standards Registered Under Continuous Maintenance:

See UL statement: ANSI/AAMI/UL 2800-1-2019, Standard for Safety for Medical Device Interoperability

This standard is maintained under continuous maintenance procedures. AAMI has created a notification registry that will send e-mail announcements when any maintenance activity occurs to the recommended practice.

Comments or proposals for revisions to any part of the standard may be submitted to AAMI any time.

Written comments are to be sent to: Standards Dept., AAMI, 1110 N. Glebe Road, Suite 220, Arlington, VA 22201-4795. Comments may also be e-mailed to: standards@aami.org.

The following person may be contacted by those interested in submitting changes:

Joseph C. Lewelling
Vice President, Standards Development
AAMI
1110 North Glebe Road, Ste. 220, Arlington, Virginia 22205
703-525-4890 ext. 206
703-276-0792
E-mail Address: jlewelling@aami.org

Program for Periodic Publication

<table>
<thead>
<tr>
<th>November (year)*</th>
<th>Solicit requests for change from committee and public. Allow at least two months to submit. Also solicit new committee members.</th>
</tr>
</thead>
<tbody>
<tr>
<td>By end of March (year +1)</td>
<td>Deadline for requests for change.</td>
</tr>
<tr>
<td>First meeting (year +1) (usually April)</td>
<td>Review new requests for change including any deferred from previous review cycles and agree on which to propose (with or without change) for formal ballot and public review, which to reject and which to defer to the next review cycle.</td>
</tr>
<tr>
<td>By mid-July (year +1)</td>
<td>Document first meeting results and put proposals for change on 6-week ballot and public review.</td>
</tr>
<tr>
<td>By end of August (year +1)</td>
<td>Ballot and public review over.</td>
</tr>
<tr>
<td>Second meeting (year +1) (usually November)</td>
<td>Review ballot and public review results and respond to comments. If needed and as time permits, begin working on any deferred requests for following year’s revision cycle.</td>
</tr>
</tbody>
</table>

*For the first revision cycle, the request for changes will need to start later than indicated in this schedule (and other dates adjusted as needed)
The AARST Consortium on National Radon Standards (AARST)

The approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

1. A documented program for periodic publication of revisions has been established. A copy is attached.

2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

   "This standard is under continuous maintenance by the AARST Consortium on National Radon Standards for which the Executive Stakeholder Committee has established a documented program for regular publication of addenda or revisions, including procedures for timely, documented, consensus action on requests for change to any part of the standard. The change submittal form, instructions, and deadlines may be obtained in electronic form from at www.radonstandards.us."

   (Note that contact information and address for the AARST administrative office is also provided next to these statements as relative to any inquiry such as appeals, etc.)

3. Procedures for timely, documented consensus action on each request for change have been established. A copy is attached.

4. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

   Name: Gary Hodgden (c/o AARST Administrative Offices)
   Address: 475 South Church Street - Suite 600
   City: Hendersonville, NC 28792
   Phone: 202-830-1110
   Fax: 913-780-2090
   E-mail: StandardsAssist@gmail.com

5. No portion of the standard(s) shall be excluded from the revision process.
6. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.

7. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

AGA (ASC B109) Gas Displacement Meters

Continuous Maintenance language applicable to all eligible standards:
NOTICE: This American National Standard may be revised or withdrawn at any time. Whenever any revisions are deemed advisable, recommendations should be forwarded to the American Gas Association. A form is included for that purpose at the end of this standard.

Standards Registered Under Continuous Maintenance:

- B109.1 - Diaphragm Type Gas Displacement Meters (Under 500 Cubic Feet Per Hour Capacity)
- B109.2 - Diaphragm Type Gas Displacement Meters (500 Cubic Feet Per Hour Capacity and Over)
- B109.3 - Rotary Type Gas Displacement Meters
- B109.4 - Self-Operated Diaphragm-Type Natural Gas Service Regulators

Schedule (Relevant sections from ASC B109 Procedures Book copied below):

7.0 REVIEW OF STANDARDS
7.1 Revisions of Standards
Each standard under the jurisdiction of the Committee shall be reviewed in light of requests and recommendations, and revisions to standards initiated as warranted. Standards may be revised as frequently as necessary in line with indicated safety needs, industry developments or current state-of-the-art.
7.2 Reaffirmation of Standards
An existing standard which has not been revised for five (5) years shall be reviewed at the beginning of the fifth year. If it is determined that the standard is needed but that no modification is required, the Committee shall recommend to ANSI the reaffirmation of the standard without revision.
7.3 Withdrawal of Standards
Standards which have not been revised (see 7.1) and not reaffirmed (see 7.2) shall be withdrawn. Consideration of withdrawal may be initiated at any time.

AGSC-AGRSS (The Auto Glass Safety Council) hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration form will be submitted to PSA/ANSI.

ANSI/AGSC/AGRSS 003-2015

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

1. A documented program for periodic publication of revisions has been established. A copy is attached.
2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows: Requests for changes and/or on the process associated with submittals of such requests may be made to info@agsc.org.
3. Procedures for timely, documented consensus action on each request for change have been established. A copy is attached.
4. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

   Name: Kathy Bimber  
   Address: 20 P G A Drive, Suite 201  
   City: Stafford  
   Phone: 5407207484 ext. 137  
   Fax: 5407205687  
   E-mail: kbimber@glass.com

5. No portion of the standard(s) shall be excluded from the revision process.
6. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.

7. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

ASC X9 Accredited Standards Committee X9, Incorporated

Continuous Maintenance language applicable to all eligible standards:

NOTICE: INSTRUCTIONS FOR SUBMITTING A PROPOSED CHANGE TO THIS ASC X9 STANDARD UNDER CONTINUOUS MAINTENANCE

This standard is maintained under continuous maintenance procedures by the Accredited Standards Committee X9, Inc. which has established a documented program/process for regular publication of addenda or revisions, including procedures for timely, documented, consensus action on requests for change to any part of the standard.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of approval.

Standards Registered Under Continuous Maintenance:
- X9.93 Financial Transaction Message – Electronic Benefits Transfer (EBT)
  - Part 1: Messages
  - Part 2: Files
- X9.121 Balance and Transaction Reporting Standard (BTRS)
- X9.129 Legal Orders Exchange

Consideration will be given to proposed changes within 45 days of submittal. Proposed changes must be submitted to:

continuous_maintenance@x9.org
using the published change form

The following person(s) may be contacted by those interested in submitting changes:

Ambria Frazier

American National Standards Maintained Under Continuous Maintenance
American Society of Mechanical Engineers (ASME)

Continuous Maintenance language applicable to all eligible standards:
Revised editions of ASME Codes and Standards result from committee consideration of factors such as technological advances, new data, and changing environmental and industry needs. Proposals for revisions are processed in accordance with ASME’s accredited Codes and Standards Development Committee Procedures and supplemental procedures of the pertinent standards development committee.
Requests for revisions may be submitted at any time and on any portion of the code or standard. Requests will be considered by the responsible committee for the next edition of the code or standard, as applicable.
Contacts: See associated standards below the list of technical staff contacts.

