

Standards to Promote Grid Interoperability

U.S.-AFRICA CLEAN ENERGY STANDARDS PROGRAM

An increased global focus on building infrastructure and creating enabling policies and regulations for the interconnection of grids has emerged as nations attempt to implement climate change commitments, increase energy security, and reduce electricity costs. This workshop will feature presentations by experts from the U.S. and across the Eastern Africa Power Pool (EAPP) on critical aspects of energy system integration. It will foster discussions on opportunities in the Rwandan market as well as crosscutting issues affecting the East African region.

October 1, 2018

9:00 AM – 5:00 PM

Kigali Radisson

Kigali, Rwanda

To register, email us-africacesp@ansi.org. Kindly indicate name, title, organization, contact email and telephone number.

The U.S.-Africa Clean Energy Standards Program is sponsored by the U.S. Trade and Development Agency and coordinated by the American National Standards Institute in partnership with Power Africa. More information is available at www.standardsportal.org/us-africacesp.
