Healthcare Information Technology Standards Panel

HITSP Panel Meeting: 2009 Update

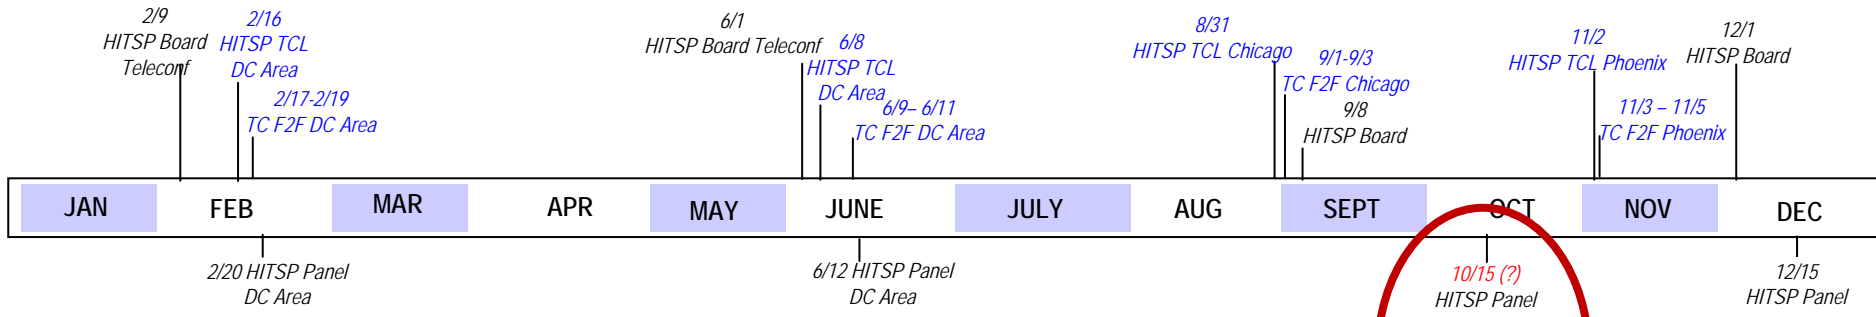

December 18, 2008

Editorial Errata

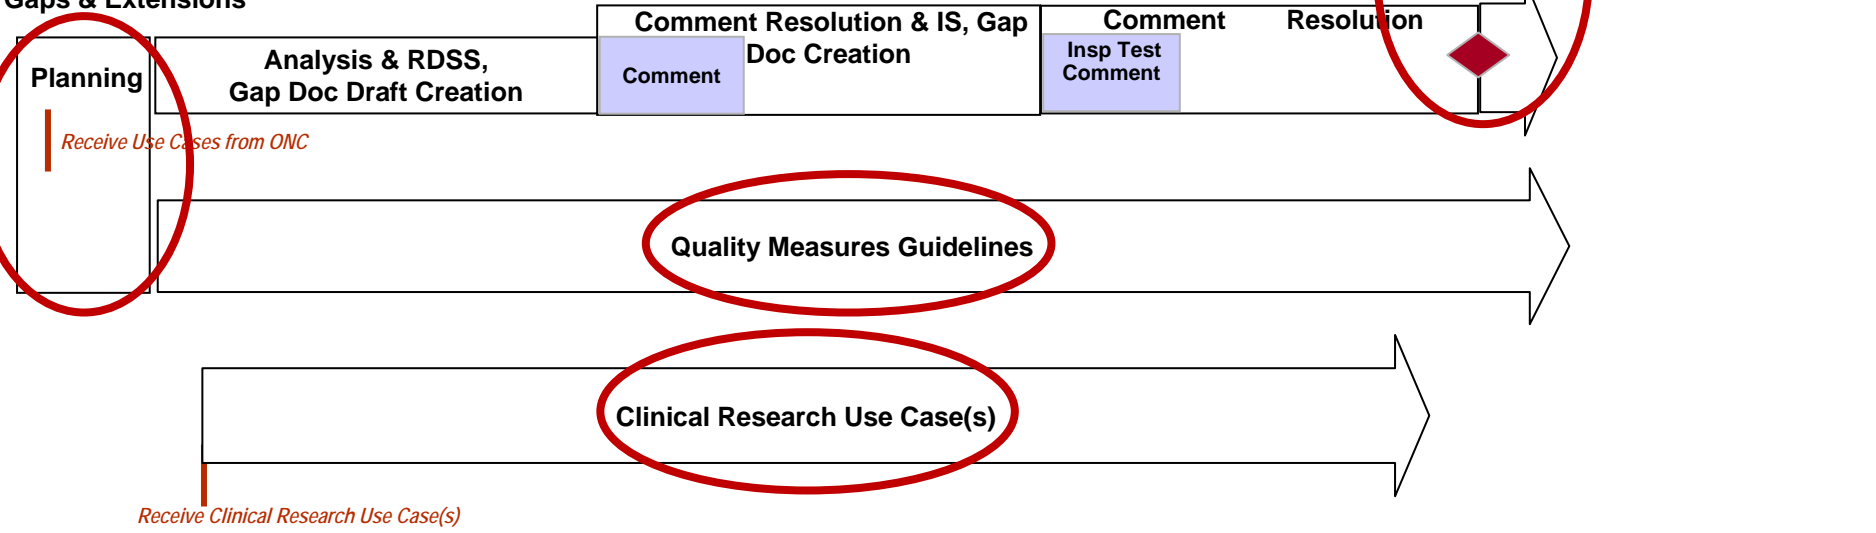

- ▶ Late in the document production cycle, we identified an inadvertent omission of selected standards in this set of Interoperability Specifications.
- ▶ When we centralized the sections and vocabularies of clinical document architecture (CDA) based components, e.g., C32, we did not list these standards because they were moved to C80. Thus there was a gap between vocabularies and terminologies in C80 and the IS.
- ▶ There are no new standards being added. A sophisticated user can go from the IS to the CDA construct to the section (C83) to the vocabularies (C80). However for easier traceability we will again list the vocabularies and terminologies explicitly in the IS.
- ▶ There are several other constructs that also have minor changes in listed standards based on inadvertent exclusions of standards that had been selected by the TC earlier in the cycle.

HITSP 2009 TC Timeline Overview

2009 Use Case, Gaps & Extensions

2006/2007/2008 Carryover Work

TBD Based on TC Evaluation

IS01, IS02, IS03, IS04, IS05, IS06, IS07 Gaps and Overlaps

Other

NHIN Coordination, Implementation Testing Support, Education and Outreach, etc