The Green Building Initiative (GBI)
Standards Registered Under Continuous Maintenance:

ANSI/GBI 01-2019: Green Globes Assessment Protocol for Commercial Buildings

This Standard is maintained under continuous maintenance procedures. GBI publishes notices for meetings and calls for public comment in ANSI Standards Action as required. GBI has a list of stakeholders that will receive email announcements when any maintenance activity occurs to the recommended practice. GBI’s website contains a place for new stakeholders to register. Comments or proposals for revisions to any part of the Standard may be submitted to GBI at any time. The following person(s) may be contacted by those interested in submitting changes:

Name: Emily Marx
E-mail: comment@thegbi.org
For ANSI/GBI 01-2019 – Year 1 = 2019 and Year 2 = 2020

Program for Periodic Publication

<table>
<thead>
<tr>
<th>Usually September/October (year 1)</th>
<th>Solicit requests for change from Consensus Body and public/stakeholders (usually combined Consensus Body ballot and public review). Allow at least 45 days to submit. Also solicit new Consensus Body members if needed.</th>
</tr>
</thead>
<tbody>
<tr>
<td>First meeting usually January (year 1)</td>
<td>Review voting results and new requests for change including any deferred from previous review cycles and agree on which to propose (with or without change) for formal ballot and public review, which to reject and which to defer to the next review cycle.</td>
</tr>
<tr>
<td>Usually by mid-April (year 1)</td>
<td>Document first meeting results and notify Consensus Body members and commenters of Consensus Body decisions.</td>
</tr>
<tr>
<td>Second meeting usually June/July (year 2)</td>
<td>Review unresolved objections and new proposals. Agree on which to accept (with or without change), which to reject and which to defer to the next review cycle.</td>
</tr>
<tr>
<td>Usually by mid-September (year 2)</td>
<td>Document second meeting results and notify Consensus Body members and commenters of Consensus Body decisions.</td>
</tr>
<tr>
<td>Usually October (year 2)</td>
<td>Conduct Recirculation Letter Ballot and, if necessary, public review. Allow at least 45 days to submit</td>
</tr>
<tr>
<td>Third meeting usually December / January (year 2)</td>
<td>Review ballot results and respond to comments. If needed and as time permits, begin working on any deferred requests for following year’s revision cycle. Solicit new committee members.</td>
</tr>
<tr>
<td>Usually March (year 2)</td>
<td>Process procedural appeals</td>
</tr>
<tr>
<td>Usually May (year 3) (new cycle begins)</td>
<td>Publish revised standard. Solicit new committee members.</td>
</tr>
</tbody>
</table>
Health Level Seven, Inc. (HL7)

Health Level Seven, Inc. (HL7) hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option.

No standards at this time are under Continuous maintenance.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

8. A documented program for periodic publication of revisions has been established. A copy is enclosed. HL7 publishes a Normative Edition once a year, typically in the April timeframe.

9. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows: This American National Standard is maintained using the continuous maintenance process. Comments or proposals for revision to any part of this standard may be submitted to HL7 at any time. Comments or proposals may be submitted online at www.HL7.org or in writing to the Associate Executive Director at Health Level Seven, Inc., 3300 Washtenaw Avenue Suite 227, Ann Arbor, Michigan 48104-4261. Comments or proposals submitted in writing must identify the standard in question and include the submitter’s name, affiliation, telephone number, and e-mail address.

10. Procedures for timely, documented consensus action on each request for change have been established. A copy is enclosed. Refer to section 15.04.03.01 of the HL7 Governance and Operations Manual (attached).

11. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

   Karen Van Hentenryck
   Associate Executive Director
   Health Level Seven
   3300 Washtenaw Ave., Suite 227
   Ann Arbor, MI

12. No portion of the standard(s) shall be excluded from the revision process.

13. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard(s) shall be taken in accordance with clause 4.7 of the ANSI Essential Requirements.

14. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI in a timely fashion.

Returned by:
Name: Karen Van Hentenryck
Title: Associate Executive Director

Facsimile Number: 734-677-6622
E-mail Address: Karenvamp@HL7.org
The Illuminating Engineering Society of North America (IESNA)

Standards Maintained Under Continuous Maintenance: (Additions since July 10, 2018)

ANSI/IES RP-7-17 Recommended Practice for Lighting Industrial Facilities
ANSI/IES RP-8-18, IES Recommended Practice for Design and Maintenance of Roadway and Parking Facility Lighting
ANSI/IES RP-27.2-00/R17, Recommended Practice for Photobiological Safety for Lamps and Lamp Systems – Measurement Techniques
ANSI/IES RP-27.3-17, Recommended Practice for Photobiological Safety for Lamps – Risk Group Classification and Labeling
ANSI/IES/AVIXA RP-38-17, Lighting Performance for Small-to-Medium-Sized Videoconferencing Rooms
ANSI/IES TM-30-18, IES Method for Evaluating Light Source Color Rendition
ANSI/IES LM-79-19, Approved Method: Optical and Electrical Measurements of Solid-State Lighting Products

Submit to: psa@ansi.org

Schedule:

All submittals received by IESNA are acknowledged and forwarded to the Committee for consideration. The Committee will inform submitters of the disposition of their substantive proposals. Committee consideration will be given to proposed changes according to the following schedule:

Deadline: December 31
Proposal Considered: By June 30

Committee consideration will be given to proposed changes by June 30 if proposed changes are received by the Director of Educational and Technical Development no later than December 31. Proposals received after December 31 shall be considered by the Committee no later than June 30 of the following year.

NOTICE INSTRUCTIONS FOR SUBMITTING A PROPOSED CHANGE TO THESE STANDARDS UNDER CONTINUOUS MAINTENANCE

This standard is maintained under continuous maintenance procedures for which IES has an established and documented program for regular publication of addenda or revisions, including procedures for timely, documented, consensus action on requests for change to any part of the standard. Committee consideration will be given to proposed changes by June 30 if proposed changes are received by the IES Director of Technology no later than December 31. Proposals received after December 31 shall be considered by the Committee no later than June 30 of the following year.

Submittal Format

Proposed changes must be submitted to the IES Director of Technology in the announced published format. However, changes may be accepted in an earlier published format, if the differences are immaterial to the proposed change submittal. If the Director of Technology
concludes that a current form must be utilized, the proposer may be given up to 20 additional days to resubmit the proposed changes in the current format.

Specific changes in the text or values are required and must be substantiated. Any change proposals that do not meet these requirements will be returned to the proposer. Supplemental background documents to support changes submitted may be included.

**Submission to the Committee Chair**
The Director of Technology shall forward proposed changes received on appropriate forms to the Committee chair for assigning to designated Committee members (responders) to develop responses to submitters of proposed changes.

**Review and Clarification**
Responders shall review proposals and should contact the proposer if necessary for clarification.

**Response Recommendation**
Designated responders shall draft a recommended Committee response, including any recommended changes to the standard. The responder’s recommended responses shall be submitted to the Committee chair in electronic form usable by Society Staff, including any recommended change to the standard in response to proposals received. (If a subcommittee is preparing a response see procedure under Exceptions above.)

Options for Committee response are limited to:
- a) Proposed change accepted for public review without modification
- b) Proposed change accepted for public review with modification
- c) Proposed change accepted for further study
- d) Proposed change rejected

The responder shall provide reasons for any recommendation other than option a) “accepted for public review without modification.”

The designated responder shall not recommend option c) “proposed change accepted for further study” unless the further study can be completed by October 1 of that year and the Committee can then vote for option a), b), or d) no later than November 15 of that year.

**Editing**
The Committee chair or his/her designee shall edit the draft responses and circulate the edited drafts to the Committee for review.

**To Access Form for Proposing Change to an IESNA Standard Under Continuous Maintenance:**
Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

Brian Liebel, IES Director of Standards

Material Handling Industry, MHI (ASC MH10)

Standards Maintained Under Continuous Maintenance:

MH10.8.2; Data Identifier and Application Identifier Standard

Schedule

Proposed changes to the standard that were accepted by the MH10.8.2 Data Identifier Maintenance Committee will be integrated into the previously published version at the recommendation of the committee. Upon approval of the new version by MH10 Subcommittee 8 and the full MH10 committee, the standard will be published as a new version.

The committee plans to incorporate accepted revisions into the standard as frequently as necessary, but in no case will a published revised standard be issued more frequently than yearly, in line with indicated needs and industry developments. Each accepted revision since the last published version shall be identified in a “Document Maintenance Summary” appearing immediately before the Table of Contents of the standard.

NAHBRC (NAHB Research Center, Inc.)
NAHB Research Center, hereby informs ANSI that the following approved American National Standard National Green Building Standard ICC 700 shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted to PSA/ANSI.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

Standards Maintained Under Continuous Maintenance:

**ICC 700, National Green Building Standard**

The following website details the maintenance schedule and contact information for the National Green Building Standard ICC 700.

