

# Panel

## Data Protection

**Dr. Alois J. Sieber, HoU,**  
EC, JRC IPSC, Ispra, Italy

**ANSI Homeland Security Standards Panel:  
9<sup>th</sup> Annual Plenary Meeting: U.S. – European Collaboration on Security Standardisation Systems,  
November 9<sup>th</sup> – 10<sup>th</sup>, 2010, Arlington, USA**

- Data Protection – ISO 29100
- Data Protection – Relevance of Data Protection Standards
- Data Protection – Conclusion: Seals and Labels in Data Protection

## □ The data protection community in Europe

- European Commission (EC)
- National Data Protection authorities,
- relevant national standardisation bodies

is following closely the **elaboration of the ISO 29100 standard** on data protection

## □ **Expectation:** an ambitious standard that protects effectively the 'data subject' rights

Promoting concrete rights for the individuals, and a high level of privacy

Safe international exchanges of data

Compatible with the existing legislation in Europe (Directive 95/46/CE)

- Those standards are seen as **extremely important** in order
  - to have **secure international data flows**,
  - Accompany the current **globalisation**, where a strong outsourcing and off shoring trends in the IT and security industry is taking place (i.e. outsourcing of CRM customer relationship management, outsourcing of antivirus and spam management ...)
  - While protecting the individual rights such as data access, data correction and deletion ...
  
- In the context: common ground (vocabulary, concept, guidelines rules, evaluation methods ...) to discuss the privacy and data protection issues is of outmost importance

- The European Commission supports the **standardisation of 'privacy and security seals and labels'**
- established seals in the US and emerging seals in Europe
- standardisation in this area will be very **welcome**

Thank you for your attention !
