

# U.S.-Africa Rural Electrification and Smart Metering Standards Workshop

Tuesday, Jan 18 and  
Wednesday, Jan 19, 2022

## U.S.-AFRICA CLEAN ENERGY STANDARDS PROGRAM

As nations attempt to increase access to and reliability of nationwide electrification, an increased focus on building infrastructure and creating enabling policies and regulations for the interconnection of grids has emerged. Nations are adopting new technologies to ensure increased grid stability, security and cost-effectiveness, while also attempting to meet climate change goals.

This virtual two-day workshop will address these forces including presentations by experts on standards-related issues such as safe, stable and efficient interconnection solutions with best practices from the U.S. and across Africa. Discussions will also feature an overview of smart metering installation and operation best practices, policies for critical communication and cyber security, quality assurance frameworks and more.

**January 18 and 19, 2022**

**8:00 am – 1:00 pm EST**

**Registration is required.** To save your seat, please register [via the form at this link](#).

If you have any issues, please contact [us-africacesp@ansi.org](mailto:us-africacesp@ansi.org).

The U.S.-Africa Clean Energy Standards Program is sponsored by the U.S. Trade and Development Agency in partnership with Power Africa and coordinated by the American National Standards Institute.