This website was established for the initial printing of ICC 700 and has been maintained continuously.

1. A documented program for periodic publication of revisions has been established. A copy is enclosed.
   (see website)

2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:
   (see website)

3. Procedures for timely, documented consensus action on each request for change have been established.
   (See Draft NAHB Research Center’s Standards Development and Maintenance Program, sections 1.4.4.2 and 4.4.2.11, see website)

4. The following person(s) may be contacted by those interested in submitting:
   Thomas Kenney
tkenney@nahbrc.com or standards@nahbrc.com or online
   www.nahbrc.com/technical/standards
   301-430-6246 ph,
   301-430-6180 fx
   NAHB Research Center
   400 Prince Georges Blvd.
   Upper Marlboro, MD 20774

5. No portion of the standard(s) shall be excluded from the revision process. Every section is represented by the online proposal form [http://ngbscomments.nahbrc.org/](http://ngbscomments.nahbrc.org/) and as specified in section 1.4.4.2 of Draft NAHB Research Center’s Standards Development and Maintenance Program, excerpted below:
6. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard(s) shall be taken in accordance with clause 4.7 of the ANSI Essential Requirements.
(see section #5 above)

7. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI in a timely fashion.

E-mail Address: tkenney@nahbrc.com
National Board of Boiler and Pressure Vessel Inspectors (NBBPVI)

**Continuous Maintenance language applicable to all eligible standards:**
The NBIC Committee meets regularly to consider revisions of the rules, new rules, and requests for interpretations. Requests for interpretation must be addressed to the Secretary in writing and must give full particulars in order to receive consideration and a written interpretation (see Mandatory Appendix "1" covering preparation of technical inquiries.) Proposed revisions to the code resulting from inquiries will be presented to the NBIC Committee for appropriate action.

**Standards Maintained Under Continuous Maintenance:**
ANSI/NB 23, The National Board Inspection Code

**Schedule:**
Colored-sheet Addenda, which include revisions and additions to the Code, are published annually. Addenda are permissive on the date issued and become effective six months after the date of issue. The addenda will be sent automatically to purchasers of the Code up to the publication of the next issue.

How to Submit a Proposed Change to an NCPDP Standard Under Continuous Maintenance

The Data Element Request Form (DERF) is the documentation used to request an addition or modification to an NCPDP standard. Anyone may submit a DERF to NCPDP along with accompanying information, including the proposed standard, implementation guide, data element dictionary, and modification log if needed.

A DERF must be completed and submitted with the proper documentation according to an established schedule in order for it to be reviewed during a quarterly work group meeting. The DERF is distributed to NCPDP members via the NCPDP website prior to the work group meeting.

National Information Standards Organization (NISO)
The following standard(s) are maintained under continuous maintenance procedures.

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

1. A documented program for periodic publication of revisions has been established. A copy is attached.
2. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests.
3. Procedures for timely, documented consensus action on each request for change have been established and no portion of the standard shall be excluded from the revision process. A copy is attached.
4. In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.
5. Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

Continuous Maintenance Procedures Z39.96-2019: 
JATS: Journal Article Tag Suite

ANSI Continuous Maintenance

In accordance with the ANSI Essential Requirements, the ANSI/NISO Z39.96-2019: JATS: Journal Article Tag Suite standard is maintained under continuous maintenance procedures.

Proposed Changes

Under continuous maintenance procedures anyone may propose changes at any time. Each change will be considered by the Z39.96 JATS Standing Committee according to a definite schedule, shown in Section 2. The Standing Committee and NISO leadership committees may also propose changes.

The Standing Committee shall follow the procedures in this section in lieu of periodic maintenance and stabilized maintenance procedures. All changes to the Z39.96 standard shall be submitted in compliance with this section.

Section 1. Instructions for Submittal of Proposed Change to ANSI/NISO Standard Z39.96 Under Continuous Maintenance

Comments or proposals for revisions to any part of the standard may be submitted in writing (including electronically) to NISO at any time. Submissions must be accompanied by the submitter’s name, affiliation, and e-mail address.

Written comments are to be submitted via the NISO web site, to a form linked from the JATS page at https://www.niso.org/standards-committees/jats

If it is not possible for the submitter to access the web form, alternatively, comments may be sent to:

National Information Standards Organization (NISO) - ANSI/NISO Z39.96
Attn: Standards Program Manager
3600 Clipper Mill Road, Suite 302
Baltimore, MD 21211
Tel.: 301-654-2512 (main)
Fax: 410-685-5278
E-mail: nisohq@niso.org

In addition, the following person(s) may be contacted by those interested in submitting changes:

Jeff Beck
Co-chair, ANSI/NISO Z39.96 Standing Committee
National Library of Medicine
E-mail: beck@ncbi.nlm.nih.gov

B. Tommie Usdin
Co-chair, ANSI/NISO Z39.96 Standing Committee
Mulberry Technologies
E-mail: btusdin@mulberrytech.com

Section 2. Maintenance Review Schedule

All submittals received by NISO or the Standing Committee chairs are acknowledged and forwarded to the JATS Standing Committee for consideration.
The Standing Committee will schedule meetings via teleconference or in person when a substantive number of comments for review have been received, but in any case no less frequently than twice a year if there are unaddressed comments, with meetings to be held more often at the discretion of the co-chairs.

The Standing Committee will inform submitters of the disposition of their proposals within one month following each meeting.

**Section 3. Resolution of Proposed Changes**

The JATS Standing Committee may respond to submissions in the following ways:

a. Proposed change accepted without modification  
b. Proposed change accepted with modification  
c. Proposed change accepted for further study  
d. Proposed change rejected

Responses are voted upon by the Standing Committee and approved by committee majority.

Accepted changes (response a or b) shall be recorded in a change log which will be posted to the JATS page at [https://www.niso.org/standards-committees/jats](https://www.niso.org/standards-committees/jats) and circulated to JATS-List ([http://www.mulberrytech.com/JATS/JATS-List/](http://www.mulberrytech.com/JATS/JATS-List/)).

The Standing Committee shall provide reasons for its responses and an estimated schedule for any action. Proposed changes accepted for further study will be again brought to the Standing Committee for resolution no later than the next quarterly review period.

All submitted changes and Standing Committee responses will be recorded and made available at www.niso.org. In addition, NISO staff will send notifications to JATS-list ([http://www.mulberrytech.com/JATS/JATS-List/](http://www.mulberrytech.com/JATS/JATS-List/)) when any maintenance activity occurs to the standard.

When a sufficient number of accepted changes have been accumulated, but no later than four years after the previous approval date, the JATS Standing Committee will prepare a revision of the standard and the revision will be processed according to the NISO Operating Procedures provisions for balloting and approving a revised standard.

**Section 4. Publication of a New Edition or Reaffirmation**

A new edition of a standard under continuous maintenance shall occur within five years of the prior publication date. An existing standard that has not been revised for four (4) years of the original publication date shall be reviewed at the beginning of the fourth year. If it is determined that the standard is needed but that no modification is required, action to reaffirm the standard shall be initiated.

ANSI/NISO Z39.102-2017: STS: Standards Tag Suite standard is maintained under continuous maintenance procedures, in accordance with [NISO Operating Procedures Section 7.6](https://www.niso.org/standards-committees/niso-operating-procedures) and [ANSI Essential Requirements Section 4.7.2](https://www.niso.org/standards-committees/ansi-essential-requirements). This document was approved by the STS Standing Committee on November 9, 2018 and the NISO Information Creation & Curation Topic Committee on February 8, 2019.
Under continuous maintenance procedures anyone may propose changes at any time. Each change will be considered by the Z39.102 STS Standing Committee according to a definite schedule, shown in Section 2 below. The Standing Committee and NISO leadership committees may also propose changes.

