

Proposed revisions to section 1.2.11-1.2.11.4 of the *ANSI Procedures*

1.2.11. ANSI Patent Policy - Inclusion of Patents in American National Standards

There is no objection in principle to drafting a proposed American National standard in terms that include the use of a patented item, if it is considered that technical reasons justify this approach.

If the Institute receives a notice that a proposed American National Standard may require the use of a patented invention, the procedures in Sections 1.2.11.1 through 1.2.11.4 shall be followed.

1.2.11.1. Statement from Patent Holder

Prior to approval of such a proposed American National Standard, the Institute shall receive from the patent holder (in a form approved by the Institute) either: assurance in the form of a general disclaimer to the effect that the patentee does not hold and does not anticipate holding any invention whose use would be required for compliance with the proposed American National Standard or assurance that:

(1) A license will be made available without compensation to applicants desiring to utilize the license for the purpose of implementing the standard;

or

(2) A license will be made available to applicants under reasonable terms and conditions that are demonstrably free of any unfair discrimination.

~~The terms and conditions of any license shall be submitted to ANSI for review by its counsel, together with a statement of the number of independent licensees, if any, which have accepted or indicated their acceptance of terms and conditions of the license.~~

1.2.11.2. Record of Statement

A record of the patent holder's statement (~~and a statement of the basis for considering such terms and conditions free of any unfair discrimination~~) shall be placed and retained in the files of the Institute.

1.2.11.3. Notice

When the Institute receives from a patent holder the assurance set forth in (1.2.11.1 a) or b), the standard shall include a note as follows:

NOTE: The user's attention is called to the possibility that compliance with this standard may require use of an invention covered by patent rights.

By publication of this standard, no position is taken with respect to the validity of this claim or of any patent rights in connection therewith. The patent holder has, however, filed a statement of willingness to grant a license under these rights on reasonable and nondiscriminatory terms and conditions to applicants desiring to obtain such a license. Details may be obtained from the publisher.

1.2.11.4. Responsibility for Identifying Patents

The Institute shall not be responsible for identifying all patents for which a license may be required by an American National Standard or for conducting inquiries into the legal validity or scope of those patents that are brought to its attention.
