

To whom it may concern.

I am writing to recommend Brian Doherty for the IEC Young Professionals (YP) Programme. Brian worked with me as a Logistics Liaison at Lockheed Martin.

Brian displayed leadership, high technical expertise, and high desire to learn. Brian took over a problem program of tracking technical documentation across programs and implementing Agile methodology to get tasking across the finish line. He met with internal and external stakeholders, mapped out a plan of action and delivered on results. Brian was always looking to grow as an engineer, taking on new projects and expanding his technical depth and breath.

I recommend Brian Doherty for this great opportunity to improve his understanding of international standards and to continue to develop as a leader.

Sincerely,

*Sarah McCullough*