The Standing Committee shall follow the procedures below in lieu of periodic maintenance and stabilized maintenance procedures. All changes to the Z39.102 standard shall be submitted in compliance as described below.

Section 1. Instructions for Submittal of Proposed Change to ANSI/NISO Standard Z39.102 Under Continuous Maintenance

Comments or proposals for revisions to any part of the standard may be submitted in writing (including electronically) to NISO at any time. Submissions must be accompanied by the submitter’s name, affiliation, and e-mail address.

Written comments are to be submitted via the NISO web site, to a form linked from the STS Committee page at https://www.niso.org/standards-committees/sts

If it is not possible for the submitter to access the web form, alternatively, comments may be sent to:

National Information Standards Organization (NISO) - ANSI/NISO Z39.102
Attn: Standards Program Manager
3600 Clipper Mill Road, Suite 302
Baltimore, MD 21211
Tel.: 301-654-2512 (main)
Fax: 410-685-5278
E-mail: nisohq@niso.org

In addition, the following person(s) may be contacted by those interested in submitting changes:

Bruce Rosenblum
Co-chair, ANSI/NISO Z39.102 Standing Committee
Inera, Inc.
E-mail: bruce@inera.com

Robert Wheeler
Co-chair, ANSI/NISO Z39.102 Standing Committee
American Society of Mechanical Engineers (ASME)
E-mail: wheelerr@asme.org

Section 2. Maintenance Review Schedule

All submittals received by NISO or the Standing Committee chairs are acknowledged and forwarded to the STS Standing Committee for consideration.

The Standing Committee will schedule meetings via teleconference or in person when a sufficient number of substantive comments for review have been received, but in any case no less frequently than once a year if there are unaddressed comments, with meetings to be held more often at the discretion of the co-chairs.

The Standing Committee will inform submitters of the disposition of their proposals within one month following each meeting.

Section 3. Resolution of Proposed Changes

The STS Standing Committee may respond to submissions in the following ways:
a. Proposed change accepted without modification  
b. Proposed change accepted with modification  
c. Proposed change accepted for further study  
d. Proposed change rejected

Proposed changes are resolved through consensus reached by Standing Committee discussion. (According to ANSI Essential Requirements, “Consensus means substantial agreement has been reached by directly and materially affected interests. This signifies the concurrence of more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that an effort be made toward their resolution.”)

Responses to submissions shall be recorded in a change log which will be posted to the STS Committee page at https://www.niso.org/standards-committees/sts and circulated to the sts-announce mailing list (https://groups.niso.org/lists/sts-announce/).

The Standing Committee shall provide reasons for its responses and an estimated schedule for any action. Proposed changes accepted for further study will be again brought to the Standing Committee for final resolution no later than the next annual review period.

All submitted changes and Standing Committee responses will be recorded and made available linked from https://www.niso.org/standards-committees/sts. In addition, NISO staff will send notifications to the sts-announce mailing list (https://groups.niso.org/lists/sts-announce/) when any maintenance activity occurs to the standard.

Interested parties can subscribe to the sts-announce mailing list by sending email to sts-announce-subscribe@list.niso.org.

When a sufficient number of accepted changes have been accumulated, but no later than four years after the previous approval date, the STS Standing Committee will prepare a revision of the standard and the revision will be processed according to the NISO Operating Procedures provisions for balloting and approving a revised standard (Section 7.5).

**Section 4. Publication of a New Edition or Reaffirmation**

A new edition of a standard under continuous maintenance shall occur within five years of the prior publication date. An existing standard that has not been revised for four (4) years of the original publication date shall be reviewed at the beginning of the fourth year. If it is determined that the standard is needed but that no modification is required, action to reaffirm the standard shall be initiated.

Any comments about these Continuous Maintenance procedures in general may be sent via email to nisohq@niso.org.
NSF International hereby informs ANSI that the approved American National Standard(s) listed below shall be maintained using the Continuous Maintenance option. Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted to PSA/ANSI.

Response
The following Standards shall be maintained using the Continuous Maintenance Option. Please send comments to the attention of the appropriate Joint Committee Secretariat at:

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

15. A documented program for periodic publication of revisions has been established. See NSF International Standards Development and Maintenance Policies, Section 5.2 (AESOP #2419[1]). A copy is attached.

16. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:
   Excerpt from the foreword of NSF/ANSI 140 – Sustainable carpet assessment:
   Comments on this Standard should be sent to NSF International, Standards Department, PO Box 130140, Ann Arbor, Michigan 48113-0140, USA or to standards@nsf.org.

17. Procedures for timely, documented consensus action on each request for change have been established. See NSF International Standards Development and Maintenance Policies, Section 8 (AESOP #2419[1]). A copy is attached.

18. The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):
   Jessica Evans, Director
   Standards Department, NSF International

Professional Ropes Course Association (PRCA)
Standards registered under Continuous Maintenance option.
(Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted to PSA/ANSI.)

ANSI/PRCA 1.0 - .03 – 2014 Ropes Challenge Course Installation, Operation & Training Standards

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

A documented program for periodic publication of revisions has been established. A copy is attached. The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

Statement on Cover: This American National Standard is subject to revision by the PRCA Standards Committee at any time The standard must at a minimum be reviewed every five years, revised, reaffirmed or withdrawn. The standard is under continuous review and a form for your comments is included at the end of each section. Comments received will be reviewed and receive careful consideration by the Standards Committee at least annually. The Committee will respond in writing to all comments received after consideration.

Statement in forward of each section: This standard is under review on a continual maintenance basis and is subject to revision at any time by the Standard Management Committee (SMC). The SMC has adopted a program for regular review, publication of addenda, revisions and interpretations, procedures for timely consensus action on requests to change any portion of the standard. At a minimum this standard shall be reviewed and revised every five years, or must be reaffirmed or withdrawn. Suggestions for improvement of this standard or the development of additional standards are welcome. Your comments for revisions of this standard, or any part thereof, must be addressed to PRCA headquarters utilizing the form located on the last page of this section of the code or available at www.prcainfo.org. Your comments will receive careful consideration of the committees at regularly scheduled meetings, and a written response will be forwarded in accordance with the committee guidelines. If you feel that your comment(s) did not receive a fair hearing you must immediately (within 30 days) make your views known in writing to the PRCA Board of Directors.

Procedures for timely, documented consensus action on each request for change have been established. A copy is attached.

The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

Name: Jack Kerns, Acting-Chair, Standards Management Committee
Address: 6260 E Riverside Blvd. #104
City: Rockford
State: IL
Zip: 61111
Phone: (815) 986-7776
Fax: (815) 637-2964
Primary E-mail: info@prcainfo.org
Direct E-mail: admin@teamadventuresllc.com

No portion of the standard(s) shall be excluded from the revision process.
In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANSI under periodic maintenance.
Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

The following documented program for periodic publication of revisions has been established.

ANSI/PRCA 1.0-.3-2014 under Continuous Maintenance

Program for Periodic Publication of Revisions

Program for periodic publication of revisions or reaffirmation:

- A new edition of the standard under continuous maintenance shall be published within five years of the previous publication date.

- If the standard has not been revised for a period of four (4) years since the previous publication date it shall be submitted to the Standards Committee for review at the beginning of the fourth year.

- If it is determined that the standard is still valid for the industry but that no revision is required, the Standards Management Committee and Standards Committee (consensus body) will take action to reaffirm the standard in accordance with the PRCA’s Accredited Procedures.

- When a sufficient number of approved substantive changes have been accrued or if the Standards Management Committee determines that a revision to a safety related standard(s) is/are necessary the Standards Committee will prepare a revision of the standard.

- The Standards Committee will process the revision in accordance with the PRCA’s Accredited Procedures for consensus balloting and approval of the revised standard.

- In no event is this process to exceed a four (4) year period without the standard being reviewed for revision or reaffirmation or withdrawal.

