Proposed American National Standards Projects

User Guide for Proposed American National Standards (ANS) related Data
Listed below are proposed projects intended to result in American National Standards (ANS) as of 3/29/2021. To review additional information about these proposed ANS you may access archived issues of ANSI’s Standards Action www.ansi.org/standardsaction using the PINS Date and/or Public Review Start Date.

If a PINS Date or a Public Review date is not displayed, then an announcement has not been published. Questions concerning a particular ANS should be directed to the sponsoring ANSI-Accredited Standards Developer (ASD).

If your ANSI-accredited organization would like to report discrepancies or changes, please contact us at psa@ansi.org. We will provide you with a customized Excel report and instructions for how to transmit your comments or corrections. Please do not use this pdf report for reconciliation.

Information about approved ANS is available in a separate document in the Approved and Proposed ANS Lists folder. Some ANS are available for purchase via ANSI’s webstore http://webstore.ansi.org/. The procedures that govern the ANS process are called the “ANSI Essential Requirements: Due process requirements for American National Standards” www.ansi.org/essentialrequirements. A list of all ASDs is available at www.ansi.org/asd. Questions concerning the ANS process may be directed to psa@ansi.org. Thank you for your interest.

Encounter and Event Notifications via Direct Secure Messaging
(new standard)
PINS Date: 7/31/2020
Public Review Start:  End:

In today's healthcare environment, care teams are frequently distributed across organizational boundaries - a primary care physician or consulting specialist may not be on the staff of a hospital where care is initially delivered. Likewise, payers and care managers may have relationships with the patient but may not be formally aligned with the inpatient facility where an encounter takes place. In order to facilitate more effective coordination of care team activities, the CMS Interoperability and Patient Access rule recently established a Condition of Participation for the Medicare program for Hospitals, Emergency departments, Critical Access Hospitals, and Psychiatric Hospitals to send notifications to other care team members for Admissions, Discharges, and Transfers (ADT). Today, many hospitals do this utilizing third-party solutions, most of which offer Direct Secure Messaging as an approach to delivering notifications into the workflow of providers. While the Direct Standard™ is one of the most common mechanisms for this delivery, there is no standard for the contents of messages or for workflow expectations in sending and receiving systems. This project will establish content and workflow standards for Direct Secure Messaging between inpatient facilities and downstream providers, as well as subscription services that act as intermediaries in this flow. In order to ensure effective interoperability and to limit burdensome workflows.
