6/24/2024

Dear Selection Committee Members,

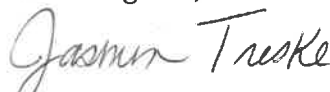

I am writing to nominate Ms. Chloe David for the IEC Young & Emerging Professionals Program. Chloe is a passionate and promising engineer who represented Rockwell Automation on the K-12 Committee of the Milwaukee Tech Hub Coalition. I believe she will represent the USNC well at the YEP Workshop in Edinburgh later this year.

In my time as Director of Early Talent of the Milwaukee Tech Hub Coalition, it was my job to lead the K-20 Committee to influence and provide resources to support K-20 strategies of local school districts to increase access to tech programs in the Milwaukee area. Chloe was one of our industry representatives who advised the Coalition's efforts to develop the tech talent pipeline in Southeast Wisconsin. She also supported the development of our signature "FUSE" program to develop students with pre-professional experience in data and artificial intelligence and mentorship of the students.

In the short time that I have known her, Chloe has demonstrated strong leadership potential and a commitment to providing knowledge and opportunities to young and underrepresented talent in tech fields. As Chloe had a more technical foundation than many of our industry representatives, she was able to contribute a unique perspective to the Coalition's K-20 initiatives.

Chloe has made an impact with the Milwaukee tech ecosystem, and I believe that she will carry that impact forward in the world of international standards.

Warm regards,

  
Jasmin Treske