The following procedures for timely, documented consensus action on each request for change have been established

ANSI/PRCA 1.0-.3-2014 under Continuous Maintenance

Procedures for Timely, Documented Consensus Action on Each Request for Change
Procedures for timely, documented consensus action on each request for change:

A. Under the continuous maintenance procedures anyone may propose changes to the standard at any time. All sections of the standards are open for comment.

B. Comments and/or a recommended proposal for changes must be submitted in writing utilizing the required formatting and the form provided on the last page of each section of the standards. The form is also available as a download from the PRCA website http://www.prcainfo.org under the ANSI Standards – Forms tab.

C. The completed written form may be submitted to the PRCA electronically as an email attachment to info@prcainfo.org or by mail to PRCA SMC/SC, 6260 E. Riverside Blvd #104, Rockford, Illinois 61111.

D. All submissions received by the PRCA will be acknowledged with an explanation of a proposed timeline and forwarded to the Standards Management Committee for consideration.

E. When a substantive number of comments/proposals for change have been received or when it is determined that a safety standard needs review the Standards Management Committee will schedule Standards Committee meetings, in person or via teleconference, to review the comments/proposals, but not less than annually if there are unaddressed comments/proposals.

F. The Standards Committee will inform the submitters of comments/proposals of the disposition of the comment/proposal within 30 working days of the balloting of findings on the proposal/comment

G. The Standards Committee may respond in the following manner:
   i) Change accepted without modification
   ii) Change accepted with modification
   iii) Change Rejected
   iv) Change accepted for further study
   All responses are voted upon by the Standards Committee and approved by a two thirds majority of the Standards Committee members voting. Abstentions will be recorded
   Changes accepted for further study will be brought to the Standards Committee for resolution at the next scheduled meeting, but not to exceed a period of one year.

H. The Standards Committee/Standards Management Committee will provide their reasons and response to each submitter and provide an estimated schedule for action to be taken.
Residential Energy Services Network (RESNET)

 Approved American National Standard(s) maintained using the Continuous Maintenance option.

(Additional standards may be identified and added to this list in the future, however, if the procedures used to maintain them vary from those included in this submittal, an additional Continuous Maintenance Registration from will be submitted to PSA/ANSI.)

RESNET Standard 1201-2016, Standard Method of Test for the Evaluation of Building Energy Analysis Model Calibration Methods

In accordance with clause 4.7.2  Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

- A documented program for periodic publication of revisions has been established. Updates to standards and amendments to standards are published to the RESNET website upon completion of the approved standards development process. See Attachment 1 for standards maintenance publication criteria.
- The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:
  - “This Standard is under continuous maintenance. In accordance with Section 10.9 of the RESNET Standard Development Policy and Procedures Manual, continuous maintenance proposals should be submitted to the Manager of Standards.”
- Procedures for timely, documented consensus action on each request for change have been established. Continuous maintenance proposals are evaluated upon receipt by RESNET. See Attachment 1 for procedures.
- The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

  Name: Rick Dixon  
  Address: 2170 S. El Camino Real  
  Oceanside, CA 92054  
  Phone: 760-408-5860  
  Fax: 760-806-9449  
  E-mail: rick.dixon@resnet.us

- No portion of the standard(s) shall be excluded from the revision process.
- In the event that a BSR-8/108 has not been submitted for an American National Standard under continuous maintenance within five years of its approval, the standards developer may request an extension, but shall then maintain the ANS under periodic maintenance.
- Any changes to the continuous maintenance process, text contained in affected standards or practices associated with the information contained herein shall be submitted in writing to ANSI (psa@ansi.org) in a timely fashion.

Returned by:
Name: Rick Dixon  
Title: Standards Manager
10.9 Maintenance of RESNET Standards

All RESNET standards shall be maintained on a continuous basis. At a minimum, each standard shall be revised, reaffirmed or withdrawn by the 5th year after its initial approval as an American National Standard.

For the purposes of continuous maintenance, all proposed changes to a published standard shall be reviewed when received. The SMB shall determine whether the change is critical or not.

When a critical change is received, the SMB shall decide whether the proposed change will be handled as an addendum to the published standard or whether it will be handled by updating the published standard. The proposed change shall be forwarded to the SDC as a Proposed NWI and the standards development process would be followed.

When a non-critical proposed change is received, the proposal shall be kept on file to be provided to the SDC when the standard is next updated.

During the 5th year after a RESNET standard is first approved as an American National Standard, the standard shall be reviewed and either revised, reaffirmed or withdrawn. The SMB shall provide the SDC with a Proposed NWI along with any non-critical proposed changes and any policy direction that is deemed necessary.

The SDC shall review the standard and address any of the non-critical proposed changes. The standards development process shall be followed as outlined in this manual beginning with the Proposed NWI stage. If there are no proposed changes and the SDC does not propose any changes, the published standard would be circulated for public comment as published.

The SDC shall;

- reaffirm the standard
- revise the standard
- withdraw the standard
Telecommunications Industry Association, TIA

Standards Registered Under Continuous Maintenance:

There are no Continuous Maintenance standards at this time

For additional information, please visit the TIA homepage at www.tiaonline.org

TIA’s address: 1320 North Courthouse Road, Suite 200, Arlington, VA 22201. All comments are to be sent to TIA Standards Secretariat at standards@tiaonline.org.
Tile Council of North America (TCNA)

Standards Registered Under Continuous Maintenance:

- A108.01 General Requirements: Subsurfaces and Preparations by Other Trades
- A108.02 General Requirements: Materials, Environmental, and Workmanship
- A108.1A Installation of Ceramic Tile in the Wet-Set Method, with Portland Cement Mortar
- A137.1 Standard Specifications for Ceramic Tile
- A137.2 National Specifications for Glass Tile

In accordance with clause 4.7.2 Continuous maintenance of American National Standards, of the ANSI Essential Requirements, we agree to the following requirements:

- A documented program for periodic publication of revisions has been established. A copy is attached. (See ASC A108 Committee Procedures)
- The published standard(s) shall include a clear statement of the intent to consider requests for change and information on the process associated with the submittal of such requests. The language of this statement is as follows:

  “This standard is under continuous maintenance and always open for comment and proposed revisions. Please submit comments and proposed revisions to the Committee Secretary, Katelyn Simpson, ksimpson@tcnatile.com”

- Procedures for timely, documented consensus action on each request for change have been established. (See ASC A108 Committee Procedures)
- The following person(s) may be contacted by those interested in submitting changes (please include name, address, E-mail, phone and fax):

  Name: Katelyn Simpson
  Address: 100 Clemson Research Blvd
  City: Anderson State: SC Zip: 29625
  Phone: 864-646-8453
  Fax: 864-646-2821
  E-mail: ksimpson@tileusa.com
Underwriters Laboratories, Inc. (UL)

Continuous Maintenance language applicable to all eligible Standards:

The most recent approval of UL as an American National Standard (ANS) occurred on ___ and covers the ___ Edition, including revisions through ___. Approval of UL ___ as an American National Standard is maintained using the continuous maintenance process. Comments or proposals for revision on any part of the Standard may be submitted to UL at any time. Written comments are to be sent to the UL staff person listed below.

Procedure to request voting membership on the standing canvass group also known as the Standards Technical Panel:
Contact the UL staff person listed below.

Schedule:

For standards maintained under the continuous maintenance option, UL shall address any comments or proposals for revision submitted for consideration on any part of a standard. UL will submit the proposal or comment to its consensus body for consideration within a reasonable time frame, not to exceed two years. The submitter will be notified of the expected time frame for consideration of the proposal. If no changes are made within four years of the ANSI approval date, UL shall apply for reaffirmation of the standard(s).

• UL 1559, Standard for Safety for Insect-Control Equipment - Electrocution Type
• UL 1561, Standard for Dry-Type General Purpose and Power Transformers
• UL 1563, Electric Spas, Equipment Assemblies, and Associated Equipment
• UL 1564, the Standard for Safety for Industrial Battery Chargers
• UL 1565, Wire Positioning Devices
• UL 1567, Standard for Safety for Receptacles and Switches Intended for Use with Aluminum Wire
• UL 1569, Metal-Clad Cables
• UL 1574, Track Lighting Systems
• UL 1576, Standard for Safety for Flashlights and Lanterns
• UL 1577, Optical Isolators
• UL 1581, Reference Standard for Electrical Wires, Cables, and Flexible Cords
• UL 1585, Standard for Class 2 and Class 3 Transformers
• UL 1598, Standard for Safety for Luminaires
• UL 1598A, Standard for Safety for Supplemental Requirements for Luminaires
• UL 1598B, Standard for Safety for Supplemental Requirements for Luminaire Reflector Kits for Installation on Previously Installed Fluorescent Luminaires
• UL 1598C, Standard for Safety for Light-Emitting Diode (LED) Retrofit Luminaire Conversion Kits

• UL 1602, Gasoline-Engine-Powered, Rigid-Cutting-Member Edgers and Edger-Trimmers
• UL 1610, Central-Station Burglar Alarm Units
• UL 1626, Standard for Safety for Residential Sprinklers for Fire-Protection Service
• UL 1635, Digital Alarm Communicator System Units UL 1637, Standard for Safety for Home Health Care Signaling Equipment
• UL 1638, Standard for Safety for Visible Signaling Devices for Fire Alarm and Signaling Systems, Including Accessories
• UL 1640, Standard for Safety for Portable Power-Distribution Equipment
• UL 1641, Installation and Classification of Residential Burglar Alarm Systems
• UL 1647, Motor-Operated Massage and Exercise Machines
• UL 1650, Portable Power Cable
• UL 1651, Optical Fiber Cables
• UL 1653, Electrical Nonmetallic Tubing
• UL 1655, Community-Antenna Television Cables
• UL 1659, Standard for Safety for Attachment Plug Blades for Use in Cord Sets and Power-Supply Cords
• UL 1660, Liquid-Tight Flexible Nonmetallic Conduit
• UL 1664, Immersion-Detection Circuit-Interrupters
• UL 1666, Test for Flame Propagation Height of Electrical and Optical-Fiber Cables Installed Vertically in Shafts
• UL 1676, Conductive-Path and Discharge-Path Resistors for Use in Radio-, Video-, or Television-Type Appliances
• UL 1678, Household Commercial, and Professional-Use Carts and Stands
• UL 1681, Standard for Safety for Wiring Device Configurations
• UL 1682, Plugs, Receptacles and Cable Connectors, of the Pin and Sleeve Type
• UL 1685, the Standard for Vertical-Tray Fire-Propagation and Smoke-Release Test for Electrical and Optical-Fiber Cables
• UL 1686, Pin and Sleeve Configurations
• UL 1690, Data-Processing Cable
• UL 1691, Single Pole Locking-Type Separable Connectors
• UL 1692, Polymeric Materials - Coil Forms
• UL 1694, Tests for Flammability of Small Polymeric Component Materials
• UL 1696, Standard for Safety for Mechanical Protection Tubing (MPT) and Fittings
• UL 1699 Standard for Safety for Arc-Fault Circuit-Interrupters

• UL 1703, Standard for Safety for Flat-Plate Photovoltaic Modules and Panels
• UL 1709, Standard for Safety for Rapid Rise Fire Tests of Protection Materials for Structural Steel
• UL 1715, Fire Test of Interior Finish Material
• UL 1727, Commercial Electric Personal Grooming Appliances
• UL 1730, Smoke Detector Monitors and Accessories for Individual Living Units of Multifamily Residences and Hotel/Motel Rooms
• UL 1738, Standard for Safety for Venting Systems for Gas-Burning Appliances, Categories II, III, IV
• UL 1739, Standard for Safety for Pilot Operated Pressure Control Valves
• UL 1740, Standard for Safety for Robots and Robotic Equipment
• UL 1746, Standard for Safety for External Corrosion Protection Systems for Steel Underground Storage Tanks
• UL 1767, Standard for Safety for Early-Suppression Fast-Response Sprinklers
• UL 1769, Standard for Cylinder Valves
• UL 1776, The Standard for High-Pressure Cleaning Machines
• UL 1777, Standard for Safety for Chimney Liners
• UL 1778, Standard for Safety for Uninterruptible Power System
• UL 1784, Standard for Air Leakage Tests of Door Assemblies
• UL 1786, Standard for Safety for Direct Plug-In Nightlights

• UL 1803, Standard for Safety for Factory Follow-Up on Third Party Certified Portable Fire Extinguishers
• UL 1820, Fire Test of Pneumatic Tubing for Flame and Smoke Characteristics
• UL 1821, The Standard for Safety for Thermoplastic Sprinkler Pipe and Fittings for Fire Protection Service
• UL 1838, Standard for Safety for Low Voltage Landscape Lighting
• UL 1839, Standard for Safety for Automotive Battery Booster Cables
• UL 1853, Nonreusable Plastic Containers for Flammable and Combustible Liquids
• UL 1863, Communications-Circuit Accessories
• UL 1876, Standard for Safety for Isolating Signal and Feedback Transformers for Use in Electronic Equipment.
• UL 1887, Fire Test of Plastic Sprinkler Pipe for Visible Flame and Smoke Characteristics
• UL 1889, Standard for Safety for Commercial Filters for Cooking Oil,
• UL 1897, Uplift Tests for Roof Covering Systems

• UL 1917, Standard for Safety for Solid State Fan Speed Controls
• UL 1951, Electrical Plumbing Accessories
• UL 1963, Refrigerant Recovery/Recycling Equipment
• UL 1971, Signaling Devices for the Hearing Impaired
• UL 1973, Standard for Safety for Batteries for Use in Light Electric Rail (LER) Applications and Stationary Applications
• UL 1978, The Standard for Safety for Grease Ducts
• UL 1981-2014, Standard for Safety for Central-Station Automation Systems
• UL 1989, Standard for Safety for Standby Batteries
• UL 1990, Nonmetallic Underground Conduit with Conductors
• UL 1993, Standard for Self-Ballasted Lamps and Lamp Adapters
• UL 1994, Luminous Egress Path Marking Systems
• UL 1995, Heating and Cooling Equipment
• UL 1996, Electric Duct Heaters
• UL 1998, Standard for Safety for Software in Programmable Components

• UL 2006, Standard for Safety for Halon 1211 Recovery/Recharge Equipment
• UL 2007A, Shatter Containment Of Lamps For Use In Regulated Food Establishments
• UL 2017, General-Purpose Signaling Devices and Systems

- UL 2580, Standard for Safety for Batteries for Use in Electric Vehicles
- UL 2586, Standard for Safety for Hose Nozzle Valves
- UL 2592, Standard for Safety for Low Voltage LED Wire
• UL 2594, Standard for Safety for Electric Vehicle Supply Equipment
• UL 2595, General Requirements for Battery-Powered Appliances
• UL 2610, Standard for Safety for Commercial Premises Security Alarm Units and Systems
• UL 2703, Standard for Mounting Systems, Mounting Devices, Clamping/Retention Devices, and Ground Lugs for Use with Flat-Plate Photovoltaic Modules and Panels
• UL 2737, Standard for Safety for Crane Insulators
• UL 2738, Standard for Safety for Induction Power Transmitters and Receivers for use with Low Energy Products
• UL 2743, Standard for Portable Power Packs
• UL 2748-1, Standard for Safety for Arcing Fault Quenching Equipment
• UL 2748A, Standard for Safety for Arcing Fault Interrupting Devices
• UL 2775, Standard for Fixed Condensed Aerosol Extinguishing System Units
• UL 2788, the Standard for Safety for Industrial and Commercial Vibrators
• UL 2790, Standard for Safety for Commercial Incinerators
• AAMI/UL 2800-1, Standard for Safety for Medical Device Interoperability
• UL 2846, Standard for Safety for Fire Test of Plastic Water Distribution Plumbing Pipe for Visible Flame and Smoke Characteristics
• UL 2849, Standard for Safety for Electrical Systems for eBikes
• UL 2904, Standard Method for Testing and Assessing Particle and Chemical Emissions from 3D Printers

• UL 3030, Unmanned Aircraft Systems
• UL 3703, Standard for Solar Trackers
• UL 3730, Standard for Photovoltaic Junction Boxes

• UL 4200A, Products Incorporating Button or Coin Cell Batteries of Lithium Technologies
• UL 4248-1, Fuseholders - Part 1: General Requirements
• UL 4248-4, Fuseholders - Part 4: Class CC
• UL 4248-5, Fuseholders - Part 5: Class G
• UL 4248-6, Fuseholders - Part 6: Class H
• UL 4248-8, Fuseholders - Part 8: Class J
• UL 4248-9, Fuseholders - Part 9: Class K
• UL 4248-11, Fuseholders - Part 11: Type C (Edison Base) and Type S Plug Fuse
• UL 4248-12, Fuseholders - Part 12: Class R
• UL 4248-15, Fuseholders - Part 15: Class T
• UL 4600, Standard for Safety for the Evaluation of Autonomous Products
• UL 4703, Photovoltaic Wire
• UL 4730, Standard for Nameplate, Datasheet, and Sampling Requirements of Photovoltaic Modules

• UL 5085-1, Standard for Low Voltage Transformers - Part 1: General Requirements
UL 5085-2, Standard for Low Voltage Transformers - Part 2: General Purpose Transformers

UL 5085-3, Standard for Low Voltage Transformers - Part 3: Class 2 and Class 3 Transformers

UL 6141, Standard for Safety for Wind Turbines Permitting Entry of Personnel
UL 6142, Small Wind Turbine Systems
UL 6703, Standard for Connectors for Use in Photovoltaic Systems

UL 8139, Electrical Systems of Electronic Cigarettes and Vaping Devices
UL 8750, Standard for Light Emitting Diode (LED) Equipment for Use in Lighting Products
UL 8752, First Edition of the Standard for Organic Light Emitting Diode (OLED) Panels
UL 8753, The Standard for Field-Replaceable Light Emitting Diode (LED) Light Engines
UL 8754, The Standard for Holders, Bases, and Connectors for Solid-State (LED) Light Engines and Arrays

UL 9540, Standard for Safety for Energy Storage Systems and Equipment

UL 60034-1, Rotating Electrical Machines - Part 1: Rating and Performance
UL 60034-2-1, Standard for Rotating electrical machines - Part 2-1: Standard methods for determining losses and efficiency from tests (excluding machines for traction vehicles)
UL 60034-5, Rotating Electrical Machines - Part 5: Degrees of Protection Provided by the Integral Design of Rotating Electrical Machines (IP Code) – Classification
UL 60065, Standard for Safety for Audio, Video and Similar Electronic Apparatus - Safety Requirements
UL 60079-0, Standard for Safety for Electrical Apparatus for Explosive Gas Atmospheres - Part 0: General Requirements
UL 60079-2, Explosive Atmospheres – Part 2: Equipment Protection by Pressurized Enclosure “p”
UL 60079-6, Standard for Safety for Explosive Atmospheres - Part 6: Equipment Protection by Oil-Immersion “o”
UL 60079-7, Standard for Safety for Explosive Atmospheres - Part 7: Equipment Protection by Increased safety “e”
UL 60079-11, Standard for Safety for Explosive Atmospheres - Part 11: Equipment Protection by Intrinsic Safety “i”
UL 60079-15, Standard for Safety for Electrical Apparatus for Explosive Gas Atmospheres - Part 15: Construction, Test and Marking of Type of Protection “n” Electrical Apparatus
• UL 60079-26, Standard for Safety for Explosive Atmospheres - Part 26: Equipment with Equipment Protection Level (EPL) Ga
• UL 60079-29-1, Standard for Safety for Explosive Atmospheres - Part 29-1: Gas Detectors - Performance Requirements of Detectors for Flammable Gases
• UL 60079-29-4, Standard for Safety for Explosive Atmospheres - Part 29-4: Gas Detectors - Performance Requirements of Open Path Detectors for Flammable Gases
• UL 60079-31, Standard for Safety for Explosive Atmospheres – Part 31: Equipment Dust Ignition Protection by Enclosure “t”
• UL 60320-1, Standard for Safety for Appliance Couplers for Household and Similar General Purposes - Part 1: General Requirements
• UL 60320-3, Standard for Safety for Appliance Couplers for Household and Similar General Purposes - Part 3: Standard Sheets and Guages
• UL 60335-1, Standard for Safety for Safety of Household and Similar Electrical Appliances, Part 1: General Requirements
• UL 60335-2-3; Standard for Safety for Household and Similar Electrical Appliances, Part 2: Particular Requirements for Electric Irons.
• UL 60335-2-8, Standard for Safety for Household and Similar Electrical Appliances, Part 2: Particular Requirements for Shavers, Hair Clippers, and Similar Appliances
• UL 60335-2-24, Standard for Safety for Household and Similar Appliances, Particular Requirements for Refrigerating Appliances, Ice Cream Appliances and Ice Makers
• UL 60335-2-34, Household and Similar Electrical Appliances, Part 2: Particular Requirements for Motor-Compressors
• UL 60335-2-40, Household and Similar Electrical Appliances, Part 2: Particular Requirements for Electrical Heat Pumps, Air-Conditioners and Dehumidifiers
• UL 60335-2-67, Standard for Safety for Household and Similar Electrical Appliances - Safety - Part 2-67: Particular Requirements for Floor Treatment Machines, for Commercial Use
• UL 60335-2-72, Standard for Safety for Household and Similar Electrical Appliances - Safety - Part 2-72: Particular Requirements for Floor Treatment Machines With or Without Traction Drive, for Commercial Use
• UL 60691, Thermal-Links - Requirements and Application Guide
• UL 60730-1, Automatic Electrical Controls - Part 1, General Requirements
• UL 60730-2-3, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Thermal Protectors for Ballasts for Tubular Fluorescent Lamps
• UL 60730-2-5, Standard for Safety for Automatic Electrical Controls for Household and Similar Use, Part 2: Particular Requirements for Automatic Electrical Burner Control Systems
• UL 60730-2-6, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Automatic Electrical Pressure Sensing Controls Including Mechanical Requirements
• UL 60730-2-7, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Timers and Time Switches
• UL 60730-2-8, Automatic Electrical Controls for Household and Similar Use; Part 2: Particular Requirements for Electrically Operated Water Valves, Including Mechanical Requirements
• UL 60730-2-9, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Temperature Sensing Controls
• UL 60730-2-10, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Motor Starting Relays
• UL 60730-2-11, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Energy Regulators
• UL 60730-2-12, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Electrically Operated Door Locks
• UL 60730-2-13, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Humidity Sensing Controls
• UL 60730-2-14, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Electric Actuators
• UL 60730-2-15, Automatic Electrical Controls for Household and Similar Use - Part 2, Particular Requirements for Automatic Electrical Air Flow, Water Flow and Water Level Sensing Controls
• UL 60745-2-4-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-4: Particular Requirements for Sanders and Polishers Other Than Disk Type
• UL 60745-2-6-2006, Safety for Hand-Held Motor-Operated Electric Tools - Safety - Part 2-6: Particular Requirements for Hammers
• UL 60745-2-8-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-8: Particular Requirements for Shears and Nibblers
• UL 60745-2-12-2005, Standard for Safety for Hand-held Motor-operated Electric Tools - Safety - Part 2-12: Particular Requirements for Concrete Vibrators
• UL 60745-2-14-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-14: Particular Requirements for Planers
• UL 60745-2-17-2006, Hand-Held Motor-Operated Electric Tools - Safety - Part 2-17: Particular Requirements for Routers and Trimmers
• UL 60745-2-20, Standard for Hand-Held Motor-Operated Electric Tools - Safety - Part 2-20: Particular Requirements for Band Saws
• UL 60745-2-21, Standard for Hand-Held Motor-Operated Electric Tools - Safety - Part 2-21: Particular Requirements for Drain Cleaners
• UL 60939-3, Passive Filter Units for Electromagnetic Interference Suppression - Part 3: Passive Filter Units for Which Safety Tests are Appropriate
• UL 60947-1, Standard for Safety for Low-Voltage Switchgear and Controlgear - Part 1: General Rules
• UL 60947-4-1, Standard for Safety for Low-Voltage Switchgear and Controlgear; Part 4-1: Contactors and motor-starters; Electromechanical contactors and motor-starters
• UL 60947-4-2, Low-Voltage Switchgear and Controlgear - Part 4-2: Contactors and Motor-Starters - AC Semiconductor Motor Controllers and Starters
• UL 60947-5-1, Low-Voltage Switchgear and Controlgear - Part 5-1: Control Circuit Devices and Switching Elements - Electromechanical Control Circuit Devices
• UL 60947-5-2, Low-Voltage Switchgear and Controlgear - Part 5-2: Control Circuit Devices and Switching Elements - Proximity Switches
• UL 60947-7-3, Standard for Fuse Terminal Blocks
• UL 60950-1, Information Technology Equipment - Safety - Part 1: General Requirements
• UL 60950-21, Information Technology Equipment -- Safety -- Part 21: Remote Power Feeding
• UL 60950-22, Information Technology Equipment - Safety - Part 22: Equipment to be Installed Outdoors
• UL 60950-23-2007, Information Technology Equipment - Safety - Part 23: Large Data Storage Equipment
• UL 61010-1, Electrical Equipment for Measurement, Control, and Laboratory Use; Part 1: General Requirements
- UL 61010-031, Standard for Safety for Safety Requirements for Measurement, Control, and Laboratory Use - Part 031: Safety Requirements for Hand-Held Probe Assemblies for Electrical Measurement and Test
- UL 61010-2-020, Standard for Safety for Safety Requirements for Measurement, Control, and Laboratory Use - Part 2-020: Particular Requirements for Laboratory Centrifuges
- UL 61010-2-033, Electrical Equipment for Measurement, Control, and Laboratory Use, Part 2-033: Particular Requirements for Hand-Held Multimeters and Other Meters, for Domestic and Professional Use, Capable of Measuring Mains Voltage
- UL 61010-2-091, Electrical Equipment for Measurement, Control, and Laboratory Use, Part 2-091: Particular Requirements for Cabinet X-Ray Systems
- UL 61010-2-201, Safety Requirements for Electrical Equipment for Measurement, Control, and Laboratory Use - Part 2-201: Particular Requirements for Control Equipment
- UL 61058-1, Switches for Appliances - Part 1: General Requirements
- UL 61058-1-1, Standard for Safety for Switches for Appliances - Part 1-1: Requirements for Mechanical Switches
- UL 61215-1, Standard for Terrestrial photovoltaic (PV) modules - Design qualification and type approval - Part 1: Test requirements
- UL 61215-1-1, Standard for Terrestrial photovoltaic (PV) modules - Design qualification and type approval - Part 1-1: Special requirements for testing of crystalline silicon photovoltaic (PV) modules
• UL 61215-1-2, Standard for Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-2: Special requirements for testing of thin-film Cadmium Telluride (CdTe) based photovoltaic (PV) modules
• UL 61215-1-3, Standard for Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-3: Special requirements for testing of thin-film amorphous silicon based photovoltaic (PV) modules
• UL 61215-1-4, Standard for Terrestrial photovoltaic (PV) modules – Design qualification and type approval – Part 1-4: Special requirements for testing of thin-film Cu(In,Ga)(S,Se)2 based photovoltaic (PV) modules
• UL 61215-2, Standard for Terrestrial photovoltaic (PV) modules - Design qualification and type approval - Part 2: Test procedures
• UL 61496-2, Standard for Safety for Electro-Sensitive Protective Equipment, Part 2: Particular Requirements for Equipment Using Active Opto-Electronic Devices
• UL 61646, Standard for Thin-Film Terrestrial Photovoltaic (PV) Modules - Design Qualification and Type Approval
• UL 61724-1, Standard for Photovoltaic System Performance - Part 1: Monitoring
• UL 61724-2, Standard for Specification for Photovoltaic system performance - Part 2: Capacity evaluation method
• UL 61724-3, Standard for Photovoltaic system performance - Part 3: Energy evaluation method
• UL 61730-1, Photovoltaic (PV) Module Safety Qualification - Part 1: Requirements for Construction
• UL 61730-2, Photovoltaic (PV) Module Safety Qualification - Part 2: Requirements for Testing
• UL 61800-5-1, Adjustable Speed Electrical Power Drive Systems - Part 5-1: Safety Requirements - Electrical, Thermal and Energy
• UL 61800-5-2, Adjustable Speed Electrical Power Drive Systems - Part 5-2: Safety Requirements – Functional
• UL 61965 Standard for Mechanical Safety for Cathode Ray Tubes
• UL 62093, Standard for Balance-of-System Components for Photovoltaic Systems - Design Qualification Natural Environments

• UL 62108, Standard for Concentrator Photovoltaic (CPV) Modules and Assemblies - Design Qualification and Type Approval
• UL 62109-1, Standard for Safety of power converters for use in photovoltaic power systems - Part 1: General requirements
• UL 62133, Standard for Safety for Secondary Cells and Batteries Containing Alkaline or Other Non-Acid Electrolytes - Safety Requirements for Portable Sealed Secondary Cells, and for Batteries Made From Them, for Use in Portable Applications
• UL 62275, Cable Management Systems - Cable Ties for Electrical Installations
• UL 62368-1, Audio/video, information and communication technology equipment - Part 1: Safety requirements
• UL 62841-1, Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 1: General Requirements
• UL 62841-2-4: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 2-4: Particular Requirements for Sanders and Polishers Other Than Disc Type
• UL 62841-2-8, Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 2-8: Particular Requirements For Hand-Held Shears and Nibblers
• UL 62841-2-11, Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 2-11 Particular Requirements for Hand-Held Reciprocating Saws
• UL 62841-2-14: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 2-14: Particular Requirements for Planers
• UL 62841-3-1: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 3-1: Particular Requirements for Screwdrivers and Transportable Table Saws
• UL 62841-3-4 Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety - Part 3-4: Particular Requirements for Transportable Bench Grinders
• UL 62841-3-6: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 3-6: Particular Requirements for Transportable Diamond Drills With Liquid System
• UL 62841-3-9, Standard for Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery – Safety – Part 3-9: Particular Requirements for Transportable Mitre Saws
• UL 62841-3-10: Electric Motor-Operated Hand-Held Tools, Transportable Tools And Lawn And Garden Machinery - Safety – Part 3-10: Particular Requirements for Transportable Cut-Off Machines

• UL 120002, Certificate Standard for AEx Equipment for Hazardous (Classified) Locations
• UL 120101, Standard for Safety for Definitions and Information Pertaining to Electrical Equipment in Hazardous Locations
• UL 120404, Standard for Safety for Pressurized Enclosures
• UL 122001, General Requirements for Electrical Ignition Systems for Internal Combustion Engines in Class 1, Division 2 or Zone 2, Hazardous (Classified) Locations
• UL 121201, Standard for Safety for Nonincendive Electrical Equipment for Use in Class I and II, Division 2 and Class III, Divisions 1 and 2 Hazardous (Classified) Locations
• UL 122701-2011 (R2016), Standard for Safety for Requirements for Process Sealing Between Electrical Systems and Flammable or Combustible Process Fluids
• UL 920001, Standard for Performance Requirements for Toxic Gas Detectors
• UL 920401, Part 1, Standard for Safety for Performance Requirements for Instruments Used to Detect Oxygen-Deficient/Oxygen-Enriched Atmospheres
